Long distance phone day or night.

NOTICE is hereby given that the rights of the government on the water-powers hereunder mentioned will be put up at auction to be held in the sales room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long lease, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ke rapids on the Quinze river, county of Pontiac, about 12 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot No. 24, 3rd range of the township of Grandmont, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manicouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the River aux Outardes, on the north shore of the Saint Lawrence, about 7 1-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Gabelle," on the Saint Maurice river, about 17 miles (in a straight line) from Three Rivers.

7. The Coteau Rapide on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermilion river, about 21 miles above La Tuque, county of Champlain, on the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 41-2 miles from the confluence of these rivers and about 90 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Sault," river Rimouski, township of Duquesne, county of Rimouski, 16 miles from Rimouski.

11. The "Rapid Malin," river Bonaventure, about 6 miles from the Barachois of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 2 1-2 miles from the village of Saint Felicien and 14 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 62 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Pelletier, county of Lake Saint John.

15. The three falls on river "Sault-au-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power of these water-powers, the extent of the surrounding land which the above mentioned concessions comprehends, apply to the Department of Lands and Forests, Quebec.

ADELARD TURGEON,
Minister.

Department of Lands and Forests,

needs no further messenger. He will straightway make the marquis his envoy. And think you the visitor need be let deliver that message? By the fiend, no! Seize his person, eh? We shall see, Jarrat! The earl knows his muttons. Meanwhile this marquis must be watched for. We must know where to put a finger on him. The lower ports are well under espionage. But some of us must watch here at Yorktown. 'Tis what I want you to do, Jarrat. Gad's life! 'Tis too delicate a matter to intrust to any bogler."

"Again you flatter me." Jarrat had been studying Foy through half shut eyes. Now he opened them.

"Enough, captain; I accept the commission. I take it upon myself to welcome the noble sojourner should he land here. Who knows, I might even make friends with him?"

"Good!" Foy's look wore relief. "I can leave tomorrow for Winchester, then, and shall tell Lord Dunmore that I have confided in you."

"Tell his excellency," Jarrat responded as the other rose, "that I shall keep a sharp eye for the marquis. From the moment he lands I shall be his shadow. A pleasant journey, captain. Leave everything to me."

"And now," said Foy, "for a bottle of old sherry."

Jarrat went to the yard to see him go and when he had disappeared turned his eye to a narrow blank window under the shingle roof.

"Louis will send another messenger when the news reaches France! When it reaches France!" he muttered. Then more slowly, "When it reaches France!"

He stood musing a moment, turned and entered the door.

* * * * * * *

The radiant Frenchman that evening, returning to the Swan afoot through the late dusk fall, went up the tavern stair to find that the door of his chamber stood ajar. An exclamation of surprise escaped him. He mounted quickly and went in.

Jarrat sat there by the little table, waiting.

"Ah!" said the secretary. His eye darted swiftly to his closet in the corner. Then he crossed the room and tried the lid. It had not been opened.

"I am no common thief, curse it!" spat out Jarrat.

"No?" observed Armand, with a rising inflection. "Monsieur will pardon me. I did not know." He sat down composedly. "To what do I owe this pleasure?" tentatively.

Jarrat leaned elbows on the table and regarded him. "You are no fool," he said at length. "All the better."

M. Armand wore a look of polite inquiry.

"My word for it," said Jarrat suddenly, "there are richer paymasters than Louis XVI."

The other fronted him fiercely, menacingly. "What mean you?" he cried.

Jarrat laughed. "You see that I know what was the marquis' business in the colonies."

He went and closed the door.

"Now," he said, returning, "M. Armand, master secretary, clerk of a dead master, I have a proposition to make to you."

"And if," said the young foreigner slowly a half hour later, looking across into the ferret eyes—"if I do this—what you call it?—masquerade; if I, the humble secretary, the clerk, as you have said it, become changed for the purposes of my lord the earl to the courtier, the noble"—

He paused. They were sitting at ease now, and on Jarrat's face satisfaction was spread thinly, like oil. The ingratiating mood became him, and his companion's distrustful look had vanished into something that smacked more of friendliness.

"Think you not," the latter finished, "that these Virginians will know the difference?"

"Bblood!" scoffed Jarrat. "What know they here in the desert of French nobles? No more than my lord bishop of London's scullery maid!"

An expression of curious intentness lurked in Armand's face. He was silent, searching the other with half smiling gaze.

"And the life. Like you balls and dances with the quality? You shall be sought after. Would you set the fashions for the gallants? They will jostle the lackeys to bob with you. Gad's life! The colonials are cubs at bootlicking a lord! The fat of the land, I tell you—rides, hunts, dances, wenches and a merry season!"

The secretary's eyes sparkled. "You think I would do it well?" he asked naively. "Ah, you never saw my master! He was a real nobleman. He was born so. One cannot learn it, monsieur. It is in the blood. But I? I? I have not the ton, the address!" He looked inquiringly at the other.

"Pshaw!" Jarrat said. "I suppose your master was fine enough, but fine feathers will do it. There's not one of them will scent the difference. I know them."

M. Armand's lids were drooped, his face thoughtful.

"You wish me," he reflected slowly, "to do two things. My master, as you have guessed—he was to be the eye of the king of France in the Virginias. Very good. You want me to be that eye. Only I shall see things always bad for the Whigs, eh? And you would have me write such letters as you shall frame, but in my master's hand, so Louis shall be fooled, so he shall think the Virginias loyal to the English crown, so he shall no longer plan to offer the aid of France."

"Sooth," applauded Jarrat, "it couldn't be plainer. You have written to your master's hand and should know his signature. Neither De Vergennes nor Beaumarchais need be the wiser; and be sure no one in the colonies will be."

"And if in spite of what were written him this foolish king should still wish to comfort?"

"Why, then the message he sends to his dear marquis will come safe to you, and we shall chuckle over it in our closets. But small chance of that. The king leaned upon your master. A dozen letters of the proper complexion and he will forget he ever dreamed of fleets a-sailing westward."

"You have the true finesse, M. le Capitaine," M. Armand said gravely. "Permit me to congratulate you."

"The reward is a tidy one." Jarrat licked the words lingeringly. "'Twould take you longer to earn a commission in your own country."

"In France to be an officer in the army one must prove descent from a family ennobled for at least a hundred years."

"Nor are doubloons to be plucked from the bushes by any stool pigeon."

"It is not too much, monsieur," the Frenchman interposed, "because you

[To be continued]

### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

### SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

### SYNOPSIS OF CANADIAN NORTHWEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet.

The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of a royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 5% per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

THOS. PATTERSON & CO., Fiscal Agts.
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

## On the Ground Ahead of the Boom

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

$5.00 DOWN
AND
$5.00 PER MONTH
FOR FOUR MONTHS WILL BUY
500 Shares
OF STOCK, WHICH MAY SOON BE WORTH
$500.00

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

## Pale Faced Girls

**Thousands Using Successful Cure For Paleness and Anaemia.**

The pallid girl always lacks appetite. What little she eats is badly digested.

At night she is restless, she dozes, but doesn't sleep soundly.

Vital force must be increased, new blood must be supplied and a general rebuilding take place before she will feel like she ought.

Dr. Hamilton had invaluable experience in these cases and found nothing so prompt in building up the young women as his vegetable pills of Mandrake and Butternut.

Dr. Hamilton's Pills begin by cleansing the system and purifying the blood; they also improve digestion and render food ready for absorption. Additional nourishment is quickly supplied and the patient is fast strengthened and invigorated.

Full of spirit, ruddy and strong is the girl that assists her system by Dr. Hamilton's Pills.

The following recent letter from Miss Etta McEwen, of Haliburton, speaks for itself:

"In using Dr. Hamilton's Pills I find my system is wonderfully built up. It is certainly the most effective remedy I ever used. I have now a good appetite, sleep more soundly, and awaken in the morning feeling quite refreshed.

"Formerly I felt tired and depressed. I looked as if a severe illness was hanging over my head.

"Nothing could give quicker results than Dr. Hamilton's Pills and I strongly advise every young woman to use them."

All dealers sell Dr. Hamilton's Pills 25c. per box or five boxes for $1, by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

# LOCAL INCIDENTS

**By The Times Man on the Street**

—The annual roll call of Park street Baptist church will be held tonight.

—Tomorrow night next the 57th Regiment Band will give its first open air concert in Victoria Park.

—The regular monthly meeting of the Ladies' Auxiliary of the Y.M.C.A. will be held this afternoon, at 3.30 o'clock.

—The Board of Works Committee met yesterday afternoon in connection with the Aylmer street extension.

—Regular meeting of the Women's Auxiliary of St. Luke's church will be held this afternoon at three o'clock.

—Mr. W. Clow, who for the past few weeks, has been employed on the Review staff, returned last night to his home in Picton.

—A meeting of the Central Ontario Medical Association will be held tonight at eight o'clock in the Ontario Bank Chambers.

—$25 reward is what the owners of the dogs poisoned yesterday, is offering for news leading to discovery of the miscreant.

—The Ladies' Aid Society of Mark street church will hold their regular meeting at the home of Mrs. L. Calvert, this afternoon, at three o'clock.

—Next Sunday the Feast of Pentacost will be observed in St. Peter's Cathedral. His Lordship Bishop O'Connor will pontificate at 10.30 o'clock.

—Two good parlor cook stoves, also three beds and some other useful articles. Genuine bargains as they must be sold at once. Apply at 381 Water street. Private sale.

—Yesterday the American Cereal Company had a gang of men at work pulling down the old building on their property just east of the Hunter street bridge.

—The Peterboro Cereal Co., this week shipped 644 cases of Canada Flakes to Manchester, England. This local product is "catching on" well in the English markets.

—The Trustee Board of Mark street Methodist church met yesterday evening at the close of the prayer meeting to consider certain proposed improvements to the church property.

—Lindsay Post says: The iron moulders of Toronto, Cobourg, Oshawa, Bowmanville and Port Hope will unite in an excursion to Peterboro on Saturday, June 6th. About 3,000 are expected.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00. In order to clear them out. Don't miss this chance. Times' Bookstore.

—Jackson Park will be formally opened next week, when Mr. Learmonth, the energetic manager of the local street railway, will have attractions put on fully equal to, if not better than last year.

—Mr. Jas. Best has sold the Bancroft House to Mr. Wm. Kennedy, the present lessee. The price paid was $12,000. This is one of the best payint hotel properties in the county of Hastings.—Madoc Review.

—Judging by Chief T. Rutherford's letter in our esteemed evening contemporaries, the writer declines to accept any privileges from the local street railway unless such privileges include all members of the fire brigade. This action, shows a most perfect "esprit de corps" exists in the brigade.

## 15-DAY NEW YORK EXCURSION

**Via Lehigh Valley Railroad, Friday June 15th.**

Tickets only $9.00 round trip from Suspension Bridge, Niagara Falls. Tickets good on regular express trains leaving at 1.50 and 7.15 a.m., 7.15 and 8.45 p.m. Don't fail to go. For tickets, Pullmans and particulars, call on or address Robt. S. Lewis, Passenger Agent, L. V. R., 10 King street East, Toronto.

## *Mark Street Church Holds a Meeting*

**Officers of Epworth League Elected and Other Business Done.**

The annual congregational meeting of Mark street church, with Pastor J. G. Lewis presiding, showed that the position of that church's affairs are most satisfactory, the receipts being much larger than during the preceding year.

Among other business transacted was election of officers of the Epworth League as follows;

Pres.—Mrs. Fowlds.
1st vice-pres.—Mrs. Speer.
2nd vice-pres.—Miss Speer.
3rd vice-pres.—Mrs. Taylor.
4th vice-pres.—Miss Crowe.
Sec.—Miss Stewart.
Ass't Sec.—Miss Dodd.
Treas.—Mr. Hooper.

The object of the League is to promote the spiritual welfare of the young people.

**A Popular Company.**

Mr. J. W. Truman, Inspector of the Monarch Cash United Fire Insurance Company, of which Mr. W. H. Hall is the local agent and Mr. R. J. Kidd is the active representative, was in town on Tuesday in the interests of his company. The Monarch is gradually working up a large business in this city, as well as throughout this section.

# SOCIAL AND PERSONAL

—Mr. A. Weller of Havelock, was in the city yesterday.

—Mr. L. J. Nichol, Galt, was in the city yesterday on business.

—See our new line of handsome souvenir post cards. Times Bookstore.

—Mrs. F. J. Tate, and her daughter of Lakefield, were in the city yesterday.

—Mr. D. Hughes-Charles left yesterday for Galt to attendt he big horse show.

—Mr. L. F. Clarry, Hastings, was in the city yesterday, a guest at the Oriental.

—Mr. R. Begley, of Peterboro, is in town, assisting Mr. B. J. Gough ing the rush.—Lindsay Post.

—Mr. Geo. A. Hutchison, Brockville, was in the city yesterday, a guest at the Snowden House.

—Mr. W. A. Mackewan, of Peterboro, was registered at the new Murray hotel, St. Catharines, on Tuesday.

—Mr. Thos. B. Thompson, steamboat inspector of Kingston, was in the city yesterday, via business with North Star.

—Miss M. Wiley, daughter of Mr. Charles E. Wiley, 270 McDonnel St. has been taken to the Nicholls hospital suffering from pneumonia.

—Mr. W. H. Meldrum, manager of the Peterboro Cereal Co., returned home yesterday after spending several days in Chicago on business.

—City Engineer T. A. S. Hay has been confined to his house for the past couple of days through illness. He was, however, able to be around again yesterday.

—Mr. F. B. McKee, who has been car checker at the C.P.R. station, left yesterday for his home in Dundalk, after which he will go to Fort William, where he will reside in future.

—A. Carroll, Montreal; Ed. S. Munroe, Toronto; E. E. Hull, Cincinnati; F. A. Brereton, A. Carson, Toronto; R. C. Burlingham, Robt. L. Rice, Toronto, are guests at the Oriental.

—Mrs. Chas. Mitchell, wife of Mr. Mitchell, popular porter of the Snowden House, yesterday arrived in the city from Eganville, and will hereafter reside on Simcoe street, taking up house with her husband.

—F. Rolland Howarth, teller in the head office of the Ontario Bank for a number of years, has been appointed manager of Millbrook branch of the Ontario Bank. He left Toronto yesterday to enter upon his new duties.

## *How to Beat the Races Always*

**The "New Theory" Gives Every Speculator a Chance to Get Rich.**

In this city are many men who occasionally "take a flyer" on the races. Whilst some lose at times times others pull off good fat rolls often.

In another column of this issue appears an advertisement that is well worth careful consideration by those who sometimes book their opinions on the races. The "New Theory," purchased by Messrs. A. Peabody & Sons, of New York, at a cost of $18,000, seems to bear the marks of a "good thing." The experts of this well known and responsible firm have carefully studied and given practical investigation with the result that enormous earnings are made during every season, and never a loss. The "New Theory," must, on its merits and system beat the races every time.

The "New Theory," which has shown a profit every season, could stand for 20 consecutive losses, although it has never shown more five. It averages 35 plays a month, and can be played personally by anyone. The "New Theory" can be played at the track, poolroom or handbook.

This system last year earned $50,000 for its originator in four months last season, $63,000 two years ago, and $57,500 three years ago, during the same period.

Here is a golden opportunity for those interested in the ponies to place their money in such a way that success is practically assured. Results so far known show, whether you play $100 or $10,000, that the profits are 100 per cent. per month. Here is a chance for those who have been "up against it," not only to recover what they have lost, but to make handsome bank deposits in a short time. For full particulars see adv. in other columns, or write to Messrs. A. Peabody & Sons, 22 West 23rd street, New York City.

## *Work Has Begun on Carpet Factory*

**The Contract Let to Mr. Dinnick of Toronto, Who will Hustle it Thro'**

The contract for the new carpet factory previously described in these columns, has been awarded to Mr. Chas. S. R. Dinnick of 34 Victoria street, Toronto, who was the successful contractor, although several local men put in tenders.

The contract has been signed in Toronto in the presence of Mr. Preen, the manager of the factory, and Mr. W. C. P. Heathcote, the architect, and work was started yesterday morning. Mr. Williams, an engineer from Toronto is in the city laying out the work, and Mr. Woodbridge of the same city is also here as foreman on the job.

If the contractor cannot get enough men here he will bring some from Toronto. The agreement calls for the factory to be completed 12 weeks from May 29th.

**Good Score at Bowling.**

Some excitement was caused last night at Mr. J. T. Smyth's bowling alley on Water street; several contestants training for the game over a prize Mr. Smyth is offering for the highest score made during the month of June. A George street merchant made a score of 208, which is considered a very high record.

## Trust to Nature.

A great many Americans, both men and women, are thin, pale and puny, with poor circulation, because they have ill-treated their stomachs by hasty eating or too much eating, by consuming alcoholic beverages, or by too close confinement to home, office or factory, and in consequence the stomach must be treated in a natural way before they can rectify their earlier mistakes. The muscles in many such people, in fact in every weary thin and thin-blooded person, do their work with great difficulty. As a result fatigue comes early, is extreme and lasts long. The demand for nutritive aid is ahead of the supply. To insure perfect health every tissue, bone, nerve and muscle should take from the blood certain materials and return to it certain others. It is necessary to prepare the stomach for the work of taking up from the food what is necessary to make good, rich, red blood. We must go to Nature for the remedy. There were certain roots known to the Indians of this country before the advent of the whites which later came to the knowledge of the settlers and which are now growing rapidly in professional favor for the cure of obstinate stomach and liver troubles. These are found to be safe and yet certain in their cleansing and invigorating effect upon the stomach, liver and blood. These are: Golden Seal root, Queen's root, Stone root, Bloodroot, Mandrake root. Then there is Black Cherry bark. The medicinal principles residing in these native roots when extracted with glycerine as a solvent make the most reliable and efficient stomach tonic and liver invigorator, when combined in just the right proportions, as in Dr. Pierce's Golden Medical Discovery. Where there is bankrupt vitality—such as nervous exhaustion, bad nutrition—and thin blood, the body acquires vigor and the nerves, blood and all the tissues feel the favorable effect of this sovereign remedy.

Although some physicians have been aware of the high medicinal value of the above mentioned plants, yet few have used pure glycerine as a solvent and usually the doctors' prescriptions called for the ingredients in varying amounts, with alcohol.

The "Golden Medical Discovery" is a scientific preparation compounded of the glyceric extracts of the above mentioned vegetable ingredients and contains no alcohol or harmful habit-forming drugs.

## POLICE NEWS

**Daily Happenings in Court Room and Station.**

Yesterday morning, two young men pleaded guilty, in the police court to having created a disturbance on George street, by engaging in a personal mix-up. They were each assessed $2 with $2.60 costs.

George Rickerby was charged with having, on January 10th, obtained the sum of $15 by false pretences from Mr. W. Eyres. As the Crown was not ready to proceed, the case was enlarged until Friday morning. Bail was allowed in the sum of $200. Mr. McWilliams, for defendant, explained the circumstances in connection with the case, saying that it was more a matter of a debt due to Mr. Eyres and asked that his client be discharged if the $15 and 90 cents of the same were paid. Mr. Wood, for the Crown consented to this.

**I. O. F. to Meet Tomorrow Night.**

It will interest local members of the Masonic fraternity to learn that there will be a meeting of Royal Arch Chapter, I.O.L., No. 80, on Monday night, when the Royal Arch degree will be conferred on three members. A full attendance of members is requested.

## DRAW ATTENTION TO THE "NEW THEORY"

## Over 75% Winners

**This Week up to Yesterday We Played Five Horses; Result, Four Won.**

We purchased outright, at a cost of $18,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling—Interests of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season same shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your money constantly showing you its full earning capacity, which was the greatest secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously and substantially. There are no "ifs" and "ands" and we stake our reputation on same.

## What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

## What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or chalces. We often win on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

**NOTE—**

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

**RESULT—**

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

## ABSOLUTELY INFALLIBLE

It earned $60,000 for the originator last season in four months, $63,000 two years ago, and $57,500 three years ago, during the same period.

## It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 100 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

## A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

## Absolutely Impossible to Lose Your Capital

Nothing of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

## NOTICE:

**This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.**

**TERMS: TWENTY-FIVE DOLLARS, ($25.00)**

Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

**GUARANTEE—**

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours: 9 a.m. to 9 p.m. Sunday by previous appointment.

## Davitt the Irish Patriot Dead

### Stormy Career of a Great Irishman Ended By Blood Poisoning--A Hater of Britain and a Friend of the Boers.

Dublin June 1—A notable career closed last night when, after a long and painful illness Michael Davitt died peacefully and painlessly at 12 o'clock in the presence of his eldest son, Michael, and his two daughters, who had devotedly attended him through his illness, and of many of his most intimate friends, including John Dillon. Shortly before his death Father Hatton had been with him.

Mrs. Davitt, who had been in constant attendance on her husband until a few days ago, when she herself was taken ill, lies prostrated in the same hospital, too weak to leave her room. She has not yet been informed of her husband's death. It is stated that Mr. Davitt left a written message.

The greatest sympathy has been displayed by all classes of society during Mr. Davitt's illness. Yesterday the hospital was besieged by anxious inquirers. John T. Redmond, leader of the Irish party in Parliament, was a frequent inquirer by telephone from the House of Commons, and gave up his proposed Continental trip over the Whitsuntide holidays in consequence of the condition of his friend, the father of the Irish Land League.

Among the last callers at the hospital was Lord Hemphill on behalf of Earl Aberdeen, Lord-Lieutenant of Ireland, and the Countess of Aberdeen.

Mr. Davitt retired from the representation of South Mayo in Parliament in 1899, but to the last took a keen interest in the politics of his county.

Death was due to blood poisoning, which followed two operations for necrosis of the jaw bone, and spread so rapidly that all efforts to stay its course were unavailing. Mr. Davitt's illness began with an insidious attack of toothache, to which he paid no attention until John Dillon urged him to have recourse to medical advice.

For some time there were hopes of his recovery, but the state of his health, which was undermined by exertions at the recent general elections, greatly hindered his progress.

Michael Davitt has always been known as a hater of Britain, and an ardent champion of Irish nationalism. His zeal for the cause was responsible for his spending nine years of his turnulent life in jail. Born on March 25, 1846, in the village of Straide, County Mayo, his parents were of the poorer class of western Irish peasantry, with some American antecedents, his mother having been born in the States. When Michael was five years old, his father was evicted from the small holding on which the family subsisted. This early experience of landlord power, doubtless tended to influence his actions in the fierce crusade which he waged for years against Irish landlordism. The family then emigrated to Lancashire, where he was employed in a cotton factory, and where at the age of eleven, he lost his right arm, through a machinery accident. He was then sent to the Wesleyan school at Haslingden, and at fifteen obtained work in a printing office, where he remained for seven years. In 1865 he joined the Irish revolutionary movement initiated by James Stephens, and in 1870 was arrested in London, tried on an indictment of "treason-felon," and sentenced to fifteen years penal servitude. After undergoing seven years and a half of imprisonment, chiefly in the Dartmoor convict prison, Mr. Davitt was released on ticket-of-leave. In conjunction with other amnestied Fenian prisoners, he was tendered a public reception by the people of Dublin, and after making a tour of the west of Ireland, and paying a hurried visit to America, he started the Land Agitation in his native County of Mayo early in 1879. In October of that year he, in conjunction with Mr. Parnell and others, founded the Land League Organization, and became its guiding spirit. He was arrested and prosecuted in November of that year for a seditious speech, but after a week's imprisonment and an abortive trial, the prosecution was abandoned. During the partial famine of 1879-80 he had the chief direction of the Land League relief funds.

## In Memory of Late Robt. Weir

**Grand Master of Grand Black Chapter of B. M. Pays Eulogy.**

The address of Mr. Wm. Chenery, grand master of Grand Black Chapter of British America, delivered recently, in the City of Toronto during their annual convention, has just been issued.

In this Mr. Chenery pays a deservedly kind token of esteem to the memory of Mr. Robt. Weir of this city, who recently passed away.

His words, in this connection were as follows:

During the past year we have been called upon to chronicle the death of a number of worthy Sir Knights who have been called to their final reward. Notable among these is Sir Robt. Weir, Most Wor. P.G.M.B.A., and Sir Henry Burnett, R.W. P.G.M. of O.W. I regret circumstances prevented my being able to attend the funeral of M. Wor. Sir Knight Weir. On receiving a report of his death I called upon Sir J. S. Williams, Grand Registrar, authorizing him on behalf of this M.W. Grand Chapter to wire a message of sympathy to Mrs. Weir and to forward a suitable floral offering, also to send a letter of condolence to the widow and family. By the death of M.W. Sir Knight Weir, and R.W. Sir Knight Burnett, many Sir Knights here today, can say as I do, we have lost two warm and personal friends, who were both kind and courteous, ever weary in well doing to further and promote the interests of our institution. Our deepest and most tender sympathies are extended to the sorrowing relatives and friends of the Sir Knights who have been called from our Preceptories.

## Peterboro Man's Successful Past

**Hon. Geo. A. Cox Gives His Experience in Canada Life Co.**

The Toronto Mail and Empire yesterday said:

"The financial position of Hon. Geo. A. Cox has always attracted a good deal of attention from the man on the street. It was probably on this account that the number of spectators in the court room was increased yesterday afternoon when he came up before the Royal Insurance Commission to be examined regarding the affairs of the Canada Life Company. The story of his own struggle to gain control of the concern made an interesting story. He became an agent for the Canada Life in 1862, but resolved at that date to aim at being president some day. Gradually as his financial position strengthened he secured more stock, until in 1892 he possessed almost a controlling influence. Then some of the directors took fright and passed resolutions against employees buying stock. At first he appeared to be obeying their order, but finally announced that he desired to become a director. Steps were immediately taken by those opposing him to get legislation forbidding anyone securing a controlling influence. Mr. Cox, however, offered to vest 400 of his shares in trustees, who could vote for them. This satisfied the directors, and Mr. Cox went on the board. He continued to buy stock until 1896, when he had a controlling influence. Then he demanded the return of the 400 shares by the trustees, and left it in the hands of the directors whether he would leave the board. The decision was in his favor and four years later he became president."

## Well Justified Appeal for Aid

**Childrens' Aid Society Wants More Money For a Good Cause.**

The Children's Aid Society have eleven children in the Shelter at present. Last year the Peterboro county council granted them $200, but they had so many children from the county in 1905 that this sum did not meet the outlay for their care and maintenance by over $100. In other words, they feel that the county is indebted to them for over $100, and there has been a heavy drain upon their resources of late.

The society is now appealing to the public for financial assistance, to the sum of at least $200. They trust that this appeal may meet with favor. The society is doing a good and useful work. Some weeks ago they received several generous subscriptions from the city and county, and they trust that more will be forthcoming, especially from the county. The Shelter now has more children to care for than it has had for some time past, although there are not many from the rural districts in the Shelter just now, the majority being from the city.

## Americans Buy Hickory Island

**Well Known Sportsman's Retreat on Rice Lake Sold.**

A Cobourg despatch says: Hickory Island, situated in Rice Lake, Northumberland county, has been purchased from the Dominion Government and the Indians by J. D. Hayden, of this town. W. H. Oliver, Charles Donnelly, and George T. Oliver, wealthy citizens of Pittsburg, Pa.

## We Congratulate Mr. S. T. Medd

**Local Officer Gets Certificate as a Field Officer.**

We notice by the last issue of the Canada Gazette and Militia General Orders, that Mr. S. T. Medd, of the Third Dragoons, has succeeded in passing the examinations for a field officer's certificate.

A Field Officer's Certificate qualifies the holder for any regimental command or rank. The examinations for this certificate, which is the highest military certificate granted by the Royal School of Cavalry, are much the same as those required of the officers of the Imperial Army. We congratulate Mr. Medd on his success.

**Auto Used to Convey Pay to Men.**

Yesterday morning Mr. Dunn, local Bell Telephone Co. manager, left by automobile for Mount Julian to pay off the men working on the new line from that place to Burleigh Falls. Let us hope he will not meet with a hold up gang. It might be noted that this payment is only the regular semi-monthly business and does not mean that the men were either through with the job or discharged.

## Faulty Digestion

**Causes Physical and Mental Breakdown, Mi-o-na Will Strengthen Stomach.**

Few people realize the intimate relation between the mind and the stomach. Worry and excessive mental work react on the digestive system, while on the other hand the greatest cause of nerve and brain impoverishment is a weak or faulty digestion.

When the stomach does not assimilate the elements of strength and nerve force that are in the food we eat, the energies we expend in the active processes of life are not replaced, and physical and mental breakdown results.

If the stomach does not have action, it soon becomes unable to act, just the same as a muscle that is not used becomes weak and valueless. Just as soon as you find that your food is not properly digested, that you taste it after eating, that the tongue is furred, the breath heavy, the appetite poor, the head occasionally dull and aching, begin the use of Mi-o-na.

This reliable remedy contains no pepsin, and is an absolute strengthener of the digestive system. In fact, it is a guaranteed cure for all diseases of the stomach, excepting cancer. It is not a patent medicine, and its formula is furnished to physicians, druggists, and all intelligent people who may desire it. Mi-o-na differs from any other remedy on the market in its lasting effects.

Mi-o-na costs but 50 cents a box.

If you cannot obtain Mi-o-na at your druggist, it will be sent by mail, postpaid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N. Y.

## POLICE NEWS

**Daily Happenings in Court Room and Station.**

Yesterday the Sons of Idleness evidently preferred the supporting walls of our local buildings to even the delights of standing up for several hours in the police court.

Several cases of non-attention to cleaning cesspools and vaults were ventilated; a few were discharged and some assessed $10 each for their delay.

Mr. Timothy Cavanagh, the veteran hotelkeeper, was charged with having had his bar room windows covered in part with curtains, thus preventing the public having free ocular admission during last Sunday. Inspector Geo Cochrane was the complainant.

Mr. Cochrane, the only witness called, said that the Simcoe street windows were covered by a curtain stretched across to a height of five feet. He acknowledged that he could look over the top of the curtain and see the bar.

Mr. A. P. Poussette acted for Mr. Cavanagh, and Mr. R. E. Wood for the prosecution.

Mr. Cochrane produced the regulations compiled by the local Board of License Commissioners.

These regulations say that "the view" of the public must not be obstructed from the interior." Mr. Poussette contended that the literal reading of the act is that this means that the regulations really say that the "obstruction" is from within and not from without the bar room. His Worship said the interpretation of the regulations is very doubtful.

Mr. Cochrane said after seeing the curtains over the Simcoe street windows of the bar, he went in ardent for Mr. Cavanagh, who was lying down upstairs. Mr. Cavanagh told him a woman had been scrubbing the bar-room floor; but Mr. Cochrane asserted the floor was quite dry. He could not say whether the east side window of the bar was covered or not, but to Mr. Poussette admitted that had it been covered he would probably have noticed it.

Here Mr. Cavanagh remarked, "Oh Mr. Cochrane has me up for very frivolous little thing he can trump up." Mr. Cochrane assured the speaker he had no animosity against him.

The Magistrate said to Mr. Wood "Don't you think as no one was in the bar drinking, and no particular harm has been done, we could let this go as a warning. Mr. Wood and Mr. Cochrane agreed to this so the case was dismissed.

**Invitation to King Edward.**

Ottawa, June 1.—The joint invitation of the Senate and House of Commons to King Edward and Queen Alexandra to visit Canada has not been sent forward yet, but will be as soon as Lord Grey returns to Ottawa. The address has been beautifully engrossed, and will be sent across the ocean in a morocco case. The workmanship is very chaste.

## The Greek Slave A Great Success

**Prof. Devey's Entertainment in St. John's S.S. Much Enjoyed.**

Last night a large and highly delighted audience thoroughly enjoyed the splendid entertainment given under instructions and training of Mr. Devey, the organist of St. John's church.

The program was a particularly good one and reflected great credit both upon the participants and especially upon the sound and intelligent training given them by Mr. R. J. Devey.

Special scenery was bought from Mr. Devey from London, England, together with scenery from other plays.

The program was as follows:

PART ONE.

Selection ... ... ... ... ...
The Orchestra.
Song and Chorus ... "The Sun is Rising."
Arthur Horsfield.
Song and Chorus ... ... ... ... "Tapa."
Harry Milner.
Piano Solo ... ... ... ... ... "Sonatina"
Cyril Devey.
Song and Chorus ... ... ... "Starlight"
Charley Milner.
Song ... ... "Four-Leaved Shamrock"
Arthur Horsfield.
Violin Solo ... ... ... ... "Air Varie"
Frank Halpany.
Song and Chorus ... "Jack's the Boy"
Cyril Devey.
Banjo and Piano ... "Dragoon Galop"
Catch ... ... ... "Frisco's Burning"
The Boys.

PART TWO.

Selection ... ... ... ...
The Orchestra.
Scene from "A GREEK SLAVE"
Helidotus ... ... ... Frank Halpany
Curiur ... ... ... Claude Bartlett
Lollius ... ... ... Hugh Wallis
Menitus ... ... ... Joseph Hughes
Siggius ... ... ... ... Carl Halpany
Iris ... ... ... ... Miss Cecilia Clement
Melanopis ... ... ... ... Miss Daisy Wood
Nepis ... ... ... ... Miss Essie Wood
The Revels ... ... ... "Saturmlia"
Frank Halpany.
Action Song ... ... "The Mandarin"
Cyril Devey and Harry Milner.
Song ... ... ... "Chin Chin, Chinaman"
Carl Halpany.
Duett ... ... ... "China Ornaments"
Allen Kingscote and Harold Devey.
Patriotic Song and Chorus ... ... ...
Mrs. R. J. Devey.

Orchestra—Mr. Chas. Seymour, violin; Mr. A. Tetherwey, cornet; Mr. A. Seward, cornet; Mr. John Butcher, flute; Mr. R. Gardner, bass; Mr. G. Schneider, piano.

Accompanists—Mrs. Halpany and Mr. Rich. J. Devey.

Stage Manager—Mr. Howard Moore.

The stage setting showed the touch of a master hand, while the Oriental costumes were exceedingly picturesque and realistic. The little folk sustained their several roles in manner highly commendable both to themselves and their instructor, Mr. Devey, who had spared neither time nor pains in training his "boys" of St. John's choir for last night's charming presentation. The scene from "A Greek Slave," was an operatic production, in which the youthful performers truly excelled themselves, and elicited from the audience, through Mr. K. Eardley-Wilmot, a hearty vote of thanks for the splendid entertainment given.

Frank and Carl Halpany carried their audience by storm in their irresistible character singing. In fact the whole youthful company's work last night was unusually acceptable, and it is hoped that Mr. Devey will see his way clear to reproduce the program in the autumn, when his and his boys' efforts will unquestionably receive more liberal patronage than accorded last night.

## Program of First Band Concert

**Victoria Park Will Be Lighted Up Tonight for the Crowd.**

By kind permission of Lieut.-Col. Miller and officers, the band of the 57th Regiment will render the following program in Victoria Park tonight, weather permitting:

March—Turenne.
Overture—"Bohemian Girl."
Highland Patrol—"The Wee MacGregor."
March—"Indiana."
March—"Valdamere."
Serenade—"d'Amouri."
Selection—"Gems from comic opera, King Dodo."
March—"The Magner."
God Save the King.

Mr. Frank Adams, chairman of the Fire, Water and Light Committee, has completed arrangements for lighting the park tonight. Yesterday all the lights were overhauled, and everything is in good shape.

## Ontario License Holders to Meet

**Mr. A. Rountree, Secretary of Local Branch Receives a Notice.**

Yesterday, Mr. Arthur Rountree, the George street grocer, secretary of the Peterboro branch of the Ontario License Holders' Protective Association received notice, from Secretary Dickie of the Ontario Association, to the effect that a convention of the members of the association will be held in Toronto on June 30.

Members of the Association will be presented with a synopsis of the new License Act in a short time.

Mr. J. M. Brooks, vice-president of the association and many other local license holders will probably attend the meeting which will likely be held in St. George's hall.

# Bomb Thrown at Alfonso and Ena

### Outrage Occurs After Gorgeous Wedding During Drive Back to Palace--Child and Horses Are Killed.

London, June 1.—A despatch to a news agency from Madrid says that a bomb was thrown at King Alfonso and Queen Victoria this afternoon, and that both escaped unhurt.

The News Agency's despatch adds that an enquiry was ordered and that a child and two horses were killed by the explosion. A fourteen-year-old boy was arrested. It is further stated that the King and Queen behaved with the greatest calmness, and that after the delay caused by the concussion they proceeded to the palace.

Madrid, June 1.—The marriage of King Alfonso to Princess Victoria was celebrated yesterday.

As the royal couple entered the assemblage arose and two hundred choristers intoned a processional march. The King looked calm and happy and slightly pale as usual. Across the breast of his field marshal's uniform was the blue and white sash of the order of Charles III. and on his breast sparkled the orders of the Garter and of the Golden Fleece.

The bride entered with her mother, brother, and Queen Christina, the silvered embroidery of her wedding dress being reflected by the myriad of lights until she seemed to be robed in jewels. Her veil, slightly drawn aside, revealed her clear, fine features with cheeks full of youthful color.

The King advanced to meet the bride and they stood together as the marriage service began. The ceremony was performed with all the impressiveness of the Roman ritual. Cardinal Sancha, Archbishop of Toledo, robed in crimson silk officiating assisted by a special nuncio of the Pope and the highest dignitaries of the Church, with scores of acolytes and incense burners. The ceremony, which lasted nearly an hour, terminated with the nuncio pronouncing the Pope's benediction of the newly married couple and the chanting of the Te Deum.

As the King and Princess Victoria were pronounced man and wife the news was signalled to the waiting crowds, and all Madrid broke into frantic demonstrations of joy, while cannon boomed and church bells chimed.

Entering the royal coach the King and Queen of Spain returned to the palace amid scenes of the wildest enthusiasm that throngs shouting "Long live Queen Victoria."

## Charlotte Street Beats St. Paul's

**Monday's Seemingly Easy Thing for St. Paul's Bunch Knocked Out.**

Last night at Riverside Park, a fair sized audience witnessed the wind up of the second game in the local Guild League baseball series.

On Monday night, it will be remembered that four innings were played when the score stood 4—1 in favor of St. Paul's.

It might be noted that the Guild League games are played on the basis of 7-innings games.

Last night the remaining three innings were played with Whiteroff again holding the indicator. The score last night dampened somewhat the ardor of the St. Paul's lung expanders as Charlotte street won out by a score of 8—2, making the totals on the game, Charlotte Ct. 7, St. Paul's 6.

## Two Citizens Now Summoned

**Messrs F. Leplante and T. Frost Charged with Illegal Fishing.**

The Sunfish Club and Easy Hours League will have an intellectual treat on Saturday morning, as our local hustling Fisher Overseer Mr. John Watt, has summoned two citizens, Thomas Frost and F. Leplante, to appear before Police Magistrate Dumble tomorrow on the charge of illegal fishing.

## WINDOVER CASES HELD OVER

**County Magistrate Edmison Withholds Judgement After Hearing Evidence.**

Last night the adjourned cases of selling liquor without a license against a man named Windover of Cavendish county, were referred before County Magistrate Edmison, in the county chambers. It will be remembered that on Wednesday the charge was brought against Windover of selling a bottle of whisky to a young man named R. H. Woods, an employe of the Dickson Co., in yesterday's issue we gave the evidence in full in this case.

Last night Magistrate Edmison noted that he would withhold judgment until Monday next.

A second charge for May 20th, practically the same was preferred against Windover. After several witnesses were heard, Magistrate Edmison also reserved judgment on this case until Monday next.

# Coffee Wrecks The Children

Dr. Elias G. Brown, the medical examiner of defective school children in the public schools of New York City, in his report to the City Supt. writes:

"After hereditary or congenital causes, improper diet is the greatest of the causes of malnutrition and nervousness. In considering nutrition I find one of the most noticeable evils to be the very large proportion of school children who drink tea and coffee.

"Both tea and coffee are, as we know, pure stimulants and contain an acid that is harmful.

"Many children come to school in the morning after a breakfast of stimulant (coffee or tea) and starch (wheat bread), and children very frequently have coffee or tea with each of their three meals, and sometimes also at three o'clock on their return from school. No child who drinks tea or coffee can be at his best. In this matter parents need education."

City Supt. of New York Public Schools, William H. Maxwell, in discussing this report writes in his report:

"In discussing improper diet, Dr. Brown finds excessive use of tea and coffee a potent reason for defect in the child. His remarks upon the use of stimulants by children should be brought home to every parent ignorant enough to give such beverages to the very young."

Children become attached to their cup of hot Postum Food Coffee for breakfast. Have it well boiled according to easy directions on pkg. and see how they thrive when Postum is used in place of coffee.

There's a Reason for

POSTUM

## Mr. J. J. Turner Severely Injured

**Well Known Local Manufacturer Hurt at Lakefield.**

On Wednesday, an accident occurred whereby a well-known local manufacturer, Mr. J. J. Turner had a close call.

It seems that whilst at Lakefield, Mr. Turner when engaged in looking over a yacht near the wharf, slipped and fell off the wharf, disappearing under the water, and coming up, struck the bottom of the hull of the yacht, fracturing a rib. He took the evening train for the city, being forced to travel without a chance of clothes. Mr. Turner was naturally much inconvenienced by his wet apparel, and this, with the pain caused by his internal injury, made his journey anything but a pleasant one. With the proverbial plusk of all Englishmen, Mr. Turner yesterday was at his desk in the factory.

## OUR HIGH RATES

**City Paying Too Much For Its Street Lighting.**

Our council made a rather poor bargain with the Cereal Company, proprietors of the Peterboro Light and Power Co., when it entered into a ten years' contract for street lamps at $65 per lamp per year. This price would mean, we are told, about $170 per horse power. The Times opposed the contract at the time, considering the terms as altogether too high.

By way of comparison it might be noted that the City of Buffalo has closed a lighting contract with the General Electric Company at $53.65 per arc lamp, for a five-years' term. On Wednesday night the Buffalo city council passed the bill over the mayor's veto. One of the aldermen, in discussing the cost of electric power, said that the price of $56 an arc lamp equals $160 per horse power.

## BASEBALL

**Eastern League Games Played Yesterday, By Special Wire.**

## REBUILD YOUR TIRED, ACHING BODY

Winter has left you in a state of fatigue and weariness.
The vitality of your blood is gone.
Your nerves are wretchedly weak and you find it hard to sleep.
The temptation to "brace up" with an alcoholic mixture is great,—but it's uselessness is plain to everyone.
Better follow Nature's plan; it's always a sure one.
First create new appetite.
Improve your digestion.
Perfect the process of assimilation.
This will ensure a supply of rich, nourishing blood.
Healthy blood soon makes a healthy body, and a system fed by pure, rich blood is bound to gain in energy and strength.
To get well and stay well, use the food tonic "Ferrozone" which is composed of concentrated vegetable extracts that supply nutrition that every sickly person needs.
No matter how long you've been in poor health, Ferrozone will win you back like it did Mrs. Sadie E. Hislop, of Whitby, Ont., who writes: "Ferrozone not only brings health to the sick, but has power to cure quickly. After being confined to bed with sickness, I seemed unable to make any headway on the road to complete health. My vitality was low and I was in great need of strength. My nerve force was gone, and from headaches and poor sleep I was in bad straits. Ferrozone was just what I needed. It increased my strength, gave me a new feeling entirely. I used about eight boxes and was made perfectly well. My doctor thinks Ferrozone a wonderful cure."

Your druggist sells it in 50c. boxes or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $2 per year, strictly in advance.

### THE WHIPPING POST

It is universally conceded that nothing short of Divine justice can measure the intrinsic guilt of any action, or administer punishment which shall be exactly commensurate to the crime. What we call justice is in fact a very rude device which finds its justification in the necessity to protect society. Each individual instead of protecting his own rights, and avenging or remedying his own wrongs, hands the task over to the agents of society, agreeing to bear his share of the expense.

As no man can estimate the temptation of another, or understand to what extent with the burdens of heredity and environment he is really responsible for his actions, it is impossible to determine degrees of guilt and punish it as such. All that should be attempted in such action by way of penalty as will be most likely to deter others from committing the same offense against society, which in dealing with criminals should do so wholly along preventive and reformatory lines, and not on any theory that power has been delegated to it to fix degrees of guilt and administer adequate punishment.

There is a theory of penalties, however, which Herbert Spencer insists on as the only natural and just one in educating children, and that is that suffering from wrongdoing should be as far as possible the natural consequences of the act, and should be of the same character as the injury inflicted. If a man robs his neighbor make him restore the property, or, if beyond his power, put him to work till he can do it. If he murders the head of a family, put him to work where he can earn something for the family's support. If he wantonly and cruelly causes another to suffer pain, inflict at least as much on him, and more, if needed, to deter him and others like him from future violation of the law.

It is upon this theory that the Hon. Richard Adams, Jr., of Philadelphia, is pressing a bill in the House of Representatives for the revival of the whipping post for wife beaters. Mr. Adams has recently made a very scholarly and carefully considered speech on the subject, in which he goes into the early status of woman in different countries, following it from the Greek period, when she could be sold as a chattel, through feudal days, when a wife would be beaten with impunity by her husband, down to 1829, when the law in England, which permitted a man to chastise his wife with any reasonable instrument, was repealed. Mr. Adams shows very clearly that the constitutional provision against cruel and criminal punishment does not apply to such carefully restricted flagellation administered in private as he wishes to reintroduce, and he has gathered figures from many quarters showing that wife beating is still widely prevalent. That it is a particularly cowardly, cruel and contemptible crime no one will question, and Mr. Adams finds very wide and influential backing among prosecuting officers and jurists to the effect that whipping would go much farther toward putting it down than fines and imprisonment.

Nevertheless, the whipping post is so essentially a survival of barbarism and is so associated in the public mind with frightful cruelty and abuses, that we are disposed to think it can never be generally reinstated for any purpose, any more than the pillory, the thumbscrew and other instruments of torture which were common in earlier days, but which civilized methods have discarded.

If the whipping post is to be used again it should not be confined to wife beaters. If all who cause pain should be punished by being made to experience pain, then every one who inflicts it wantonly upon another or subjects him to physical suffering in any way should be whipped. That is the logical basis for it. Are we ready to go back to that? Is it wise or necessary?

---

One of the foreign fire insurance companies that lost largely in the San Francisco fire has lost twenty-seven times its original capital by risks placed in America for more than a century. The company was originally projected by Daniel Defoe, author of "Robinson Crusoe," at the time when he was pamphleteering for the union of Scotland and England. Defoe's fire insurance project was left in abeyance while he turned his energies to the project that fructified in the Bank of Scotland. In the first stage of the South Sea speculation the fire insurance company was organized, chiefly for providing parishes with fire engines and paid firemen, whose services were to be paid for by assessments on rate payers. This was the first paid fire department in the world. This old corporation and one other, also hard hit in San Francisco, are the only survivors of the seven thousand projects floated in England in the South Sea era of speculative bubbles.

---

The right of a wife to go through her husband's pockets in search of money has never been successfully assailed. Therefore the decision of a New York court that it is not stealing for a man to take his wife's money is particularly refreshing to the sex that wears the trousers.

---

### *Devlin Knows Naught Of It*

London, May 31.—The Church Army has addressed a letter to the Home Secretary, drawing attention to the fact that the efforts of the society to improve the conditions of the labor market by sending unemployed to Canada is largely nullified by the influx of aliens. Mr. Gladstone replied promising consideration of the complaint.

One hundred and sixty emigrants under the care of the Church Army sailed on the C.P.R. Lake Erie. A permanent situation has been guaranteed each emigrant.

Charles Devlin, M.P., says he knows nothing about the reference in an Ottawa cable, stating he is resigning his seat in the House to accept a seat in the Canadian Cabinet as Minister of Justice.

TENDERS FOR DREDGING

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Dredging St. Mary's River, Sault Ste. Marie, Ont.," will be received at this office until the 13th day of June, 1906, inclusively, for dredging in the St. Mary's River, at Sault Ste. Marie, Ont., according to a plan and combined specification and form of tender to be seen at the office of J. G. Sing, Esq., Resident Engineer, Confederation Life Building Toronto, on application to the Postmaster at Sault Ste. Marie, District of Algoma, Ont., and at the Department of Public Works, Ottawa.
Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.
Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, for six thousand dollars ($6,000.00), which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.
The Department does not bind itself to accept the lowest or any tender.

## ADVERTISING PAYS

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

gay me for what I know of my master—habits, speech, writings, seal, all. I can write so that the king of France will never know he is dead—never till I choose. He will send no other; no—not till he has found it out. But when he does, what then? Shall I escape his wrath? Shall I not be an alien, an exile from my country?"

Jarrat bent toward him and spoke smilingly in the arrogance of full blood:

"Is there no compensation even for that? Look, you! There be bright eyes in the middle plantation—bright eyes and red lips and little waists and soft ways. There are slender fingers to be kissed, and these fingers oft hold purse strings. Love is a pretty game, and by benefit of clergy 'tis sometimes wed with broad plantations that bring golden guineas across the water."

He laughed at the look the other gave him. "Zooks!" he cried. "Why not? Think you the proudest of them all would not blush to be wooed by a noble? There are few 'my lords' in the valleys."

M. Armand sprang up, pushed the shutters of the window wide and leaned out, drawing a deep, long breath. Dark was come down over a moonless vast flooded with waves of bishop's purple, to which trees lent a deeper mystery of shadow. When he turned his face was tender, his eyes luminous.

"Virginia ladies," Jarrat continued, "are as proud as any court dames. They have the St. James sniff for the commoner. But 'tis yours to choose from them all as you use your wit."

"Mine to choose," the young foreigner said as if to himself—"mine to choose!" He looked out again into the dark, while his tempter smiled discreetly behind him. "But to win—is it always to keep, monsieur? Some time—some time the truth must come to light. She whom I would win must love me. Would she love me then?" He spoke low, rather to the outer silence than to the other.

"Pooh! When a woman has once wed think you it matters whether her

"Louis Armand is gone away, monsieur," he said.

husband be a hero or a rogue? When the game is over the heifer is in the stall, and there's the commission to console her. Bethink, too, that the game is honored by the governor's approval. 'Tis a crown service, done at the solicitation of the royal governor. We shall presently set out for Winchester, where he lies with the troops. He shall guarantee this betimes there. What say you?" Jarrat's voice was contemptuous.

M. Armand turned from the darkness, his look suddenly changed. "Yes," he said slowly, "I will do it."

His visitor rose with a covert twist to his lips. "You have decided well," he said. "You have the assurance to succeed too! To flutter the farthingales you will need money, of course."

"Money?" the other smiled. "And me the Marquis de la Trouerie? Talk of money between gentlemen? Plenty of time for that—afterward."

"Better and better," said Jarrat, the old sneer returning now that the game was won. "It bespeaks good faith. I hope you shared your master's gold with our honest skipper, Elves. But you will need brave clothes. 'Tis not too much you look like a marquis at present."

M. Armand laid his finger on his lip laughingly. "Ah, that is my secret. Clothes!" He crossed to the chest, unlocked it with a key from his pocket, threw it open and began with rapidity to take out coats, waistcoats, short clothes—all of beautiful texture and heavy with lace.

"Clever robber!" said Jarrat admiringly under his breath. "A neat plucking of a useless cadaver!"

The secretary laughed gayly as he took out these, with a ribbon of foreign orders and a sword.

"Clothes!" said he again. "Let me see which I shall wear." He was lifting the exquisite garments. "I beg monsieur will turn his head away for one moment. Comme ca!"

He called to imaginary body servants: "Alphonse! My waistcoat! The flowered one—that is right. Now my coat. Vite! My sword belt, Pierre. Bo! The fairest lady in the world would be pleased with that. Now M. le Capitaine!"

Jarrat, looking around, could scarce repress a cry. The gray coated figure was no more. In its stead a vision invested in pale rose satin, with gold chain, jeweled and smiling, stood before him.

The secretary raised the sword and gave Jarrat the fencer's salute.

"Louis Armand is gone away, monsieur," he said, lifting eloquent shoulders. "Henceforth behold in me M. le Marquis de la Trouerie, noble of France, messenger of Louis XV!"

CHAPTER VI.

On a hazy afternoon following Jarrat's stroke of diplomacy a Berlin chaise, in lieu of the ruined chariot, bearing Mrs. Tillotson and Mistress Anne on a visit to Berkeley, drew through Ashby's Gap, along slopes spotted with clumps of lilac and goldenrod.

Francis Byrd rode beside the window, for he was to join Lord Dunmore at Winchester, whither the governor, in a burly fit of rage at his recalcitrant burgesses, had betaken himself to await the gathering of troops from the northern counties for the expedition

(To be continued)

### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

### SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the *settler* must *give six months' notice* in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

### SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be required by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of a royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 47 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

THOS. PATTERSON & CO., Fiscal Agts.
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

## $5.00 DOWN
AND
## $5.00 PER MONTH

## On the Ground Ahead of the Boom

## Are You Often Bilious?

**Read This and Learn How To Prevent Attacks.**

Biliousness is merely a term applied to a condition that exists when the body is over-loaded with bile.

The complexion turns yellow, eyes look dull, pimples, itching and eczema break out, headaches are ever present.

Biliousness has two great causes, constipation and defective liver action.

When Dr. Hamilton's Pills are taken they not only correct the bowels, but act directly on the liver, regulating its bile secretion.

Unlike ordinary medicines, which purge and give temporary relief, Dr. Hamilton's Pills remove the condition which causes biliousness; thus permanent cures are effected.

Dr. Hamilton's Pills do cure Biliousness and liver ills under all circumstances.

We prove this by the statement of Mr. Penwick Luddington, of New Harbor, N.B., who writes "Three months ago I had no expectation of ever getting free from periodical bilious attacks. They were preceded by dizziness and dreadful headaches. If I stooped over my head would swim and a nauseous feeling crept into my stomach.

"Dr. Hamilton's Pills fixed up my liver, drove all the bile out of my blood and made me a well man in a few months. Today I enjoy good appetite, excellent digestion, and the best of good health. Dr. Hamilton's Pills did it all."

Get Dr. Hamilton's Pills today. Sold by all dealers; 25c. per box or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## LOCAL INCIDENTS

By The Times Man on the Street

—A meeting of the Board of Works was held last night.

—Wanted at once a woman to do cleaning. Apply at this office.

—Three large parcels of old papers at this office for only ten cents.

—For bargains in fancy goods and stationery, come to Times Bookstore.

—The Central Ontario Medical Association met yesterday evening in the Ontario Bank chambers.

—St. John's choir boys gave a concert in the church yesterday evening which was largely attended.

—The Boys' and Girls' Guild of All Saints' church will run an excursion via Sir Water Lily on Thursday evening, June 14th.

—E. W. Eloomfe, grocer, Campbellford has made an assignment for the benefit of his creditors, who will meet on June 6th.

—The house formerly occupied by Mrs R A Hamilton on Water street, has been taken by Mr. John Jayes, who is now occupying it.

—The annual roll call took place in Park street Baptist church last night. Tea was served, with Rev. A. H. Brace, pastor, presiding.

—The closing exercises of the Peterboro Conservatory of Music will be given in the Grand Opera House, on Wednesday, June 20th.

—The county roads and bridge committee met yesterday at Evans' bridge and inspected the work, which is in progress on the foundation and piers.

—In the Charlotte street vs. St. Paul's game in the Guild League, played last night on Riverside Park, Dusty took Amos McWilliam's place.

—A number of the Eko Club boys are trying to find out who took their yacht down the river on Wednesday afternoon and forgot to bring it back.

—The Fire, Water and Light Committee met last night for the purpose of locating several new electric lamps which are needed and which have been applied for.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—Mr Ray, of Ottawa, has purchased from Mr. Charles Pym, of Lindsay, the residence at 271 Sherbrooke street, occupied by Mr. Wm. Bletcher Mr. Ray will take possession in a few weeks.

—Last night a great-great-grandchild of one of the composers of part of the music rendered in St. John's church entertainment, took part in the program. The music was composed and written over one hundred years ago, and the child 14 years of age.

### 15-DAY NEW YORK EXCURSION

**Via Lehigh Valley Railroad, Friday June 15th.**

Tickets only $9.00 round trip from Suspension Bridge, Niagara Falls. Tickets good on regular express trains leaving at 1.50 and 7.15 a.m., 7.15 and 5.49 p.m. Don't fail to go. For tickets, Pullmans and particulars, call on or address Robt. S. Lewis, Passenger Agent, L. V. R., 10 King street East, Toronto.

### St. Luke's Chancel Guild Officers.

A meeting of the Chancel Guild of St. Luke's church was held on Wednesday afternoon. The resignation of Mr. A. O. Sawyer, who is leaving the city was accepted. Mrs. Roland Dentse was elected president, and Miss Eva Nesbitt, secretary.

### Omemee Parson's Salary Raised.

Rev. J. H. Toney, rector of Christ church, Omemee, has decided to remain in charge of the parish. The Bishop of Toronto declined to accept his resignation and Mr. Toney's stipend has been raised from $650 to $1,000 a year, with a free house.

### Meeting of Sunday School Teachers.

The usual weekly meeting of the Primary and Junior Union of Sunday school teachers will be held this evening in the Y.M.C.A. from seven to eight o'clock. Charlotte street Sunday school will be in charge and the lesson will be taught by Miss Thomas.

### Recruiting for 24th Field Battery

Mayor Young will be at the drill hall tonight to enroll men for the 24th Field Battery. All those desiring to join should apply. The major received word from the department at Ottawa yesterday stating that the gunn and equipment will be forwarded here within a few days.

### East Ward Must Keep the Law.

East ward householders do not yet seem to recognize the duties that enrollment in a city's privileges and trials seem to involve. Eight more east ward residents came up before the magistrate yesterday morning for violating the health act, including a Celestial washee washee.

### Peterboro Canoes at Cobalt.

Canoes are in great demand in Cobalt and vicinity, just at present by prospectors, miners and others. Where canoes are used, Peterboro is a familiar word. The Peterboro Canoe Company has shipped over 150 canoes to Cobalt. They were of various types and included nearly every design of canoe made by this company.

The Peterboro Canoe Company has been exceedingly busy this spring, canoes being shipped to all parts of Canada and the United States.

### Poisoned Dog Has a Relapse.

It was noted in The Times of yesterday's issue that Dr. Poole, V.S., Water street, had a valuable collie dog poisoned, but saved in time on Wednesday. Yesterday the dog had a relapse and for a time it was feared that he was going to go over the "Great Divide." The dog was writhing on the lawn when discovered and would likely have died had his master not taken him in hand, and relieved his sufferings.

## SOCIAL AND PERSONAL

—Mr. Thos. Fortune was in Toronto yesterday.

—Mr. H. Lefbrun was in Toronto on business yesterday.

—Mr. Bert McCollum is spending a few days in Orillia.

—Mr. J. A. Vandervoort, of Kingston, was in the city yesterday.

—Mr. Geo. Davey, of Meaford, is registered at the National.

—Mrs. W. C. Austin and Miss Austin of 100 Weller Street, will not receive again till the first Thursday and Friday in September.

—Hastings paper: Mr. Jas Noonan of Peterboro, was in Hastings on Victoria Day—Miss Maggie Perault, of Peterboro, visited her mother on the holiday.

—F. G. Soper, Toronto; W. H. Geldhouse, Robt. L. Fairbairn, Montreal; W. A. Fisher, Hamilton; J. A. Gibb, Chas. A Liffton, Montreal; F. J. Elsbon, Toronto; W. McK. Barlow, Montreal; V. L. Cote, St Hyacinth, are guests at the Oriental.

—Yesterday a new traction engine and power threshing machine, with patent blower, arrived by G. T.R., consigned to Mr. David Smith of the 10th concession of Smith. It will be used on its purchaser's farm and rented to other farmers.

—Mr. Alex. J. Grant, the new superintending engineer of the Trent canal, accompanied by his wife and son, are at the Oriental. They will take up residence in the Grand Central chambers, in the rooms lately occupied by Mr. and Mrs. L. D. Oakley.

### Only 45c. On $ to Shareholders

**Creditors of Defunct Sugar Co. Will Soon Know Where They Are At.**

As noted in a former issue of The Times Judge Weller has, for some time been looking into the affairs of the now deceased Peterboro Sugar Co., which is being wound up under the provisions of the Ontario Companys' Winding-Up Act.

It has also been noted that Ald. Frank Adams is the liquidator, and Mr. R. E. Wood is solicitor for the liquidator. Mr. A. P. Poussette, K. C., and Mr. J. W. Garvin, former managing director of the company, have been present to assist in seeing that all the claims are adjusted equitably. The building and land were sold some time ago to Senator Geo. A. Cox for $25,000. It is understood that the total liabilities of the company are about $35,000, of which there are some $13,000 in preferred claims which have to be met in full. Deducting the $13,00 preferred claims from $25,000 (the amount realized for the property) leaves $12,000 to meet the remaining claims. The expense of winding-up, legal and liquidators fees, have to come out of this, so that it is reported the ordinary creditors will be paid about forty-five cents on the dollar. This matter, there is reason to believe, will very shortly be settled finally.

### Mr. F. Cunningham Here Again.

Mr Frank Cunningham, who has been in Winnipeg since July last, has returned to the city and will re-enter the employ of the Dominion Express Company. Mr. Cunningham has been in poor health, but is recovering. His old friends are glad to meet him again. He met a number of former Peterboro citizens in the Manitoba capital, and reports that they are all doing well.

### Will Visit Old Country.

Mr. and Mrs. Henderson, of Norwich, arrived in town on Wednesday, and are the guests of their son and daughter, Mr. and Mrs. A. W. Cressman, Brock street. Next week Mr. Henderson leaves for Montreal, where he will embark on a trip to England and Ireland, for the benefit of his health. Mrs. Henderson will also leave in a few days for the Northwest, on a visit to her daughter, Mrs. Mills. Their many friends in Peterboro, join in wishing them each a pleasant voyage and safe return.

### Here's Just the Right Bowel Laxative

**Gentle, Sure—Pleasant to Take—A Tried and True, Genuine, Nature's Remedy.**

If you do not have free, easy and regular movements of the bowels you lack the prime and first essential of good health. There's more harm done than many realize by constipation and biliousness. Poisonous products of food wastes in the bowels are absorbed into the circulatory system—the blood—and carried to every organ instead of a fountain of pure life and new vitality. The life of constipation are not living but merely always dying. Headaches are frequent with vitiated blood, sallow complexion, foul breath, coated tongue, etc. Nature's relief is Dr. Hamilton's Pills. Nature's gentle, natural aid of Lax-ets. Be sure not to confuse Lax-ets with harsh, violent purgatives which force and exhaust the delicate organs of the stomach and bowels. Avoid all the danger of powerful drugs and unknown medicines! Your safety and your health are always assured—if you take Lax-ets. The formula is on every box—show it to your family physician. Lax-ets are put up in a flat metal case in handy tablet form—one tablet taken before meals or on retiring always brings relief. Planning to take the most potent yet gentle of all remedies—a genuine help of Nature's own—is a decision which carries consideration. Recommended and for sale by

5 Laxets Only 5

## Dr. Pierce's Favorite Prescription

Is a powerful, invigorating tonic, imparting health and strength in particular to the organs distinctly feminine. The local, womanly health is so intimately related to the general health that when diseases of the delicate womanly organs are cured the whole body gains in health and strength. Nor weak and sickly women who are "worn-out," "run-down" or debilitated, especially for women who work in store, office or schoolroom, who sit at the typewriter or sewing machine, or bear heavy household burdens, and for nursing mothers, Dr. Pierce's Favorite Prescription has proven a priceless benefit because of its health-restoring and strength-giving powers.

As a soothing and strengthening nervine, "Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea, or St. Vitus's dance, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the womanly organs. It induces refreshing sleep and relieves mental anxiety and despondency.

Cures obstinate cases. "Favorite Prescription" is a positive cure for the most complicated and obstinate cases of "female weakness," painful periods, irregularities, prolapsus or falling of the pelvic organs, weak back, bearing-down sensations, chronic congestion, inflammation and ulceration.

Dr. Pierce's medicines are made from harmless but efficient medical roots found growing in our American forests. The Indians knew of the marvelous curative value of some of these roots and imparted that knowledge to some of the friendlier whites, and gradually some of the more progressive physicians came to test and use them, and ever since they have grown in favor by reason of their superior curative virtues and their safe and harmless qualities.

Your druggists sell the "FAVORITE PRESCRIPTION" and also that famous alterative, blood purifier and stomach tonic, the "GOLDEN MEDICAL DISCOVERY." Write to Dr. Pierce about your case. He is an experienced physician and will treat your case as confidential and without charge for correspondence. Address him at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., of which he is chief consulting physician.

## Rare Chance for a BEAUTIFUL HOME

We are instructed by MR. C. B. McALLISTER to sell his entire property in East City, consisting of:—

### No. 1.

His beautiful Residence situated on Roger street and known as ENGLEBURN PARK containing 5 acres of land, about three of which have been laid out in choice Building Lots, some fronting on Burnham Street and others having a commanding view of the River. The balance of about 2 acres is included with the House, a large lawn beautified by choice shrubs and ornamental trees, nice garden with choice fruit, also first class stable and carriage house.

### No. 2.

A block of land containing about 3 acres with two splendid Houses, situated on the corner Burnham and Maria streets and known as the property of the late John Burnham. This has recently been subdivided into Building Lots.

Also his Summer Home situated at Mount Rascal, on Clear Lake, containing 8 acres of land and Cottage furnished throughout, also Ice House filled with ice. This we have for sale, or to rent at a reasonable rent for the season or by the month.

As Mr. McAllister intends removing from Peterborough we are authorized to dispose of his City Property en bloc or divided as per Plan at our Office.

Price and full particulars on application.

### DRAW ATTENTION TO THE "NEW THEORY"

### Over 75% Winners

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $15,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interests of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season since shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your income consistently showing you 8% full earning capacity, which was the greatest secret of Pittsburg Phillis' wonderful success.

The "New Theory" MUST beat the races continuously and substantially. There are no "ifs" and "ands" and we stake our reputation on same.

### What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the race-track, poolroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

### What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or chokers. We often win on horses at 3, 4, 5, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

### NOTE—

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

### RESULT—

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

### ABSOLUTELY INFALLIBLE

It earned $50,000 for the originator last season in four months, $63,000 two years ago, and $67,500 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successfully whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 100 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Nothing of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

### NOTICE:

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)
Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

### GUARANTEE—

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours: 9 a.m. to 9 p.m. Sunday by previous appointment.

## Local Lady Died in St. Clair River

### Mrs. George Reid, Formerly of Dublin Street Drowned in Steamship Collision, Her Son Escaping.

Yesterday Mrs. Valentine Fair, corner of Dalhousie and Stewart streets, received a telegram from Spanish River, conveying the sad intelligence that her sister, Mrs. Geo. Reid had been drowned in the recent terrible ship collision on the St. Clair river.

The remains of the deceased, accompanied by her husband and 13-year-old son, Harold, arrived by the C.P.R. midnight and were taken to Mrs. Fair's residence.

The late Mrs. Geo. Reid, who some three years ago, resided on Dublin street, this city, was well and favorably known by a large circle of friends in the city. Her maiden name was Mary Bennett.

Besides her husband and one son, as noted, there are left to mourn her loss, her sisters Mrs. V. Fair, Mrs. E. Windover, Harvey, and Mrs. Pearson of Rutherford avenue, and three brothers, Messrs. N. Bennett, east ward, David and Fred Bennett of Harvey township.

The exact date of the funeral was unable to be procured last night, but will, either take place today or tomorrow, and proceed from Mrs. Fair's residence to Bridgenorth for interment.

It might be noted that Mrs. Reid and her son were on the boat that was sunk in this collision when a large number of passengers lost their lives. The boy was saved and first telegraphed the sad news from Chatham, it being again sent on her from Spanish River.

## The Cost of Our City Lamps

### Peterboro Gets Her Street Lighting at Very Reasonable Figures.

In our issue of yesterday, by wrong information supplied us, we quoted the prices paid by this city for street lighting, saying that the Peterborough Light and Power Co. charges the city $45 per arc lamp. We compared these prices with those paid for the same class of lamps by the City of Buffalo, the comparison showing apparently that our local prices are high.

Now the figures quoted in our article, as regards this city, were incorrect, and consequently, by inadvertence, did the Light and Power Co. an injustice. The prices paid for street lighting in this city amount to only $50 a lamp per year. The company pays the city a poll rental of $100 a year, so that the net price received by the company is really only about $45 a lamp per year. By comparison with prices paid in other cities, Peterborough gets her street lights at a very reasonable rate.

## Inconvenience By Smith St. Bridge

### Messrs Curtis Bros. Alone Losing $1,000 a Year By Longer Hauling.

Much inconvenience is being caused by closing of the Smith street bridge. Yesterday Mr. Charles Curtis called up The Times in connection with this matter. He noted that he is now delivering bricks from their yard, in the East Ward, to the north end of the city. He has now to bring his heavy wagon loads of brick around by the Hunter street bridge. He estimates that the closing of the Smith street bridge will cost him $1,000 this year in extra time and cartage. Other people who have much carting to do have also complained to The Times about this bridge being closed.

A prominent contractor, who has looked into the matter, says this bridge could be made to last for several years for comparatively little money. At all events, ordinary horse-sense would indicate that the old bridge should be kept up until the new one is ready to be erected.

## A Prosperous Local Industry

### Messrs Curtis Bros. Get Large Contract From Queen's University.

Messrs Curtis Bros., the well known local brickmakers, are rapidly increasing their business. Their bricks are now to be found in many of the towns and villages between Toronto and Ottawa. A few days ago Mr. Curtis received an order from Queen's University, Kingston, for 500,000 of their white bricks, to be used in the new gymnasium of that seat of learning. Last week one of the university staff visited Messrs. Curtis' brickyards, and after a look through the premises and material, at once placed this order.

It may not be generally known that probably one-third of the buildings in Peterborough are built with brick from Messrs. Curtis Bros. yards.

## West Peterborough Farmers' Institute

### Annual Meeting in Council Chamber June 14th.

Notices have been issued by Mr. Wm. Collins, secretary of West Peterborough Farmers' Institute, to the effect that the annual meeting will be held in the City Council Chamber on Saturday, June 16th, at one o'clock for the election of officers.

The following is the program of the meeting:

President's report.

Discussion thereon.

Report of Executive committee and financial statement by Secretary-Treasurer.

Auditor's report.

Suggestions as to points at which to hold regular and supplementary meetings.

Election of Directors and of Auditors.

Suggestions as to how the Institute can be improved or made more useful.

All members, and especially the Directors, are urgently requested to bring along some of their neighbors and friends and get them to join the Institute.

## New Police Bylaws Now In Force

### Commissioners Consider Matters Affecting Cabs and Other Rigs.

The Police Commissioners of this city have now decided to regulate the matter of second-hand dealers and of cabs and other vehicles, and, by request, we publish the regulations now issued by them, for guidance of the police.

Bylaw No. 1 is a bylaw to license and regulate the second hand shops in the city. The license fee was fixed at $10 a year. The bylaw affects goods or merchandise, worn, used or purchased for wearing or use, and no longer required by the person who first wore, used or purchased the same. The bylaw also includes wares or merchandise of every description obtained on pawn tickets, purchased or taken in exchange; and includes metals of every description under certain conditions. This does not include persons who deal exclusively in second hand household furniture, stoves, pianos, sewing machines or books.

The bylaw forbids the license holder from buying from anyone under 18 years old, or under influence of liquor. The license holder must keep a book provided by the city, and used for no other purpose, in which he shall enter every purchase made with full particulars therewith connected.

Any person convicted of a breach of the provisions of this bylaw shall be liable to a fine not exceeding $50 for each offence, exclusive of costs, or six months in the common jail.

VEHICLE BYLAW.

Bylaw No. 2 places a license on all persons having for hire, cabs, carriages, omnibusses, tally-ho coach or dray or any other vehicle.

The fees to be paid for licenses issued under this bylaw shall be as follows.

For each cab drawn by two horses, the sum of $6; one-horse cab, $4.

For each automobile, capable of carrying two or three persons, $4; four or more persons, $6.

For each omnibus belonging to an hotel, $5.

For each omnibus or other vehicle for the conveyance of passengers, $6.

For each tally-ho coach, $10.

Transfer of license, $1.

Every licensed vehicle, licensed under this bylaw shall be provided with a number to be placed on such vehicle and such a badge to be worn by the driver.

All licensed cabs shall travel at the rate of six miles an hour, unless otherwise requested by the passengers.

The following shall be the tariff of charges for cabs and omnibuses and tally-ho coaches in the city of Peterborough.

Hotel omnibuses, between noted and steam boat landing or railway station, each person 25 cents.

For other omnibuses, from any place to any place on its route, each person, 5 cents.

For tally-ho coaches, for one hour, not to exceed two, each person $1; each subsequent hour, each person 50 cents.

For two-horse cab or automobile for four or more persons (by the hour) for first hour, one to four persons, $1; each subsequent hour, 75 cents, and for each additional person, 25c. For the day, of nine hours, $6.00.

One horse cab or automobile, for two or three persons, first hour, 75 cents; each subsequent hour, 50c; each additional person 25 cents, for the day of nine hours, $4.

The charges for cabs after twelve o'clock at night until 6 a.m., shall be one half more than regular tariff.

Children under eight years, in charge of an adult: free; over eight years to 12 years, 1-2 fare, and over 12 years full fare.

Baggage—One trunk and articles placed inside the cab to be carried free.

Any infraction of this bylaw may be punished by a fine not exceeding fifty dollars or six months in jail.

## Work Progressing on Gas Holder

### Gang of Men Engaged in Excavating for 150,000 Ft. Holder.

Under the strenuous management of Mr. J. H. Larmouth, managing director of the Peterborough Light & Power Co., work on the new gas holder is being rapidly pushed forward.

Already the former residence of the gas maker at the local works has been torn down and removed. In its place a large gang of men are excavating for the new and large gas holder. The new holder will have a capacity of 150,000 cubic feet of gas, as compared with the present holder, which contains, at utmost, capacity, some 28,000 feet. The excavation for the new holder will bring its lowest level even with the works at the foot of the hill. Those familiar with the location can easily judge the extent of the new holder. The new holder will be telescopic in form; i.e., unlike the present holder, which is simply one receptacle of sheet iron, the new one will consist of either two or three, one inside its outer covering, which, when filled with gas, will rise from the center, as do the various parts of a telescope when drawn to full length.

## A Golden Chance For Wealth

### Vanguard Mining Co. for a Limited Time Offering Snap to Investors.

In these days of numerous propositions offered the investing public in connection with "Get Rich Quick" schemes, it is well to thoroughly weigh every circumstance noted in the advertisements of such offers.

In another column of this issue appears an adv. of the Vanguard Mining and Extraction Co., whose property lies in Gunnison Co., Colorado. This advertisement is well worth careful attention and future reference as the company seems, by every indication, to have one of the most promising mines on the continent.

A few of the features of the Vanguard Mining Co. that appeal to careful and conservative investors, are as follows. Their property is fully paid for, and the company has no debts; there is no staff of high salaried officials; they own ten full claims with water power, timber and cheap railroad shipping facilities and above all veins, not in possibility but actually located running to six feet in width, that assay up to $200 a ton in gold, silver, and galena. For full particulars those wanting an investment that will, in a short time probably pay enormous dividends, should see what the property is, by writing or calling upon Messrs. Thos. Paterson & Co., fiscal agents, Peterborough, or H. Bruce, Secy. and Treas., Box 104, East Islip, New York.

The tunnel of this mine will cut four good veins in 100 feet. At a depth of 10 feet these veins show pure quartz, much oxodized and of high value; the veins inside the trench showing two feet. Dead, and consequently expensive work is fortunately saved by the numerous veins.

## POLICE NEWS

### Daily Happenings in Court Room and Station.

Yesterday the police court opened with the trial of Geo. Rickerby charged by Mr. Wm. Eyre with having obtained $15 from him under false pretenses. Mr. Eyre's evidence went to show that he had rented a piece of pasture land known as the Sullivan farm in Douro, from Rickerby, last January, and that he had handed Mr. R. McWilliams $15 at the time to pay to Rickerby for part rental. A short time ago he had been notified to remove his cows from the land as Rickerby had no authority to rent the property, he not owning it.

Mr. McWilliams who acted for the prisoner, acknowledged having paid the $10 to Rickerby.

Mr. Morrow, the county registrar, went into the box and produced the deeds of the property, showing the sale and transfer of the lots, during 1905 from defendant to other parties.

Mr. Davidson of Hall, Medd and Davidson testified to having recently rented the property to Mr. O'Connell. There had been a house on the property which some little time ago mysteriously disappeared. The property had been mortgaged by prisoner to Mr. J. R. Stratton, and after the interest fell two months behind in payment, acting for Mr. Stratton, he took proceedings to dispose of the land.

Mr. R. Hay, gave evidence as to deeds of the property when in Sept., 1905, the defendant sold it to John F. Rickerby.

Other evidence went to show that possibly Rickerby had rented the property to Mr. Eyres after he had given up all title to it.

The magistrate then committed Rickerby for trial before the county judge.

At this juncture Mr. R. E. Wood made out an information, sworn to by Chief Roszel, charging Rickerby with perjury. The information is based upon a paper Rickerby is alleged to have sworn to before Judge Weller, in connection with the property deal, and which it is alleged was known by Rickerby to have been false.

The case arising out of this serious charge was enlarged until Tuesday, June 5th. Mr. McWilliams brought up the question of bail, whereupon his Worship said, "If you get two responsible real estate owners in the sum of $500 each, we might allow the bail. In the meantime Rickerby is confined in the county jail.

## Sherring Asked to Join Circus

### Cole Bros. Offer Great Hamilton Athlete $150 a Week.

Mr. L. M. Harris, general press agent of Cole Bros. United Shows, which exhibit here on June 6th, is in the city, and last night gave The Times a call. During a conversation with Mr. Harris, he informed The Times that, whilst in Hamilton on Thursday he made a personal call upon Sherring who won the great Marthon long distance race in Greece.

Mr. Harris offered, on behalf of his circus to give Sherring $150 a week to accompany the show and compete in a horse vs. man running race.

"Mr. Sherring," said he, "I have an offer to make you. The Cole Bros. circus is willing to pay you handsomely to engage with us. What we want you to do is this; Run a race say of five miles, against a horse that we shall furnish, at our performances. The contract shall be for the whole season. Will you accept?"

Sherring declined. It was not that he did not appreciate the honor, but he said that he had become a government employe, and had absolutely quit running. "I shall run no more," said he, adding that his determination included even the running of exhibitions. He expressed his thanks for the circus offer, which is the crowning event of his career. He said that he might possibly have considered it were he not so tied up with engagements to pay visits that he had already accepted.

Mr. Harris, although a young man, is a proper hustler, and what he can't find good to say about Cole Bros. Circus could not be found by a high-class microscopic. He will remain in the city over Sunday, and will leave for Ottawa on Tuesday.

## J. J. Turner & Sons' Assessment

### Application to be Made for a Fixed Assessment on Monday.

It is well known to our readers that Messrs. J. J. Turner & Sons, the tent and awning factory men of this city, consider that their factory is entitled to get a fixed assessment on their George street factory.

In this matter Messrs. Turner & Sons, think they have not received full justice or proper recognition of the benefit their factory confers on the city.

Yesterday a Times representative, by request, made a thorough visit to Messrs. Turners' large factory. Without commenting upon the rights or wrongs of the council's action in connection with this request for exemption privilege, it may safely be said that the Times' man was simply astonished at the busy hive of industry located in Turners factory. Every square foot of this large building, from cellar to garret, is occupied by busy, intelligent and contented employes.

A look through the pay list of Messrs. Turner & Sons disclosed that, outside the members of the firm, over fifty hands are employed, mainly heads of families and skilled workmen. There are of course a few women employed, but most of them as shown by the pay lists, earn more money perhaps than paid by any factory in this city.

One point as disclosed by the books of the firm is that this factory is not busy part of the year, and then partly closed down; on the contrary the factory runs at full strength all the year round, and during a good part of the year overtime, i.e., until 10 p.m., six nights out of the week.

The pay roll, as shown by the books averages $1600 a month or nearly $20,000 a year. The goods by Messrs. Turner are not, excepting a very small minority for home consumption but are shipped daily to all parts of Canada, from ocean to ocean; even large shipments are constantly being sent Great Britain as well as to other European countries, and the United States. These goods, like "Petgboro Canoes," are constantly advertising not only Messrs. Turner & Sons, but this city. Messrs. Turner assert that there are factories in this city which do not employ as many skilled workmen, and whose pay rolls do not begin to compare with theirs, which are given a fixed assessment, more reasonable than asked for by them.

## Is the Opera House Safe?

### Bricks and Mortar on North Wall of New Building.

Whilst it is considered yellow journalism to create excitement by undue means, there are circumstances by which a newspaper is impelled, in the public interest, to bring before the public facts which have, or may have, a direct bearing upon the public's health or safety.

Without any desire either to pose as an alarmist, or to seem to act contrary to the interests of the new opera house erected in this city, The Times feels it a duty to call for an investigation, or, at least, an explanation, of the undeniable fact that the north wall of the opera house shows evident signs of disruption.

Any man, let him be ever so unskilled in architecture or in the matter of buildings, cannot but see that the north wall of this building shows evident signs of being badly impaired.

Most of our readers are aware that this wall rises to a height of, say, four or five stories, without any buttresses or supports. Just about the centre of the wall, about 15 or 20 feet from the roof, the bricks are already showing a bad break and are pushed out quite a distance from the perpendicular of the wall.

Now, in this house there are often gathered from 800 to 1,000 people. Suppose this wall were to give away and the whole opera house were to collapse. What would be the result? It would mean that crape would hangs from the doors of many of our local residences; it would mean that thousands of our citizens would mourn the loss of friends and relatives, killed or wounded by a perhaps parsimonious management which did not take precautions or spend the money to make a place of public resort safe.

It seems to us that it is now in order for the management of the opera house to explain this bulging wall or take precautions to have this evident defect remedied.

Yesterday a Times representative interviewed several contractors regarding this suspicious looking bulge, their opinion generally was that immediate steps might be taken to obviate this possible danger. A Toronto contractor, interviewed, said that the best thing to do in such a case was to have iron bars, with large washers outside, put through the building to hold it together.

In any case, public safety demands that something be done and done at once, as we do not want to have a catastrophe here approximating that of the Iroquois theatre, Chicago.

## GAIN IN CUSTOMS

### Local Seat of Cesser Doing a Rapidly Growing Business.

Peterborough's business as indicated by the financial barometer, the custom house returns is increasing.

The customs house returns for the port of Peterborough for the month of May show a large increase over the receipts for the corresponding month last year. The returns for the past month total $38,900.90, as compared with $18,346.61 for the month of May last year, an increase of $20,554.39. The returns for the month of April this year were in the vicinity of $31,000.00.

## THE JURY DISAGREED.

Vancouver, B.C., June 2.—The first jury at Kamloops having disagreed in the train robbing case, the second trial of Edwards Dunn, and Colquhoun commenced yesterday. The Crown will introduce some fresh evidence, and expects to finish before Saturday night. It was just before daybreak that the foreman of the jury, which had been hearing the case for the past three days, announced that there was no hope of coming to an agreement. His Lordship said there was nothing to do but discharge them. Eleven men believed the charge proved against the alleged bandits. The twelfth man is understood to be a Socialist, who has often expressed the opinion that no poor man should be sent to prison.

## Smith St. Bridge Will Be Repaired

### At Once. Construction of a New Bridge Considered to Be Too Expensive a Job at Present For City's Finances--Street Extension Still in Abeyance.

The Board of Works met in business session last night when there were present, Chairman Ald. Hicks and Aldermen Frank Adams, Graham, Wilson and Geo Elliott.

The Board decided to put another cement crossing across George at Smith street, south side.

SMITH STREET BRIDGE.

In connection with this matter, the city engineer reported that a new steel structure on concrete abutments would cost $37,200, not including removal of old bridge which could be disposed of as salvage.

Ald Elliott moved, seconded by Ald. Graham,—That the city engineer be instructed to have the present Smith street bridge repaired.—Carried.

INSPECTION OF WIRES.

Mr. Aitkins, electrical expert of Toronto, wrote the Board that he would be pleased to come here and examine the street line of our electrical power service, for a fee of $25 a day and expenses, which would include cost of necessary repairs and preparing of report.

Mr. Aitkins was communicated with with a view to secure a thorough practical examination of the electrical wiring of this city, arising out of the recent experiences from its natural channel, resulting in one instance in the death of Mr. Gibbs' valuable team of horses.

Ald. Hicks thought the money would be well expended in the safeguarding of the city from probable future damages should this matter not be looked into.

Ald. Adams moved, seconded by Ald. Wilson,—That the clerk was instructed to write Mr. Aitkins, stating the approximate number of poles on our streets, and the number of companies doing business, and ask for an estimate of how long it would take Mr Aitkins to make the inspection And that the chairman be authorized to employ Mr. Aitkins, if thought advisable.

SIMCOE ST. SIDING.

The engineer reported favorably on the matter of the Peterboro Light and Power Co., constructing a siding up Simcoe street to their gas works, which is to be extended. He admitted however that such siding would interfere with the laying of a sidewalk to the city's contemplated wharfs along the water front.

Ald. Hicks said it was a new departure to give the right of a street for siding purposes.

Mr. Meldrum, of the Peterborough Ceral Co., who is opposing the Peterborough Light and Power Co., thought there was nothing to prevent the latter company running a siding into their own property.

Ald. Adams thought the Board should not refuse the Peterborough Light and Power Company's request providing they cut the siding short at the end of their coal shed.

Ald. Elliott said the Board should safeguard the interests of the public in general.

Ald. Hicks wanted to assist any local industry as far as practicable, and where the interests of other concerns are not menaced.

Mr. W. H. Meldrum objected to a siding going on this street on the grounds that when the Peterborough Cereal Co., asked for a siding on the same street last year, Mr. Larmouth of the Peterborough Light and Power Company, opposed such a measure unknown to Mr. Smart, who had expressed to Mr. Meldrum in Chicago, his surprise at such an opposition on the part of his company. Eventually, the Peterborough Cereal Co. constructed their mill, run their siding in on the south side and provided for farmers' access to their mills on the north side on Simcoe street; they had asked permission to construct their siding. And, now Mr. Larmouth after successfully opposing the Peterborough Cereal Co. in the matter of a siding, comes to the council and seeks permission to run a siding up the same street for the use of his company. The granting of such a measure, Mr. Larmouth argued, would be an injustice to his company. As a private citizen, Mr. Meldrum objected on the ground that as the Government are about to construct an expensive wharf and pier at the foot of Simcoe street for the accommodation of Rice Lake boats, it would be an unwarrantable action to block ready access to such boats by allowing a siding to be run up Simcoe street, which will be eventually a main avenue to the river front.

Mr. Larmouth explained that last year he opposed the Cereal Co's. proposed siding up the south side of Simcoe street because it was contemplated raising such siding three or four feet, which would throw all the surface water on the side of the gas works.

Ald. Adams moved,—That the Peterborough Light and Power Co. be allowed to run a siding up Simcoe street, north side, on the same conditions as offered the Peterborough Cereal Co. last year, to build a siding up Simcoe street, and which they rejected; and also on condition that the C.P.R. give right of way across their tracks so said.

No seconder could be secured for this motion, and the matter was allowed to drop, without any action being taken.

POR INSPECTOR OF SEWERS.

Richard Regan, late of Montreal, Mr. Bartlett, Mr. W. White, all applied for the position of superintending foreman of the construction of the Water street sewer, north from Smith street.

On motion of Ald. Wilson, seconded by Ald Elliott, Mr. Wm. White received the appointment at a salary of $3 a day.

CHANGE OF LIGHTING SYSTEM.

The Peterborough Light and Power Co., wrote, saying that as they are contemplating changing their system of electric lighting, they would like permission to make necessary changes of poles or replacing of same, without appealing to the council from time to time through the summer as replacing or changing of poles are found advisable.

This request was granted.

This new system of lighting will permit the lamps to hang lower so as to secure a better distribution of light.

This company's request to erect poles on Dufferin street, and on south side of Charlotte street, west of Park, was referred to the city engineer, with power to act.

STREET EXTENSION QUESTION.

His Worship informed the Board that he would not consent to give a right of way from Aylmer street unless both that street and Aylmer St. are opened, and he could vouch that his neighbors would not neither.

Ald. Hicks opined that if the city opens but one Street, Aylmer is the most necessary, as work has already been commenced on the new school to be located west of Aylmer street, proposed extension.

To Ald. Hicks, his Worship replied that his offer of a right of way from George street stands good whether Aylmer street is opened or not.

His Worship did not like assuming the responsibility of undertaking the opening of both streets, and necessitating the carrying over to next year a liability of some $9,000 or $10,000 which would have to be added on to next year's rate. However, he had asked the solicitor to report on the legal phase of this question, Monday night.

Ald Adams offered that the city would probably have a surplus this year of $1,000 over the estimates, and would receive an additional $2,000 from the liquor licenses which was not looked for at the beginning of the year. This $6,000 could be applied to the opening of Aylmer St., at a cost of $9,000 or $10,000, leaving but an overdraft of $3,000 or $4,000 to be paid out of next year's revenue.

This question will be definitely decided Monday night at council's regular session.

NEW WALK GRANTED.

The petition of ratepayers for a new granolithic walk on north side of King street from Park street to Maitland avenue was granted.

## ATHLETIC WORLD

### BY OUR SPORTING EDITOR

LACROSSE.

Last night a large audience witnessed the first junior C.L.A. game at Riverside Park, between the Ontarios, of Port Hope and the Young Shamrocks. The Peterboro line up was;

Goal—Gilman.
Point—Seymour.
Cover—White.
1st defence—Dusty.
2nd defence—Doris.
3rd defence—Devlin.
Center—Tucker.
3rd home—Saunders (capt.).
2nd home—Johnson.
1st home—J. McNichol.
Outside home—Feeney.
Inside home—Donovan.

Mr. A. Miners, of Ottawa, was referee.

The game, considering it was the first of the season was well attended. The locals won out by a score of 5—2, and did so under commendable circumstances, as the Ontarios outclassed them in weight; good team play however was the game. Tucker and Dusty both did good work, as in fact did every man on the team.

The play at times was a little rough, but still all present saw a good exhibition of the national game.

BASEBALL.

Following are the results of Eastern League Baseball games played yesterday.

Toronto 2, Buffalo 0.
Montreal 7, Rochester 6.
Newark 1, Providence 3.
Jersey City 5, Baltimore 2.

• • • •

The opening games in the Canadian General Electric shop league will be played this afternoon on Riverside Park, with a double-header. The first game will be played at 2 o'clock between the machine shop, and the armature department, and the second contest will be called at 4 o'clock, between the tool room and brass department teams.

Fred Whitcroft will look after the trouble in the first, and "Billy" Warsm will boss the job in the second.

## CAN YOU RESIST DISEASE GERMS?

**Yes, and becomes "Germ-proof" by Driving Out Blood Humors and Restoring the System.**

Why are doctors and hospitals so busy in spring-time? Easily answered. People haven't made surplus vigor in the spring; it was all used up in fighting off colds through the winter.

With thin blood and low vitality, the germs of disease become active and cause fevers and debility.

Your one protection is to get the abundant vigor that Ferrozone so quickly supplies; it gives spring sickness that "tired feeling," restores nerve energy and instills vim and force into every ailing organ of the body.

No abler restorative is known than Ferrozone; its influence is not temporary but lasting, laying a sound foundation of health that lasts till old age.

Mr. Nazaire Begin, of Walton, P.O., Que., who received enormous benefit from Ferrozone, writes: "I cannot speak too highly in praise of Ferrozone. If any one had told me that any remedy could build up my nervous system so well, I wouldn't have believed it.

"Before using Ferrozone I was run down in nerve and vital energy, and in very weak health.

"I didn't get enough sleep at night and felt poorly in the day time.

"Ferrozone has filled me up with energy and vim, increased my weight and made a new man of me."

Your health through the summer depends on clearing away all traces of spring sickness; the remedy is Ferrozone. Sold by all dealers, 50c. per box, or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read througbout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

## DISTRICT NEWS

### CHANDOS

—It is a late spring, but at last the farmers have finished seeding. The trees are all out in leaf once more, and the woods look green and lovely.

—The cottage at Loon Lake, which is being erected for the summer campers, is progressing rapidly, and when finished will be up-to-date in every way.

—There is talk of a yacht being on the lake for the summer, Mr. Charles R. Hawkes as proprietor. Chandos is coming to the front.

### INDIAN RIVER

—Mr. Gilbert Elmhirst did not spend last Sunday at home.

—Mr. Patrick Torpey shipped a carload of beef cattle and veal calves from here on Thursday last.

—Mr. Joseph Clancy and sister, of Percy, spent a couple of days last week visiting friends here.

—Messrs. Charles and Joseph McNulty, and their sister, Miss May, were visiting friends here on Sunday last.

—The bachelors' meeting, which was to be held on June 1st, was laid over until a call from the president. In order to show their activity as sports they met and defeated the local football team by a score of 2—0, in one of the roughest games of the season. The teams lined up as follows: Bachelors—Goal, F. Devlin; backs, M. O'Leary, D. Devlin, halves, A. Fife, A. Quinlan, F. Cavanagh; forwards, J. Sullivan, C. McNulty, W. O'Leary, J. Foley, W. O'Brien. Indian River—Goal, Gib. Elmhirst, backs, Frank Elmhirst, W. Robinson, halves, T. Whibbs, T. Elmhirst, Andy Evans; forwards, Frank Sullivan, H. Nelson, J. Knight, W. Wright, Tom Dickson, Wm. Breckenridge. The bachelors' strong defence made it invincible for the locals. Devlin was very seldom called upon to stop anything which seemed dangerous. Fife played his usual game and with a little more practice he intends to play a friendly game with the Norwood champion team.

### KEENE

Another monster meeting was held on the park on Tuesday night by the Sons of Rest. The attendance last week was 105; this week 120. The president took the chair at eight o'clock and opened the meeting with prayer. After the roll call Minney Wale rose to his feet and thanked the members for the interest which they were taking in the meetings. He said that he had ascertained from personal experience that it paid to have good material at the head of any society. Excuse me for making the remark, but judging from the good attendance at the meetings, I must be made of the very best of material. Fighting Archy told him that no person but himself thought so. Minney Wale threw his cane at Archy, but missed him and broke ten panes out of the window and struck a boy on the head inflicting a nasty wound on his eye. After Archy dressed the boy's wound, he informed Minney Wale that he would be even with him the first time he ran across him on the street. Oh! says Minney Wale, we often hear owls screeching before a storm. Archy shook his fist at him and took his seat. Minney Wale now told the brethren that the meeting was open for general business. Ockalow Elliot rose and said he had a charge to lay against Shoemaker Clark for leaving a peg in his boot. The president imposed a fine of sixty dollars or six months in jail. Montgomery McCarthy laid a charge against Engineer Mac for singing songs in his sleep, disturbing all the occupants of the tent. The president fined Engineer one thousand cents, to be paid this week or one hundred days in prison with hard labor. Tom Dewackey laid a charge against Pauline Legge for digging drains without a license. He was fined twenty cents, to be paid next week. Ponty Mac laid a charge against Howden Davis for throwing a pail of water on a cat. The president fined Howden fifteen dollars, to be paid at once. He paid the fine. Pokey Moore laid a charge against Farmer Taylor for driving furiously on our streets, endangering the lives of pedestrians. The president imposed a fine of one thousand dollars on Taylor, to be paid in four days or imprisonment for life. Buckeye Carter laid a charge against Ockalow Elliot for putting four frogs in his hook and six fish worms in his vest pocket. The president fined Ockalow fifty dollars, to be paid in one week or two weeks in Central prison. Yankey Mac laid a charge against Montgomery McCarthy for driving a team of horses and wagon over the park. Minney fined Montgomery one hundred dollars, to be paid in three days or six months in Mimico. Fatty Drummond laid a charge against Floridale Dixon for wheeling to Keene on Saturday night for the purpose of purchasing two plugs of tobacco and whistling while passing a certain lane. The president fined Floridale forty dollars and seven cents, to be paid in two days or he would mortgage his bike. Wolf Howson now began to yawn and intimated to the president that it was time to close. Minney Wale asked Fatty Drummond and Farmer DeKeefe to sing the closing ode. They sang until the pickets on the graveyard fence began to tremble. The president cried quit and then closed the meeting until next Tuesday evening at eight o'clock sharp. God Save The King.

### Parole System in Canada.

Ottawa, June 1.—In his report to the Minister of Justice, Dominion Parole Officer W. P. Archibald gives the result of the work of the system with prisoners. Mr. Archibald gives a summary of the work done since 1899 up to 1905, which shows that out of a total of 713 prisoners released from penitentiaries and 370 from prisons, gaols, etc., on parole, 657 sentences were completed on parole, 76 licenses were cancelled for non-compliance with parole regulations, 125 sentences are not yet terminated, and 24 licenses were forfeited by subsequent convictions proved worthy of the privilege, and 98 per cent. have so far respected the conditions of their parole, with part of their sentence yet to run, leaving a comparatively small percentage of those who have or who may, abuse the parole privilege.

### Prefers Girl to $10,000,000.

Portage, Wis., June 1.—Coral Raymond Fuller, 21 years old, who has been toiling on a farm for wages to such good effect that he managed to save enough to establish a little home of his own, now has to choose between Miss Cora Tilden, of Detroit, whom he is to marry in the fall, and $10,000,000. He says he will take the girl. The fortune was left to him by his grand-uncle, Coral de Raymond, of Paris, on condition that he shall not marry before he is 26 years old, on pain of forfeiture of four-fifths of the estate. Young Fuller says he will wed the girl at once and try to get along on $2,000,000.

### Will Visit the Fatherland.

Montreal, June 1.—Fifteen families of Germans have arrived from the West on the Winnipeg express, and will sail this week for their old homes. They looked prosperous and there was a spirit of rest among about them all. When asked why they had decided to leave Canada and go to Germany, one of them replied:

"Oh, we come back. We go home for few months to visit our fathers and mothers, and we come back this fall."

To another question he said: "We make lots of money here. Canada is the greatest country in the world, but we want to see our parents before they die. Perhaps some of us will bring them to Canada."

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Hoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

### Estimating a Horse's Height.

The Arabs have two methods of estimating the height to which a colt will grow, the first being to stretch a cord from the nostril over the ears and down along the neck and compare this measurement with that from the withers to the feet, and the other method being to compare the distance between the knee and the withers with that from the knee to the coronet. In the first method it is considered that a colt will grow as much taller as the first measurement exceeds that of the second, and in the second method, if the proportion is as two to one, the horse will grow no taller.

### Birds That Carry Their Young.

The woodcock, it is said, has been known to carry away her young when threatened with danger. She places them on her spread feet, pressing them between the toes and the breast. A naturalist says many woodcocks also carry their young down to marshy feeding grounds in the evening, returning before dawn. In fact, they have no means of feeding their young except by carrying them to their food, for they cannot convey their food to them.

### Not a Bombardment.

Kissam—Has her papa ever fired you?

Higgins—He has never resorted to bombardment. His tactics are more in the nature of a passive blockade.

"How is that?"

"When I call to see his daughter he remains in the parlor during the whole of the interview."

**MONTREAL HOUSEWIFE CAN NOW PERFORM HER USUAL DUTIES—THANKS TO PE-RU-NA.**

Josephine Lupien, Hotel Dieu, Montreal, Can., writes:

*"Four months ago I commenced to take your Peruna. I can tell you with entire truth that I do four times as much work this spring as I did before. I have done washing and house-cleaning without becoming much fatigued. I have received great benefit through your medicine and recommend it to every one.*

"I have not had a cold or bronchitis this winter. The constipation has entirely disappeared, also the rheumatic pains."

One such case as that of Josephine Lupien ought to be all the evidence any one needs to be convinced of the priceless benefit of Peruna.

This lady was changed from an invalid into a busy housewife. She asserts that through Peruna she is able to do four times as much work as before, that she does not take colds any more, and that the rheumatic pains and constipation which had troubled her have disappeared.

Any medicine that brings about these changes needs no further recommend.

## INS AND OUTS

It is eight years since Spain was getting as much free advertising as it is getting now.

* * * * *

From the way the Czar feels about it, a Douma must be a first cousin to a white elephant.

* * * * *

The manager of the local play house, who spent a few days in Ottawa recently, says he had a good time while in the capital. It takes but one guess to tell who paid the shot.

* * * * *

It is said that Spain used up 150 tons of roses at the King's wedding on Thursday. It looks to this great family journal as if a slight was being put upon that national flower, the Spanish onion.

* * * * *

A subscriber writes a long letter on how to manage a canoe. It appears to this g. f. j. that the most important thing to learn about canoeing is to know how to swim.

* * * * *

Very fittingly the Douma's request for sweeping reforms were presented by a man named Broomski.

* * * * *

Mr. Billy Lech, chief agitator in connection with the great and only original excursion, has sent word to Burleight Falls that the party will arrive on time next Thursday, and will bring their appetites with them. In the meantime mine host Darcy is working overtime nailing down everything that can be lifted without the aid of a block and tackle.

* * * * *

Rojestvensky has resigned from the Russian navy. At least, he has resigned from the spot where the navy would be if Russia had one.

* * * * *

Plunkett Greene, the singer, says that nine out of every ten songs heard at a public concert are absolutely bad. He is modest in his estimate. Usually it is ten out of every ten.

* * * * *

After being in prison 15 years Berkman came out and immediately married Emma Goldman, the Anarchist. Perhaps he thought he didn't have punishment enough.

* * * * *

Col. Millar, of the 48th Regiment, thinks, now that the Separate School building has disappeared, that we may expect a start to be made on the new armoury, in which event the present drill shed will be obsolete. This g. f. j. would suggest that the old building be taken in at night, or the Eastwood Wrecking Company may get away with it.

* * * * *

A Winnipeg man predicts the end of the world, inspired no doubt by the news that nine M.P.'s had voted against the salary grab.

* * * * *

The City Fathers do not appear to be at all anxious to have the Bell Company's telephone wires placed under ground. This will mean that many members of the Council will themselves be buried next January when the ballots are counted.

## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

## SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 25 0x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of a royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

## FOR YOUNG FOLKS

### AN IMITATION STORM.

**How You May Produce a Raging Tempest in a Bottle.**

Some of our young experimenters may be interested in a simple device for making a real rainstorm in a bottle. The only apparatus necessary is a tall bottle, like the one shown in the cut, and an ordinary coffee saucer. The bottle is half filled with alcohol of 92 degrees strength and heated in a bath of water until the alcohol, the bottle and the saucer are of an almost equal temperature. Then the apparatus is removed from the water, wiped quickly with a soft cloth, and the experimenter is ready to watch some wonderful transformations inside of the bottle.

The vapor of the alcohol soon rises and fills the bottle, but the saucer cools rapidly, and the vapor, being warmer,

THE STORM IN THE BOTTLE.

is quickly condensed. Real clouds appear in the upper part of the bottle, and presently, as the cooling process goes on, tiny raindrops form and fall just as in a regular shower.

The whole process of the distribution of moisture on the earth's surface is illustrated in the bottle. The alcohol is the ocean or the lake, the air above it is the clear sky, and the warm bath of water is the sun. The saucer plays the part of the cold currents in the upper air and condenses the vapor which the sun draws up from the ocean.

A still more striking result can be obtained by using a cold saucer in place of the warm one. In that case the difference of temperature will be increased, and there is a regular old fashioned hurricane.

This very simple experiment was invented recently by Professor Errera of Brussels, and almost any of our boys or girls could interest a whole class or a school exhibition with it. Try it.

**A Pretty Experiment.**

Take a common tumbler, partly fill it with clear water and place upon its surface some pieces of gum camphor. Immediately they will begin to swim around the water, and if the camphor be lighted they will look like balls of fire floating thereon. Put a few drops of oil of any kind into the water and the camphor will cease moving at once. And while you have the camphor at hand put a little in a clear bottle, cork it and place it in the sun for a few hours. Then you will notice beautiful white, silky needles begin to appear around the neck of the bottle, which are so delicate and fragile in appearance that you would hardly think they could hold together.

**The Height of a Mountain.**

The barometer is the instrument by which the weight of the atmosphere is determined. But how many of you know that this instrument may also be used to determine the height of a mountain? It has been found that the column of mercury in the barometer falls about one inch to every increase of 1,000 feet in altitude, because the higher we ascend the lighter is the atmosphere and the less, therefore, the pressure on the mercury in the reservoir of the instrument. If the barometer marks thirty inches, then, at sea level and twenty-seven inches on top of a mountain, it follows that the mountain is 3,000 feet in height approximately.

**Animals Enjoy Music.**

Horses are easily trained to step proudly to the sound of fife and drum. At the zoo in Paris a learned professor has been examining various animals with regard to their musical ear. He found monkeys very partial to ragtime, particularly if played on a violin or flute. They stop eating, scratching or jumping about to listen. Elephants or rhinoceroses took no notice of either ragtime or symphony, but the hippopotamus raised his head out of the water and listened with the keenest enjoyment apparently to a waltz by a famous composer—Offenbach.

**Conundrums.**

Why can a clear summer's night furnish you with an excellent weather forecast? Because it gives you dew not ice (due notice).

Why is an umbrella like a hot cross bun? Because it is never seen after lent.

Why is life the greatest riddle of all? Because you must give it up.

When does a man have to keep his word? When no one will take it.

**My Lucky Brother.**

I have a brother not so tall—
I haven't any other—
So he's what you may really call
A very lucky brother,
For when my trousers get too small
For me to wear our mother
Just "takes them in," seams, legs and all,
And gives them to my brother.
—Malcolm Douglas in St. Nicholas.

**Chivalry.**

By the rules of chivalry all persons, male and female, old and young, in a town taken by assault were liable to be put to death, and the men and boys seldom escaped the brutality of the victors.

**Old Religious Rites.**

India celebrates annually cocoanut day, sacred to the worship of their god of the sea. In order to propitiate this deity cocoanuts are thrown upon the sea by the Brahma priests, but the practical Mussulmans gather these votive offerings from the waves and sell them again.

**Syrian Rugs.**

Most of the Syrian rugs are made with a small square of some decided color, generally blue, in the center, which is supposed to have the merit of warding off the "evil eye." The rug-makers use no patterns, depending entirely on the memory.

**To Cut Stick.**

To "cut stick," a euphemism for running away, is an expression found not only in English, but also in French, German, Italian and Spanish. It is supposed to refer to the practice among travelers of cutting a staff from a hedge or tree before beginning a journey.

**An Old Proverb.**

In many nations it has been believed that an individual bitten by a dog may cure himself by placing three of the dog's hairs on the wound. The idea is expressed in the English proverb, "The hair of the dog is good for the bite."

**Malay Language.**

The Malay language, spoken in the south seas, is softer than the Italian and is said to be totally unlike any other known language.

**Routed by Mosquitoes.**

When Hannibal's army descended from the Alps into the valley of Lombardy the whole force was well nigh routed by a plague of mosquitoes, which drove men and animals almost wild with pain.

**Aconite.**

Aconite is the active principle of the plant known as Aconitum napellus, which grows in the mountainous districts of Europe, Siberia and central Asia. It is well known from appearing as an ornamental plant in flower gardens. Aconite as a medicine was first used by Stoerk in 1762, being employed then, as now, in infinitesimal doses.

**Street Railroads.**

The first street railroad was laid in New York in 1832, between the city hall and Fourteenth street.

**Florida Ants.**

There are more ants to the square mile in Florida than in any other country in the world. There are ants that will measure more than half an inch in length, and then there are ants so small that they can scarcely be seen to move with the unaided eye.

**The South Pole.**

There seems to be no hope of finding the south pole, the antarctic zone being so cold and so compacted with ice as to make any sort of travel there impossible long before the pole is reached.

**Oldest Herbarium.**

The oldest and most curious herbarium in the world is in the Egyptian museum at Cairo. It consists of crowns, garlands, wreaths and bouquets of Egypt, most of the examples being in excellent condition, and nearly all the flowers have been identified. They cannot be less than 3,000 years old.

**Rice in India.**

In India the cultivation of rice antedates history.

**Plighting Stones.**

The "plighting stone" was used until quite recently in parts of Scotland. Troths were plighted by grasping hands through the stone. These troths and promises were inviolate in matters of love, business and all social relations.

**The Bird of Paradise.**

The bird of paradise is found wild in India and central Africa. It was so called not on account of its beauty, but from the fact that the earliest dealers cut off the ugly feet and legs of the living specimens and gave out that the bird came from the other world and did not alight in this, so it had no need of feet.

**Eskimo Doctors.**

The head of an Eskimo family gives his doctor a fee as soon as he comes. If the patient recovers, it is kept; if not, it is returned.

**Our First Coins.**

A United States historian says that "the first coins struck by the United States mint were some half dimes in 1792. The first dimes were struck in France from old silver family plate furnished by Washington, the coins being known as "Martha Washington dimes," from an adaptation of the Liberty head to that of Martha Washington.

**Magna Charta.**

The Magna Charta, or great charter of English liberties, is still preserved in the British museum. The impress of the seal and King John's name are both very distinct.

**A Baron's Crown.**

A baron's crown is a velvet cap with ermine border, but the coronet differs from that of the viscount in having eight pearls on the upper rim instead of fourteen, the latter number being the allowance of the viscount. In France the pearls are usually arranged in sets of three.

**Lake Michigan.**

Lake Michigan was so named by the Indians. The word means a "fish trap."

**Keep From the Grate.**

During a thunderstorm, it is pointed out, the inhabitants of houses should not remain in the kitchen or other room where a fire is burning in a grate, as the heated gases from the chimney top provide a line of least resistance, and this is so whether the house be provided with lightning rods or not.

**Crickets.**

In almost every country in Europe there is a current belief that the presence omen and that the singing of the crickets at night betokens good luck for the next day.

## THE PALACE OF DOOM

### STRANGE LEGEND OF A MYSTERIOUS STATUE IN ROME.

**It Pointed the Way to a Scene of Silent and Dazzling Splendor—The Fate of the Man Who Solved the Enigma of the Finger Message.**

There stood in Rome many ages ago a beautiful marble statue the mystery of which attracted the attention of all the wise men from far and near. Nobody could remember when it had been erected, and nobody knew what it meant.

It was the figure of a woman, tall, strong and supple. She stood erect, with her right arm outstretched, her mantle falling in graceful folds about her figure, on her face a look, half smile, half frown, luring, yet appealing, but always holding the observer by a strange feeling that it reused of mystery, glory and horror.

But even all that, written so clearly in the mystic signs that art uses, might have been overlooked by the people had it not been for a more material puzzle presented by the statue. On the third finger of the outstretched hand was written in unfading letters, "Strike here." And therein lay the mystery.

Years came and went, and wise men puzzled their brains to find the secret. Seers from faroff lands came to Rome, attracted by the statue, and still it stood, mute, cold, inexplicable.

One day a young man stood before it. He had grown up with the idea of solving the mystery, and each day since he was a little child he had come for a few moments and stood silently gazing at the strange countenance.

He had learned to love the face, the wise lips that looked as if they might part and tell the secret that ages had yearned to know, but through these ages only he had been sincere in his search. Faithful through all disappointments he had gained strength and wisdom, and now as he stood before the statue the sun, halfway up the eastern sky, shone full upon the image.

A strange thrill passed through the man, and, looking in the direction indicated by the pointing finger, he saw, some yards away, the shadow of the outstretched hand on the ground. He gave a low cry, and, after noting the spot well, he departed.

That night at midnight he went to the place and began to dig in the ground where the shadow of the hand had fallen. A long time he worked, never ceasing his digging, when suddenly his spade struck something hard.

Then his zeal increased, and, clearing a space, he saw beneath him a trap-door, with a great stone ring. Grasping the ring he pulled open the door and started back, dazzled, for a flood of light burst upon him from out of the depths.

Quickly recovering, the young man looked again and beheld a wide marble staircase descending from the trap-door. Throwing down his spade he passed through the door, down the steps and found himself in a vast hall. The floor of this room was of marble, pure white, while the walls and ceiling were of the same material in many colors. The huge pillars upholding the vast dome shone like alabaster. Rare paintings hung upon the walls, and rich rugs lay strewn upon the floor.

In the center of the room a fountain stood. The water in its basin was as pure as crystal, but not a ripple stirred its surface, and no pleasant lapping charmed the ear as it does when water falls from on high, for, though the fountain was apparently perfect, no water rose from it to fall again.

On seats running around this silent fountain were many men in rich brocades and costly fur robes. Lifelike they looked, but to the touch they were as marble. It was as if in the midst of life death had come and petrified these beings in mockery.

Around on tables and benches were scattered piles of gold and precious gems. Delicate enameled vases and swords inlaid with gems added their wealth to the place.

But rarest of all the gems was a great carbuncle, which stood in a corner of the room and from which came the sole light by which the place was relieved from darkness. In the corner opposite to this stone stood an archer, his bow bent, his arrow on the string, aimed at the carbuncle. On his bow, shining with reflected light, were the words:

"I am that I am. My shaft is inevitable. You glittering jewel cannot escape its stroke."

As he looked on all this in silent wonder the young Roman heard a voice utter one word—"Beware!"

Then he passed into the next room and found it fitted up as magnificently as the one he had just left. All manner of couches were about this room, and reclining on them were wonderfully beautiful women. But their lips were sealed in this place of silence.

From there he passed on, finding many more wonders—rooms filled with treasures of art, stables filled with fine horses, granaries filled with forage. Everything that could make a palace complete was there.

The young Roman returned to the hall.

"I have here seen," he said, "what no man will believe. I know that of this wealth I should take nothing, but to prove to them that I speak truth can be no harm."

Then he took in his arms a jeweled sword and some rare vases, but suddenly all was dark.

The charm was broken. The arrow had left the bow and shattered the carbuncle into a thousand pieces. Pitch darkness overspread the place.

Then the young man remembered the warning, but too late. And there he probably adds one more to the silent watchers in the magic chamber.

Has this story a moral? Let those answer who have eyes to see.

Pink Lips, Like Velvet. Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most highly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

Sore Lungs

We want everybody who has a hard cold in the chest to use Ayer's Cherry Pectoral. Our long experience with it, over sixty years, tells us there is nothing its equal for coughs, colds in the chest, bronchitis, hoarseness, sore lungs, weak throats, and weak lungs. Doctors tells us the same thing. Ask your doctor about it.

We have no secrets! We publish the formulas of all our medicines! J. C. Ayer Co., Lowell, Mass.

Department of Railways and Canals, Canada

ST. LAWRENCE CANALS

MURRAY CANAL

NOTICE TO CONTRACTORS

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Concrete Superstructures," will be received at this office up to 16 o'clock on Friday, the 15th day of June, 1906, for the construction of concrete Superstructures for the wooden piers at the entrance to the Murray Canal, and, reinforced Concrete bridges to span the openings between piers.

Plans and specifications of the work can be seen on and after Monday, the 21st of May, 1906, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Superintendent of Operation, Cornwall, Ont., at which places forms of tender may be obtained.

The Department does not bind itself to accept the lowest or any tender.

By order,

L. K. JONES,
Secretary.

Department of Railways and Canals,
Ottawa, 17th May, 1906.

TENDERS FOR DREDGING

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Dredging St. Mary's River, Sault Ste. Marie, Ont.," will be received at this office until the 13th day of June, 1906, inclusively, for dredging in the St. Mary's River at Sault Ste. Marie, Ont., according to a plan and combined specification and form of tender to be seen at the office of J. G. Sing, Esq., Resident Engineer, Confederation Life Building, Toronto, on application to the Postmaster at Sault Ste. Marie, District of Algoma, Ont., and at the Department of Public Works, Ottawa.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, for six thousand dollars ($6,000.00), which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, May 22, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Corner George, King and Water Street
Peterborough

Long distance phone day or night.

NOTICE is hereby given that the rights of the government on the water-powers hereunder mentioned will be put up at auction to be held in the sales room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long lease, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ko rapids on the Quinze river, county of Pontiac, about 12 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot N. 28, 3rd range of the township of Crandison, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manicouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the River aux Outardes, on the north shore of the Saint Lawrence, about 7 1-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Gabelle," on the Saint Maurice river, about 12 miles (in a straight line) from Three Rivers.

7. The Coteau Rapids on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermilion river, about 21 miles above La Tuque, county of Champlain, on the the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 4 1-2 miles from the confluence of these rivers and about 20 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Rault," river Rimouski, township of Imngane, county of Rimouski, 16 miles from Rimouski.

11. The "Rapid Malin," river Bonaventure, about 6 miles from the Barachois of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 2 1-2 miles from the village of Saint Felicien and 16 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 63 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Pelletier, county of Lake Saint John.

15. The three falls on river "Rault-au-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power, of these water-powers, the extent of the surrounding land which the above mentioned concessions comprehends, apply to the Department of Lands and Forests, Quebec.

ADELARD TURGEON,
Minister.

## PASSING OF STREET ARAB.

**Picturesque London Type Practically a Thing of the Past—Better Social Conditions Responsible.**

Has anyone seen a "street arab" lately, one of the type immortalized by Dickens in "Jo," and described as well by the late Lord Shaftesbury? "Bold and pert, and dirty as London sparrows, but pale, feeble, and sadly inferior to them in plumpness of outline," wrote his lordship, in that stirring "Quarterly Review" article in which he gave an account of his explorations in the underworld of London. They begged, thieved, sang in the streets, herded out in nomad crowds, and were not only a nuisance but a social menace.

There are still thousands of waifs and strays and truant boys in the London streets, but the old type has vanished, and his disappearance marks one of the greatest social changes that has come over the life of England within recent years.

That was the interesting statement made by Mr. J. W. C. Fegan, of the Boys' Home at Southwark, which has a branch in Toronto, Ontario, to a newspaper representative in a reminiscent conversation which covered thirty years' experience in the reclamation of homeless boys. Mr. Fegan began his work as a teacher in a "Ragged School," and he can recall the time when he could go out searching for "street arabs" (It was Lord Shaftesbury who gave them that title), and come back every evening with fifteen or twenty, quite a common "bag."

"Now," he says, "I could hardly get one. There are still boys to be found in need of a home and a start in life, but the old class has been improved out of existence. In those early days the boys lived in gangs, sleeping under railway arches, in vans, on barges, and in empty houses. They were generally driven into the streets by the cruelty of parents, but to many the life had a strange fascination. It was full of adventure, irregularity, and hardship, but they liked it, and often one or two boys who had taken to it would infect others, even boys of a better class."

In illustration of this last point, Mr. Fegan tells a quite romantic story of a remarkable character who once came under his notice, and whose memory still lives in the purlieus of Westminster. He was known as "Stuttering Bob." Bob was well connected, being the nephew of one of our most distinguished living actors. Developing a roving restless disposition, he became the associate of low companions, and, although his distracted father frequently sought him out and brought him home, he always returned to his old haunts. He obtained his name from an infirmity of speech, and one of his greatest strokes of genius was to dress up as "Poor Jo" when Miss Jennie Lee was giving her remarkable representation of that character. In tattered garments, and with a broom in his hand, he would stand outside the theatre where Miss Lee was acting, and where, he would plaintively repeat "Pi-pi-please to re-re-member Poor Jo." He made heaps of money in this way, but squandered it among his wild boy friends. Eventually he was rescued, and Mr. Fegan's last letter from him came from the United States, and told that "Stuttering Bob" was steadily making his way in the world.

This is only one of the instances of the reclamation of a street arab of the old type with which Mr. Fegan's memory is crowded. Of the causes which have led to the disappearance of the class, one of the most important has, of course, been education, and it was in this direction that the "Ragged Schools" began the pioneer work which the board school later, and now the county schools, have continued.

"There are now so many boys," said Mr. Fegan, "who are qualified for permanent and progressive employment, who in the days gone by could not have obtained any kind of work. They could not read or write, and were so untrained that if they were asked to place an object in the centre of the table, say, they could not do it."

When board schools were established, one of the first teachers to be put in charge of a special school was that splendid fellow and almost genius, James Runciman. His school was in Hale street, Deptford, and Mr. Fegan, who worked in the same neighborhood, knew him well. Runciman used to tell how, when he was teaching a class of "arabs" the alphabet, he asked them to copy the letter "t" on the blackboard. One boy made some very fair imitations, but he also added a number of weird hieroglyphics which Runciman could not understand.

"What are these, my boy?" he asked. "Please, sir," was the quaint answer, "I thought we would not have it all "t," and it would be nice to have coffee as well." The strange writing was his way of representing coffee.

Another great reason for the disappearance of the old-time street "arab" has been the sweeping away of the slums and rookeries — a process not yet completed. A third great reason is to be found in the beneficent work of the Society for the Prevention of Cruelty to Children. It has created something like a new conscience among fathers and mothers, whose outbursts of violence used to drive boys and girls into the streets. Mr. Fegan tells some appalling stories of the cruelty practiced by unfeeling parents on their offspring, generally when in drink.

"Thirty years ago," he says, "we could meet with eighty cases of cruelty to one that comes under our notice now. One of the worst cases I ever knew was when a father tied his little boy to the bedstead and thrashed him with a stick. When he dropped, or seemed likely to swoon, this unnatural father revived him by applying lighted matches to him. There were horrible cases of cruelty to children in those days, and this conduct was responsible for the vast hordes of 'street arabs' we had to deal with. But Mr. Waugh's society has made a marvelous improvement."

### Just Escaped.

An English newspaper has an item about a little Scotch boy who, while playing on the docks, fell into the water and was with great difficulty rescued by a bystander.

"You ought to be very glad I was near by," said his rescuer.

"I am," replied the boy. "And I'm so glad ye got me out. What a fickle I wad got from my mither if I'd been drooned!"

### Also When Is a Sea Dog?

"Maw!"

"What is it, Johnny?"

"Do the ocean greyhounds ever bite the ocean tramps?"

It is very easy to get angry with somebody for doing what it would be very unreasonable for anybody to get angry over if you do it.

## MY CREED.

Better a smile than a tear or a sigh,
Better a laugh than a frown,
Better an upward look to the sky
Than always a sad look down.

The joys we find in each little day
Perhaps may seem few and small,
But better these little joys, I say,
Than to have no joys at all.

Keep faith in the love that blesses men
As the sunshine does the sod.
Let us do our best and trust the rest
To the father heart of God.

—Eben E. Rexford.

## PHOTOGRAPH MYSTERY.

**Picture of Girl Shows Her Fiance Holding Dagger Over Her.**

The astounding story of mysterious photographs, which is vouched for by a well-known London photographer, is told in the current number of M. A. P.

A certain young woman named Miss B., who lives with her mother in one of the home counties, made an appointment with the photographer in question. The sitting was duly given, the photograph taken, and after the lapse of a week the young woman received a letter saying the photographs were not a success, and asking for another sitting. She agreed, and as soon as possible went to London again and a second photograph was taken.

A short time elapsed, and, as no proofs were sent, she wrote, making enquiries, only to receive a very apologetic letter saying that again the photographs were failures and asking for a third sitting. For the third time Miss B. came to London. In two days she received an urgent letter from the photographer, asking her to come up to his studio and bring a friend with her. As a result of this letter Miss B., accompanied by her mother, paid a fourth visit to the studio, and there the photographer exhibited the amazing results of the three sittings.

The actual photographs of the girl herself were quite good. But in each plate there was to be seen standing beside her the figure of a man holding a dagger in his uplifted hand. The features, though faint, were clearly discernible, and to her horror Miss B. recognised them as those of her finace, an officer in the Indian army. The effect of this experience was so great that she wrote to India breaking off her engagement.

### Painter From a Burglar.

"Bank of England notes are ridiculously easy to imitate. The dull, single-colored ink in which they are printed is an inducement to forgers."

This remarkable statement, which is in direct opposition to the belief which has always been cherished by the lay mind, was made by William Barmash, one of the most famous note forgers of the century.

Barmash was released from Pentonville Prison after serving a sentence of penal servitude for participation in a bank-note forgery, which, had the plot succeeded, would have robbed the Bank of England of £50,000.

Having now resolved to devote his abilities to honest business transactions, Barmash, starts by making a practical suggestion for putting an end to note forgery.

"The Bank of England," he said, "could stop all the attempts at forging their notes by printing in fifteen or sixteen different colors. Even the cleverest forgers would then be foiled.

"If we had been as successful as at one time we thought we should be, we should have entirely destroyed the credit of the Bank of England note in its present old-fashioned shape, and should have compelled the bank to change the color and design of their notes."

### Foiled After All.

During the peninsular war a number of English officers had established a *mess* in a Spanish village, with native cooke, whose efforts were fairly satisfactory to the keen appetites of the campaigners. They were joined, however, by a certain peevish, cantankerous major, who bitterly complained that every dish was flavored with sugar, after the Spanish fashion, and quite uneatable. Finally he confined himself to a diet on eggs boiled in the shell. "They can't sugar those!" he cried triumphantly. But his triumph was short-lived. Next morning some mischievous subs were at the mess table before the major and emptied all the salt cellars, replacing their contents with powdered sugar. The major boon appeared and with gloomy complacency began upon an egg, with which, as usual, he took plenty of "salt." At the first mouthful his face turned purple with rage. "Sugared, by Jove!" he exclaimed and rushed off to his tent.

### Wrong In His Head.

A Yorkshire mill worker charged with having set fire to a large haystack was defended on the ground that he was not altogether responsible for his actions. One of the witnesses, a typical Yorkshire man, testified to the belief that the prisoner was "wrang in his held."

"Can you mention any occasion on which the prisoner behaved in a manner to warrant your statement?" he was asked by the prosecuting counsel.

"Yes," answered the witness. "Ah mind once 'at he got hawf a crown too much for his wage, an'"—

"Well?" said counsel as the witness hesitated.

"He took it back to t' manager!" concluded the witness amidst a roar of laughter.

### Sea Mystery Solved.

Another mystery of the sea has been settled apparently. The British steamer Loch Vennacher left the Clyde for Adelaide on June 14, 1905, and was never seen after Sept. 14. A bottle containing a slip of paper purporting to have been written by one J. B. Gillingham of Glasgow and dated 3 a. m. Oct. 29 has been found off the Australian coast. It states that the ship had struck on the Althorpes, near Kangaroo Island, and was not expected to float more than half an hour. Boats were being launched, but it was not thought they would live, as the sea was very rough.

### They Would.

Oh, time and love and money
Are just the three big things
Which would be e'en more sunny
If we could clip their wings!

### Auto Used to Convey Pay to Men.

Yesterday morning Mr. Doan, local Bell Telephone Co., manager, left by automobile for Mount Julian to pay off the men working on the new line from that place to Burleigh Falls. Let us hope he will not meet with a hold up gang. It might be noted that this payment is only the regular semi-monthly business and does not mean that the men were either through with the job or discharged.

## WONDERFUL MIRAGES.

**These Seen in the Winter Twilights in Northern Alaska.**

The most wonderful mirages ever beheld by mortal eyes are those that are seen in the twilight winter days in northern Alaska. These remarkable ghastly pictures of things, both imaginary and real, are mirrored on the surface of the waste plains instead of upon the clouds or in the atmosphere. Mimic lakes and water courses fringed with vegetation are to be seen pictured as real as life on the surface of the snow, while grassy mounds, stumps, trees, logs, etc., which have an actual existence some place on the earth's surface, are outlined against mountains of snow in all kinds of fantastic shapes. Some of these objects are distorted and magnified into the shapes of huge, ungainly animals and reptiles of enormous proportions. The fogs and mists are driven across these wastes by the winds, and as the objects referred to loom up in the flying vapors they appear like living creatures and seem to be actually moving rapidly across the plain.

At other times they appear high in the air, but this is a characteristic of the northern mirages that are seen near the seashore. When the vapors and mists are driven out to sea the images mirrored in them appear to be lunging through the waters at a terrific rate of speed, dashing the spray high in the air, while huge breakers roll over them and onward toward the mountainous islands beyond and against which they all appear to be dashing. Monstrous serpents, apparently several hundred feet long, sometimes with riders on their backs, men on horseback thirty to fifty feet in height, animals and birds of all kinds of horrible shapes and colors seem to be scurrying past, racing and chasing each other until they are lost in the twilight fogs or dashed to pieces upon the rocky islands mentioned above and which are twenty miles out to sea.

## THE RED SQUIRREL

**He Stores Very Little Food For Use In Winter.**

In Maine—in fact, all over New England—red squirrels do not put by great hoards of any kind for winter use. When a Maine red squirrel has filled itself with acorns and beechnuts it will hide a few here and there—under leaves, in hollow logs, in cracks of rifted trees and among stone heaps.

An average red squirrel, having the run of an oak grove in the fall of the year, may in the course of two weeks hide away from two to four quarts of acorns, though they will be in perhaps twenty different places, and in no instance which we have noted has any nut been shelled.

The squirrel which plans a board of nuts and makes deliberate preparations for winter is the little chipmunk, or striped squirrel, which seeks winter quarters soon after heavy frosts and which remains in hiding all winter. The chipmunks often hide as many as two quarts of shelled beechnuts in one place. Their storehouses are, as a rule, under the ground, in sloping and sandy soil, the burrows having been dug with true engineering skill, so that no freshet can drown them out.

It is believed that most observing woodsmen will say that the red squirrels of this vicinity seldom make large caches of provisions for winter consumption and never shell the stored nuts. In fact, the red species have no need to pay much heed to such matters, as they are abroad and active in the coldest days of winter as much as they are in midsummer, so precautions for food are not demanded. As the red squirrels subsist for a good part of the year upon the cones of pines and spruces, which hang to the limbs, they do not care how deep or hard the snow may be, feeling secure in finding all the food they want among the treetops.

### Courage.

The greater part of the courage that is needed in the world is not of a heroic kind. Courage may be displayed in everyday life as well as in historic fields of action. There needs, for example, the common courage to be honest, the courage to resist temptation, the courage to speak the truth, the courage to be what we really are and not to pretend to be what we are not, the courage to live honestly within our own means and not dishonestly upon the means of others.—Smiles.

### Indian Ocean Serpents.

Among the most venomous serpents in the world are the marine snakes of the Indian ocean. They are the dread of fishermen, and it sometimes happens that vessels are obliged to thread their cables through barrels to prevent the reptiles from swarming on board. Great numbers of them may often be seen floating on the surface of the water as if asleep. They are exceedingly fierce and will commonly attack human beings without provocation.

### When the Raven Was Milk White.

According to Mohammedan belief, the ravens which Noah took with him on the ark were both pure white. When the ark had been riding the billows of the flood for thirty-three days one of the giraffes died, and the carcass was thrown overboard. No sooner had it struck the water than the ravens pounced upon it. For this Noah cursed them, and since that day they have been coal black.

### The Disappointment.

May—It was too bad that Miss Trills disappointed the audience at the amateur performance. Elsie—But she didn't. She was able to appear after all. May—Yes, but it was generally supposed that she would not be able to appear.

### Mr. F. Cunningham Here Again.

Mr. Frank Cunningham, who has been in Winnipeg since July last, has returned to the city and will re-enter the employ of the Dominion Express Company. Mr. Cunningham has been in poor health, but is recovering. His old friends are glad to meet him again. He met a number of former Peterboro citizens in the Manitoba capital, and reports that they are all doing well.

## Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

against the restless Shawanoe Indians on the Scioto river.

They had met but few travelers of quality so far to the westward—for the most part wandering petty chapmen or perhaps a Palatinate trader coming from Pennsylvania. These latter drove teams of six or eight horses wearing jingling bells, and their huge Conestoga wagons were loaded with plow irons and with salt, lead and gunpowder for the lower settlers.

At the notched summit Byrd rose in his stirrups.

"The Shennando, Anne!" he cried.

Below, where the unbroke sunshine spun its web, lay a gold valley clasped in hills. The near mountain walls stood all matted with burnished leaves of wild ivy and bloom of chamœdaphne, its white cup shapes stained with purplish red. In the wooded bottom the river shivered with the tumbling foam of steep torrents and went slipping soapily over ledges and between wild acres of mottled sycamore, of drooped willow and of birch. The sun as they rode became dull saffron gold between the overlapped wedges of crimsoning hills.

"Poor dear!" sighed Anne as an extra heavy jolt brought lamentation from her nerve racked companion. "We shall soon be there, Aunt Mildred. Winchester is just beyond the next forest."

"It's been just beyond the next forest for three hours!" moaned the lady. "The colonel really must have new springs put to the chaise. This road is barbarous!"

"There is Winchester!" Anne exclaimed joyfully. "I see the flag on the fort."

This, a great square fortification with four bastions, the stockade built by Colonel Washington before the reduction of Duquesne, was gone much to ruin. It sat on the town's edge, with generous barracks rearing above the walls and soldiery grouped before the entrance. Here Byrd left them to report his arrival, and the two ladies rode to the town ordinary.

They descended to find the long parlor thickly set with guests and passed quickly through the hall to the inn yard, waiting disposition of their luggage.

"The place is overfull, it seems," Mrs. Tillotson said to the landlord.

"Oons!" he answered. "There are a-plenty of beds, though nigh all my tankards are kept well in use. 'Tis the soldiery at the fort draws them, a good thing for the King's Arms. The Indians may go a-scalping as oft as they will."

"They are all king's men within?" asked Anne.

"Aye, a proof of my loyalty. These be times," he added, scratching his grizzle head as he went in, "when 'tis hard to choose betwixt old and new things, with the Whigs so hot. As for me, though, methinks the old will outlast my time."

"Aunt Mildred," called Anne delightedly; "look! There is my Lord Fairfax's chariot!"

It stood under the wide shed, huge and ungainly. Anne went to it and patted the dark leather and laid her young cheek against the purple cushions.

"He is here, then!" she cried. "I wonder if we could see him." Drawing Mrs. Tillotson after her, she passed to the wide low window and peered within. It was flung half open, and through it came glassy tinkles and a babble of talk.

Colonial costumes were sown through the long room, and here and there were royal uniforms flagrantly crimson. Cocked hats and greatcoats lay about on the chairs, and riding whips were scattered on the tables.

Opposite them, against the farther wall, Hurnaby Rolph of Wentham sat squat in his oak chair where the candles glinted on his gold lace, stirring with his dress sword a punch of Jamaica rum in a great bowl. Beside him, his arm flung carelessly back, lounged Captain Foy. Now the spirit was in his mottled, sensual face, and it seemed to cloak a devil in scarlet.

The girl shrank back instinctively and held her aunt's arm more closely. Then she turned her eyes over the assembly.

"Mistress Anne!" exclaimed a voice behind her.

"Oh," she cried, turning, "Mr. Henry! How good it is to see you!"

He took her hand and bowed to Mrs. Tillotson.

"It seems as if we had not seen you for a year," Anne continued, looking up into his sallow face and then, with a hint of approval, at his dark wig and suit of minister's gray.

He saw her glance and smiled a little quizzically. "I am being fast spoiled," he said. "I have a plenty of coats good enough for me, yet once I go to the congress I must get a new one to please the eye of other folk. I am on my way back from Philadelphia now."

"Are you lodged at the King's Arms?" asked the elder lady.

"At the Three Rama. Methinks the royal tang hereabout is a bit strong for me. I have a scent for it like a beagle for a porcupine."

"Lord Fairfax is here," said Anne, "but he has not yet seen us. We shall surprise him." She clapped her hands together softly. "I wonder how he will look. We were playing eavesdropper just now, Aunt Mildred and I, only to steal a view of him. Is it very dreadful? Come with us and look."

"I shall leave her to you, Mr. Henry," said Mrs. Tillotson. "The chests are in, so be not long, Anne. I shall wait in our chamber."

As they crossed to the window Anne stopped and looked at him questioningly.

"What of the congress?" she asked. Her voice was sharp and eager.

He shook his head a little sadly, his brows together over his deep sunk eyes. "'Tis not the time yet. The assembly is too young. They fear to take a step in the dark. It is the blind leading the blind," he said a little bitterly. "There is no open eye. Stay—there is one. He offered them a thousand men-at-arms."

"Colonel Washington!" she said under her breath.

"Aye, Colonel Washington, the best soldier in America today. The only one who sees. For the others, it is temporize, temporize, wait the king's better humor. Parson Duche, the rankest Tory of them all, opening the session with prayer.

"Why, a Philadelphia delegate named Galloway spoke for a new plan of reconciliation, with close allegiance, an American legislature and a president general appointed by the king. It came nigh to stampeding the whole convention. They see only war and the ravage of our towns—not one rood beyond that. They see not that the time and people are ripe for it. They see not that such a war cannot be fought alone—that we shall, we must have, help from Europe, that we must win.

"Oh," he said with sudden passion, his eyes burning like coals, "of such stuff is our congress made! A multitude of counselors and no leader. The sacrifice laid waiting, but no fire!"

Anne came closer to him, her fine face flushing.

"But this is not the last time," she said. "The congress will meet again. When it does Virginia should lead them. The colonies must look to us if it comes to worst. You say we have the best soldier. So shall we have the best regiments. Virginia alone of all the rest was settled by a single people. 'Tis held by gentlemen, and gentlemen fight best!" She put out her hand and laid it on his arm. "You can be the

### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### ODD WATER WHEELS.

**Some Float on Streams—Huge Ones Make a River Lift Itself.**

The people of Syria and Tiflis make their streams do things that Americans do not seem to have learned the secret of persuading the water courses of this country to perform.

At Tiflis the natives have learned how to utilize the power of the current of the river Kur without building dams. What they have accomplished possibly might be done by an American farmer living on the banks of a rapidly moving stream and desiring a small, cheap power. The Caucasians build floats on the surface of the river into them are set water wheels. The whole affair is fastened to the bank in such a way that it will rise and fall with any change in the level of the surface of the river, so that the power is about constant all the time.

In Hama, the ancient "entering in of Hamath," the Syrians have accomplished a feat that makes one think of lifting oneself over a fence by tugging at one's bootstraps. They have harnessed the historic Orontes, or Nahr el Asi, as the Syrians call it, into the work of lifting itself many feet toward the zenith and trained it thus to water their fruitful gardens and orchards.

As for size, the water wheels which do this work are as to other water wheels what Niagara is to other waterfalls. As one stands by one of these great wooden frames revolving upon its wooden axle and looks up at its perimeter forty feet above one thinks it large and is astonished when he turns his gaze up stream to see that relatively it is not a great wheel, for in the distance looms up one sixty feet in height. Even then he is not prepared for the spectacle of one ninety feet in diameter grunting around on its cumbrous axle just outside the town.

Life in Hama for some people is like the liking of others for olives, an acquired taste, because of these very water wheels. According as one feels about it, it is a musical city or one filled with nerve racking groans. Day and night without ceasing these massive, slow revolving structures utter speech. For those who have acquired a taste for their companionship the never ceasing tones are soothing, resembling the ocean roar or a slow fugue played on some cyclopean organ. The diapason tones are deeper and louder than the deepest organ stop. Now they are in unison, now repeating the theme, one after another, now for a brief moment in a sublime harmony never to be forgotten, according to one traveler, then once more together in a tremendous chorus. The sounds are described as a slow movement up the scale, followed with a heavy drop to the keynote as: Do mi sol, do do do; do sol la, do do do. This unceasing Sisyphean music, it is said, has been going on for a century at least.

### POINTED PARAGRAPHS.

How hard a man falls after having been boosted too high!

When a man gets the baby to sleep, how proud he is of himself!

There is usually enough humiliation in all our lives to keep us modest.

It is not the stingy man who becomes a burden as age approaches; it is the spendthrift.

A pathetic admission older people often make is, "The romance has all been knocked out of me."

What has become of the old fashioned woman who called her friends "copycat" when they bought something like hers?

When a man is reasonably happy and content, it doesn't just happen. He is compelled to use common sense and work to an end.

## W. L. LAFFER,

BROKER,
CLEVELAND, - - OHIO

Offers some very choice Mining stocks for sale, all of which he fully guarantees to be promoted by reliable Mining and Financial houses. The Gold Center Water & Mills Co., of Gold Center, Nevada, own town site of Gold Center, three thousand town lots, the entire water supply of Amargosa River for domestic and milling purposes, and sixteen valuable mining claims all in one company, Capitalized at One and One-half Million dollars, treasury stock 40 cents, pooled promotion stock at 75 cents. A splendid stock.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

THOS. PATTERSON & CO., Fiscal Agts.
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

## On the Ground Ahead of the Boom

$5.00 DOWN
AND
$5.00 PER MONTH
FOR FOUR MONTHS WILL BUY
500 Shares
OF STOCK WHICH MAY SOON BE WORTH

## Proper Medicine For The Blood

**Drives Away That Tired Feeling; Makes You Feel Brisk.**

To every one is sure to come that tired, exhausted feeling.

When the blood is weak, thin and debilitated, circulation is slow, and in consequence the system is congested with poisons and waste that should be driven off.

The sensible person acts on the teachings of experience and cleanses his system with a course of Dr. Hamilton's Pills of Mandrake and Butternut.

No medicine can be more certain to quickly cure. Convenient to take. Just one pill at bedtime, safe, because entirely vegetable; unfailing, because proved by thousands that Dr. Hamilton's Pills set you up in a few days.

From Chelsea, Pic. N.S., comes the following from Mrs. W. A. Reynolds:

"A year ago my health began to fail. I lost appetite, became nervous and sleepless. My weight ran down, I became thin, hollow-cheeked, and had black rings under my eyes. I really felt as if the charm of life had left me and when springtime arrived I was in the 'Blues.' I read of Dr. Hamilton's Pills, and got five boxes at once.

"Within a month my appetite and color were good. I gained strength and felt like a new woman. New life and vigor returned, and my friends scarcely knew me. A medicine that will do this should be in every home."

Good health means much to you. Success and happiness depend upon it. The maintenance and source of health is found in Dr. Hamilton's Pills. 25c per box, or five boxes for $1.00, at all dealers, or by mail from N. C. Polson and Co., Hartford, Conn., U. S. A. and Kingston, Ont.

## TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS.

### Phonographs.

Sold on easy payments at The J. M. Greene Music Co., George street, New Opera House Building, Peterboro.

### Examinations at Local Conservatory.

The examinations for the Toronto College of Music will be held today at the Peterborough Conservatory of Music. Mr. A. D. A. Tripp, of Toronto, will be the examiner.

### Wanted Immediately.

Good sewing machine operators on power machines. Only first-class hands need apply. Apply to J. J. Turner & Sons, Tent and Awning Manufacturers, George street, Peterboro.

### Large Crowd Hears the Band.

A large and delighted audience last night thronged Victoria Park and thoroughly enjoyed every selection given by the 57th Regimental Band. This was the first concert of the season and every number was given in the typically correct style that makes our local band what it is.

### Organ for Sale.

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1168.

### Danny Simons Coming Home.

Mr. P. Simons, the George street merchant tailor, yesterday told a Times' representative that he expects his son "Danny," the rising American comedian, to arrive in the city next Monday. "Danny" will likely spend a few weeks in the city and then, during the off season during the summer, accept some flattering offers he has received to play as some of the leading Canadian Park.

### Men Wanted.

**Any number of Rivermen and Woodsmen wanted for Algoma Commercial Company, Sault Ste Marie, Ont. Highest wages paid. Apply to GEO. J. CHALMERS 542 Water Street or P. O. Box 831, city.**

## THE NEW TERM

at the

## PETERBOROUGH BUSINESS COLLEGE

opens on

TUESDAY JAN. 2, 1906

Intending students should make application as soon as possible. Call at the College or address

WM PRINGLE, Principal.

Opposite Post Office.

## LOCAL INCIDENTS

By The Times Man on the Street

—Good morning! Is your log poisoned yet?

—And the band played on, whilst the crowd applauded.

—Board of Works met last night. Particulars elsewhere in this issue.

—See our new line of handsome souvenir post cards. Times Bookstore.

—But is the month of roses, if the weather does not warm up, also of red noses.

—The G.T.R. summer time table will go into effect about the 17th of the present month.

—The proposed home for aged editors is an absurdity. Editors don't become aged. The good die young.

—Last night, on a conservative estimate, there were at least 2,000 people present in Victoria Park.

—Starting next Monday the druggists will close every evening at seven o'clock. Must be lots of coin in this trade.

—C. Rutherford at noon yesterday arrested John Colley, as d. & d. at the corner of George and Sherbrooke street.

—The great Barnum & Bailey Circus shows here on Wednesday, Aug. 15. It takes three special trains to bring it.

—The annual meeting of East Durham Farmers' Institute will be held in the town hall, Millbrook, on Saturday June 23rd, at 2 p.m.

—At Park street Baptist church on Sunday, the fourth anniversary of Rev. A. H. Brace as pastor of the church, will be observed.

—The Peterborough Canadian Order of Foresters will attend divine service in a body at Murray street Baptist church Sunday night.

—Victoria Park last night was very well lighted up, and the Peterboro Light and Power Co. deserved credit for their prompt and efficient service.

—A meeting of the executive of the City Sunday School Association will be held at the Y.M.C.A. hall on Monday evening next at eight o'clock. A full attendance is requested.

—Mr. T. Cavanagh's license has been extended one month, and Mr. James Allen's license for the O.P.R. Hotel, has been transferred to Mr. Harry Waters, as foretold in these columns.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—The West Peterborough Farmers' Institute picnic to Guelph, will be held on June 14th. A large crowd it is anticipated will take advantage of this cheap trip to the Royal City.

### 15-DAY NEW YORK EXCURSION

**Via Lehigh Valley Railroad, Friday June 15th.**

Tickets only $9.00 round trip from Suspension Bridge, Niagara Falls. Tickets good on regular express trains leaving at 3.50 and 7.15 a.m., 7.15 and 8.49 p.m. Don't fail to go. For tickets, Pullmans and particulars, call on or address Robt. S. Lewis, Passenger Agent, L. V. R., 10 King street East, Toronto.

### Mr. J. Stevenson's Sister Here.

Mrs. W. Y. Swayne and Miss Swayne of San Francisco, are in the city, guests of Mrs. Graham, Water street. Mrs. Swayne is a sister of Mr. James Stevenson, and many years ago resided in this city. It was at first thought that the Swayne family who owned much valuable property in San Francisco, were heavy losers by the earthquake; fortunately however, they will not lose anything. Mrs. and Miss Swayne will be in the city for a few days, when they will leave for the Coast.

If your Stomach is Weak,
If your Food distresses you,
If you are Weak and Nervous,
Use Dr. Shoop's Restorative one month and see what it does for you. Sold by J. D. Tully.

### Just Canadian Magazine.

It has always been a question whether or not it was good policy for a magazine to deal with current events. There is no doubt that the answer must depend upon circumstances. The June Canadian Magazine is embellished with photographs and drawings of the San Francisco fire, and with pictures of Prince Arthur's visit to Canada. There is surely some excuse for the attention shown to these two important events. Of course there are a number of articles which have less the appearance of having been ordered. Professor Coleman's article on "Earthquakes and Volcanic Eruptions" is exhaustive and scholarly and should attract attention just at this time. Frederick Dolman's article on Sir John Millais' art and art methods is well illustrated and worthy of special mention. Frank Carrel's illustrated article on "An Experience in Tangiers" is very readable. Mr. Webber's second article on "The New York Season of Drama," with its illustrations, forms an excellent feature. The stories by Nellie L. McClung, W. A. Fraser and Herman Whitaker are exceptionally good. Arnold Haultain takes the country and the government to task in an article entitled "Art and the Tariff," which is mainly a protest against the duty on sculpture. Mr. McCredy continues his story of the early days of the Federal Government. It will thus be seen that the menu card is lengthy and varied.

Rich sense of comfort when well made

## POSTUM

Hot, crisp, delicious, goes with the meal.

"There's a Reason"

Read "The Road to Wellville," in pkgs

## SOCIAL AND PERSONAL

—Mr. J. Irwin, Lindsay, was in the city yesterday on business.

—Three large parcels of old papers at this office for only ten cents.

—Mr. C. G. Keyes, Hamilton, was a guest at the Oriental yesterday.

—Mr. G. H. Roper, of the Y.M.C.A., has gone to his home in Toronto.

—For bargains in fancy goods and stationery, come to Times Bookstore.

—Mr. G. M. Boyd, Boycavgeon was in the city yesterday a guest at the Snowden House.

—Mr. J. G. Fitzgerald, of Ottawa, district for the Singer Sewing Machine Co., is in the city.

—Mrs. William Wright, of Tweed, was in the city, the guest of her daughter, Mrs. F. Cobb, this week.

—Mr. A. A. Mulholland, manager of the paper mill, and Mr. A. B. Colville, barrister, of Campbellford, are in the city.

—Mr. W. H. Meldrum and Mr. R. H. Hall, M.P., have returned after a most enjoyable trip to Chicago, Milwaukee and Detroit.

—Wanted at once a woman to do cleaning. Apply at this office.

—W. G. Fischer, Toronto; Jas. Norris Kingston; F. Earle Walker, Montreal; R. Home, Toronto, are guests at the Snowden House.

—Mr. E. P. Terrace and Clarence W. Dunoon, who have been visiting their uncle, Mr. Robt. Gibbs, for a few days, have returned to Chicago.

—Mrs. R. A. Graham, of Toronto, and Miss K. Kennedy, of Dunsford, are the guests of their sister, Mrs. J. D. Haggart, 79 Union street.

—Dr. Elmer A. Best, who has just graduated from the Chicago College of Dentistry, is in the city on a visit to his father, Mr. John Best, Donegal street.

—Mr. and Mrs. W. J. Hopwood, of Toronto, were in the city yesterday en route to Chemong, where they are going to prepare their summer home for this season.

—Direct your friends who are are strangers in the city to the Times Bookstore for dainty souvenirs in china and burnt wood. Views of all places of interest hand painted on each. We also have books descriptive of the lift lock.

—T. H. Hastings, C. S. Macburney, W. D. Simmons, Toronto; John Beaufort, New York; G. W. Stone, Toronto; J. H. Bartell, Orillia; A. West, New York; N. M. Harvey, New York, are guests at the Oriental Hotel.

### Auto Service to Chemong Assured.

As foretold a few days ago in The Times, arrangements have now been completed by Messrs. Bruce Lee and I. Eastwood for placing a large auto car, with a carrying capacity of 22, on the route between Peterborough and Chemong. The service will begin on June 15, and the big conveyance, which is of the latest modern design and equipped with a thirty-five horse power engine, can climb any hill at good speed.

### Contractor McPherson Kept Busy

Mr. J. McPherson, the local contractor, has his hands full at present. Among the many contracts Mr. McPherson has taken lately, over the tender for the stone and brick work of the Lakefield House of Refuge, sublet him by Messrs. Happle Bros., the same class of work for the new large wholesale warehouse of Messrs. T. Kinnear & Co., wholesale grocers, which building will be placed on the Cook property, George street, and also the stone and brick work of the new office buildings, about to be built by the Peterboro Cereal Co.

### Peterboro People in Lakefield

—The Lakefield News says: Miss Huldah, Dobbin of Peterboro, spent the 24th in the village visiting friends. • • Miss Cora Montgomery of Peterborough, spent Thursday in the village visiting friends. • • Miss Blanche Graham spent Friday in Peterborough visiting friends. • • Miss Janet Quinn of Peterborough, spent Victoria Day in the village. • • Mr. Leo Young of Toronto, and the Misses Young of Peterborough, spent Victoria Day in the village visiting friends. • • Mr. and Mrs. Pappas of Peterborough, were visiting friends in the village on Sunday. • • Mr. Wm. McGregor of Peterborough, who recently purchased Mr. J. E. Kelly's barbering business, took charge on Monday. Mr. McGregor has the reputation of being a skilful artist in his profession.

## *Getting Ready For Decoration*

**Local Oddfellows Preparing for the Popular and Impressive Ceremony.**

Decoration Day has for many years been a red letter day in Peterboro, thanks to the exemplary lesson taught by brethren of the triple links. Now the local Oddfellows are making preparations for this event, which will be held about the 21st of June. The exact date will be decided during the next few days, when the usual procession will be held to, and the appropriate ceremonies will be held in, Little Lake cemetery.

### Trout and Skeeters Bit Well.

Yesterday a party of four local sports returned after a two days' fishing trip at Cavanville. These gentlemen had great lusk and brought back eighty-two speckled beauties, which they allege average 17 ounces each. This weight, however, is merely for publication, not necessarily etc.

They report that whilst the trout bit well, the musquitos bit better. One member of the party spent thirty six minutes counting the pests on one square inch of his epidermis; when he got fairly into the hundred thousands he found that the first musquitoes counted had died from a rush of blood and had been replaced by 11221 children and grandchildren, who had hatched out during the count.

SUBSCRIBE FOR THE TIMES.

### The Best Guaranty of Merit Is Open Publicity.

Every bottle of Dr. Pierce's world-famed medicines leaving the great laboratory at Buffalo, N. Y., has printed upon its wrapper all the ingredients entering into its composition. This fact alone placed Dr. Pierce's Family Medicines on a par *with all by themselves*. They cannot be classed with patent or secret medicines because they are neither. This is why so many unprejudiced physician prescribe them and recommend them to their patients. They know what they are composed of, and that the ingredient are those endorsed by the most eminent medical authorities.

The further fact that neither Dr. Pierce's Golden Medical Discovery, the great stomach tonic, liver-invigorator heart regulator and blood purifier, nor its "Favorite Prescription" for weak, over worked, broken-down, nervous women contains any alcohol, also entitles them to a place all by themselves.

Many years ago, Dr. Pierce discovered that chemically pure glycerine, of proper strength, is a better solvent and preservative of the medicinal principles residing in our indigenous, or native, medicinal plants than is alcohol; and, further more, that it possesses valuable medicinal properties of its own, being demulcent nutritive, antiseptic, and a most efficient antiferment.

Neither of the above medicines contains alcohol, or any harmful, habit-forming drug, as will be seen from a glance at the formula printed on each bottle wrapper. They are safe to use and potent to cure.

Not only do physicians prescribe the above, non-secret medicines largely, but the most intelligent people employ them—people who would not think of using the ordinary patent, or secret medicines. Every ingredient entering into the composition of Dr. Pierce's medicines has the strongest kind of an endorsement from leading medical writers of the several schools of practice. No other medicines put up for like purposes has any such *professional* endorsement.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pellet" is a gentle laxative, and two a mild cathartic. Druggists sell them, and nothing is "just as good." Easy to take as candy.

## *Mr. W. Duncan's Son Dies, Aged 15*

**John Duncan Passes Away in the Nicholl's Hospital.**

Today the last mortal remains of John Duncan, aged 15 years, son of Mr. Wm. Duncan, corner of George and Sherbrooke streets, who died on Thursday night at Nicholls hospital, will be laid to rest.

The young man, it seems had been working some months ago in the lumber camps, and getting septic infection, was brought to the hospital. Here everything possible was done for him, but he gradually grew worse and passed away Thursday night.

Lax-ets—A Candy Bowel Laxative.
If you have Constipation,
If you have a coated tongue.
If you are dizzy, bilious, sallow.
If you have Headaches, Sour Stomach, etc., risk 5 cents on Lax-ets See for yourself. J. D. Tully.

## Rare Chance for a BEAUTIFUL HOME

We are instructed by Mr. C. E. McALLISTER to sell his entire property in East City, consisting of:—

### No. 1.

His beautiful Residence situated on Roger street and known as ENGLEBURN PARK containing 5 acres of land, about three of which has been laid out in choice Building Lots, some fronting on Burnham street and others having a commanding view of the River. The balance of about 3 acres is included with the House, a large lawn beautified by choice shrubs and ornamental trees, nice garden with choice fruit, also first class stable and carriage house.

### No. 2.

A block of land containing about 3 acres with two splendid Houses, situated on the corner Burnham and Maria streets and known as the property of the late John Burnham. This has recently been subdivided into Building Lots.

Also his Summer Home situated at Mount Rascal, on Clear Lake, containing 3 acres of land and Cottage furnished throughout, also Ice House filled with ice. This we have for sale, or to rent at a reasonable rent for the season or by the month.

As Mr. McAllister intends removing from Peterborough we are authorized to dispose of his City Property enbloc or divided as per Plan at our Office.

Price and full particulars on application.

DRAW ATTENTION TO THE "NEW THEORY"

Over 75% Winners

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $15,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interests of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on this "New Theory," and have demonstrated that every racing season it shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this? So change is here your original capital, and your profits simply showing you its full earning capacity, which was the great secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously and consecutively. There are no "ifs" and "ands" and we stake our reputation on same.

### What the "New Theory" Will Do

It will withstand ninety-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in the system.

If averages thirty-two plays a month, or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, pastroom or hard book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

### What the "New Theory" Will Not Do

It will not make you rich over night.

It is not depending upon favorites or chalices. We often play on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

NOTE—

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into agreement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

RESULT—

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

### ABSOLUTELY INFALLIBLE

It earned $50,000 for the originator last season in four months, $63,000 two years ago, and $57,300 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 160 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Noting of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

### NOTICE:

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)

Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

GUARANTEE—

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours 9 a.m. to 9 p.m. Sunday by previous appointment.

## Sad Drowning of Rev. W. M. Roger

### Presbyterian Pastor Well Known in This City Passes Away.

It will come as a great shock to the many friends and admirers of Rev W M Roger, M A, to learn that this talent d and widely respected minister, has passed away.

The first intelligence of Mr. Roger's death received here, was a telegram received by Mr G M Roger from the Presbyterian minister at Tweed, saying that Rev. Mr. Roger was missing. It seems that Rev. Mr. Roger had driven out, from Bancroft on Thursday alone, to have a fish. His horse was found unattended on Friday evening by a farmer, who took the animal to his place. On Friday a party of fishermen drove from Bancroft to the same spot as Mr. Roger had left for. The farmer referred to asked the party about the horse to discover its owner, and ascertained from them that it was Mr. Roger's.

Mr. Roger has been boarding for the past two months at Bancroft, engaged in Presbyterian missionary work. As Rev. Mr. Roger had not returned the members of the fishing party assisted by others, made a deligent search for him, and not getting any trace of the missing clergyman, Mr. G. M. Roger of this city, left for the scene Saturday morning and did not get there until the same night.

Mr. G. M. Roger telephoned yesterday that the body had been found in a shallow creek, and as Rev. Mr. Roger's remains and fishing outfit were not accompanied by any fish, the presumption is that he must, shortly after arriving, have fainted or fallen so as to strike his head, and whilst senseless had been drowned in the shallow water.

The deceased clergyman was eldest son of the late Rev J. M. Roger, the pioneer Presbyterian pastor of Peterborough, and predecessor of Rev. Mr. Torrance, pastor of St. Paul's church. He graduated as M. A. at Toronto University, and in theology at Knox College. His first charge was at Perth. Other charges taken by him were Ashburn and London south. After leaving London he was engaged in work in connection with the French evangelization work of the church in Scotland. While in that country he received an appointment to the Mauritius in connection with the Church of Scotland. He was in the Mauritius for a number of years together with Mrs. Roger and his daughter. On his return to Canada he became engaged in missionary work in British Columbia for two years, and had only been, as noted, at Bancroft for two months previous to his lamented taking off.

He leaves to mourn his loss, besides a wide circle of personal friends, his widow and daughter Miss Alice Roger, living at "Cordsch," the residence of his brother, Mr. G. M. Roger; and Mrs. Fairbairn, also of Peterborough.

Mr. G M Roger will arrive by the 11.30 train from Lindsay today with the last mortal remains of the deceased. The funeral will take place this afternoon at 3 p.m. from Mr. G. M. Roger's residence.

## Why Not Pay Mr. Bogue His Money?

### Correspondent Objects to Local Contractor Not Being Paid His Money

(To the Editor of The Times.)

Dear Sir,—I saw in your valuable paper a day or two ago, that Mr. J. Robson's sewer on Hunter street, east side, is being held up by Mr. Bogue refusing him an outlet by the outfall sewer. Now your article might lead people, not knowing the way in which Mr Bogue is being treated by the city, to think he is acting crankily. I claim to be pretty well acquainted with this matter, and I think it only fair to explain matters.

Mr. Bogue has completed a very large percentage of his sewer, and on that part already fully finished only he is asking the city to pay him 95 per cent. of his contract price. This the city engineer refuses to do, only recommending 85 per cent. payment. This seems a most unfair deal. Mr. Bogue's personal expenditure probably far exceeds what he has already received from the city, and all he is asking for is a part of his well earned profit, as well as what he is now out of pocket. The city engineer recommends bringing an expert here from Toronto to settle this matter. I understand from Mr. Bogue that he has neither consented to abide by this expert's decision, nor will he be actuated by it.

Whether this expert's advice is taken or not it seems to me a great injustice that a local citizen, who has done good work, and with which the city finds no fault, should be kept out of hundreds, if not thousands of dollars honestly earned.

Yours truly,
FAIR PLAY.

### Waterways Commission's Powers.

Ottawa, June 4.—A meeting of the International Waterways Commission will be held in Toronto on June 5, to consider the proposed work of the Minnesota Power and Canal company, under which there would be a diversion southward of certain streams which now empty into Rainy River. This is taken to mean that the jurisdiction of the United States section has been enlarged beyond the consideration merely of waters that find their outlet by the St. Lawrence, as was originally proposed.

## Toronto Band In S. A. Barracks

### Large Audience Greets Fine Musical Aggregation.

On Saturday night the fine band 35 strong connected with the Temple corps of the Salvation Army, Toronto, arrived in the city by the 7.33 C.P.R train. The local band of the Army itself a musical organization of and great merit, played their Toronto confreres from the depot to the barracks.

Here at 25 cents a head, the barracks Saturday evening quickly filled with an audience that were thoroughly delighted with the splendid music furnished by the Toronto band under leadership of Bandmaster McGrath. Whilst the Saturday night proceedings were largely musical in character, the usual devotional services were rendered by Ensign McElheneny of Toronto, who accompanied the band. Yesterday Yesterday services were held in the barracks at 11 a.m., 3 p.m., and 7 p.m., at which the Toronto band rendered several selections. The local band as usual played on the streets. The profits of Saturday night's entertainment, after deducting expenses of the visiting band and the average collection, were divided equally between the local corps and the Provincial Treasury of the Army.

## Bar Windows Are Covered

### Inspector Cochrane Explains This Seemingly Break of the Law.

Last night a well known citizen called up The Times to say that there is something radically wrong in the administration of the liquor law in this city. He said that yesterday he passed by several local hotels, the bar room windows of which were rendered impossible for the public to see through. This action on his part was taken partly through a trial held in the police court last week, when a Simcoe street hotelman was charged with having a curtain over his bar-room windows, contrary to regulations of the Peterboro License Commissioners. Our informant stated that five or six barrooms were yesterday rendered impervious to sight by boards or other obstruction.

The Times called up Inspector Cochrane, and asked him what explanation of such a condition could be given. Mr. Cochrane informed us that these covered bar-room windows are known by the license commissioners, most of them having been thus covered before the new regulations went into force, and in some instances are rendered impossible to see through by formation of the building. He contended that the case of last week arose out of artifical coverings over the windows, and through no personal animus against the hotelman tried.

### A GREAT EXHIBITION

#### Cole Bros.' Colossal Circus and Menageres.

No matter what engagements you may have made for Friday, June 8th, the day and date that Cole Brothers United Shows will exhibit in Peterborough, break them now. Even if you can not attend the afternoon or evening performance, you can ill afford to miss viewing the gorgeous street parade at 10 a. m. and the thrilling free-out-of-doors exhibition to be given immediately afterward on the show grounds and again at 6.30 p.m. If necessary, miss the former but not the latter, which will prove the biggest surprise treat of the year. Mlle D'Zizi, one of the fairest daughters of France, has been especially engaged by Cole Brothers to "span death's arch" upon a slender bicycle and this she does twice daily. This is an act which has never been attempted before by any women, even the most fearless of whom gasp with horror every time they witness it. While no other lady cyclist would ever dream of trying, Mlle D'Zizi accomplishes every week-day morning and evening with as much unconcern as the average person would exhibit when partaking of dinner. Ascending a tall, fragile wooden incline plane to the top, mounting a light bike and riding toward the earth at terrific speed, then arching a 55-foot death gap and landing upon the other side in safety, is the frightful feat executed by this intrepid beauty. There is absolutely no charge made. It is presented in the open air as stated above free to all who visit the show lot.

### Military Church Parade.

The 57th Regiment will parade to St. John's church next Sunday evening, when the sermon will be preached by Rev. Canon Davidson, rector of St. John's and chaplain of the regiment.

### United States Naval Estimate.

Washington, D. C., June 4.—The naval appropriation bill was reported to the Senate Saturday by Chairman Hale. The total increase made by the Senate was $2,461,837, making a grand total of $103,-070,673. The House provision for the powerful battleship equal to the English ship Dreadnought remained in the bill.

### New York's Great Budget.

New York, June 4.—It took 51,146 persons to conduct the government of the city of New York last year. That is the official figure from the city's pay roll. The salaries paid to these employes was $64,264,647.67. This is four millions more than the year before and eight millions more than in 1903. Mayor McClelland gave the figures to the aldermen in his financial message.

### Union of Italian Laborers.

Toronto, June 4.—A movement, headed by Mr. John Flett, Dominion organizer of the Canadian Trades and Labor Congress, has been started to form a union of the Italian laborers in the city. Several thousands of these live in Toronto, and it is expected that they can be joined into one of the biggest unions on the continent.

### Bound for North Pole.

Trondhjem, June 4.—Five members of the Wellman-Chicago-Record-Herald polar expedition, have arrived here, bound for Spitzbergen, where they will make preliminary arrangements pending the arrival of the leader and other members of the party. Those here, who sail for the north today, are Messrs Hersey, Hirschberg, Buzzacott, Ekentaal and Rosenberg.

### Grand Trunk Hotel at Ottawa.

Montreal, June 4.—A Grand Trunk official stated that the company has decided upon the plans for a big hotel in Ottawa, which will be erected in connection with the new Union station. It will span the canal, close to Sparks street and will take in the entire Government park property from the Bate & Company's warehouse to Sparks street. It will face on Sparks street.

### Belleville to Have a New Police Force

Belleville, June 4.—The resignations of all members of the police force of this city have been called for by the police commissioners. They will take effect on June 30. New members of the force must be 26 years old or under. This action of the police commissioners is precipitated by the feeling of the citizens, who think the force as at present constituted is not what it should be.

### Wedded Couple Disappears.

Denver, June 4.—Miss Josephine Hood, an Asheville, N. C., belle, became the bride of John G. Cavendish, an Englishman of Boer war fame, at New Iberia, La., December 18 last. Cavendish professed to own an extensive plantation in Mexico.

The pair came to Denver on a visit, ostensibly on their way to South Africa on a trip. Since that time neither has been heard from, and John Hood, father of the bride, has telegraphed to thorough search here. Hood is a retired millionaire. He fears foul play, letters to his daughter here having been returned unopened.

### POLICE NEWS

Daily Happenings in Court Room and Station.

Saturday was his Worship's busy day at the police court. James Lyle pleaded guilty to being drunk and disorderly, in a public place. He was fined $2 and costs, amounting to $5.75. Lyle also pleaded guilty to a further charge, that of carrying a concealed weapon, to wit a revolver, but explained he had put the weapon in his pocket, as he had intended leaving the day before for the Soo, but the date of his leaving had been changed to Monday.

"$20" remarked the magistrate, "and it must be paid forthwith, or in default of payment 20 days in jail with hard labor."

John Cooley pleaded guilty to trespassing on the premises of Wm. Duncan, George street. It seems that John had looked through the bottoms of too many glasses, the contents of which had passed into his department of the interior, when he went into the house. His unwelcome call cost him $5 or 10 days.

David Potts, lessee of Chemong Park hotel, was charged with attempting to buy on the market poultry and eggs, before 10 o'clock, contrary to the bylaw. He said he was buying supplies for his hotel at Chemong and not for his store. The magistrate dismissed the case.

A bicyclist was assessed $2 for pavement work.

Thos. Frost and Fred LaPlante were charged with having caught protected fish, to wit, two maskinonge by the former, and a bass by the latter out of season.

## Labor Anarchists Scorn Marriage

### Believe in Free Love and Individual Freedom.

Chicago, June 4.—There are three classes of labor unionists, all apparently more or less connected with each other. One is the ordinary labor unionist, the second the socialist, who favors division of the world's wealth, and the anarchist, who favors the overthrow and destruction of all governments and all authority. Emma Goldman is the exponent of the latter brand. This noted woman has been living in Chicago of late, where she lectures before the labor unionists and anarchist clubs. A despatch says that the Goldman woman and Alexander Berkman, whose coming to Chicago spread panic among the police long before their arrival, sat on a bench in Lincoln Park the other day, hand in hand, not denying they were happy together, but of marriage, so far as formalities are concerned, they uttered only scorn.

"The basis of living together," said Miss Goldman, "is a true spiritual love that still leaves free scope for individuality. That means companionship. But whenever one anarchist ceases to love another more than any one else in the world, then he is free to go his way."

"Emma visited me twice while I was in prison," said Berkman, as he smiled upon her lovingly. "The first time was after I had been there two months. She came as my sister. Then for ten years I had no visitor. They kept me in solitary confinement. But two months ago Emma Goldman came to see me."

"I've known Berkman since 1889 and I loved him" said Miss Goldman, frankly. "I loved him so that if I had been able to comfort Berkman with the affection of any woman during the time he has been in that penitentiary I would have done everything in my power to so comfort him."

Berkman, whose face has good color despite his years of confinement, glowed as he said: "The love of one anarchist for another is the most beautiful love there is."

### Run Store Like Christ.

Coshocton, Ohio, June 4.—"On business principles," declared Rev. I. N. Dillon, when asked whether he would run the new grocery his church will establish "like Christ would" or as a business man. "This running things 'as Christ would' is a misnomer, a woeful one," he continued. "Christ would have run any business right up to its limit to make as much money out of it honestly and honorably as possible. The Lord put people on earth to help themselves, and the man who waits for the Lord to come along and give him a lift will wait a long time. We shall run our grocery on practical business lines."

### Judge MacTavish in Ottawa.

Ottawa, June 4.—"The work is progressing with rapidity," said Judge MacTavish, chairman of the insurance commission, who was here yesterday on a flying visit. He came in from Toronto yesterday morning and returned last night.

Judge MacTavish says the investigation into the Canada Life is affording the commissioners plenty to do at the present time. There are so many other companies to be taken up, the chairman cannot tell how much longer the inquiry will last. He says the investigation will be resumed in Ottawa as soon as the program already in hand is exhausted.

## Roosevelt May Be Next Victim

### Nihilist Crowd on Pacific Coast Said to Have Designs on the President's Life---Drunken Italian Threatens the Longworths.

Portland, Ore., June 3.—As the outcome of the arrest of a Pole in this city for an assault upon several Russians, local detectives have learned of the existence here of a large body of Russian Nihilists who it is alleged, have been plotting the assassination of President Roosevelt, simply awaiting the accumulation of sufficient funds before sending a deputation to Washington to carry out the scheme.

The Pole, who claims to have been threatened with death by several of the plotters, and who was arrested for assault, was acquitted yesterday, and it was then that the detectives learned of the alleged true purpose of the organization.

Friends of the Pole informed the police of the doings of the Nihilists, local detectives have learned of the existence here of a large body of Russian Nihilists who it is alleged, have been plotting the assassination of President Roosevelt, simply awaiting the accumulation of sufficient funds before sending a deputation to Washington to carry out the scheme.

The Pole, who claims to have been threatened with death by several of the plotters, and who was arrested for assault, was acquitted yesterday, and it was then that the detectives learned of the alleged true purpose of the organization.

Friends of the Pole informed the police of the doings of the Nihilists, who, of their eulogistic praise of Czolgoz, the assassin of President McKinley, and finally of their desire for the death of President Roosevelt.

Detectives have been put on the case.

### LONGWORTHS IN DANGER.

New York, June 3.—Just before the steamer St. Louis left the American Line pier for Southampton some excitement was caused by a drunken Italian declaring that he was an anarchist, and that he intended to throw a bomb at Congressman Nicholas Longworth and his wife, who were on board.

By the time a policeman could be found the man had disappeared.

## Not Worth the Living

### Sorry Condition of Many in Peterborough Today.

Those who never have any stomach troubles and whose digestion is like that of an ostrich cannot possibly understand the sorry condition of many in Peterborough today.

Life does not seem worth the living, they bear up with nervous irritation, sleeplessness, pain and misery in the stomach, headaches, backaches, and have a constant fear that what they eat is going to disagree with them and cause still greater distress. While persons with a weakened stomach should have our sympathy, it is much better to point out the way to cure their physical troubles and make it possible for them to once more enjoy life without thought or care as to what may be eaten.

In Mi-o-na there is a remedy that restors the lost functions of the digestive system, revives flagging nutrition, and aids in the assimilation of food. This remedy soothes and heals the irritated and inflamed walls of the stomach, strengthens the nerve centers of the digestive system, and makes a permanent and positive cure in all forms of stomach trouble, excepting cancer.

Mi-o-na costs but 50c. a box

If you cannot obtain Mi-o-na of your druggist it will be sent by mail, postpaid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithica, N. Y.

## Arrested After Breaking Records

### Two Young Men Taken Into Custody for Fighting in Munden's Store.

On Saturday night two young men named respectively Burns and Gorham were arrested for fighting and disorderly conduct on Simcoe street. It is alleged that the young men entered Mr. Charles Munden's agency of Columbia graphophones, and getting into a mix-up. They broke one of the expensive graphophones, and destroyed $3 worth of records. Yesterday Burns was released on his own recognisance by order of the magistrate. The two men will appear for trial at 9 a.m. today.

### MR. THOS. ROBINSON GONE

#### Life-Long Resident of Smith Township Has Passed Away.

The last mortal remains of Mr. Thomas Robinson, one of the pioneers of Smith township, who passed away Saturday morning, at his residence 8th concession, will be laid to rest in the Lakefield cemetery this afternoon. The deceased who 76 years of age, was predeceased by his wife, but leaves three daughters Mrs. Robinson, Peterboro; Mrs. G. Murphy, Bobcaygeon, and Mrs. Abbot, Manitoba, and one son, Charles, living on the homestead.

The deceased was a member of the Baptist church. He was a staunch Liberal in politics, and always was active in municipal work.

## Many Dupes Bite At Bargain Bait

### Non-Existent "Co-Operative System" by Extensive Advertising and Alluring Offers Attracted a Flow of Cash.

Woodstock, June 3.—"For sale — sugar, 33 lbs. best granulated sugar for one dollar; also everything you eat, wear or use, at wholesale, no matter where you live; Co-operation pays the freight and saves you one-third. Send for list. First National Co-operative Society, Woodstock, Ont."

The foregoing advertisement inserted in various Canadian papers, are tracted attention, it would seem from results all over Canada.

Last night High Constable Boyle St. Catharines, and Constable Hill of this city went to Beachville, and took Arthur Smith of Hilcrest Farm into custody. This morning the prisoner was taken to St. Catharines to answer to a charge of obtaining money under false pretences, with intent to defraud.

The arrest was made at the instigation of E. G. Hull & Sons of St. Catharines, nurserymen, who claim to have sent money to Smith Bros., of Beachville for a shipment of seed potatoes, which was never forwarded.

The arrest led to the uncovering of some strange doings. Circular letters, it is said, have been sent broadcast over the country by means of the mails, advertising "seed potatoes, which sold in the old country in 1903 for $7000 per stone (14 pounds), collie dogs, imported hogs, strawberry plants" and other things almost as varied and numerous as it is possible to imagine. This circular was directly responsible for the arrest of Arthur Smith.

#### A MONTHLY PUBLICATION.

In addition to the circular, a publication, known as the Canadian Co-Operator, was published monthly and sent out, advertising everything "from a needle to an anchor," the choice of goods being as great as is found in the biggest department store in the land. Groceries are given particular attention, and prices are quoted away below those which the manufacturers quote to the wholesalers. Granulated sugar cannot be bought at 33 lbs. for a dollar in carload lots, but the unsuspecting were duped right and left, and money orders, postal notes, registered letters, bank drafts, etc., have been coming to the Woodstock postoffice for months, only to be sent to the local letter office and returned to the senders.

The First National Co-Operative Society could not be located by the authorities here, and an inspector of the postoffice department came here to investigate the society. It was decided, for some reason, not known to the local police not to prosecute the concern. Chief Zeats worked the matter up, but did not care to proceed after it had been dropped by his official superiors.

#### MANY DUPES

The "First National" has no office in this city, but mail addressed to the concern found its way into Smith's hands, and he is held responsible.

Chief Zeats has received many communications from people who have been duped, and in some cases the dupes have even come to this city to try to recover their money. The mails were extensively used, and farmers seemed to be the special mark.

The police are in possession of advertisements which have appeared over the high-sounding name of the aforesaid company in many newspapers, the "ads" being sent to readers who knew Woodstock, and became suspicious.

Smith will come up for trial on Tuesday.

## Three Children Died In Trunk

Kankakee, Ill., June 3.—Three young children of the family of Mr. and Mrs Adelord Van Slette had been playing out of doors much of the day yesterday listening to music and watching martial display. Late in the afternoon they went into the house to continue their romping.

Supper time came and Mrs. Van Slette's calls through the house and yard failed to bring any response. She searched every nook and corner without result.

After a lapse of four hours the mother discovered the tray of a Saratoga trunk on the bed and on opening the trunk found her babies dead. Ida, aged 8 years, was sitting upright, her head dropping on her breast. The two other younger ones were lying on a pillow on the bottom.

The Van Slettes moved here from a farm at Beaverville a year ago. The husband is a teamster in good circumstances and the family consisted of six boys and four girls.

### MORE HIGH FINANCE.

Chicago, June 3.—Judge Landis was told yesterday that the American Crushed Stone Company has been paying 25 per cent. dividends to stockholders, when protested paper has stood out against it and notes which have fallen due have not been paid. In view of this and other representations of a serious nature made by counsel for creditors, the court appointed F. E. Klosterman receiver in $25,000 bonds.

### KNIFED

#### Coffee Killed an Old Soldier.

An old soldier, released from coffee at 72, recovered his health and tells about it as follows:

"I stuck to coffee for years although it knifed me again and again.

"About eight years ago, (as a result of coffee drinking which congested my liver) I was taken with a very severe attack of malarial fever.

"I would apparently recover and start about my usual work only to suffer a relapse. After this had been repeated several times during the year I was again taken violently ill.

"The Doctor said he had carefully studied my case and it was either quit coffee or die, advising me to take Postum in its place. I had always thought coffee one of my dearest friends, and especially when sick, and I was very much taken back by the Doctor's decision for I hadn't suspected the coffee I drank could possibly cause my troubles.

"I thought it over for a few minutes and finally told the Doctor I would make the change. Postum was procured for me the same day and made according to directions; well, I liked it and stuck to it and since then I have been a new man. The change in health began in a few days and surprised me, and now, although I am seventy-two years of age, I do lots of hard work and for the past month have been teaming, driving sixteen miles a day besides loading and unloading the wagon. That's what Postum in the place of coffee has done for me. I now like the Postum as well as I did coffee.

"I have known people who did not care for Postum at first, but after having learned to make it properly according to directions they have come to like it as well as coffee. I never miss a chance to praise it."—Name given by Postum Co., Battle Creek, Mich.

Look for the little book, "The Road to Wellville" in pkgs.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

### BASEBALL

Following are the results of the games played in the Eastern League on Saturday.

Jersey City 4, Baltimore 3.
Toronto 6, Buffalo 2.
Montreal 4, Rochester 2.
Providence 3, Newark 4.

• • • • •

### LACROSSE.

Capitals of Ottawa defeated Torontos on Saturday at the latter place by the close score of 6—5 The Torontos had all the better of the first half, but seemed to die away at the finish.

• • • • •

Cornwall beat the Nationals at Cornwall on Saturday by four goals to 2.

• • • • •

The Shamrocks beat the Tecumsehs at Montreal on Saturday, by a score of 6—3.

• • • • •

### THE TURF.

Gerald Dunsford has gone to Wingham, taking with him Harry Direct and Hazel Bell, the animals being entered in the races at that town on June 6th and 7th. Harry Direct will be in the 2.50 trot or pace, and Hazel Bell in the 2.20 event. Dr. Johnston, V.S., who controls the horses, will leave for Wingham this week. The horses will, after the meet there, be sent to London, Seaforth, Listowel, Stratford and Preston.

## Old House on Water St. to Go

### Mr. Frank Mason to Enlarge His Fine Greenhouses.

On a venerable shack situated just to the south of Mr. Frank Mason's new green house on Water street, appears a sign reading, "This house for sale, must be removed before July 1st."

Mr. Mason has decided on an extensive addition to his greenhouse, which, although extensive, are insufficient to supply the growing demands of his trade.

The addition, which will be 40 feet by 22 feet, will be erected on the site of the old house above mentioned, which has stood on its present position for over 50 years.

### COMMISSARY CARS

#### On Homeseekers Excursion, via Canadian Pacific Railway, June 5th.

That these already attractive excursions may be made more popular and overcome the inconveniences of patrons of above excursion, in supplying their own provisions, it has been decided to place a commissary car on each section of tourist car trains, with all necessary supplies and provisions, in which substantial meals will be served at reasonable rates. It will not be necessary therefore, for passengers, who travel in the equipped tourist cars to go to the trouble of taking their own provisions. All this is by way of an experiment, depending largely on the patronage received, whether the commissary cars will be run also, on excursions June 19th, July 3rd and 17th. For further information see W. McIlroy, city passenger agent.

## Your 'Fagged' Feeling Is Spring Sickness

**This Unhealthy Weather Will Intensify Your Exhaustion Unless You Have Good Medicine.**

Time won't help; matters grow worse instead of better if your system isn't rid of its poisonous burden.

Your blood is not only thin, but is contaminated with a whole winter's accumulation of wastes.

A stimulating blood tonic is required.

What's it going to be?

No bitters or alcoholic dope, but concentrated cure in the form of "Ferrozone" which is known as the best of all spring rejuvenators.

It creates keen appetite.
Produces prodigious digestion.
Converts food into nourishment.
Gives richness and vitality to the blood.
Makes strong nerves and hardy muscles.

Ferrozone possesses power that cannot be doubted. It will do for you what it did for Walter Wood, of Beaufort Car Co., N. B., who writes. "I can say that Ferrozone has given me a new lease of life. A year ago I suffered much from nervous weakness. I was really scarcely able to drag myself around. My appetite was gone, I had no color or ambition and felt generally used up. The first box of Ferrozone started me back to health. I took a number of boxes, but it was worth while as my health was completely restored."

Get back to health with Ferrozone. Your druggist sells it, 50c. per box or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

English Office—30 Fleet street, London, E. C.

PETERBORO JUNE 6, 1906

### THE JOY OF RURAL LIFE

The Hamilton Spectator, in speaking editorially of the rush of farm boys to the city, moralizes on the beauty of a life in the country. "Let memory," remarks the writer, "carry the reader of these musings back forty years and see the way strewn wrecks of the failures in business and professional life; while, on the other hand, the men who stuck to the farm have journeyed down to a serene old age in comfort. The farmer begins life in partnership with Nature; he lives with trees and flowers, and breathes the sweet air of the fields. There is no constant strain on his mind. His nights are filled with sleep and rest. He watches his flocks and herds as they feed upon the green and hilly slopes. He hears the patter of the rain as it falls upon the waving corn, and the trees he planted in his youth rustle about him as he plants anew for the children yet to be. He lives the ideal life, yet as he grows in years he repines over imaginary lost opportunities that might have brought him wealth and honor in the city."

### NOGI AND STOESSEL.

General Nogi's word should carry weight in Russia. His hand was heavy enough, in all reason, and his whole conduct has given proof that he is as well considered in his words as in his deeds. Dispatches from Tokio say that he has wired St. Petersburg saying that, if it is true that General Stoessel has been condemned to death for the surrender of Port Arthur, he wishes to testify in his former opponent's behalf that the surrender was inevitable and could not have been avoided. Russia may properly consider this testimony as important.

Stoessel, of course, was not the greatest of commanders who ever defended a doomed cause for Russia. In the days when Nogi's name had not even got past the Japanese censor office, when the world knew Port Arthur was besieged without knowing who the commander of the besieging army was, Stoessel was as much of a hero as telegraph wires, paper and ink could make him. In the later days of the siege the tales that leaked out from Port Arthur made some of his subordinates seem the real heroes of the defense and left Stoessel in a rather unattractive light. But when the time for the inevitable surrender came, it was nevertheless Stoessel who had the final word to say and who put himself in position for the certain court-martial and for the probable role of scapegoat.

The dispatches as to Stoessel's fate are typically Tartar. The decision of the court-martial is not formally announced, but merely hinted at. Mystery makes it more terrible. It is "death," say some. It is an assignment to some little post in Siberia where death will come "by accident" some fine day, say others. Minor cruelties are added for good measure.

Whatever Stoessel's deserts may be, it would certainly be more just if he could sit in judgment on the Russian bureaucracy instead of having a bureaucratic court-martial sit in judgment on him. Should this latter procedure be possible, it is certain that the chivalrous Nogi could not see his way to speak so much as a single word against whatever punishment might be decreed to fit the bureaucratic crime.

### A WORD FOR THE EDITORS

Ministers were exhorted to take a lesson from the modern newspaper by Bishop Samuel Fallows, of Chicago, in a sermon delivered at the General Council of the Reformed Episcopal Church in Philadelphia. The bishop said the press in some respects had superseded the pulpit, and now exercises many of the functions which the pulpit has lost. He said: "The preacher of today can learn many valuable lessons from the modern newspaper. He should emulate it and catch its style. The ideal newspaper articles are sharp, short, pungent and to the point. The sermon should have all these characteristics." The bishop said the press has been the faithful ally of the pulpit in breaking down caste, in favoring humanitarian reforms, and in advocating the rights of all. "When the prayer book was first compiled," he said, "journalism has scarcely begun its existence. Hence no mention is made of editors in the enumerated list of persons needing the prayers of the church. No revision ought to be deemed complete which does not include them, for no class requires more intercession of the saints."

**All He Needed.**

A number of Wall street men at luncheon one day were discussing the remarkable ability of a certain operator in the street to weather any financial storm.

"Why," said one of the financiers, "that chap's a wonder. I don't know how many times they've had him against the wall, yet he always contrives to get away."

"I have heard it said," observed another, "that Blank is resourceful enough to make a living on a desert island."

"Yes, he could do that, too," affirmed the first speaker, "if there were another man on the island."

**The Perfect Spanish Beggar.**

There is a calm dignity about the Spaniard of every class which will strike a stranger. Even the beggars, of whom, goodness knows, there are plenty, seem to stand on a higher platform than their confreres in other lands. In our country the statutory address is, "Could you spare me a copper?" but a Spanish beggar thus addressed as at a railway station, and we give his address as typical of his class, "O senorito, da me un alimosnita, y rogare por su feliz viaje!" which may be translated into English thus: "Oh, little gentleman, give me an alms, and I will pray for you a happy journey."

**A Singular Epitaph.**

At Annapolis, N. S., and in the military cemetery attached to old Fort Anne is a tombstone with the following odd inscription:

Here Lyeth the Body of
Margaret Winlett,
Born the 6th day of April, 1722, and Dyed
the 28th of February, 1722.

The singular part of the epitaph is that the child, according to the engraving on the headstone, died nearly a year before its birth.

**Interpreted.**

"Father," asked the youth, "what is your understanding of the saying, 'The race is not always to the swift?'"

"Practically, my son," replied the wise father, "it means that in the race of life the fast men don't usually come out ahead."

**The Decline of Chivalry.**

Wife (drearily)—Ah, me! The days of chivalry are past. Husband—What's the matter now? Wife—Sir Walter Raleigh laid his cloak on the ground for Queen Elizabeth to walk over, but you get mad simply because poor, dear mother sat down on your hat.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

### THE JURY DISAGREED.

Vancouver, B.C., June 5.—The first jury at Kamloops having disagreed in the train robbing case, the second trial of Edwards Dunn, and Colquhoun commenced yesterday. The Crown will introduce some fresh evidence, and expects to finish before Saturday night. It was just before daybreak that the foreman of the jury, which had been hearing the case for the past three days, announced that there was no hope of coming to an agreement. His Lordship said there was nothing to do but discharge them. Eleven men believed the charge proved against the alleged bandits. The twelfth man is understood to be a Socialist, who has often expressed the opinion that no poor man should be sent to prison.

The Celebrated English Cocoa.

**EPPS'S**

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**COCOA**

TENDERS FOR DREDGING

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Dredging St. Mary's River, Sault Ste. Marie, Ont.," will be received at this office until the 15th day of June, 1906, inclusively, for dredging in the St. Mary's River at Sault Ste. Marie, Ont., according to a plan and combined specification and form of tender to be seen at the office of J. G. Sing, Esq., Resident Engineer, Confederation Life Building Toronto, on application to the Postmaster at Sault Ste. Marie, District of Algoma, Ont., and at the Department of Public Works, Ottawa.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, for six thousand dollars ($6,000.00), which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS,
Secretary.
Department of Public Works,

## Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

leader," she said. "You can be the fire!"

Thereafter neither spoke for a moment. From the stables a horse whinnied softly, and a gust of laughter and the sound of a falling ale pot came from the crowded parlor.

Then they moved forward and stood by the open window.

"I see Lord Fairfax," whispered Anne, "there by the door."

The old nobleman whom her smiling eyes sought out sat quietly apart, his sword across his knees, with his body servant standing behind him. His near-sighted glances, sent squinting, searched the assembly with a lurking distrust. They were king's men truly, but not gentle like those of his own time. He turned his face toward Foy as the latter, pounding the table with his sword, suddenly spoke up loudly:

"I am just come from Philadelphia, gentlemen, where the ragamuffin congress sits, and may I be flayed if I ever saw a finer lot of noodle heads! Our Virginian cocks-o'-the-walk were all there, slimy from their hell broth of treason at Williamsburg. 'Od's heart! It sickens to the marrow of the bones to see that lout, Patrick Henry, strut about in Quakerdom."

Anne flinched as if she had been stung and seized Henry's wrist. "Oh," she said under her breath, "come away! 'Tis shameful!"

"No; let us hear it," he answered. "Think you I am not used to such as that?" His voice trailed a slender line of infinite scorn. "Look!"

For more than one of those there had got up and were going out at this. Even among those who sided with the king there were many who had spoken open disapproval of the stamp act days and loved Henry for that if for naught else.

Foy saw it. "Aye, let them go—let them go," he sneered. "'Tis time folk knew where loyalty lay, as they know with you and me, my lord."

A slow contempt went over that rugged old face. The baron had small love for this coupling. He despised the blackguard confidant of Governor Dunmore too heartily to baudy talk with him.

Foy filled his glass. "'Tis said in Philadelphia," he resumed, "that one of our Virginians got on his hind legs and told them he wished to God he could fight it out single handed with George. What think you of that, Ralph?"

Lord Fairfax had deliberately turned his back upon Foy, but he shifted in his seat now at the answer of one of the quality.

Burnaby Ralph, Foy's companion of the gold lace, already heavy with the

"I touch it to you—you dog of the kennel!"

punch and rocking tipsily in his chair, lifted his head and laughed drunkenly.

"Sooth," he hiccoughed. "The same one offered to enlist a thousand men at his own expense and march them to relieve Boston."

Anne's face went colorless, and her fingers clasped Henry's arm with a force that made him wince. "Cruel! Cruel!" she said, for the old baron broke in, stammering with choler.

"The infernal rebel!" he cried, trembling. "Is it gone so far then? Do they flout their king to his face?"

The buzz in the room ceased, and all eyes looked at the tawny old nobleman, his features working with wrath. Henry's fingers were tight closed, and Anne's white teeth bit her under lip till a spot of blood came upon it.

All in that room knew the old man. Many loved him. Not a few held lease upon his land. He was one of the last brave barons who bore his name, for the most part, whether crusaders or poets, men gentle, reckless and mindful of God—men who lived cleanly lives and died commending their souls to Jesus and bequeathing torches and sheep for their funerals. He was a man every inch of him! He blamed the king's ministers, but he loved the king.

At the leer Foy gave him some half rose angrily, but others, of the lower sort, scenting what was coming, slyly winked and smiled behind their palms.

"One could scarce be too severe with such a bloody knave, my lord."

"He should rot in Tyburn!" blazed the old man.

"Swelp me!" cried Foy with a coarse laugh. "And who, gentlemen, think you was this hangman's cur, this dirty factious scoundrel? Why, Colonel Washington, I' faith—turncoat since the French war!"

There were murmurs at this from all sides, even from these Tories, at the trap that had been set, at the wanton affront to a friendship that had been well known throughout the colony since the days when Lawrence Washington first brought sweet Anne Fairfax from Belvoir to Mount Vernon.

"Hound!" ground Henry between his teeth. A cold hand seemed pressed upon Anne's heart.

The stanch old loyalist's face had turned a gray white. He half choked, and his hand went fumbling to the lace at his throat. He was silent for a moment, his great brows together, his fingers on the arm of the chair clasping and unclasping, while Foy sneered audibly in the quiet.

"Not George!" he faltered at length. Something almost like a dry sob escaped him. He seemed not to see the sneering faces before him, now searching about for applause. He turned to

(To be continued)

### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

### SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

### SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quarts.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of a royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world to-day are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 16 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

THOS. PATTERSON & CO., Fiscal Agts.
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

$5.00 DOWN
AND
$5.00 PER MONTH
FOR FOUR MONTHS WILL BUY
500 Shares
OF STOCK WHICH MAY SOON BE WORTH
$500.00

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

W. KELSEY HALL,
Fiscal Agent, 375 Water Street,

## He is Correct

**Dr. Hamilton Proves That Piles Are Caused by Constipation and Strong Cathartics**

Knowing the frequency with which people suffer from this ailment, Dr. Hamilton made an exhaustive study into the cause of piles.

He found that the lower part of the bowels is like a network of blood-vessels, and if subjected to persistent pressure, a section will bulge out and form what is commonly known as piles.

The only effective mode of curing this trouble is the regular use of Dr. Hamilton's Pills, which can be taken before retiring. Next day will bring wonderful relief.

"I suffered up to about the limit of human endurance with piles," writes Miss Lueders, from Cornwall, Ont. "I was employed in a factory here, but for a while had to give up work till I got better of this trouble. I read in the Montreal Herald about Dr. Hamilton's Pills, and after using them for two weeks was cured. I can recommend these pills very highly; there are none better. They at once relieve and prevent a constipated condition of the bowels, and from my experience can be depended upon as a perfect safeguard against piles. Dr. Hamilton's Pills of Mandrake and Butternut, I am sure, would be a benefit to every girl or woman."

Take Dr. Hamilton's Pills and your system will be regenerated, revitalized, and made proof against disease.

Good for men, excellent for women, and most effective for children. All ages and both sexes find Dr. Hamilton's Pills a marvelous medicine. Although active, they do not gripe or cause inconvenience, still they cleanse and purify the system, thereby maintaining a high standard of health. Sold by all dealers, 25c. per box, or five boxes for $1.00, or by mail, from N. C. Polson and Co., Hartford, Conn., U. S. A., and Kingston, Ont.

GEO. J. CHALMERS
542 Water Street
or P. O. Box 831, city.

### *THE NEW TERM*

at the

## PETERBOROUGH BUSINESS COLLEGE

opens on

TUESDAY JAN. 2nd 1906

Intending students should make application as soon as possible. Call at the College or address

WM PRINGLE,
Principal.

Opposite Post Office.

## LOCAL INCIDENTS

By The Times Man on the Street

—The Cole Bros. circus will arrive in the city in 53 cars.

—See our new line of handsome souvenir post cards. Times Bookstore.

—"Stony Lake" postoffice at Junipers Island has been exchanged to "Juniper Island."

—Mr. W. Fowler, tailor, Brock St., has sold out his stock of clothes and tailors' wares, to Mr. B. Lastar.

—Yesterday Rev. A. H. Brace, pastor of Park street Baptist church entered his fourth year in his parish.

—It is reported that the last line of survey made by the C.P.R. between Lindsay and Peterborough, is soon to be placed under construction.

—Solomon in all his glory was not a circumstance to the uniform of the Toronto Salvation Army Band uniform, displayed here yesterday.

—House rents in Belleville have recently gone up 25 per cent. So our local coal dealers put their surplus funds into property in the Bay City.

—Coal is now selling in the city at $7 per ton, cash with order. Ten cents per ton per month is the fine imposed by the local coal combine for delay.

—Yesterday being Whit Sunday, Holy Communion was celebrated at the morning service in St. John's church. In the evening the service was wholly choral.

—Last week a large number of speckled trout fry were sent from the Dominion hatcheries to the Norwood pond. What's the matter with few more bass and lunge for Stony Lake and the Otonabee?

—The village was pretty well deserted on Victoria Day. There was plenty of noise on Front street, however, for a bunch of kids from Peterborough kept the fire crackers on duty all day.—Hastings Star.

—The members of the three local courts of the Canadian Order of Foresters attended divine service at Murray street Baptist church last night. Rev. F. J. Scott delivered an eloquent sermon to the visitors.

—Direct your friends who are strangers in the city to the Times Bookstore for dainty souvenirs in china and burnt wood. Views of all places of interest hand painted on each. We also have books descriptive of the Trent lock.

—Mr. Z. M. Harris, press agent of the Cole Bros. Circus, took in the C.G.E. Co baseball games on Saturday. Mr. Harris remarked to a Times representative that Peterborough is the liveliest and most hustling city of its size his extended travels has taken him to.

### 15-DAY NEW YORK EXCURSION

**Via Lehigh Valley Railroad, Friday June 15th.**

Tickets only $9.00 round trip from Suspension Bridge, Niagara Falls. Tickets good on regular express trains leaving at 3.50 and 7.15 a.m., 7.15 and 8.43 p.m. Don't fail to go. For tickets, Pullmans and particulars, call on or address Robt. S. Lewis, Passenger Agent, L. V. R., 10 King street East, Toronto.

### *A Few Features of Cole's Circus*

**This Week's Great Show Brings Novelties From Europe.**

As Peterborough will this week witness one of the largest circuses on the globe, it may interest our readers to learn what the Decatur Herald of May 31st., has to say concerning it. This paper says:

"It was the greatest circus that ever came to Decatur.

Cole Bros. circus, with its 53 cars, travelling in three sections, is a marvellous attraction, and in the menagerie are more special features than can be imagined.

When the Cole Bros. came back home, its menageries was the most complete in the country. No zoologics' garden had such a collection of valuable animals. Among the exhibit is a second Jumbo, the largest elephant in the world. Added to this, by Cole Bros. foreign agent, only recently is the smallest elephant.

Cole Bros. "Black Camel," the only one that is known of is a marvelous sight. Where has a black camel ever been exhibited? It is said to be the greatest curiosity in American zoological gardens. Another interesting sight is the black tigers, and 50 cages of zoological wonders.

Cole Bros. circus has the largest tent in existence, seating 11,000 people, and traveling with the circus are 400 people, 365 head of horses. This will give you an idea of the great show.

Like all other big attractions there is one amazing feature and most shows would make this their main exhibit in the big show.

This year Cole Bros. give absolutely free, immediately after the parade, the most astounding feat ever attempted by a woman.

Mlle. D'Zizi in spanning death's arch. This same performance is given at 6.30 p.m. Free at the show grounds.

### *Mr. W. Buller is Made Manager*

**Important Change in Management of Peterboro Fuel & Cartage Co.**

Mr. William Buller, Peterboro's veteran in the cartage business, is now manager of the Peterboro Fuel and Cartage Co., whose office is located on Charlotte street. Mr. McClellan, the former manager has resigned, and is now succeeded by Mr. Buller. Mr. Buller will take charge of the business today. We venture to prophesy that under Mr. Buller's management, his long years of experience in the various branches of the company will result in the company getting a large and lucrative slice of Peterborough's trade.

## SOCIAL AND PERSONAL

—W. H. McGean, H. Graham Seath, O.P.R., were registered at the National on Saturday.

—Mr. F. J. Slade, Cobourg, was in the city on Saturday, registered at the National Hotel.

—Mrs. R. J. Waller is visiting her father, Mr. Wm. Runnels, of Campbellford, for a few days.

—Mr. George Matthews, sr., of Lindsay, is in the city visiting his son, Mr. T. F. Matthews.

—Mrs. Brighton, Yeadon Falls, is the guest of her daughter, Mrs. W. H. Robertson, Water street.

—Mr. T. G. Blackburn, M.P.P., has returned from the legislators' trip to the Temiskaming district.

—For bargains in fancy goods and stationery, come to Times Bookstore.

—Rev. E. A. Langfeldt has again been appointed examiner in modern languages for Trinity College school, Port Hope.

—Miss Winnifred MacFarlane, Homewood avenue, left Saturday afternoon for the west. She expects to be absent until November.

—Mr. John McBrin of Peterborough, was busy shaking hands with old Madoc friends a couple of days last week.—Madoc Review.

—Mr. J. M. Laing, of Peterborough, representing the Trent Valley Navigation Company, has been in town for a couple of days closing dates for excursions.—Lindsay Post.

—Mr. Sidney Moss, representing one of the big Nottingham lace curtain manufacturers, was in the city on Saturday, booking R. Hall & Son's orders.

—Mrs. Swayne and her daughter, Miss Helen, of San Francisco, who have been the guests of Mrs. Graham Water street, for several days, leaves for home this morning via Lindsay.

### REGIMENTAL ORDERS

**All Leggings Must Be Returned at Once to the Armories.**

It will interest those belonging to the 57th Regiment to know that the following orders have been issued;

Headquarters,
Peterborough, June 2, '06.

Orders by Lieut.-Col. J. W. Miller, C.O., 57th Regt. Peterborough Rangers.

All leather leggings not now in the regimental stores must be returned to the company armories, June 5th, 1906.

By order,
D. WALKER, Capt.
Adjutant.

**At St. John's Yesterday.**

Yesterday evening, Whitsunday, the service at St. John's church was fully choral. The offertory solo, "The Lord is My Helper," by Alliken, was sung by Mr. Rice, of Montreal, whose powerful baritone voice of wide range did justice to this beautiful musical selection.

**A Kick Over Bonus System.**

Campbellford Herald says: Hastings may get the boiler industry if they pay the price. When the municipalities along the Trent can offer cheap power privileges, it is hoped that the bonus system will be archaic, a thing of the past. May it be soon.

**Local Firm Sells Goods.**

Havelock Standard says: The Peterborough Show Case Co. have lately placed two of their "silent salesmen" with our merchants. Mr. J. V. A. Coon has purchased a large one and Mrs. R. E. White, a smaller one. Mr. Dunslow, the energetic head of the firm, reports a brisk demand for their product.

**School Supplies' Contract Let.**

The Supervision Committee of the Public School Board, has awarded the contracts for supplies for the schools of Peterborough for the current year. The contract for chemicals and supplies for the Collegiate Institute, being given to Ormond & Walsh and the text books and supplies for the Public schools and kindergartens, to Mr. R. J. Soden. There was good competition.

**Cab Owners Sore on New Bylaw.**

Local cab and hack owners are up in arms against the recently passed bylaws imposing heavy license fees upon them. The Times on Saturday, interviewed several of the cab owners, and ascertained that they consider the bylaw unjust, absurd and contrary to a proper spirit of business enterprise. One cab owner has cancelled an order placed for a bus and Messrs. McCallum Bros. are seriously considering selling all their hacks. If the cabs are driven out of business it would be a serious matter for Peterboro,—particularly with the opinion visitors would carry away of the town.

### Weak Kidneys Bright's Disease and Diabetes

**Use Dr. Sheop's Restorative to Cure the Cause, If You Suffer From These Symptoms.**

Here are the symptoms of Kidney complaints: Urine laden with sediment, brick dust in urine, highly colored urine, greasy froth of blood in it, stringy mucous in urine, unusual desire to urinate, pain in passing water, pain in the back and over the kidneys, hot, dry and itching skin, hair dry and brittle, painful joints, legs feel heavy, sleeplessness, dullness, loss of weight, chilly sensations, loss of memory, general debility, irregular heart, disorders of eyesight, trouble with hearing, wasting pains, fever, distress from one to the other in standing. As improper or treatment is often worse than none. Most Kidney medicines get their effect from remedies called diuretics. These are practically purgatives, physicking or setting as cathartics but on the bowels. They excite the kidneys to unusual action, they cause over strain. These diuretic remedies are then relieves the frequent causes of serious kidney disease. Don't try to doctor the kidneys themselves, for you will only harm them. Their only strength is nerve power. Dr Sheop's Restorative vitalizes the nerves that operate the Kidneys. Sold by

J. D. TULLY.

### They Stand Alone.

Standing out in bold relief, *all alone*, and as a conspicuous example of open, frank and honest dealing with the sick and afflicted, are Dr. Pierce's Favorite Prescription for weak, over-worked, debilitated, nervous, "run-down," pain racked women, and Dr. Pierce's Golden Medical Discovery, the famous remedy for weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness, all catarrhal affections whether of the stomach, bowels, kidneys, bladder, nasal passages, throat, bronchia, or other mucous passages, also as an effective remedy for all diseases arising from thin, water or impure blood, as scrofulous and skin affections.

Each bottle of the above medicine bears upon its wrapper a badge of honesty in the full list of ingredients composing it—*printed in plain English*. This frank and open publicity places these medicines *in a class all by themselves*, and is the best guaranty of their merits. They cannot be classed as patent or secret medicines for they are neither *—being of known composition.*

Dr. Pierce feels that he can afford to take the afflicted into his full confidence and lay all the ingredients of his medicines freely before them because these ingredients are such as are endorsed and most strongly praised by scores of the most eminent medical writers as cures for the diseases for which these medicines are recommended. Therefore, the afflicted do not have to rely alone upon Dr. Pierce's recommendation as to the curative value of his medicines for certain easily recognized diseases.

A glance at the printed formula on each bottle will show that no alcohol and no harmful or habit-forming drugs enter into Dr. Pierce's medicines, they being wholly compounded of glyceric extracts of the roots of native, American forest plants. These are best and safest for the cure of most lingering, chronic diseases. Dr. R. V. Pierce can be consulted FREE, by addressing him at Buffalo, N. Y., and all communications are regarded as sacredly confidential.

It is as easy to be well as ill—and much more comfortable. Constipation is the cause of many forms of illness. Dr. Pierce's Pleasant Pellets cure constipation. They are tiny, sugar-coated granules. One little "Pellet" is a gentle laxative, two a mild cathartic. All dealers in medicines sell them.

### *5c. in Toronto 50c. in Peterborough*

**"It is About Time Local Theatre Prices Be Shown Up."**

A citizen called at The Times office on Saturday in regard to the statements in past issues of this paper concerning the exorbitant charges made by the local theater management. He seemed to have taken exception to some remarks as to these "show-ups" of the local high prices Peterborough citizens are mulcted in.

However, when we showed him some plain proofs backing our statements, he departed in an entirely different frame of mind. On Saturday some of our citizens who had been in Toronto and, in that city, took in the San Francisco moving pictures, they paid exactly five cents to see them. In Peterborough the prices charged for San Francisco moving pictures was 50 cents. This alone headed off our Saturday's objector, who now thinks its time local theater prices should be shown up.

**Body, 8 Miles From Collision.**

Further enquiries concerning the death by drowning by a steamship collision in Ste. Clair river, last week, concerning which first particulars were given in Saturday's issue of The Times, show that the boy, Harold Reid, on rising to the top of the water, managed to secure a piece of floating wreckage. Grasping this, he was carried about a mile down the river before being rescued by an Indian. The body of Mrs. Reid was recovered eight miles below the scene of the accident.

DRAW ATTENTION TO THE "NEW THEORY"

Over 75% Winners

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $[illegible], the "New Theory" from the originator, who made a fortune through same, and [illegible] retired, and we therefore control the entire selling interests of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing [illegible] shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your profits [illegible] by showing you the full earning capacity, which was the [illegible] secret of Pittsburg Phils wonderful success.

The "New Theory" MUST beat the races continuously, and [illegible] ally. There are no "ifs" and "ands" and we stake our reputation in same.

### What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses without [illegible] never shown more than five.

It have shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or bank book, simply leaving the selections to be played with your bookmaker or commission agent. All that is required are the entries each morning.

Copyrights are now pending.

### What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or choices. We often win on horses at 3, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

NOTE—

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

RESULT—

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

ABSOLUTELY INFALLIBLE

It earned $50,000 for the originator last season in four months, $61,000 two years ago, and $67,500 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 100 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

Absolutely Impossible to Lose Your Capital

Nothing of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the game, and is considered the best authority of finances.

You will admit, the infallibility of this system the moment you see the plan and look up the records.

NOTICE:

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)

Complete, Payable Strictly in Advance.

No Additional Payments of any Kind are Made After Purchase of the System

GUARANTEE—

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours: 9 a.m. to 9 p.m. Sunday by previous appointment.

VOL XXXIV, NO. 137 PETERBOROUGH, ONTARIO, THURSDAY, JUNE 7, 1906. PRICE TWO CENTS

## Sheehy Objects to City Hiring His Men

### Sewer Construction in East Peterborough in a Congested State Through Mr. Bogue Refusing to Finish the Outfall Sewer.

FOUNDATION OF FIRE HALL.

At a meeting of the Fire, Water and Light Committee, a proposition to construct the foundation of the new fire hall with concrete in place of Longford stone as originally decided upon, was rejected.

The Board of Works met subsequently, and voted through the following business:

OUTFALL SEWER MUDDLE.

Chairman Ald. Hicks reported that sewer construction in east Peterborough was congested on account of Mr. Bogue, the contractor for the outfall sewer, having because of a claim, that he has not been paid a just percentage on the work already done, packed up his traps and thrown up his contract. By reason of this course taken by Mr. Bogue, which leaves the outfall sewer in an unfinished condition from within forty feet of the center of Hunter street, Mr. Robson, contractor for the Hunter street sewer, cannot complete his contract. Mr. Robson's excavation is flooded with water, which has no means of access to the outfall sewer owing to Mr. Bogue's action; consequently Mr. Robson cannot lay his pipe.

Mr. Bogue also claims that he cannot now get sewer pipe, but Ald. Hicks is in receipt of a telegram advising that pipe could be shipped here on Friday.

Ald. Johnson moved, seconded by Ald. Adams,—That the city engineer give notice to Contractor Jas. Bogue, in accordance with specifications in connection with his contract, that he must finish the sewer to the center of Hunter street, including manholes, the earliest date he can; also that Mr. Bogue's sureties be advised of this action on the part of the city.

Ald. Graham moved, seconded by Ald. Wilson,—That the city engineer be authorized to relieve Mr. Robson of the water in the sewer trench on Hunter street, east Peterborough, until such time as he can connect with the outfall sewer, the cost of such work to be charged to Mr. Bogue, if the solicitor advises that this can be done.—Carried.

TO EXAMINE WIRES.

A communication was received from Mr. Aikens, electrical experts of Toronto, suggesting that, as the inspection of and making necessary alterations to the electrical poling and wiring would be a lengthy undertaking and entail a large expenditure to the corporation if carried out by him in its entirety, he proposed to come down himself for a few days, examine the system and leave instructions for the properly execution of all local work by city men.

Ald. Adams moved, seconded by Ald. Johnston,—That Mr. Aiken's advice be acted upon.—Carried.

TAKING CONTRACTOR'S MEN.

Contractor Sheehy complained that although working on city sewer construction under a tile limit, Wm. White, city inspector of sewer construction, has induced his employes to leave him, and engage on the Water street sewer being constructed by the city by day labor, under the superintendence of Mr. White.

Mr. White replied that he engaged the best men he could get in the city's interests, irrespective if any desire to take men away from Mr. Sheehy or any other contractor.

It appeared that the city is paying them more money than is paid by Mr. Sheehy.

Mr. Sheehy explained that if the city is going to call for tenders and give contracts to contractors, and then offer special inducements for contractors' men to leave their engagements and take positions with the corporation, such a policy is unfair to the contractors. He had paid his laborers at the start $1.50 a day and subsequently raised their wages to $1.65.

It is understood that some of Sheehy's laborers getting $1.65 a day, have secured work with the corporation entailing a little more responsible work at $1.75 a day.

The engineer was instructed to look into this matter and discountenance the taking away by the corporation of men from the contractors.

EXTENSION OF STREETS.

Ald. Adams moved, seconded by Ald. Graham,—That the properties necessary to open George street, 66 feet wide from Lake to Lansdowne street and Aylmer street, from the new school to north of Wescott street, be purchased—Carried.

## New License Law Good for City

Under the recently increased liquor license fees, Peterborough gets quite a considerable "rake off."

The receipts for liquor licenses issued for the first six months of the year 1906 will amount to $3,347.70. Of this amount half will go to the Provincial Government and half to the municipality of Peterborough.

Inspector Cushman yesterday received the following notice from the department of the Provincial Secretary:—

Sir,—I am directed by the Honorable the Provincial Secretary to advise you that the Board of Licensed Commissioners is hereby authorized to issue cheques in the usual form, on the license fund, the same being in respect of the first distribution of such fund for the license year 1905-07, viz,

To Provincial Treasurer ... $2,620.85
Municipality of Peterboro $2,620.85

$ 5,241.70

### Negro Sentenced for Assault.

St. John, N. B., June 7.—George Hector, colored, for assaulting Mrs. Annie Baird at Passenger Station, on the Intercolonial, two weeks ago, has been sentenced by Judge Wedderburn to two years in the penitentiary.

### Hamilton Workingmen After Preston

Hamilton, June 7.—At the meeting of the local Trades and Labor Council the delegates who are quite Liberal in their political views, passed a resolution asking the Laurier Government to dismiss W. H. Preston, immigration commissioner, in London.

### Tupper Not Downhearted.

London, June 7.—Sir Charles Tupper, who is staying at Bexley Heath, has benefited much by the change of climate. He has expressed himself not in the slightest way downhearted at the result of the recent general elections. He is confident that the next appeal to the country will tell a different tale.

### Protecting Czar Against Nutiny.

St. Petersburg, June 7.—Fear that revolutionary agitation among the sailors at Kronstadt may cause them to trains guns on the Emperor's palace across the bay have caused the authorities to mount several strong searchlights on the fortifications and a guardship has been stationed just off shore.

### Fatal Accident in Sherbrooke.

Sherbrooke, June 7.—Joseph Caya, eighteen years of age, was killed at the works of the Eustis Mining Company. His clothes caught in the machinery and before aid could reach him he was dead.

### Troops Sent to Scene of Riots.

Columbus, Ohio, June 7.—The Governor, through Colonel Aminat, has ordered the Fourth Regiment to mobilize here to go to the mines in Jefferson County. Of the injured two guards will probably die. Seven others, all guards, are missing. It is supposed that they have deserted. The wounded were all foreigners. They were taken to Plum Run and are now in the hospital tent, being cared for by the company.

### Murder and Suicide Through Jealousy

Worcester, Mass., June 7.—John Rowland, a dyer, who had left his wife here some time ago and gone to Brockton, returned on Saturday and after shooting his wife dead, turned the weapon on himself. Jealousy, had caused the quarrel and separation, and when Rowland returned and found his wife's brother and sister and a boarder in the house, he got furious and started the shooting.

### Murder Near Buffalo.

Buffalo, June 7.—As the result of a quarrel in a saloon at Springville about midnight, a man named Percival was shot and killed. Another man was wounded in the leg. The man who is supposed to have shot Percival jumped on a passing freight train and escaped.

### Count Boni in Need of Cash.

Paris, June 6.—Count Boni de Castellane's signature to articles frequently appears in the newspapers now. His financial difficulties have driven him to sell his and others'—ideas, chiefly on foreign politics. But charitable instincts are attacking with him. He bid for an autograph of the King of Sweden at an aristocratic charity sale arranged by Countess Grefuhle.

### White Slave Sentenced.

New York, June 7.—Berthe Claiche, who pleaded guilty of manslaughter in the first degree for the killing of Emil Cerdron, was sentenced to not less than two years and two months nor more than five years' imprisonment by Judge Davis. The maximum penalty for the crime is twenty years.

## Married in St. Peter's Cathedral

Yesterday morning the marriage month of June, saw still another wedding, quietly celebrated in St. Peter's cathedral, when Rev. Father Collins united Mr. Nelson Goyette, of South Monaghan, and Miss Ella May Michaels, daughter of Mr. and Mrs. Henry Michaels, of Otonabee, in the holy bonds of wedlock. Miss Annie Michaels, sister of the bride, acted as bridesmaid, while Mr. Ed. Goyette, brother of the groom was best man.

Mr. and Mrs. Goyette will take up their residence in Bewdley.

### CANADA AND AUSTRALIA

London, June 6.—The Postmasters-General of the Commonwealth of Australia, says the Canadian emigration boom awakened them to the need of doing something to push Australia. Australia can offer as satisfactory prospects to the emigrant from Great Britain as Canada. Canada is nearer, but it must be remembered that the railways in Canada are in private hands, while the railways in Australia are in the hands of the state. The result of this is that when the emigrant reaches Canada the cost of transit to his destination in the interior is considerable to the individual or the country that, it is greater than if he had gone to Australia where special facilities are afforded immigrants on railways. These things ought to be known and preparations are being made with a view of placing the facts before intending emigrants.

## Married in St. Luke's Church

### Miss Elizabeth A. Armstrong is Wedded to Dr. St. Clair.

Yesterday afternoon, a pretty June wedding was solemnized in St. Luke's church, when Miss Elizabeth Alexina Armstrong, third daughter of the late Geo. W. Armstrong, was married to Dr. Wade Hampton St. Clair of Bluefields, W. Virginia.

Owing to the family being in mourning the wedding was witnessed only by immediate friends and relatives. The rector, Rev. E. A. Langfeldt, performed the ceremony. The church was prettily decorated.

The bride, who was given away by her brother, Mr. George Armstrong, wore a pretty costume of grey silk voile over taffeta and grey Gainsborough hat trimmed with long grey plumes, and wore the gift of the groom, a handsome sunburst of diamonds set in platinum.

After the ceremony a wedding breakfast, was served at the residence of the bride's mother, 263 Charlotte street.

This being an international affair, the house was decorated with an appropriate blending of the flags of each contracting party's country.

The bride's travelling costume was of blue panama cloth with hat to match.

Dr. and Mrs. St. Clair left on the 5.10 C.P.R. train for Toronto, from whence they will go by boat to Quebec, New York, and to Norfolk, Virginia. They will be the guests of the groom's mother, Mrs. Alexander St. Clair, while at Norfolk.

Dr. and Mrs. St. Clair will reside at Bluefields, where Dr. St. Clair has been practising for some time.

## PROFITS FROM MEXICAN GOLD MINES

### The Opening and Operation of Large Gold Mines in Sonora Add Materially to Mexico's Gold Product.

It is difficult to estimate the amount of gold which is sent from Mexican mines, owned by Americans to the mints of the United States. The most active gold section in the Southern Republic is in the State of Sonora, which immediately adjoins Arizona on the south. It has been customary to ship gold bars from the mines of this belt to the American mint at San Francisco. This is usually done by Wells Fargo Express. For instance, a short time ago the Trinity mine, which lies twelve miles south of Magdalena, on the Sonora Railroad, and fifty-four miles south of the Arizona line, produced $5,000 of gold in two months. The product was moulded into gold bricks or bars, taken by the manager of the mine to a large mercantile house in Magdalena, which also does a banking business. This establishment turned the gold over to the Wells Fargo Express Company, which carried it to San Francisco and delivered it to the Bank of California. The Bank of California then transferred this bar, which contained about $1,500 worth of the metal, to the Government itself.

"In order to eliminate any impurities which any gold bar might contain, and to arrive at the exact quantity of the metal, the mint remelts the bar. The quantity of the gold is then accurately determined and the mint report sent in this case to the Bank of California; the bank forwards the report to Magdalena with notice that the value of the gold bar has been deposited to the credit of the Trinity Mining Company in the Bank of California. Very often it is the custom of banks located in the mineral sections to buy ore outright from the mines. If this is done, the bars are not remelted, but borings are made, usually one in the center and one at each corner, making five in all, or one in the center and one on two diagonal corners, making three borings. The gold taken from these borings is then tested. It is possible to employ deception where this method is used by substituting in a certain part of the gold brick another metal and covering it over on all sides with the gold. This other metal, however, must be between the center and the corners, else it would be penetrated by the borings. The United States Government avoid all danger of any deception of this sort by remelting all the gold bricks which are brought to it.

The Trinity Mining Co. is a Chicago enterprise of great magnitude and of unusual interest. Prominent Chicago business men are interested in the property with Mr. H. C. Reno, a very well known mining engineer. The company has blocked out more than a million dollars worth of ore and has been operating a small mill. It is proposed, however, to increase the earnings of the company very largely by enlarging the capacity of the mill and adding the Cynanide plant. The Cynanide process catches the fine gold which escapes when the amalgamating plates are used. The company is to be enlarged and its operations very greatly increased.

## Bay of Quinte Conference Busy

As noted before the Bay of Quinte Methodist conference has been busy at Port Perry.

The Stationing Committee has completed its first draft of stations, the draft for the Peterborough district being:

Peterborough, George street—Wm. J.—Crothers, M.A., D.D.; Wm. E. Smith, M.D., missionary Chentu, China.

Peterborough, Charlotte street—H. M. Manning.

Peterborough Mark street—J. G. Lewis, B.A.

Millbrook—G. R. Clare.

Cavan—M. E. Sexsmith, B.A., L.L.B.

Cavan South—A. K. Edmison

South Monaghan—W. J. Wetherill.

Lakefield—John Bidford.

Bridgenorth—Dr. Metzler.

Warsaw—Geo. Nickle.

Bethany—Dr. Marvin.

Pontypool—J. F. Chapman, B.A.

Wesley—C. S. Rowlick.

Chemong Lake—To be supplied.

Apsley—One to be stated.

Rev. W. J. Brothers is chairman of the district and Rev. J. G. Lewis, B. A. is financial secretary.

### $9.00 New York and Return $9.00.

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls, $9.00 good 15 days. Good on regular express trains leaving at 7.05 a.m., 7.15 and 2.45 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

### New World's Record Made.

Evanston, Ill., June 7.—A new world's record in the pole vault Saturday marked the 40th annual meet of the Intercollegiate Conference Athletic Association. The University of Michigan team took first honors, scoring 62 4-6 points. Leroy Samse, of Indiana University, by vaulting 12 feet 4 7-8 inches, established a new world's record for the event.

### Heavy Crop in South of Russia.

Odessa, June 6.—The South Russian harvest promises to be the most abundant in the last twenty years. There is some anxiety as to whether sufficient labor will be available, as in consequence of the precarious political situation, the garrison commanders have issued instructions that the army reserve men shall not be allowed this year to hire themselves to the farmers.

### Medical Association Meets.

Boston, June 7.—Several thousand physicians and surgeons from various quarters of America and several distinguished medical men from abroad were here today to attend the opening meetings of the annual convention of the American Medical Association. The House of Delegates, the governing body of the association, assembled yesterday at the Boston Medical Library to transact routine business and complete arrangements for the convention.

### Not Wisely But Too Well.

Detroit, June 7.—James Dryden, a young Englishman, has been condemned on a charge of forgery and will be given a short term at the House of Correction, the jury recommending him to the mercy of the court.

Young Dryden, who is the son of a wealthy shirt manufacturer in London, lived in Montreal, where he became enamored of a chorus girl. He followed her from place to place in Canada, and finally running short of funds at Battle Creek, forged a cheque for $10. He went to gaol, while his charmer continued with the troupe.

### Bank Clerk Leaves With Large Sum.

Ottawa, June 6.—A young bank clerk named Ross, employed as teller at the branch of the Union Bank at Winchester, has been missing since May 23. He altered the combination of the safe of the bank, and a Montreal expert was required to open it. It is said a large sum was found missing. It is variously stated at from $12,000 to $30,000, but sureties have covered liabilities.

Ross was but 19 years old, and had the reputation of being a quiet, steady young fellow. The affair has mystified the district, and reasons cannot be assigned for the affair.

## THE POST DISCOVERY

### A Revelation in Human Food.

Previous to the discovery of the Post process of changing the starchy part of Wheat and Barley into a form of sugar, many people suffered from what is known as starch indigestion.

That was shown by gas and all sorts of stomach and bowel trouble, (sometimes ending in appendicitis) brought on by the undigested starch in wheat, oats, white bread, cake, puddings, etc., etc.

Nature ultimately punishes anyone who continually takes some medicine or drug to smooth over or nullify bad conditions of the body. The only safe way to cure such ills is to correct or remove the cause. Therefore it was plain to Mr. Post, in working out his discovery, that people who show some weakness in digesting the starchy part of food, (which is much the largest part of all we eat) must be helped by having the starch digested or transformed before being eaten. And of course the safest and truest way to do this would be to imitate nature and avoid all chemicals or outside and unnatural things. The body digests the starchy food by the following process: first the moisture of the mouth and stomach, third warmth or mild heat, which gives or develops diastase from the gluten. Time is also an important element, and when all work together and the human organs operate properly the starch is slowly turned into a form of sugar, as it must be before the blood will absorb it and carry the nourishment to different parts of the body. Of course if the body fails to do its work perfectly trouble sets in.

So in the making of the famous food—Grape-Nuts—moisture, warmth and time are the only things used to turn starch into sugar, the imitating nature and keeping the human food in its original purity, free from outside things and just as Mother Nature intends it shall be kept for advantageous use by her children. The food is fully cooked at the factories, and is crisp and delicious with little thick cream poured over.

It can be softened for people with weak teeth, but is most valuable to others when it must be thoroughly chewed, thus bringing down the saliva from the gums to go to the stomach and help digest the entire meal, besides the use of the teeth strengthens and preserves them. Nature blesses the parts of the body that are used and not abused. Grape-Nuts food brings peace) health and comfort when people are in despair from any one of the ills resulting from undigested food.

Read the little book, "The Road to Wellville," found in pkgs.

"There's a reason."

## Must Dismiss The Cabinet

### Czar Must Take Means to Delay the Coming Storm in Russia---Raise Standard of People.

St. Petersburg, June 7.—The Lower House of Parliament and the Government are rapidly coming to close quarters, and the conflict which became inevitable the moment the popular assembly presented its demands in the address to the throne, cannot be much longer delayed. The excitement in the interior is increasing daily. Partial strikes have begun at Kieff, Odessa, Moscow and other cities, and the peasants in some provinces are no longer restrainable, and have commenced to seize the land of the proprietors. Since the Government declined to give the House satisfaction regarding the continued execution in the provinces, or to bring to book the local officials whose tyranny is fanning the flames of popular indignation, parliament has had no alternative except the immediate insistence on its demands for the dismissal of the Cabinet. The scene at yesterday's session, when the House refused to listen to the ministers and practically drove them from the rostrum, clearly presents the issue—the Emperor must dismiss the cabinet or fight. In yielding to the militant spirit of the Radicals upon this point, the Constitutional Democrats again solidified the Opposition, which was on the verge of dissensions over the agrarian question.

The spirit of conflict which prevailed at yesterday's session continued at the sitting all day, although some of the leaders of the Constitutional Democrats went into the breach to stay too hasty action. M. Vinaver's project, of which he gave notice on Tuesday, to change the regulations of the House so as to eliminate all control of the ministers either in the drafting or manipulation of bills, was introduced yesterday.

M. Annitin and Allsdin, the peasant party leaders, used the occasion to make violent speeches, in which they argued that it was useless for parliament to proceed in the regular way. The government intended to rely on bullets and bayonets, and it was parliament's duty to recognize a banner under which the people would fight when the inevitable collision comes.

M. Roditcheff, Cadlarovsky, and Siretlanoff, Constitutional Democrats appealed to the members of the house not to lose their heads, but to proceed calmly and systematically, with the work of battering a breach in the wall. Their arguments carried the day, and by practically unanimous vote M. Vinaver's project was referred to a committee.

## Former Local Lady Is Dead

### Mrs. Wm. Allen Passes Away at Parry Sound.

Yesterday Mr. Andrew Montgomery of London street, received a telegram conveying the sad intelligence that his sister Mrs. Wm. Allen had passed away at Parry Sound on Tuesday. Mrs. Allen, is a former resident of Peterborough, and has a large circle of friends and acquaintances here.

Mrs. Allen, whose husband predeceased her, leaves to mourn her loss Mr. Andrew Montgomery, as above noted, Mr. John Montgomery, a nephew, and Mr. Richard Chowen of Water street, another nephew.

The remains of the deceased arrived here on the G.T.R. 9 p.m. train that night. The funeral will be held from Mr. John Montgomery's residence, 33 Louis street, Friday afternoon, and proceed to Bridgenorth cemetery for interment. Mrs. Allen was a member of the Presbyterian church, and was universally beloved and respected by all who knew her.

## A NORWOOD WEDDING

### Miss Effie Sherry Becomes the Bride of Mr. G. H. Sing.

Yesterday a June wedding was celebrated at Norwood, in Christ church, Norwood, when the marriage of Miss Effie Sherry, eldest daughter of Mr. Geo. J. Sherry, barrister, to Geo. H. Sing, Ph.D., professor in Columbia University, New York, and a son of Dr. G. W. Sing of Sutton, Ont., was solemnized at 2.30 o'clock. The impressive ceremony was performed by Rev. E. W. Pickford and was witnessed by a large number of friends and relatives.

The bride entered the church on her father's arm, where the groom awaited, she was attended by Miss Helen Davies of Peterborough, while Dr. John Paton of Dutton, was best man. Miss Blanche Pearce presided at the organ, and after the ceremony was over, sang with great effect "Oh Fair, Oh Sweet and Holy," and then played Mendelssohn's wedding march as a recessional. Mr. John C. Sherry, B.A., brother of the bride, and Mr. C. P. Pearce, performed the duties of ushers.

The bride's gown was made of Brussell's net, with valenciennes insertion and trimmed with lace and baby ribbon over white taffeta silk. She wore a long bridal veil with orange blossoms and a pin of pearls and diamonds, the gift of the groom.

The bridesmaid, Miss Helen Davies of Peterborough, was charmingly attired in dotted muslin, with insertions of valenciennes lace, and wore a hat of lace, trimmed with marguerites.

After the bridal ceremony a reception was held at the residence of the bride's father. The house was decorated with cut flowers and palms.

The happy young couple left on the 4.40 C.P.R. express for San Francisco, California, and other American cities on a wedding tour. Before taking up their residence in New York, Mr. and Mrs. Sing will return to Norwood for a short visit.

## Inspection of Coll. Inst. Corps

This afternoon Lieut.-Col. Young of Kingston, will inspect the Collegiate Institute Cadets. Complete details have not yet been arranged as the exact time will be governed by the convenience of the inspecting officer.

Under Drill Instructor Hodgson, the cadets have become very proficient in their drill and will no doubt pass the inspection with credit to themselves and the city.

## Fake Horse Buyer Beats Hotelmen

Last week a man by the name of Harrison, representing himself as a partner of O'Neil, the horse man, of Cobourg, went through the county buying horses, saying he wanted to ship to Winnipeg. A bargain was made with several farmers for horses to be delivered at the Cavanagh House Saturday morning, a dollar being paid to some, and others were given an I.O.U. or a cheque. Harrison spent Friday at the Cavanagh House, Saturday morning, he moved over to the C.P.R. Hotel, and forgot to pay Mr. Cavanagh. He stayed at the C.P.R. hotel until Monday morning, and left there, ostensibly for Rosehill. Mr. Allan was not paid either.

On Saturday, four or five horses were brought into the Cavanagh House yards, but Harrison was not there, and the animals were taken home again.

It seems, according to what Mr. R. H. Leary says, that Harrison has been offering about $25 too much for the horses, and that may possibly be an explanation of his failure to keep faith.

## Pretty Wedding in Smithtown

A pretty wedding took place at the home of Mr. Robert Darling, 3rd line of Smith, on Tuesday, when his daughter, Miss Emma Darling, and Mr. Albert A. Scott of Brandon, Man., were made man and wife. The ceremony was performed by Rev. Mr. McKinnon, pastor of Gilmour Memorial church, and was witnessed by over seventy-five guests. The ceremony was becomingly arranged in a costume of grey silk. After the ceremony a dainty dejeuner was partaken of. The happy couple left on the 3.15 C.P.R. train for Brandon, where they will reside.

## Ultimator Co's Premises Taken

### Rapid Tool Co. Will Shortly Begin Operations.

As noted in a recent issue Messrs. W. G. Fergusson and Gus Hay a short time ago purchased the building formerly occupied by the Ultimator Company, in the Fifth ward, together with the shafting, motors and transformers.

The Rapid Tool Company, Limited, has leased the building and plant, and will shortly begin business there.

## Prices for Cheese Are Strong

At yesterday's meeting of the local cheese board 3,142 boxes were boarded. The highest price reached was 10 1-16 cents. About 500 were sold at this figure and the remainder at 10 5-8 cents. Mr. P. Johnson, an English visitor, addressed the board in reference to the dairy produce market in the old country.

## Terror of Spring is Sickness

**What Are You Doing to Protect Your Weak Body Against Spring Fevers?**

A delay gives the germs and weakness a better chance to take hold. Don't wait, think of your small resisting powers, and begin building up today!

For weakness, overwork and debility the doctors prescribe Ferrozone; let it help you now.

Vitality and power are instilled into the blood; this means new strength for all weak organs.

The fire of youth will dance in your veins, and new found energy will increase your desire to work.

Ferrozone supplies the nourishment and tissue-building material your system lacks. Isn't that a reason why.

From Cornbermere, Ont., Mrs. Jno. Oram writes as follows: "For a number of years I was sickly in the springtime. I felt tired, nervous and had headaches. My blood was weak and damp days brought on rheumatism. My nervous system was unstrung, and I felt utterly worn out. Ferrozone revived me in a short time. In two days my appetite increased and I could feel a building up process going on. This great tonic made a new person of me, and I don't think a more strengthening medicine for the spring can be found."

Wouldn't it be just fine to get back your old time spirits and vigor? Easily done with "Ferrozone;" commence today. Sold by all dealers, 50c per box or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

### ENGLAND'S AFRICAN TROUBLES

Were it not for the momentous struggle going on in Russia and the fight being waged against industrial piracy in the United States, the uprisings of natives in Africa against British rule would arouse public interest.

There are two revolts, one in Natal, in South-East Africa, and the other in Nigeria, in the western part of Central Africa, 9,000 miles away. In Natal the formidable Zulus are up in arms. The cause of their rising was the execution of some of their chiefs who were held responsible for the killing of white settlers. The Zulus are led, it is reported, by a former officer in the Boer army, a Dutchman named Smuts, who joined their tribe after the Transvaal Republic was conquered.

The Zulus, famous for their fighting qualities and commanded by a white man with a good military training, have proved too formidable for the British forces first sent against them. Almost daily desperate fighting, with severe losses on both sides, is reported. England has a difficult task on hand.

The uprising in Nigeria is fully as serious, though it has not yet been accompanied by as much fighting as there has been in Natal. The cause is an old one—native dissatisfaction with the conditions on which the British Government took possession of the lands of the Royal Niger Company.

The struggle in both places may be prolonged and bloody, but there can be no doubt as to the result. British power will prevail in the end. From the standpoint of the master spirits of the British Empire, the revolts are merely episodes in colonization.

### THE BOOK OF REVELATIONS

The latter day Book of Revelations shows no signs of coming to an end. Perhaps it may contain a few supplementary chapters disclosing graft if not graft in the sacred and learned and even the literary and journalistic professions, and it is possible that a few might actually link the thing made be founded on fact. Of course this is wildly improbable. We have heard reverend divines accusing each other of stuffing the ballot boxes at the election of a bishop, but how are preachers to denounce electoral sin unless they gather some practical knowledge of it? Lawyers never make experiments in grafting if they take a fancy to a bit of it they take business on the side they go at it like experts and the world gets no revelations. Only common commercial men tumble clumsily into business sin. Wise parents will henceforth bring up their boys to be either millionaires from their birth, or to the gentle art of preaching, pleading, or writing safe things in books or papers. Next to the bliss of being a respected member of a successful commercial thing is the sweet joy of adding new chapters to the Book of Revelations, which pleasant diversion is not without profit.

This daily exposure of old and new rascalities in high places is growing monotonous. Does anybody nowadays believe anybody else is honest? We used to say every man has his price, we may almost say, now that he has the other fellow's price as well, and that his Fall season is sure to fall up soon after his Spring rise. Out of sheer sympathy with the throng of good men now wallowing in trouble not of their own seeking, we hope the little band of ever virtuous reformers will agitate for the adoption of the British practice, which delivers the voters from the temptation to take bribes, by dividing politics from the corrupting taint of the dollar. Make patriotism an honor and not a trade.

### FATAL BALLOON TRIP.

Rome, June 6—Three aeronauts who made an ascent at the Milan exhibition on Saturday were blown over the Apennine Mountains and out over the sea. They did everything to lighten the balloon and finally cut away the car and hung on to the ropes, till two of them fell into the sea from exhaustion and were drowned. The third was rescued by a torpedo boat after being in the water four hours.

### WEDDING GUEST KILLED.

Winnipeg, June 6—At a wedding in the Galician quarter here last night some of the guests became under the influence of liquor and a quarrel, resulting in the murder of a young man, Martin Sonyk, aged 20, was the outcome of the affair. He was struck on the head with a stone, and when he fell was battered to death with a chair. Three fellow countrymen have been arrested charged with the crime.

### Sumatra.

Sumatra is a veritable dime museum of nature. In no other place is there such a collection of odd animals, birds and trees.

### The Waterfall's Roar.

The roar of a waterfall is explained in the constant explosion of hundreds of thousands of bubbles. The impact of water against water is believed to be a comparatively subordinate cause.

### Malaga Vines.

The method of cultivating the vine in Malaga is in every way simple. The only feature there which is not observed in other countries is that the "crowns" of the vine are kept very close to the ground. The object of this is to enable the surface growth to benefit from the close proximity to all moisture rising from or descending upon the soil.

### The Sacerdotal Crown.

The sacerdotal crown was one of roses or other flowers, which, on certain festival occasions during the middle ages, was worn by the priests or monks when marching in procession through the streets.

### Water.

So penetrating is water at high pressure that only special qualities of cast iron will withstand it. In the early days of the hydraulic jack it was no uncommon thing to see water issue like a fine needle through the metal, and the water needle would penetrate the unwary finger just as readily as a steel one.

### Blindness.

In parts of Austria and Italy there is a superstition that the human saliva is a cure for blindness. The idea probably originated in the miraculous healing of a blind man recorded in one of the gospels.

### Tabby.

Tabby, the name of a well known species of cat, was formerly atabi, which was a term used to designate a peculiar pattern in the silks manufactured in Persia. The markings in the fur of the cat resemble the pattern in the silk; hence the double application of the name.

### Wrens in Wales.

In Wales it is believed that if any one kills a wren he will fall down and break a bone before the end of the year.

### Zenobia.

Zenobia, the queen of Palmyra, spoke seven languages. After being captured by the Romans she learned Latin and Greek also; married a Roman senator and lived the rest of her life as a Roman matron.

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Snoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

### AGRARIAN DISTURBANCES.

Tula, Russia, June 6—The agrarian movement in this Province is spreading, and is assuming a threatening phase.

Voronezh, Russia, June 6—A collision occurred here yesterday between rural guards and peasants who were annexing land belonging to local proprietors. Two guards were killed.

Mohileff, Russia, June 6—If many places in this vicinity the rural guards, who are in sympathy with the peasants, are refusing to obey the orders of their superiors.

The Celebrated English Cocoa.

**EPPS'S**

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**COCOA**

The Most Nutritious and Economical.

**Thin Hair**

Yes! We had noticed that your hair was looking pretty thin, and that it lacked lustre and life. But we didn't like to speak of it! Of course you know that Ayer's Hair Vigor is a regular hair-grower, makes the hair soft and smooth, gives it life and strength. This isn't the kind of hair that falls out! And, too, it keeps the scalp so clean and healthy.

# STOCKS - THE MARKETS OF THE WORLD - BONDS

*We call the attention of our clients to the fact that*

**BULLFROG RED OAK CO. STOCK**

We call the attention of our clients to the fact that

**WESTERN UNION OIL STOCK**

Buy this stock NOW before further radical rise takes place. ... which we advocated for purchase at 10c., is now $11c and with the advance but just begun.

**FAIRVIEW CENTRAL MILLING CO. Stock at 15c. per share**

... we urged our clients to purchase at $11c per share, is now $15c bid, with a few offered under $16c. Western Union Oil is a conservative investment at this price.

Of the cheaper stocks, we now recommend without hesitation ... payable 1-4 cash, 1-4 in 30 days, and 1-2 in 60 days from date of purchase.

Situated in the heart of a new and phenomenally rich district of Nevada, FAIRVIEW bids fair to rival the very richest of the older Nevada camps.

FAIRVIEW CENTRAL gives promise of uncovering high values, and under the conservative business management of its officers will be one of the GREAT MINES OF A GREAT DISTRICT.

But this stock and hold it for a permanent investment.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

The clatter of horses sounded, and the lank figure of Henry came from the stable yard leading two mounts.

As the pair took saddle and rode away Jarrat stood looking after them down the highroad.

"So the lady has lowered her eyes to you?" he scoffed, with a dark smile on his arrogant lips. "And I dare not spoil your gay masquerade? I wouldn't give a pistole for your chances with Foy. He will end you as he would undo an oyster. You made a mistake, my new laid marquis, in soaring so high, and a worse one in bragging of it. But for that touching scene in the yard I had stopped that blundering idiot, but now he may spit you and welcome!"

The rattle of departing hoofs had scarce died away when Anne crept softly down the stair of the inn. She had donned a long cloak, and from under the edge of its hood, drawn over her hair, her blue eyes looked out with a feverish brightness.

The hall was lighted with a great lantern, whose yellow flood added to the flower white pallor of her countenance. The clock was striking 10. The soldiers had sought the fort to gain early rest, and the townfolk were gone home. The long parlor was still and dark. Through the open door Anne could see the litter of tankards and pipes and a lean dog, stretched with black muzzle laid to the threshold, asleep.

She slipped through the door and to the highroad, and then, with tremulous fits of fear at the shadows, rap at her best pace toward the fort. It was a good half mile, and she reached it out of breath. A sentry at the gate stopped her, and to him she said she wished to see the governor on important business.

"I know not if he will see you," he objected doubtfully. "It is late, and the march is to begin at sunup."

"But he must see me," she told him. "Tell him he must!"

He left her for a moment, then, returning, led her across a court of hard beaten earth into a log building containing a single room. At the far end was a table strewn with papers and maps. A sword rack was nailed to the wall.

In an armchair before the table, his plumed hat and sword tossed across it, sat the governor, heavy, coarse featured, with reddish, muddy skinned complexion under a black curled wig. He was pig necked and his eyes were bloodshot.

She came into the center of the room and courtesied slowly, while the earl rose clumsily, his red eyes flaming over her lithe young beauty, and sat down again, tilting back his chair.

"Your excellency," she began, "will pardon this intrusion and my haste. A duel is to be fought this night on Loudon field, and I—I appeal to you to prevent it."

"A duel!" The earl bent his bulky neck. "I' faith, this is not the court at Williamsburg. I have weightier bull-skin matters at present to fill my time."

*She came into the center of the room.*

But 'tis truth a desperate encounter to cause such a pretty interest from Mistress Tillotson. And what fight they ever, pray? I warrant me they have seen your eyes—eh?"

"At the King's Arms tonight," she said, flushing, "an affront was offered to a gentleman who was absent,"

"Who was this gentleman?"

"Colonel Washington."

"The Mount Vernon farmer whom the rebels bespeak to drill their hinds. Humph! And whose was the affront, eh?"

"Your excellency" said, Captain Foy."

The governor slapped the table, highly amused.

"'Twas Foy? 'Od's fish, but he has a high stomach. He carries a pretty point, though, and has used it too. He can take care of *himself*. And why think you I should trouble myself over such playful bloodletting, mistress? Soldiering makes one not so squeamish. Haith, but I have had affairs in my day. When I was a braw young blade—aye, and there were pretty eyes went red then, too," he added, with a boisterous laugh.

Anne's fingers quivered with resentment, and storm came to her eyes.

"Your excellency," she cried, "the thing was but a trick to wound and flout a loyal hearted gentleman!"

"Ah, indeed! And who this time?"

"My Lord Fairfax."

The earl chuckled in his chair. "So the barge took up for his farmer friend, eh?" he asked, shaking his sides. "I scarce assume that Foy is going to fight the old man."

Anne had drawn herself up, her face pale with this added humiliation. She replied with dignity:

"No, your excellency. The affront was answered by a French gentleman named Armand."

At the name the governor dropped his feet shuffling, and a quick gleam darted across his florid face.

"Armand!" he cried. "The devil, eh? Foy to fight him?" He struck the bell for the orderly as he spoke.

"It shall be stopped," he went on. "An affront to Lord Fairfax, you say—a king's man, aye, and a loyal Loudon field, is it? Foy shall be disciplined, the rascal! I thank you, mistress, for this information. I shall send at once and put a stop to the meeting."

He was leading her to the door as he spoke, not waiting her thanks, and as she went out she heard him rumbling angry instructions to his orderly.

Before she had gone from view of the fort gate four mounted men poured out and clattered down the highroad at a planter's pace.

(To be continued)

**Deafness Cannot be Cured**

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

**SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS**

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

**SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.**

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of a royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them however increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

**THE COLONIAL DIAMOND MINING COMPANY**

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 20 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that such laborer we employ produce larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue; and it is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

**THOS. PATTERSON & CO., Fiscal Agts.**
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE.

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**
AND
**$5.00 PER MONTH**
FOR FOUR MONTHS WILL BUY
**500 Shares**
OF STOCK WHICH MAY SOON BE WORTH
**$500.00**

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

## PORT HOPE ENTHUSIASTIC

**Reynolds Had Lots of Sympathy in His Home Town.**

Port Hope, June 6—James "Marathon" Reynolds, as he is now jocularly termed, is the hero apori of Port Hope on his successful win of the $135 wager in arriving of the King Edward Hotel at 4.34 a.m. yesterday. Two hours and twenty-six minutes ahead of the limit. As a result of past victories and defeats in hockey and lacrosse, Port Hope has been credited with being the sportiest town of its size in Ontario, and the enthusiasm displayed yesterday over Reynolds' performance was no exception to the appreciation. Crowds of excited citizens of all ages and both sexes besieged the telegraph and telephone offices until late at night eager for news of the popular veteran's progress along the route, and yesterday morning when his success became known the first thing thought of was a demonstration of welcome, which is now being arranged for.

Reynolds excites universal admiration for his pluck in attempting the feat at his advanced age of 55. Jim is never known to have accepted a bluff from anyone, and he has won general sympathy on the present occasion because the wager was thrown at him in the first place in the nature of a bluff, and its accomplishment looked upon by those originating it as a physical impossibility for a man of his years. His daily duties have handicapped him in any genuine attempt at training, and his only opportunity for exercise has been in the early morning and late at night. As illustrating the pluck of the man just before starting, he drew out his last ten dollars and offered to add it to the $135 already up, but it was not covered. On a previous occasion a man offered to bet Reynolds $25 that if he attempted the walk he would be brought back to Port Hope a corpse. Even the peculiar nature of this did not deter the dauntless Jimmie, and he was eager to take the bet, but on investigation it proved only a bluff. Considerable money changed hands here and elsewhere on the result. The last news available Monday night was from Pickering, which place he passed at 8.30 p.m., and, notwithstanding the early hour of finish, several expectant ones were on hand at 4.34 a.m., when the final bulletin of success arrived. A big demonstration was held here last night.

**Hat Reverence.**

In mediaeval times the hat of a ruler was regarded with peculiar reverence, something of the respect shown for the crown as an emblem being also entertained for the hat. The story of William Tell, with Gesler's cap or hat on a pole to be reverenced by the people, furnishes an illustration of an incident often seen in the middle ages.

**Living Skeletons.**

The very first of the living skeletons ever exhibited in modern times was a Frenchman named Claude Seurat, who was born in 1799.

**Roman Camp Crown.**

The camp crown of the Romans was conferred upon the soldier who in an assault first made his way into the camp of the enemy. It was made of gold and was decorated with small pickets, in imitation of the palisades around the camp.

**Torpedoes.**

Torpedoes when first employed by the Americans against the English in the Revolutionary war were called American turtles, and their use was pronounced infamous and worthy only of savages.

**Carbolic Acid.**

Carbolic acid was discovered by Runge in 1834 as a constituent of common coal tar. Its properties were fully investigated by Laurent in 1841, who termed it hydrated oxide of phenyl. This name, however, never met with favor, for out of respect for Runge, the discoverer, the name he gave it has always been retained.

NOTICE is hereby given that the rights of the government on the water-powers hereunder mentioned will be put up at auction to be held in the males room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long lease, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ke rapids on the Quinze river, county of Pontiac, about 12 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot No. 28, 3rd range of the township of Grandison, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manicouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the River aux Outardes, on the north shore of the Saint Lawrence, about 7 1-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Gabelle," on the Saint Maurice river, about 13 miles (in a straight line) from Three Rivers.

7. The Coteau Rapids on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermillion river, about 21 miles above La Tuque, county of Champlain, on the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 4 1-2 miles from the confluence of these rivers and about 90 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Sault," river Rimouski, township of Duquesne, county of Rimouski, 16 miles from Rimouski.

11. The "Rapid Malin," river Bonaventure, about 6 miles from the Barachois of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 2 1-2 miles from the village of Saint Felicien and 18 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 62 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Pelletier, county of Lake Saint John.

15. The three falls on river "Sault-au-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power, of these water-powers, the extent of the surrounding land which the above mentioned concessions comprehends, apply to the Department of Lands and Forests, Quebec.

## NATURE IN THE OCEAN.

**Creatures Devouring Each Other to Prevent Overproduction.**

It is estimated that the cyclops will beget 442,000 young in the course of the year, and if these were all permitted to mature and reproduce themselves the seas would in a short time be a simple mass of living organisms. But the cetochilus, or "whale food," constitutes almost the exclusive food of the vast shoals of herrings and the sea living salmon and salmon trout. Their existence is one of the greatest economic triumphs of nature, for these minute creatures scour the sea of its refuse and keep it sweet, while they form the food of fishes, which in turn furnish wholesome food for millions of human beings.

Feeding on dead vegetable and animal matter, these entomostraca are converted into the food fishes of the world by one remove, being first assimilated by the herrings, then absorbed by the tunny, cod, mackerel and other fishes which follow herring shoals and prey upon the latter. They mainly swim on the surface of the water, and it is the search of them in this position which brings the shoals of herrings to the surface. Their countless numbers are also augmented by the microscopic larvae of fixed shells, such as the barnacle, which begins life in this form first as a one eyed swimming crustacean, then growing a pair of eyes and finally affixing itself.

In rivers these larvae are the sole food of all young fish and often also of older fish. In early spring the creatures in every stage—eggs, larvae and perfect though microscopic entomostraca—swarm in the water, on the mud and on the water plants, and were it not for nature's provision for keeping them in check so rapid would be their rate of multiplication that the whole character of the water would speedily be entirely changed.

## AIR IN HIGH ALTITUDES.

**The Same as In Other Places, but It Contains No Microbes.**

It is an error to think that the chemical composition of the air differs essentially wherever the sample may be taken. The relation of oxygen to nitrogen and other constituents is the same whether it is on the heights of the Alps or at the surface of the sea. The favorable effects, therefore, of a change of air are not to be explained by any difference in the proportions of its gaseous constituents. The important difference is the bacteriological one. The air of high altitudes contains no microbes and is, in fact, sterile, while near the ground and some hundred feet about it microbes are abundant. In the air of towns and crowded places not only does the microbe impurity increase, but other impurities, such as the products of combustion of coal, accrue also.

Several investigators have found traces of hydrogen and certain hydrocarbons in the air, especially in pine, oak and birch forests. It is to these bodies, doubtless consisting of traces of essential oils, that the curative effects of certain health resorts are traced. Thus the locality of a fir forest is said to give relief in diseases of the respiratory tracts. But these traces of essential oils and aromatic product must be counted, strictly speaking, as impurities, since they are apparently not necessary constituents of the air.

Recent analysis has shown that these bodies tend to disappear in the air as a higher altitude is reached until they disappear altogether. It would seem, therefore, that microbes, hydrocarbons and entities other than oxygen and nitrogen, and perhaps also argon, are only incidental to the neighborhood of human industry, animal life and damp vegetation.

**Ancient Remedies For Hiccough.**

The hiccough seems to be a modern and dangerous disease, but the ancients knew it and prescribed remedies that might now be tried advantageously. Galen recommended sneezing. Aetius approved of a cupping instrument, with great heat, to the breast. Alexander believed in an oxymel of squills. Alsaharavius made use of refrigerant drafts. Rhazes put his trust in calefacients, such as cumin, pepper, rue and the like in vinegar. Rogerius looked kindly on calefacient, attenuant and carminative medicines.

**Not Just What He Meant.**

Lloyd George was addressing a meeting in Wales, and his chairman said: "I haff to introduce you to the member of the Carnarvon boroughs. He has come here to reply to what bishop of St. Asaph said the other night about Welsh disestablishment. In my opinion, gentlemen, the bishop of St. Asaph is one of the biggest liars in creashon. But he hass his match in Lloyd George!"

**Savored of the Truth.**

"That's no lie," remarked the man with the newspaper.

"What's no lie?" queried the other party to the dialogue.

"This paragraph to the effect that 'wise men are more often wrong than fools are right,'" answered the other.

**Why Bodies Were Embalmed.**

The Egyptians believed that the soul lived only as long as the body endured; hence their reason for embalming the body, to make it last as long as possible. It is estimated that altogether there are 400,000,000 mummies in Egypt.

Bad men live that they may eat and drink, whereas good men eat and drink that they may live.

It is some compensation for great evils that they enforce great lessons.—Bovee.

**Urges Preference on Meats.**

London, June 6.—With the most scandalous as an illustration, "Imperialist" writing to The Telegraph, advocates a preferential tariff for colonial meats in the British market rather than on corn. The Imperial Government, he urges, with such a tariff, would have the power thoroughly to inspect the quality and treatment of meat.

## WHEN THE DUNES WALK.

**A Sand Storm Experience in the Desert of Sahara.**

To flee from a sand storm in the midst of a drenching rain seems an absurd performance. The Arab, however, experienced in the ways of Sahara, knows that when the rain stops the dunes are apt to begin their most terrible "walking." He seeks shelter while there is yet time.

Our worst experience of the desert in one of its mad fits, says the author of "In the Desert," was on a morning when, luckily for us perhaps, we were nearing the large oasis of Nefta, near the Tunisian frontier. The flapping of the tent and the drumming of raindrops upon it awoke us, and Ahmeda, in some excitement, hurried our departure. He explained that so long as the rain lasted it would keep the sand quiet and that this was our opportunity. Accordingly, in a very short time we had struck tent, loaded camels, saddled ponies and were under way.

It seemed to us a somewhat purposeless proceeding. The rain was and had been heavy. The ground was saturated. There seemed no prospect of its drying in a hurry. As Nefta was only half a day's march away it seemed unnecessary to start in frantic haste in the middle of the night in a pouring rain. Ahmeda, however, made no answer to our protests. The other Arabs seconded his efforts with all their energy.

Morning broke wan and sickly. As the light grew the rain slackened. The big warm drops became less frequent and at last ceased. The dull, opaque sky was pasty white and the air hot and oppressive, but the wind still blew as hard as or harder than ever.

Hardly had the rain stopped when I tasted between lips and teeth the familiar, gritty texture of sand. Hardly had the light increased sufficiently to disclose to view the drifts when all their edges and crests could be seen crawling and flickering in the gale. Already there was the droning sound in the air which meant that the dunes were walking. We saw at last the reason for the hurry. The rain cannot hold the sand for more than the instant it is falling. As soon as it strikes the earth it sinks in. One moment you may be streaming with water like a drowned rat, the next you are choking in clouds of sand.

The air grew darker and darker, and the roar of the sand as it rushed along the desert made speech, except by shouting, impossible. I could just distinguish our tall camels in the gloom, their ungainly action giving them something the look of ships pitching and tossing in a gale.

Ahmeda led the way by some mysterious instinct to us totally incomprehensible. We followed as best we might, breathing sand as we went, our heads bent to protect our faces. My recollection of the next two hours is no more definite than would be the recollection of being rolled over and over by a huge breaker. A singing and roaring in the ears, almost total blindness, a sense of suffocation and the feeling that I was in the hands of elements more powerful than myself are the vague impressions that remain.

When we at last got to Nefta we could not have been more saturated with sand had we been buried in it and dug up again. Hair, ears, clothes were full of it. Our cheeks were scarlet and sore with the ceaseless battering, and on them had formed hard crusts of sand, cemented by the water that had streamed from our eyes.

**The Bloodstone.**

Almost every jewel has superstition of some sort attaching to it, and the bloodstone is not wanting in this particular. The story is told of it that at the time of the crucifixion some drops of blood fell on a piece of dark green jasper that lay at the foot of the cross. The crimson crept through the structure of the stone, and this was the parent of this beautiful jewel. The dark red spots and veins were supposed to represent the blood of Christ, and many wonderful properties were attributed to the stone. It was thought to preserve its wearer from dangers, to bring good fortune and to heal many diseases.

**Great Men Have Been Erect.**

The first object of physical methods should be to straighten and expand the body. The world may in a broad, general way be divided into two great classes—the erect and the inerect, the strong and the weak. The epoch makers—the Cromwells, Luthers, Napoleons, Wellingtons, Washingtons and Websters—have been men marked by a straight spine and a broad, high, deep chest. The mastered millions, the defeated ones, have been the inerect.—Outing.

**Extenuating Circumstances.**

A woman was charged with stealing a dozen cases of silver. She appeared before the second judicial chamber. Said the judge, "Conie, tell us the truth." Said the woman: "The truth, my good judge, is that I have not been able to resist the temptation. Consider, your honor—they all bore my initials!"—L'Independance Roumaine Bucharest.

**No Wonder.**

"What makes Archie Feathertop have such a strange, preoccupied look about him lately?"

"Preoccupied is the right word for it. He's engaged to a girl, but he has found another girl that he likes better."

**Accomplished a Good Deal.**

Mrs. Hoyle—What do you think of my dressmaker? Mrs. Doyle—She's great. She has almost given you a figure.

Let thy speech be better than silence or be silent.—Dionysius.

## MUKDEN OPENED TO WORLD.

Tokio, June 2.—Mukden was formally opened yesterday to international trade. The occasion was widely celebrated. The Chinese general, Chao, and the Japanese consul-general Hagiwara, representing their respective governments exchanged the most cordial greetings.

## ANATOMY OF AN OYSTER.

**The Bivalve's Organs and Where They Are Located.**

Every oyster has a mouth, a heart, a liver, a stomach and other necessary internal organs, including a set of cunningly devised intestines. The mouth is at the small end of the oyster's body, near the hinge of the shell. It is oval in shape, and, though not readily discovered by an unpracticed eye, it may be easily located by gently pushing a blunt bodkin or similar instrument along the folds of the surface of the body at the place mentioned. Connected with the mouth is the canal which the oyster uses in conveying food to the stomach, from whence it passes into the curious little set of netted and twisted intestines referred to in the opening.

To discover the heart of an oyster the fold of flesh which oystermen call the "mantle" must be removed. This is fatal to the oyster, of course, but in the interest of science and for the benefit of the "curious" it is occasionally done. When the mantle has been removed the heart, shaped like a crescent or horned moon, is laid to the view. The oyster's heart is made up of two parts, just like that of a human being, one of which receives the blood from the gills and the other drives it out through the arteries. The liver is found in the immediate vicinity of the heart and stomach and is a queer shaped little organ, which is supposed to perform all the functions of a blood filter.

## JAVA'S ISLAND OF FIRE.

**It Is Really a Lake of Boiling, Bubbling Mud and Slime.**

The greatest natural wonder in Java, if not in the entire world, is the justly celebrated "Gheko Kamdka Gumko," or "Home of the Hot Devils," known to the world as the Island of Fire. This geological singularity is really a lake of boiling mud situated at about the center of the plains of Grobogana and is called an island because the great emerald sea of vegetation which surrounds it gives it that appearance. The "island" is about two miles in circumference, and is situated at a distance of almost exactly fifty miles from Sole. Near the center of this geological freak immense columns of soft, hot mud may be seen continually rising and falling like great timbers thrust through the boiling substratum by giant hands and the again quickly withdrawn. Besides the phenomenon of the boiling mud columns there are scores of gigantic bubbles of hot slime that fill up like huge balloons and keep up a series of constant explosions, the intensity of the detonations varying with the size of the bubble. In time past, so the Javanese authorities say, there was a tall spirelike column of baked mud on the west edge of the lake which constantly belched a pure stream of cold water, but this has long been obliterated, and everything is now a seething mass of bubbling mud and slime.

## EYEGLASSES.

**How to Put Them on and Take Them Off Properly.**

There is nothing which more completely changes the effect of a pair of eyeglasses than the habit of crowding them on the nose with one hand. The best efforts at fitting and adjusting are all brought to naught by a person who has acquired that habit.

The proper way to take off glasses is to take hold of the bridge and lift off gently without dragging or pulling out of shape. To take off spectacles take hold of the right temple with the right hand and lift it off the ear. Then turn the head to the right and the left temple will fall off easily.

The average wearer of glasses when he is cleaning them takes hold of the bridge. The consequence is that he gradually works the bridge out of shape, and every rub he gives the lens gives a twist to the bridge, and in course of time the bridge or the lens breaks when he least expects it. There are probably more glasses broken in this way than any other.

The correct way to clean them is to take hold of one of the eye pieces where the glass is screwed on the outer edge and clean the lens, and then reverse the glasses, take it by the other end piece and repeat the process on that lens.

**She Didn't Sleep Well.**

A woman who lives in an inland town, while going to a convention in a distant city, spent one night of the journey on board a steamboat. It was the first time she had ever traveled by water. She reached her journey's end extremely fatigued. To a friend who remarked it she replied:

"Yes, I'm tired to death. I don't know that I care to travel by water again. I read the card in my stateroom about how to put the life preserver on, and I thought I understood it, but I guess I didn't. Somehow I couldn't go to sleep with the thing on."

**A Judge's Advice.**

Recently a retired English judge was asked what was the most prominent conviction that remained with him after his long judicial experience, and he is said to have replied, "That every means should be tried for the settlement of a dispute before it be taken to the law courts."

**Her Dilemma.**

Young Matron—Why so pensive, dear? Angelina—I'm desperate! Will adores me in pale pink, while Max says I'm an angel in blue. I can't have, but one gown, so you see my whole future depends on the color I select. It is sending me crazy.—London Tit-Bits.

Courage is resistance to fear, mastery of fear—not absence of fear.

Pink Lips, Like Velvet. Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying a healing, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is simply a wonderful and most highly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

# A PROFITABLE INVESTMENT FOR MONEY SAVERS

I am going to talk to you through this advertisement just the same as if I was looking straight into your eyes.

I make a business of finding profitable investments for money savers.

I employ the best of experts to help me determine the profit possibilities and the safety of such investments before I recommend them to my clients.

The person with $50,000 or more can live on the interest of his money, but the person who can save only a dollar a week or who has any small amount up to the $50,000 mark, feels keenly the necessity for placing his money where the possibilities of large profits exist and where the danger of losing his money is diminished as much as possible.

It is to accommodate this class, as well as to secure the money for meritorious enterprises, managed by honest and competent men, that I make a business of investigating and finding desirable investments for money savers.

I bring the money saver and the meritorious enterprise together.

In making scores of investigations, and as a consequence of the thousands of letters received from investors all over the United States, I agree with the late Henry Ward Beecher, who said:

"I admire the miner's wealth. It is clean. There is neither blood nor tears on it. It is acquired away from the scheming and ordinary cut-throat ventures where the success of one man often means the disaster and downfall of another. No one has been pinched; nobody has been wrecked. The miner who digs a fortune out of the ground has the satisfaction of knowing he has not robbed a soul, even though he becomes a thousand times a millionaire."

Mining, because of its tremendous importance and its unparalleled influence upon the world, as it is the basis of our entire monetary wealth, to say nothing of its other features, suffers through the shortcomings and errors of those who take a mean advantage of the industry and the public confidence, but it should no more be condemned than should the Christian religion suffer because of the wrong it is done by the hypocrites.

I AM FIRST, LAST AND ALWAYS FOR THE SQUARE DEAL. The square deal for the investor; the square deal for the enterprise; the square deal for every interest involved in business or out of business. This policy is necessary to my success.

The Square Deal involves something more than simply common honesty, and the man who is not willing to let the Square Deal permeate his entire proposition has a mistaken idea of what is best for him and in nine cases out of ten he never succeeds.

The undertaking that will not bear the most rigid investigation, both in regard to the business itself and the men responsible for it, should be left severely alone.

The Trinity Mining Company, its officers and directors, its properties and business are subject to any or every investigation that the most exacting investor might wish to make.

Some of the several prominent men who are behind this enterprise with their money and brains are the following: H. H. Latham, of the Latham Machinery Co., 197 So. Canal Street, Chicago; I. L. Shafer, of the Jukes & Shafer Co. (Japanners), 201 So. Desplaines Street, Chicago. H. E. Procunier, President of the Moon Mfg. Co. (Electrical Equipments), 47 South Canal Street, Chicago. H. C. Reno, Mining Engineer, 140 Dearborn Street, Chicago.

If you will take the trouble to make proper inquiry through any of the commercial agencies or through Chicago acquaintances, you will discover these men are not the kind who would permit their names, to say nothing of their money, to be used or coupled with an enterprise that did not deserve every confidence and co-operation, and if these men can afford to do it, any other man living can afford to do the same thing.

I am in the investment business for life. I, naturally, will not intentionally direct you wrong. I want you as a customer.

A good block of paying mining stock is as good life insurance as any man needs. He does not have to die to enjoy the benefits of his self-denial. It insures him a comfortable seat in a cozy corner by his own fireside when he is no longer able to work.

The directors of the Trinity Mining Company have authorized me to sell 300,000 shares of their treasury stock for the immediate use of installing additional facilities for the economical extraction of the values from their ore bodies, and for other purposes incident to the enlarged success of the corporation.

Every stockholder stands on an equal footing with every other stockholder in proportion to the amount he holds. There will be no freezing out or squeezing out of any interest. I wish to be emphatic in this particular for I realize that such things are common where the "big fish eat the little ones," and I wish to say that in this case or in any other enterprise that I may recommend to the public, such unwarranted methods will not be permitted to prevail.

Read every word that follows and let me hear from you immediately.

**PIERCE UNDERWOOD, Specialist in Profitable Investments,**
**140 Dearborn Street, Chicago.**

# A SQUARE DEAL IN MINING INVESTMENTS

**PROOF ONE:**

Investigate through any commercial agency or any other channel, the men behind this enterprise. If they are not both honest and able don't invest.

**PROOF TWO:**

I have in my office many receipts from the U. S. mint at San Francisco given to the bank for bullion received from the La Jojoba (pronounced La Hohova) group of mines while the Trinity Mining Company was proving the property. Ask any friend here to come and inspect—come yourself if you can.

**PROOF THREE:**

Read what Mr. H. C. Reno, the eminent mining engineer and president of the Trinity Mining Co., says. He stakes his reputation on the general worth and profit producing abilities of these properties. *HE KNOWS.*

**ESTIMATED PROFIT FOR OUR STOCKHOLDERS.**

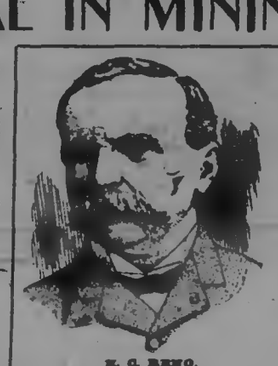
*$100,000 to $150,000 ANNUALLY*—This is a very conservative estimate—and based upon *what is in sight and not upon guess work.*

REMEMBER! The increase in value of this stock will in all probability reach several dollars a share and buyers will be eager to purchase it—a profit increase would return to you an enormous profit aside from whatever it may earn for you in dividends.

Stock in several Mexican mining companies that originally sold for a small price per share has risen to hundreds, and in some instances, to thousands of dollars per share.

Every favorable condition seems to exist to justify the belief that TRINITY STOCK WILL REACH A VERY HIGH FIGURE.

In any event the investor has the advantage of knowing that his money is invested in a real mine that is a good producer when operated and can be made one of the biggest. Also his money will not be frittered away through mismanagement. AGAIN REMEMBER! Gold mines are not usually affected by troubles that ruin most enterprises, such as strikes, panics, droughts, fires, trusts, etc., etc. Gold is always necessary and the demand at $20.67 per ounce is world wide—ALWAYS A MARKET THAT PAYS SPOT CASH.



H. C. RENO,
Mining Engineer,
President Trinity Mining Co.,
1102 Hartford Bldg.,
CHICAGO.

Shaft Machinery of San Miguel Mine.

**THE TRINITY MINING COMPANY AND ITS PROJECTS**

The Trinity Mining Company is a corporation organized under the laws of the District of Columbia for One Million Dollars, divided into one million shares of a par value of $1.00 each, fully paid and non-assessable, all stock common stock.

The purpose of the company is to operate the vast LaJojoba group of mines located in the State of Sonora, Mexico. This property is twelve miles due west of Magdalena, and Magdalena is on the Sonora Railroad, fifty-six miles due south from Arisona.

**VAST MINERAL DEPOSITS CONTROLLED BY THE TRINITY MINING COMPANY.**

The great LaJojoba group of mines include twelve or more individual properties, any one mine of which, it is believed, is sufficiently strong enough to earn a good interest on the entire capital stock of the company. Two of the mines have been considerably developed with a view of ascertaining as nearly as possible a correct estimate of the vast wealth contained in their veins. These properties include a surface area of 142 acres.

Mill with capacity of 40 tons daily to be increased to 100 tons.

**CONDITIONS OF PROPERTY.**

The conditions of this property are ideal. As to climate, the altitude is about 2,700 feet above the sea, no severe storms of any kind and work can go forward without discomfort during the entire year. There is near at hand an abundance of hard wood for fuel and timbering, and water sufficient for all purposes.

The improvements consist of a large mill with all necessary accessories and appliances, capable of handling 40 tons of ore a day; one 85 H. P. Ames Engine with boiler, etc., etc., all of which is properly housed in substantial buildings. There are two small engines with blowers, pipes and all necessary tools and supplies for conducting an extensive business.

On the Cleopatra Mine there are surface improvements, including frame hoist, blacksmith shop tracks, etc. On the San Miguel Mine there is a new gallows frame 43 feet high, a 50-ton ore bin, a new Fairbanks-Morse & Co. double cylinder hoist, a 40 H. P. tubular boiler, blacksmith shop, tanks, pumps, etc., etc.

In addition to the equipment for the mines and mills, there is an office building owned by the company, a two-room supply building, a two-room mess building, one large five-room boarding house, two four-room renting buildings and several other houses for the use of miners; a 3,500 foot 4-inch pipe line connects the San Miguel Mine to the mill.

There are over 12,000 tons of mill tailings which, when run through a Cyanide plant, will leave a net profit of over $30,000.

**DEVELOPMENT.**

The men responsible for the Trinity Mining Company, before consenting to the sale of stock in this company to the public, felt it was not only a duty to themselves, but to the public as well to first prove these properties and see whether they were all that it was believed of them and to eliminate, if possible the element of speculation. They therefore developed the San Miguel and the Cleopatra Mines and blocked out ore in quantities sufficient, in their estimation, to guarantee themselves and investors against any possible loss, thus making the enterprise one of proven merit and not of speculation.

The development of these properties includes a shaft on the San Miguel Mine, 160 feet vertical, together with several other shafts on the vein to a less depth. There are over 2,000 feet of drifts and the ground opened up in this mine discloses a very strong vein, varying in width from two to twenty feet, and there is in sight a very large block of free milling gold ore, which, in places, runs exceedingly high. The ore is soft and can be cheaply mined and milled.

Development in the Cleopatra is extensive to a depth of about 125 feet. Ore in this mine is blocked out 60 feet wide, 400 feet long, and to a depth of 125 feet. This one block contains over 250,000 tons of ore which can be quarried and delivered in the mill for less than 40c a ton. Its average value is about $4.00 a ton and will pay a profit of about $2.00 per ton net.

There is a large amount of development and good ore bodies in the other properties. These properties together could easily produce from 200 to 500 tons of milling ore per day for many years.

Office and Supply Department.

**WHAT THE COMPANY NEEDS**

The company needs your subscription to its capital stock, and your money will be used for increasing the mill and other facilities for treating the ore in the mines controlled by the company, and it will be some satisfaction for you to know that the by-laws of this company specifically forbid the use of any of the money for the payment of official salaries or any other subsidiary purposes except actual operation and its necessary incidents, and the acquirement of property.

The mill must be increased to 150 tons capacity. It is now only 40 tons and costs practically as much to operate as a large mill.

A tramroad should be built to the mines so that the ore can be delivered in the mill for 15c a ton instead of 60c, as it has been costing. A cyanide plant, which, as soon as installed will pay for itself twice over in profits from the tailings of the present mill.

For various purposes, the directors of the company have authorized me to sell $50,000 shares of the treasury stock, of which 40,000 shares have been set aside exclusively for the readers of this paper, and no subscription for less than 25 shares will be taken.

The price is 50c a share cash or $5c if paid for on installments of 10 per cent down and 10 per cent a month. Par value $1.00 per share. Estimated value within one year, from $2.00 to $5.00 per share.

OFFICERS' QUARTERS.

**"I have staked my reputation on the general worth and profit producing abilities of the mining properties controlled by this company."**

May 11, 1906.

Mr. Pierce Underwood, 140 Dearborn St., Chicago:

My Dear Sir—For twenty-seven years my time has been exclusively devoted to the examination of mining properties of the United States, Canada and Mexico, and in the superintendence of others.

I have felt that it was the time to secure the control of a property for myself, one that I could select with the advantage of my years of experience and one that I would know possessed all the necessary requisites to make myself and my associates financially independent, and I am pleased to say that I have staked my reputation on the general worth and profit producing abilities of the mining property controlled by this company.

I have based this view upon the following facts, which are within my knowledge: First, there are over 250,000 tons of visible, available and profitable milling ore exposed in view in the form of a vast quarry, which can be taken out at an expense of not exceeding 50 cents per ton; it can be milled with proper milling machinery at a cost of not exceeding $1.50 per ton, and it has been shown by actual mill runs that the average value is not more than $4.00 per ton (while some ores taken from other mines of this group have shown from $60.00 to $80.00 per ton, and in individual instances have shows as high as $460.00 per ton.) The above quantity is visible, and one is warranted in the belief that the ore will continue in depth and produce many times this amount of ore of equal or possibly greater value. This is only one of the twelve mines controlled by the company constituting this group.

My long experience justifies my statement that in the Trinity Mining Company as a corporation and in the properties controlled by this corporation the element of risk to the investor is as wholly eliminated as honesty, ability and very valuable property can accomplish. My A. L. is invested in this undertaking, because I am confident of its success. Yours truly,

H. C. Reno M. E.

## MEDICINE MEN MAKE OBJECTIONS

**Further Labeling of Bottles Would Excite Unnecessary Suspicion.**

Ottawa, June 6.—The Parliamentary Committee investigating the patent medicine trade in Canada yesterday heard from David Watson of Montreal, president of the Association of Proprietary Medicines, that any additional labeling of medicines would seriously affect the trade. People became accustomed to certain labels and bottles, and would look with suspicion on any change. For this reason he did not approve the suggestion to attach an additional label to medicine, showing the contents.

"What effect," asked Mr. H. H. Dewart, "would it have on the consumption of medicines containing cocaine or morphine or marcelf?"

"That's a psychological matter," observed Mr. Stockton.

"And it would enable those with the habit to get these drugs all the easier," said the witness.

Mr. J. A. McKee, president of the Dodds Medical Company, and chairman of the Board of Control of the Dominion proprietary medicine men, testified to the usefulness of patent medicines, and the country people beyond reach of doctors appreciated the opportunity of getting medicine in the stores, and would be seriously inconvenienced if legislation was passed restricting such business to druggists.

"They have a legitimate place in the world" asked Mr. D. W. Dole. The witness agreed.

L. S. Levee, Toronto, representing the medicine firm handling Psychine, told the committee he would object to registering the formula of his medicine.

## THE CHICAGO NEWSPAPERS ENTHUSIASTIC

**About the Trinity Mining Co. and the Men Behind It.**

READ WHAT THEY SAY

**CHICAGOANS SEEK GOLD IN MEXICO**

**Opening of Large Mines Follows Inrush of American Capital.**

Special Dispatch to The Inter Ocean.

MAGDALENA, Sonora, Mex., May 15.—The gold belt of Sonora, which is in the western part of this state, and one of the largest in the world, is now being rapidly developed by foreign capital, most of it from the United States and a part from England and South Africa. Large mines are now being opened and operated, particularly in the Minas Prietas and the Magdalena districts. The Colorado Cracion, which has already produced $10,000,000 in gold, is now yielding a profit of $300,000 a year to its owners, who are Chicago and English capitalists. South African and American mining men are interested in the Grand Central mines at the same camp, which is becoming one of the big producers of this section.

The Trinity Mining Company, made up entirely of Chicago business men, owns a large mine twelve miles west of the town. This mine has been operating on a comparatively small scale and its milling plant is now to be enlarged and a big cyanide plant added. The company has large deposits of gold, with some silver and copper, and has its mines extensively developed. About $2,000,000 worth of ore is blocked out and ready to be milled.

*News Item from Chicago Inter Ocean, May 23d issue.*

## PICKING UP MILLIONS FROM MEXICAN MINES

**Chicago Men Acquire Control of an Enormously Valuable Property at Sonora, and Predict That It Will Rival in Richness Anything in the Republic.**

"Only those who have had occasion to do business in Mexico can appreciate the intensely friendly feeling with which the Mexican government and the representative men of the country regard American capital, and the protection and inducements they offer those to make investments there."

The speaker was H. E. Procunier, one of the directors of the Trinity Mining Company of Sonora, Mexico, and also president of the Moon Manufacturing Company of 47 South Canal street. The Trinity Company has acquired possession of a property in Sonora which expert engineers have pronounced to be of exceptional richness, and which promises to yield another group of millions to the Chicagoans who have been made millionaires by investments in mines.

Mining," continued Mr. Procunier, "is like any other business. If a man is going to invest in a mine he wants to do the same as he would do in any other business—investigate it thoroughly. He has got to find out in the first place that the properties really exist, he has got to find out if they have veins, and, if they have, how much. Then comes the question of title and conservative estimation. After these points be found to be right the management is competent and if the controlling spirits are honorable. Given a favorable reply to all these questions, there is no reason why a man should hesitate any more to put money into a mining company than into a stock of groceries.

"That is the way I went about it before I put a dollar into the Trinity company. I believe I know that we have got one of the most valuable mineral properties that exist, even in that wonderful mining country of Mexico, and that this property is within the next few years going to return millions of dollars to us in dividends. Our ore assays high in value, and there is enough in our property by run in for scores of years to come."

Other Chicago men who have joined Mr. Procunier in the Trinity mine are H. H. Latham of the Latham Machinery company, 197 South Canal street; I. L. Shafer of Jukes & Shafer, 201 South Desplaines street.

*News Item from Chicago Examiner of May 24th.*

## CHICAGOANS EXPECT RICH PROFITS FROM MEXICAN GOLD MINES

**Local Capitalists Are Opening Large Gold Mines in Sonora.**

It is difficult to estimate the amount of gold which is sent from Mexican mines annually by American loans to the mints of the United States. The most active gold section is the Southern Republic is in the State of Sonora, which immediately adjoins Arizona on the south. It has been customary to ship gold bars from the mines of this State to the American mint at San Francisco. A short time ago the Trinity Mine, which lies twelve miles south of Magdalena on the Sonora Railroad, and fifty-four miles south of the Arizona line, produced $8,000 of gold in two months. The product was molded into gold bricks of bars, taken from the camp of the mine to a large mercantile house in Magdalena, which also does a banking business. This establishment turned the gold over to the Wells Fargo Express Company, which carried it by rail to San Francisco, and delivered it to the Bank of California. The Bank of California then transformed the bar, which contained about $1,500 worth of the metal, to the government mint.

In order to eliminate any impurities which may exist, and to separate the gold from the silver, if any, in any quantity of the metal, the mint remelts the bar. The quantity of the gold is then accurately determined and the mint reports same in this case to the Bank of California, the bank forwards the report to Magdalena with a notice that the value of the gold bar has been deposited to the credit of the Trinity Mining Company in the Bank of California.

The Trinity Mining Company is a Chicago enterprise. Prominent Chicago business men are interested in the property with Mr. H. C. Reno, a well known mining engineer. The company has blocked out more than a million dollars' worth of ore and has been operating a small mill. It is proposed, however, to enlarge the capacity of the mill and add the cyanide plant. The cyanide process retches the fine gold which escapes when the original amalgamating plates are used. The company is to be enlarged and its operations very greatly increased.

*News Item from Chicago Examiner of May 25th.*

## CHICAGOANS GOING TO MEXICO TO INSTALL MINE MACHINERY

**H. E. Procunier Talks of Gold Properties in Sonora Owned by Local Business Men.**

A number of prominent Chicago business men, the principal ones interested in the Trinity Mining Co. of Sonora, Mexico, are contemplating a trip to that section shortly to witness the installation of extensive modern mining machinery, which will be used to take out thousands of tons of rich ore already blocked out. Among the Chicagoans who are interested in the company are H. E. Procunier, president of the Moon Manufacturing Company, 47 South Canal street; H. H. Latham of the Latham Machinery Co., 197 South Canal street; I. L. Shafer of Jukes & Shafer, 201 South Desplaines street, and H. C. Reno, mining engineer.

Mr. Procunier, in speaking of the mines at Sonora, Mexico, owned by the Trinity Mining Co., said:

"Owing to a real mining enterprise there is no wildcat speculation about it. The property is famous, besides, for its rich gold ore, and that, together with the capitalization constructed, the management competent and the controlling spirit honorable, I see no reason why any prospective people should always say that the above conditions are true. It is not always necessary to make a personal investigation of the property, especially if well known persons have profitably gambled every representative made.

"The government of Mexico is specially favorable to American capital and safeguards it to the last degree. We expect to put our company on a basis of operation equal to some of the very largest and best producers in the State of Mexico, and have the money to do this and the public is taking great interest in our enterprise."

**Medal Awarded for Heroic Conduct.**

Kingston, June 6.—The Royal Canadian Humane Society has awarded a medal to J. B. Forsyth, wharfinger clerk, for heroic conduct in the rescue of James MacNicol, from drowning at Kingston in June, 1905. Mayor Mowat will present the medal at an early date.

## House-Clean Your System!

**Keep it Pure and Clean if You Desire Good Health.**

The inside of your body requires attention just the same as the outside. A great accumulation of effete matter is clinging to the various organs, and must be moved off.

Some gentle laxative and tonic should be used.

The poisons must be relieved of its burden if you are to enjoy a happy, healthy summer.

Physicians who have examined the formula of Dr. Hamilton's Mandrake and Butternut Pills say no medicine could be better.

Whether ill or not, thousands rely on Dr. Hamilton's Pills which are truly marvellous in preventing debility and sickness.

Begin Dr. Hamilton's Pills without delay. You'll feel stronger, eat heartier, digest better, sleep sounder, and gain more in weight.

Mr. Ed. Maynard, an old resident of New Westminster, B. C., writes: "I don't say Dr. Hamilton's Pills will cure everything, but they made a quick job of building up my run-down system. I had kidney disease and constipation, and was wholly unfitted for work. Pains shot through my limbs and lodged in my back. Headaches often made me desperate. I had no appetite, an awful color, and felt despondent. Sometimes I was a little rheumatic. After a few days I began to mend, and kept up Dr. Hamilton's Pills till I was restored to my present tip-top condition."

Can you afford to miss the benefit of this marvel-working medicine? Think of it. All dealers sell Dr. Hamilton's Pills, 25c. per box, or five boxes for $1.00. By mail from N. C. Polson and Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS.

**Phonographs.**

Sold on easy payments at The J. M. Greene Music Co., George street, New Opera House Building, Peterboro.

**Trent Valley Canal Open.**

Water was let into the canal yesterday for the first time since the break last winter. Everything is now in shape for the opening of the lift lock today.

**Wanted Immediately.**

Good sewing machine operators on power machines. Only first-class hands need apply. Apply to J. J. Turner & Sons, Tent and Awning Manufacturers, George street, Peterboro.

**Olympic Excursion Today.**

The Olympic Club excursion will take place today to Burleigh Falls, and is as usual personally conducted by Mr. W. E. Loch. The boys as usual spared neither trouble nor expense in having this event up to the well known high mark.

**Organ for Sale.**

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1168.

**Trouble on East Ward Sewer.**

The heavy rain of Tuesday night caused the banks of the sewer on Hunter street east, lately put in by Contractor J. Robson to cave in. Mr. Robson is having a hard row to hoe, being delayed in getting an outlet to his sewer. This is partly due Mr. Robson informed a Times' representative yesterday, to Mr. Bogue stopping work on the outfall sewer, and thus holding the work back

**Men Wanted.**

Any number of Woodsmen wanted for Algoma Commercial Company, Sault Ste Marie, Ont. Highest wages paid. Apply to

GEO. J. CHALMERS
542 Water Street
or P. O. Box 831, city.

**THE NEW TERM**

at the

**PETERBOROUGH BUSINESS COLLEGE**

opens on

TUESDAY JAN. 2, 1906

Intending students should make application as soon as possible.
Call at the College or address

## LOCAL INCIDENTS

By The Times Man on the Street

—The lift lock will be opened today.

—The Board of Works met last night. Particulars elsewhere.

—For bargains in stationery, fancy goods and notions see our window display. Times Bookstore.

—There are eighteen prisoners in the county jail at present—seventeen males and one female.

—The county court and general sessions of the peace will open on Tuesday next before His Honor Judge Weller.

—A special meeting of the Ladies' Aid Society of George street church was held yesterday evening in the church parlor at 8 o'clock.

—The Sons of Idleness had to go hungry yesterday morning, their feast of venison, viz., "d. & fa." at the police court being a blank.

—Last night the Fire, Water and Light Committee met to discuss the delay in starting the new fire hall. For particulars see other columns.

—The Sunday school convention of Smith and Lakefield will be held in the Gilmour Memorial church on Friday night, with Sheriff Hall presiding.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—It seems that the local livery men now that they have thoroughly read, marked and inwardly digested the new bylaw regulating their license fees are fully reconciled to the terms thereof.

Lax-ets—A Candy Bowel Laxative.
If you have Constipation,
If you have a coated tongue,
If you are dizzy, bilious, sallow,
If you have Headaches, Sour Stomach, etc., risk 5 cents on Lax-ets See for yourself. J. D. Tully.

**New Belts for 57th Regiment.**

Arrangements are being made by the 57th regiment for new belts, which will be somewhat different in design from those used at present. The officers now wear white belts, but the new ones will be a brownish color and consequently more easily kept clean.

**For the Lumber Camps.**

Mr. Geo. J. Chalmers, the well known lumberman yesterday shipped a dozen men to the Commercial Lumber Company's camps at Sault Ste. Marie. These men mostly came from the north country and are a husky bunch of river men being strapping fellows. Mr. Chalmers wants several hundred more men.

**Hogs Arrived Per Rainbow.**

Yesterday evening Capt. Bennetts' fine steamer, the "Rainbow," brought up a scow load of hogs from points on Rice Lake and the lower Otonabee consigned to Messrs. G. Matthews Co. There were 200 hogs in the shipment. After delivering its cargo the Rainbow left last night for Rice Lake.

**Star of East Gold Mine Officials to Meet.**

The directors of the Star of the East Gold Mining Company will hold a meeting at their works in Barrie Township, Hastings County, on June 18th. They will inspect the plant and afterwards hold a meeting. It is said that some improvements are contemplated.

**Farmers Picnic to Guelph.**

Great interest is being taken in the Guelph excursion on June 14th. The Farmers' Institutes of East and West Peterborough, and East Durham, have joined issue in this annual trip to the Royal City. Mr. W. Collins is working hard these past years to make the outing not only well patronized, but enjoyable by the hundreds who will take it in.

**Ross Rifle in D. R. A. Matches.**

The Times was yesterday notified that the Ross rifle, having been officially recognized by the Dominion Government for the Canadian militia, will be permitted in all Dominion Rifle Association matches. This rifle will be used at Bisley this year, and it seems to meet with universal favor on account of its wonderful accuracy and splendid sighting arrangements.

**Pig Found By a Times Adv.**

Talking of the benefits of advertising it might be noted that on Monday a gentleman who had found a stray pig, advertised the fact in The Times of next day. Before 24 hours had passed the owner of the porker, saw The Times' ad. and quickly gained possession of the animal which makes by itself more noise under a gate than two of a kind.

**New Cars for G.T.P.R.R. Here.**

Last night forty new box cars en route for the Grand Trunk Pacific Railroad passed through the city. The cars were stalled for a long time between Lake street and Otonabee river, whilst the locomotive hauling them ran up to the city to take in water. Considerable interest was aroused among those who saw this formidable invasion of brand new cars.

**Theatrical Celebrities in the City.**

Mr. Richard Simons, a son of Mr. Simons, the George street merchant tailor, and an old Peterborough boy, is in the city as guest of his father on Rubidge street. Mr. Richard Simons, better known in the city as "Dick," is, like his brother "Danny," a successful member of the theatrical profession. "Dick's" wife is also in the city. Mrs. Simons has made a name of high standing on the American stage, her professional name being Miss Tipton. Mrs. Simons with her husband, has recently been with the John A. Himmelein Imperial Stock Co. No. 2. Mr. and Mrs. Simons have just returned from a successful professional trip through Ohio, Michigan, Illinois, Indiana, Kentucky, W. Virginia and Pennsylvania. Mr. and Mrs. Simons will be in the city until about June 25th.

## SOCIAL AND PERSONAL

—Mr. E. H. Hill, of Syracuse, is a guest at the National.

—Mr. William Shaw left yesterday on a few days' trip to the north.

—Mr. George W. Watt of the C. G.E. head offices, Toronto, is in the city.

—Mr. Henry Thompson left yesterday morning for Winnipeg, where he will in future reside.

—Mr. A. O. Tate, an old Peterborough boy, now living in Toronto, is in the city on business.

—Mr. Richard Lees left for London yesterday to attend the General Assembly of the Presbyterian church.

—Mr. A. J. Grant, Superintending Engineer of the Trent Valley Canal, is in Fairfield and Gamebridge on business.

—Mr. Gordon of the firm of O'Connell & Gordon, left last night for Toronto to look after a case at Osgoode Hall.

—Mr. Henry Holgate of Montreal, who was the investigating engineer in the lift lock investigation, is in the city on business.

—Mr. Robt. Harrison left yesterday morning for London where he will attend the General Assembly of the Presbyterian Church.

—Mr. W. J. O'Brien, the popular George street cigar man yesterday changed his residence from 48 Bolivar street to 136 Waterford street.

—Rev. W. J. Jolliffe, who has been transferred to Clinton, returned yesterday from attending the session of the London conference in Windsor.

—W. H. Meyers, New York; Hugo Greef, Herm Greef, Geo. W. Watts, D. T. White, Toronto; T. A. Galey, Toronto. L. E. Perry, London; F. Allison, Toronto, are guests at the Oriental.

**Big Excursion For Peterborough.**

The Orangemen of East Toronto will run an excursion to Peterborough on Saturday of this week and it is expected that over 600 visitors will be in the city that day. A couple of gentlemen from Toronto have been in the city making arrangements for the trip, and notifying the local hotelmen to be in readiness. A trip over the lift lock will be one of the attractions.

**Nearly Went Over Niagara Falls.**

Niagara Falls, N.Y., June 6.—A man giving his name as Amos Switzer, 29 years of age, was fished into the Niagara River early today. Fireman Thomas Conroy and Policeman Watts went out thirty-five feet on an extension ladder, and reached the man fifteen feet from the brink of the falls.

If you Stomach is Weak,
If your Food distresses you,
If you are Weak and Nervous,
Use Dr. Shoop's Restorative one month and see what it does for you. Sold by J. D. Tully.

**A Lindsay Wolf Story.**

The Lindsay Post of last issue contains a story that to assimilate would require at least one barrel of sodium chloride. It is to the effect that at the "Narrows," between Haliburton and Minden, a trapper named Bill Otter saw a flock of wolves numbering forty swimming across the water. With his Winchester he pumped fifteen bullets into the bunch killing 13 wolves. Before they sank he cut off their ears and will now take in $195 in bounties. If George Washington and his little hatchet had only been along, he and Bill would have scooped in the whole forty.

**Band at Jackson Park.**

Last night the 57th Band was at Jackson Park, as advertized by the Street Railway Co. The moving pictures exhibited at that Park this year are of a high class and well worth any one's trip to see them. Last night owing to the rain fall and consequent wet grass, the attendance was altogether incompatible with the quality of entertainment provided. However the fact that the band under existing circumstances were at the park amply demonstrated the good faith of the street car people and will doubtless establish a feeling of confidence in future statements made by them.

**Fire Engine Stands Good Test.**

The new steam engine is "fit." During the test given Tuesday evening under charge of Chief Thos. Rutherford, with the whole brigade present, and with Wainwright at the throttle steam was got up in nine minutes, exactly one minute longer than the professional expert took when the engine was first displayed here. Of course whilst one minute difference may seem a consideration, it must be borne in mind that the expert a few weeks ago only had enough water in the boiler to prevent an explosion; on Tuesday night the boiler contained sufficient water to render an accident practically an impossibility.

## HYOMEI CURES CATARRH

**Its Healing Balsams Kill All Catarrhal Germs.**

There is no more common disease than catarrh, and none that is more dangerous. It weakens and debilitates the whole system, if it is allowed to run, leads to serious and sometimes fatal complications.

No dangerous drugs are taken into the stomach when Hyomei is used. Breathed through the small pocket inhaler that comes with every Hyomei outfit, its healing balsams penetrate to the most remote cells of the throat, nose, and lungs, killing the germs of catarrh, healing the irritated mucous membrane, and making complete and lasting cures.

The complete Hyomei outfit, consisting of an inhaler that can be carried in the purse or vest pocket, a medicine dropper, and a bottle of Hyomei, costs only $1. The inhaler will last a lifetime, while extra bottles of Hyomei can be procured, whenever needed, for only 50 cents.

If you cannot obtain Hyomei of your dealer, it will be forwarded by mail, postage paid, on receipt of price. Write today for consultation blank that will entitle you to services of our medical department without charge. The R. T. Booth Company, Hyomei Building, Ithaca, N. Y.

## A Trite Saying.

It is a trite saying that no man is stronger than his stomach. Dr. Pierce's Golden Medical Discovery strengthens the stomach—puts it in shape to make pure, rich blood—helps the liver and kidneys to expel the poisons from the body and thus cures both liver and kidney troubles. If you take this natural blood purifier and tonic, you will assist your system in manufacturing each day a pint of rich, red blood, that is invigorating to the brain and nerves. The weak, nervous, run-down, debilitated condition which so many people suffer from, is usually the effect of poisons in the blood; it is often indicated by pimples or boils appearing on the skin, the face becomes thin and the feelings "blue." Dr. Pierce's "Discovery" cures all blood humors as well as being a tonic that makes one vigorous, strong and forceful. It is the only medicine put up for sale through druggists for like purposes that contains neither alcohol nor harmful habit-forming drugs, and the only one, every ingredient of which has the professional endorsement of the leading medical writers of this country. Some of these endorsements are published in a little book of extracts from standard medical works and will be sent to any address free, on receipt of request therefor by letter or postal card, addressed to Dr. R. V. Pierce, Buffalo, N. Y. It tells just what Dr. Pierce's medicines are made of.

The "Words of Praise" for the several ingredients of which Dr. Pierce's medicines are composed, by leaders in all the several schools of medical practice, and recommending them for the cure of the diseases for which the "Golden Medical Discovery" is advised, should have far more weight with the sick and afflicted than any amount of the so-called "testimonials" so contemptuously flaunted before the public by those who are afraid to let the ingredients of which their medicines are composed be known. Bear in mind that the "Golden Medical Discovery" has THE BADGE OF HONESTY on every bottle wrapper, in a full list of its ingredients.

Dr. Pierce's Pleasant Pellets cure constipation, invigorate the liver and regulate stomach and bowels.

Dr. Pierce's great thousand-page illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 21 one-cent stamps, or cloth-bound for 50 stamps. Address Dr. Pierce as above.

## INDISCRETE UTTERANCES

**Dr. Morrison's Interview Displayed Doubtful Judgment.**

In the report contained in Tuesday's Examiner of Mr. Geo. Cochrane's resignation as license inspector for West Peterborough, there appears an alleged interview between that paper and Dr. M. A. Morrison, chairman of the local Board of License Commissioners. In this interview, Dr. Morrison is reported to have said that "He knew no reason why this action should have been taken by the members for West Peterborough as chairman of the Board he regretted the circumstances, etc." Dr. Morrison then went on to say that he "was sorry that he (Mr. Cochrane) was being interfered with."

Now with all due deference to Dr. Morrison, whose position in Peterborough is above reproach, and whose actions as chairman of the board are above criticism, we must say that as an employe and beniffitiary of the Ontario Government, his action in directly finding fault with Mr. Bradburn, the member for West Peterborough, is to put it mildly outside ordinary procedure.

Dr. Morrison, evidently sees many virtues in Mr. Cochrane's administration of his office, but at the same time, it might perhaps have been more courteous to Mr. Bradburn, had he not, through a newspaper interview, have published his personal views.

DRAW ATTENTION TO THE **"NEW THEORY"**

## Over 75% Winners

**This Week up to Yesterday We Played Five Horses; Result, Four Won.**

We purchased outright, at a cost of $15,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interests of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season same shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your money constantly showing you its full earning capacity, which was the greatest secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously and substantially. There are no "ifs" and "ands" and we stake our reputation on same.

### What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

### What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or choices. We often win on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

**NOTE—**

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

**RESULT—**

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

### ABSOLUTELY INFALLIBLE

It earned $56,000 for the originator last season in four months, $43,000 two years ago, and $67,500 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $23,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 100 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Noting of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

**NOTICE:**

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)
Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

**GUARANTEE—**

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours: 9 a.m. to 9 p.m. Sunday by previous appointment.

## Road to Lift Lock Will Be Purchased

### Agreement With Bell Telephone Co. to Put Wires Underground Practically Shelved--- Use of Wells in Congested Parts of City May Be Prohibited.

The City Council met in regular monthly session last night, when there were present, Mayor Henry Best, and Aldermen Johnson, Tovey, Hicks, Mason, Elliott, Graham, Hall, Duncan, Wilson, McIntyre, Adams.

COMMUNICATIONS.

The following communications were referred to their respective committees:

From ratepayers, asking for a concrete crossing across George st., north side Edinburgh street.

From ratepayers petitioning for granolithic sidewalks on the following street:

North side of King from Park street to Maitland avenue.

On Mark street between Hunter and James street, outside of the street line.

On West side of Jackson street, and also when building the new proposed sidewalk on Albert street, south to put the same on the inside of the tree line, and further to use the old material taken up on Albert St. to construct a sidewalk on the east side of Jackson street.

On West side of Water street from Dublin to Antrim.

On east side of Donegal street from Hunter to Brock outside the tree line.

On west side of Reid, north McDonnel and London, outside trees.

From ratepayers petitioning for pipe sewers on the following streets:

On Murray street from Downie to a point 250 east on Murray street.

On Perry street from Stewart to Park street.

From Fire Chief Rutherford, asking that he be furnished a bicycle to facilitate his attending to the attending to his duties connected with the fire department in the most expeditious manner possible.

W. and R. Parnell, drivers in the fire department, asked for an increase of salary.

From W. F. McAmmond, officer in charge of the Salvation Army, asking a grant of $200 to go toward the purchase of new instruments for the S.A. Band.

From E. C. West, clerk, Campbellford, requesting the honor of the council's presence at the inauguration celebration of Campbellford as a town on July 2d, 1906.—Received.

From Thomas Price asking the refund of $1.90 paid as road work, which assessment he was not entitled to pay, being a tenant in the city.

From S. R. Armstrong, enclosing the following resolution passed by the local Board of Health: "That the matter of terrace and dwellings on streets where sewers have been constructed, not being connected with the sewers, be referred to the City Council with the request that the council look into the matter and pass such bylaw as may be necessary to provide a remedy."

From N. Lush, petitioning against the construction of a granolithic sidewalk on the east side of Bethune street to Antrim street, on account of the very small value of the property on said street owned by him.

From Jno. Cameron, Mrs. E. H. Mason and Hattie A. Jenkinson, petitioning against the construction of a granolithic walk on north side of Brock street, from Park to Reid streets. The petitioners prefer the present system of walks to remain.

From the Peter Hamilton Company, Limited, collectively and individually, objecting to the construction of a granolithic walk on east side of George street from King street south, opposite lots No. 7 south of King and north of Sherbrooke, and objecting to be assessed for payment of same.

From the Wm. Hamilton Mfg. Co., protesting against the laying of a granolithic walk on west side of Reid between Murray and Brock streets.

From Patrick Hogan, D. McGregor and Timothy O'Leary, petitioning against the laying of a granolithic walk on south side of Douro street, East Peterborough.

From R. C. Braund and four others calling council's attention to the fact that they have no sewer accommodation, and that in the space of one and a half acres of ground, including Jackson street and Lafayette avenue, there are twenty-three houses with an average of five to a house, giving a population of 105 people, all without sewer accommodation. The petitioners thought it time some steps were taken to remedy this unsanitary state of things.

From Isabell Knox requesting the immediate opening of the Queen St. sewer as the busy season of the soda water factory was about to begin and there was no place for the vast amount of waste water to go.

From J. Robson stating that he could not get an outlet into the outfall sewer on Hunter street east, and asking that the city be held responsible for any loss that may occur to him from rain storms, etc.

From J. Z. Roger, manager of the Peterborough Canoe Co., Limited, asking for a fixed assessment on the company's property.

From A. Stevenson, secretary of the Water Commissioners, requesting that the council make the usual arrangements for paying the interest on the debentures of the water commissioners, which amounts to $5,552.50. The communication also notified the council that the commissioners were prepared to purchase the $10,000 of local improvement debentures which are being issued, provided the council would pay them $5,000 on account of the demand of this year.—His Worship and the finance chairman were empowered to act in this matter.

From ratepayers of the west part of Gilmour and Charlotte streets, asking for an electric light to be placed on the north-west corner of Charlotte street.

From Robert Wilson seeking the position of park constable for Jackson Park during the coming season.

From the executors of the estate of the late Hon. J. D. Armour and property owners against the construction of a granolithic sidewalk on the east side of Concession street, from Douro to McFarlane street.

The following communication was received from Mr. E. H. D. Hall, city solicitor, in answer to your enquiry as to the payment of street extension, I beg to advise that under the bylaw provided for borrowing $12,000 for constructing bridges and opening new streets, it is recited that it is desirable that certain new streets should be opened, and that it is necessary to purchase land for that purpose, and that it is estimated that the cost of purchasing said land and opening said new streets would be the sum of $6000; and it is provided by the bylaw that the proceeds of the debentures authorized by it when sold should be appropriated as follows:—A sum not exceeding $6000 in the purchase of land for and in opening new streets where necessary in the city.

The council has therefore authority to expend $6000 in opening new streets and no more, unless out of current revenue, if there is sufficient current revenue unappropriated and available. Of course it follows from this if there is not sufficient unappropriated current revenues for doing the work any money spent in addition to the $6000 would be illegal. You will notice that no particular streets are mentioned in the bylaw, and therefore this $6000 can be used in the discretion of the council in buying land for and opening new streets.—Received.

TAX COLLECTOR'S STATEMENT

Tax Collector W. J. Green, submitted his monthly report as follows.

| | |
|---|---|
| Total amt. of roll, 1905 | $114,611 27 |
| By deposit | 111,067 05 |
| | $3,544 22 |
| Total deposit for May | $1,490 32 |

OPEN AIR GOSPEL SERVICES.

Mr. Robert Milligan addressed the council, and asked the city's permission to hold gospel services in the Central Park Sunday afternoons. Mr. Milligan represented the christians who worship in the Gospel Hall, cor. Brock and George streets.

This request was granted.

SANITARY MEASURES.

Mr. Eyres, Chairman Board of Health, asked that the sewer provided for to meet the requirements of St. Joseph's Hospital, and citizens contingent to this institution, be completed as early as possible.

The contract for this work has been let, but deplorable delay has arisen in its prosecution.

ENFORCE SEWER CONNECTIONS.

Mr. Eyres also pointed out that the existence of large houses and terraces without sewer connection with trunk sewers available are a menace to the health of this city thus giving access to wells of pollution from cesspools. Now the Board of Health, and Provincial Health Department have now very considerable power in this matter, and the local Board of Health suggested the co-operation of the city with them in this large question, by passing a bylaw to

PROHIBIT USE OF WELLS

in at least the congested portions of the city; and also to enforce sewer connections with trunk sewers where available.

ISOLATION HOSPITAL.

Mr. Eyres also reported that the Board of Health wished to act in concert with the City Council in the matter of establishing an isolation hospital, the plans for which have been prepared by Architect Blackwell and referred to the Medical Association of this city for their consideration and advice.

The above matters were referred to the Committee of the Whole.

ALD. GRAHAM OBJECTS.

Ald Graham objected to clause 2 of the report of the Board of Works' recommending an amendment to the building bylaw. The clause reads as follows.

"That the building bylaw be amended and that this committee be authorized to get such information as shall enable it to draft a comprehensive bylaw, and that provision be made to allow buildings of not more than two stories in height to be erected with 9-inch walls for the second story, and for the extension of the limits."

Ald. Graham could not get it seconder, and the clause was adopted with the report.

NO SIDING UP SIMCOE STREET.

Ald. Hicks submitted the report of the Board of Health, which amongst other business recommended that no action be taken regarding the Peterborough Light and Power Company's request for permission to construct a railway siding on Simcoe street to their gas works.

Ald. Adams objected to the clause and recommended that the request be granted, not perpetually, however. He would advise that they be permitted to lay the siding until such time as the siding may be found an obstruction to the new wharf to be built at the foot of Simcoe street, when they could be asked to remove their siding.

Ald. Hicks pointed out that it would be unfair to construct a prospective sidewalk on the south side of Simcoe street, which action would prove an obstruction to the large farmers' trade done by the Peterborough Cereal Company on that side of the street. And to put a sidewalk on the north side of Simcoe St. after the proposed siding were laid would be impracticable.

Mr. Larmouth said he thought his company would be willing to agree to take up the siding at the end often years if so desired by the city to furnish ready access to the water front. The Peterborough Light and Power Company would bear the whole expense of this siding, and not the C.P.R. Co.

Mr. Larmouth remarked that his company was going to have a siding and asked if it were better to have it coming up across Simcoe street. They could get permission from the Railway Commission to run a siding across the street.

Ald. Hicks,—"Across the street."

Ald. Graham said he understood that the Peterborough Light and Power Company, had now taken some of the city's property and filled it in.

Ald. Adams—"They are welcome to improve the city's property if they choose, that doesn't give them the ownership of it."

Ald Adams failing to get a seconder, this clause with the report was adopted. Consequently the Peterborough Light & Power Company will not be permitted to lay their siding up Simcoe street.

WEAVING CO'S ASSESSMENT

In 1903 the Colonial Weaving Co. secured from the town the promise of a fixed assessment of $4,000, and a bylaw was prepared but never confirmed. Mr. R. H. Kells addressed the council and pointed out that in faith that the town would carry out its agreement, the Colonial Weaving Co. had formed a company, sold stock, complied with the bylaws conditions and employed more hands than demanded by the town. Now that the town has not carried out its agreement with the company, the latter considered they were entitled to a rebate of taxes for one year between the fixed assessment agreed upon—$4,000—and their present assessment $9,500.

To the mayor, Mr. Kells replied that had a fixed assessment of $4,000 not been agreed upon, his company would not have established themselves here.

The council decided that they had no legal power to act in this matter.

UNDERGROUND WIRES.

Ald McWilliams presented the draft of an agreement upon which the city will give the Bell Telephone Company, permission to lay their wires underground. But on the strength of the city solicitor's opinion given below, the matter was referred back to the Manufacturers' Committee;

"You will notice that there is no limit as to the time the company has the right to maintain its conduits embodied in the agreement as I understood that this was not intended by the committee and as I do not know what the effect of the bill at present before Parliament respecting the Bell Company may be, I cannot feel sure that the agreement as drafted will have the effect of protecting the city or reserving the council's rights over the streets. This will depend upon the provisions of the act and there is the danger that it may continue any rights the Bell Company may have under agreement entered into before the act is passed."

ROAD TO LIFT LOCK.

Ald. Adams fathered a bylaw to purchase from the Armour people a right of way to the lift lock at an expenditure of $400.

Ald Elliott remarked that as so much unforseen expenditure has cropped up this year, the council would be premature in buying a right of way to the lock. The $400 purchase of the required land, was but a small end of the needed expenditure, as it would cost some $2,000 or $3,000 to put the road in a safe condition for pedestrians and equestrians. He thought Mr. Cox would give a right of way for two or three years at a reasonable annual fee. Immediately the city assumes proprietorship of this road they would be liable for damages should any accident occur.

Ald. McWilliams thought that as the government had spent so much money on this lift lock, which is the best advertisement the city possesses, we should have for visitors some ready means of access to so marvellous a structure as the lift lock.

The bylaw then passed two readings.

Ald. Hicks, seconded by Ald. Mason, moved in amendment that the third reading be postponed for 61 days—Lost.

The bylaw then had its third reading, and the right of way to this lock will be immediately purchased.

Some reports are left over until tomorrow's issue.

**Moving Pictures in Jackson Park Tonight.**

## Two Tigers Make Their Escape

### Great Excitement at Last Exhibition of Cole Bros. Circus.

During the performance of Cole Bros. shows yesterday at St. Catharines, one of the black tigers escaped, just prior to the afternoon show.

Two of the keepers were severely bitten, and after much difficulty the animal was corralled, and forced in the cage it escaped from. The accident happened, while one of the employes was cleaning the cage. Quite recently one of the black tigers escaped, and was shot before it could be captured. This came by special wire last night to Mr. Harris, press agent of the circus who has been in the city for several days.

REMARKABLE TEST

Hyomei Has Been Known for Years and is Guaranteed to Cure Catarrh

We have given Hyomei a most thorough and remarkable test.

The remedy has made so many cures that we have urged its use in the most chronic cases of catarrh.

Breathed for a few minutes four times a day, through an inhaler that comes with every outfit, it soothes the irritated mucous membrance of the nose, throat, and lungs, kills the catarrhal germs, and restores complete health. Its healing, antiseptic fragrance penetrates to the most remote air passages, as no medicine taken into the stomach can possibly do. Immediate relief almost always follows the use of Hyomei, and great benefit is seen after a few days' treatment.

The complete Hyomei outfit costs only $1, and consists of an inhaler that can be carried in the pocket or purse, and will last a lifetime, a medicine dropper, and a bottle of Hyomei. If this is not sufficient for a complete cure, additional bottles of Hyomei can be obtained for 50 cents.

Compare this small expense with the fees charged by specialists.

If you cannot obtain Hyomei of your dealer, it will be forwarded by mail, postage paid, on receipt of price. Write today for consultation blank that will enable you to services of our medical department without charge. The R. T. Booth Company, Hyomei Building, Ithaca, N. Y.

## POLICE NEWS

Daily Happenings in Court Room and Station.

Yesterday the "Industrial Dead Heads' Club" turned out well at the police court, thus beginning their week of work in due and ancient style. Two young men were charged with having been disorderly in a public place. One denied the soft impeachment and the other admitted it. Mr. C. Munden, proprietor of the Graphaphone store, on Simcoe street, testified to the two men having had a scrap in his shop Saturday night. One caught the other by the throat and backed him over one of his machines. Both prisoners went into the box and, after their evidence was heard, the Magistrate fined the one who had pleaded guilty $2, and discharged the other. It seems that the one pleading guilty had struck the other without any provocation. The Chief asked the one shown to have struck the blow whether he had hit the other fellow, to which he answered "I don't remember." "Were you as drunk as all that?" "I don't know," was his reply.

## Church Records to be Searched

### Mrs. Margery Speakman of Illinois Wants Marriage Certificate.

Peterborough is the scene of a search for marriage certificates and christenings fully adaptable to the most yellow backed novel of recent issue.

A day or two ago, Rev. Canon Davidson, rector of St. John's church, received a letter addressed to the postmaster, in which the writer said she did not know the address of the present incumbent of St. John's, so sent it under cover to him.

The letter is from Chadwick, Carroll Co., Ills., U.S., and dated May 28th. It says, "Sir, I write unto you in hopes that you will to me the favor of looking on the English church books for the record of Kim and Catharine Tighe, his wife, for their marriage and also for the record of the christening of their children, as the record was destroyed by fire. Minister Wade christened John in May of the year the militia was stationed in the town of Peterboro. Minister Taylor christened the rest. It was about the year 1837 or 1838 up to 1854, as we left Canada about that time. I will pay you for the trouble as my father and mother are both dead and I want to get the record of their marriage, if it is there, and of the births of all the children. I hope you will take the pains to do so and the names of the ministers that married and christened them also, and oblige.

Yours resp.,
MRS. MARGERY SPEALMAN.

P.S.—The names of the children are John, Edward, Mary, Ann Jane and Elizabeth (twins), Catharine Eleanor, Kim, Margery, Margaret and Rachel Tighe.

Any one able to throw any light on these christenings and marriages might communicate with Mrs. Speakman at the address given above. Rev. Canon Davidson will at once consult the parish records and reply.

## Fined $50 for Selling Liquor

### Nelson Windover of Cavendish Found Guilty on the Second Charge.

As noted in a former issue of The Times, some days ago, an interesting case was heard by County Magistrate Edmison, in which Nelson Windover, of the township of Cavendish, was tried on two charges of selling liquor to a man going out to the shanties; Mr. G. W. Hatton for the defence, and Mr. Wood, County Crown Attorney acting as prosecutor. At this trial his Worship reserved judgment, and yesterday rendered it. The first offence against the accused was, according to the writ served, committed on May 7th, and the second on May 12th.

His Worship dismissed the first case, but found Windower guilty of the second charge, and imposed a fine of $50 and costs. The lowest penalty under the act.

## Three Circles Seen Round the Sun

Quite an excitement was caused throughout the city yesterday morning by a peculiarity of the atmosphere, causing it to look as though the sun was surrounded by three bright circles, lying apparently at an equal distance from each other. The ring nearest the sun was very bright, the others were not so distinct or so completely formed. A phenomenum of this kind is usually described by the term "sun dog."

Whilst many of our citizens have seen a single "sun dog," the three distinct surrounding circles are very unusual, in fact almost unique. Many citizens considered that the circles portend a severe storm, probably electric in character.

### Lady Has Narrow Escape.

About 2.30 yesterday afternoon a lady walking north, when just in front of W. G. Rundle's cigar store, on George street, got a fright that showed plainly her complexion was given by nature not by aid of the druggist. As she passed Rundle's store a brick from the top of the building fell to the pavement, striking the latter and breaking into a hundred pieces. The falling missile escaped striking her by about 24 inches. Had it hit her there would would have been mourning bought. A horse standing in front of the store was badly frightened.

Feel Right When You Feed Right

You know one always feels very fit when the head and nerves swing along peacefully and with that certain sense of power that is unmistakable.

But when overwork or anxiety breaks down the soft gray matter in the brain and nerve cells (anxiety will do it quicker than overwork) faster than the food you have been using replaces it, then to save yourself from that horror of darkness, nervous prostration, you must change food, and take on some sure rebuilder.

That's the mission of Grape-Nuts, made of selected parts of Wheat and Barley, containing the natural Phosphate of Potash which combines with albumen in the human body and makes the soft gray filling of the brain and nerve centres. In making Grape-Nuts the starchy parts of the field grains are converted into a form of sugar exactly as in the process of digestion in the body. So Grape-Nuts has really passed the first act of digestion and therefore the food is quickly assimilated in the most perfect manner by babe or athlete.

There's a Reason.

GRAPE-NUTS

## Little Vin. Detcher Drowned Last Night

### Sad Accident in Otonabee River Above Inverlea Park---All Efforts at Resuscitation Proved Futile.

Last night when Mr. W. Detcher allowed his little eleven-year-old son Vincent to go out, as small boys will during the summer evenings, to play, he little thought that the lad's next return home would be when cold in death.

About seven o'clock the little fellow whilst playing round the river's edge, about fifty feet north of the first dam above Inverlea Park, got on a log and when playing the usual pranks such as children will, fell in. The current quickly drew him into deep water, when, before aid could arrive, he sank for the last time to the bottom of the treacherous water. Several people who had witnessed his struggles for life did all in their power to locate the body but it was perhaps twenty minutes before Mr. E. Vinnette, by use of a pike pole, located the body.

As soon as Mr. Vinnette got a grip on the body of the boy, willing hands came to his assistance, and, Vinnette, assisted by Mr. Ernest LaFeve, and others, whose names could not be obtained at that hour, managed to bring the body to the surface and put it in the punt they were using. They at once took the body to shore, and the usual methods customary in attempted recuitation of partially drowned people, were adopted. These present worked for over half an hour, but the spark of life had been extinguished.

The boy's father, Mr. W. Detcher, who carries on a grocery business at Water street and Victoria Ave., was quickly summoned. A man named Hamlin, employed in drawing gravel who was washing a dog near where the boy fell in, went to his assistance at once. No arrangements had been made up to time of going to press regarding the funeral. All those in the neighborhood will give their heartfelt sympathies to the bereaved parents.

## Public Defence Incurs a Suit

### Management of Local Opera House Objects to Our Criticisms.

An action for libel has been entered against The Times for damages alleged to have been done plaintiff, presumably based upon our notices, remarks and criticisms of the local opera house.

In this matter we feel confident that the public thoroughly understands that any such notices or criticisms were based solely upon what we consider to be the duty of a newspaper in protecting the interests of said public. In any criticism that may have been made in these columns concerning the local opera house, there is self-evident fact that such matter was in no way biased by any personal resentment or animus against the management individually.

Any paper that will, for private gain, directly or indirectly, suppress or color news that affects the personal or financial interests of the public is failing in its duties to the public. We can only refer our readers to what has appeared in these columns in the way of criticism, and let them judge whether such criticisms were manifestly in their interests or not. We do not doubt what the concensus of opinion will be.

## Moving Pictures in Jackson Park Tonight.

### All Aboard for Europe!

Think of it! The British Isles spread out before you in the form of the three-leafed clover, Scotland representing the top leaf, and England and Ireland corresponding to the lower leaves on either side, seen in the moving picture which fancy draws for those who seek recreation novelties, and with just such a picture in summer beckoning you away to other climes, Scotland is noted for the abundance of historic features which its territory encompasses. Here will be found the venerable and majestic cathedrals around which Scotia's traditions linger, the famous castles of romantic and chivalrous associations, the birthplace of the lovable and nature-knowing bard, Robert Burns, and the poet Sir Walter Scott, the picturesque and beautiful capital of ancient Scotland—Edinburgh—"Europe's Holiday City," together with the Giant's Causeway, the grandest and most sublime work of nature, as a prelude to the pleasures which a trip to Europe by the Anchor Line route embraces, besides being within easy reach of the eloquent Blarney Castle, Dells of Shandon, and unrivalled Lakes of Killarney, the never-falling attractions of Ireland. That such a trip is not the exclusive privilege of the rich but a delightful and practical expedient for persons of moderate incomes is demonstrated by the Anchor Line, which affords the means at the minimum expense. The new twin-screw steamships of that line have at a bound given the line additional prominence which, together with the excellent service and solicitude for the comfort and welfare of all classes of passengers, have made for it a following peculiarly its own. An entertaining book of tours can be had free by addressing the general agents, Henderson Brothers, 17 and 19 Broadway, New York.

**Moving Pictures in Jackson Park Tonight.**

## Moving Pictures at Jackson Park

### The Summer Season Opens With Good Show Tonight.

The management of the local Street Railway Co., are again holding to the reputation they gained last summer for enterprise and good attractions.

Tonight Jackson Park will be officially opened for the season by a splendid lot of moving pictures well displayed.

Efforts were made to have the 57th Regiment Band present. That organization had an engagement, but it will be at the street railway park tomorrow night. The restaurant under charge of Mr. Hooper will be opened in a day or two with a balcony over the platform of the skating rink waiting room and will be fitted up with small tables and chairs.

### Government Grant to Spring Horse Shows.

At the recent session of the Legislature special votes were made in the interest of horse breeding. The Minister has decided that $1,000 of the money voted shall be set aside to assist Spring Stallion Shows. Any society desiring to participate in this grant must apply not later than the 15th of June next. Each application should contain information regarding the show held previous to 1906, as well as the show of 1906. A statement must be made that the prize list has amounted to at least one hundred dollars ($100.00) and that prizes given for stallions have been for pure-bred stallions only, recorded in a reliable record. The application must be signed by the president and secretary of the organization under which the stallion show is held. Detailed rules governing the distribution of the grant will be sent upon application. The grants will be divided immediately after June 15th.

## 57th Regiment to be Inspected

### Lieut. Col. Miller Notifies Regt. Concerning Coming Inspection.

The following orders to the local regiment were issued yesterday;

Headquarters,
Peterborough, June 4, 1906.

Orders by Lieut.-Col. J. W. Miller, Commanding 57th, Regt., D.R.

The annual company and regimental inspection of the 57th Regiment, Peterborough Rangers, will be held at the armories as follows;

Wednesday, June 6th, at 8 p.m.—Companies Nos. 5, 6, 7 and 8.

Thursday, June 7th, at 8 p.m.—Companies Nos. 1, 2, 3, and 4.

Friday June 8th, at an hour to be announced later — Regimental inspection.

By order,
D. WALKER, Capt.,

### Mr. Craig in Auto Accident.

Fred Craig, one of the local newspaper representatives, was knocked down on the corner of George and Charlotte streets, yesterday evening by an unknown automobile.

Mr. Craig was not seriously injured, but was scared for a few minutes. He was able to walk home. The automobile party escaped.

## Damp Spring Weather Ruinous to Health

### Causes Weakness, Headaches and Feeling of Unrest; the Cure is Simple.

That peculiar weakness so common in the spring, is demoralizing to body and mind alike.

Stupid, absent-minded and dull,—You feel the need of a stimulating tonic.

To impart quickness and great vitality to the entire system nothing acts like Ferrozone.

In a short time it makes you feel fit and fine, creates a feeling of youth and strength that's surprising.

Ferrozone revives and braces the sickly because it nourishes and builds up the organs that are weak. As a spring tonic, appetizer and blood-strengthener it is unequaled.

A well known resident of Utopia, Ont., Mr. H. H. Postle, writes: "From long experience I am convinced that everyone requires medicine in the spring. As a rule the blood is thin and impure and the whole system is congested with poisons that should be carried off. I use Ferrozone because it clears up the system, gives you an appetite and makes you sleep well. One winter I had serious palpitation of the heart, nervous headaches, and an extreme tired feeling. Sleep was not restful and by spring I was in bad shape. I took six boxes of Ferrozone and was made the picture of health."

Ferrozone makes permanent cures. Absolutely safe because it is purely vegetable and contains no alcohol. Concentrated cure in tablet form,—that's Ferrozone, 50c. per box or six boxes for $2.50 at all dealers or by mail from N. C. Poison & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

English Office—30 Fleet street, London, E. C.

UNION LABEL

PETERBORO JUNE 6, 1906

### RE-FORMING LIFE INSURANCE LINES.

Our neighbors are already at work reforming the lines of their life insurance business in Illinois and New York the companies are being denied the privilege of owning a controlling interest in any stock company. They are commanded to browse in their own pasture. No longer will they be permitted to pull down the bars to engage in a financial canter, and mayhap a headlong race among rocks, for purposes not connected with the interests of their policyholders. They must let go of the subsidiary company through which much of the Napoleonic devilry has been perpetrated to the scandal of sound finance. As a result of the United States ruling the Independent Order of Foresters, an insurance organization with branches in many of the neighboring States, has cut connection with the Union Trust Company, of Toronto, whose board of directors, by right of stock holdings, it controlled. This United States insurance law has just come into force and it is bound to be far-reaching in its effects. What New York and Illinois have done for the protection of the policyholders will produce like action in other parts of the country. The movement to clear the business of life insurance of the suckers will meet with popular approval in the Republic. It is bound to sweep over the lines, now that a few of our companies have been affected by the recent enactments in New York and Illinois.

### WHAT IS THE DIFFERENCE?

The whole world is shocked by the bestial assault made upon the young King and Queen of Spain in their bridal procession, and the slaughter wrought among attendants and spectators. It would be impossible to exaggerate the infamy of the attack or to condemn too severely the perpetrators.

But from the human point of view, how is the hurling of a bomb at a young royal pair different from the planting of a bomb in the path of an American public officer returning to his home in the evening? How is the bloody slaughter of Spanish grandees and royal guards worse than the dismemberment by dynamite of a group of American workmen in a railway station?

King Alfonso has done no crime but to be born to a throne whose duties he has been trying to fulfill as he understands them. Gen. Steunenberg, of Idaho, has done no crime but to try to do his sworn duty as a public officer in putting down labor union thuggery and rebellion. The courtiers and lookers-on at Madrid were innocent of all offense but the sentiment of duty and loyalty. The workmen at Independence had offended only by working for wages to support those dependent upon them.

The Spanish crime was no worse than the American, though the glitter of royalty and the concentrated attention of the world make it more conspicuous. It is time to understand that civilization and humanity, under whatever form of government, despotism, constitutional monarchy or republic, are exposed to a common peril and have a common interest in extermination of enemies of law and the race. One touch of dynamite makes the whole political world kin.

Anarchy is not abolished by abolishing tyranny, in form as well as in fact Anarchy is political hydrophobia. The remedy for it is that applied by Great Britain, when it destroyed all the tainted dogs in the kingdom and prevented the importation of more.

### FATE OF RUSSIAN GENERALS

General Stoessel, like Kuropatkin, falls under the reactionary wrath, for he is laden down with knowledge of the theft and maladministration, which account in some measure for the failure to hold Port Arthur. He, too, like Kuropatkin, can throw such light on the way affairs were managed by the grand ducal junta that in the hands of the revolutionists he would make Russia impossible for most of the members of the imperial family. On his return from Port Arthur, Stoessel was refused an audience with the Czar; he was not allowed even to communicate in person with the War Minister. He was permitted to know that an imperial commission was examining the whole period of the defence of Port Arthur, and with such facts as had been obtained from Japanese sources, he (Stoessel) need never hope for the Czar's forgiveness. From this a rumor grew among the revolutionary journals that it had been determined to exile the General and bury the disgraceful story of the surrender in oblivion, to save the army the shame of being associated with the "traitor" of Port Arthur. Yet all the time the Czar has in his hands the revelations made, not only by Stoessel, but the heroic Makaroff, who went down with his ship, accusing the naval authorities of treason and scoundrelism. As it would not do to try either Kuropatkin or Stoessel by court-martial, they are to be exiled to their provincial properties, and in the course of time they may be found murdered by unknown hands under such circumstances as will make it impossible to investigate—or even if investigated, to reach any enlightening facts.

The Celebrated English Cocoa.

**EPPS'S**

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**COCOA**

The Most Nutritious and Economical.

NOTICE is hereby given that the rights of the government on the water-powers hereunder mentioned will be put up at auction to be held in the sales room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long lease, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ke rapids on the Quinze river, county of Pontiac, about 12 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot No. 28, 3rd range of the township of Grandison, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manicouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the River aux Outardes, on the north shore of the Saint Lawrence, about 7 1-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Gabelle," on the Saint Maurice river, about 12 miles (in a straight line) from Three Rivers.

7. The Coteau Rapids on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermillion river, about 21 miles above La Tuque, county of Champlain, on the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 4 1-2 miles from the confluence of these rivers and about 20 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Sault," river Rimouski, township of Duquesne, county of Rimouski, 14 miles from Rimouski.

11. The "Rapid Main," river Bonaventure, about 6 miles from the Barachois of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 2 1-2 miles from the village of Saint Felicien and 15 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 63 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Pelletier, county of Lake Saint John.

15. The three falls on river "Sault-au-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power, of these water-powers, the extent of the surrounding land, which the above mentioned concessions comprehend, apply to the Department of Lands and Forests, Quebec.

ADELARD TURGEON,
Minister.

Department of Lands and Forests,
Quebec, 16th May, 1906.

**Half-Sick**

When your nerves are weak, when you are easily tired, when you feel all run down, then is the time you need a good strong tonic—Ayer's Sarsaparilla. Your doctor will tell you why it has such power over weak nerves, why it makes the blood rich, and why it gives courage and strength. Ask him if it is not just the medicine you need.

We have no secrets! We publish the formulas of all our medicines! J. C. Ayer Co., Lowell, Mass.

# STOCKS - THE MARKETS OF THE WORLD - BONDS

*We call the attention of our clients to the fact that*

**BULLFROG RED OAK CO. STOCK**

We call the attention of our clients to the to the fact that

**WESTERN UNION OIL STOCK**

Buy this stock NOW before further radical rise takes place, which we advocated for purchase at 60c., is now $1.10 and with its advance but just begun.

**FAIRVIEW CENTRAL MILLING CO. Stock at 15c. per share**

which we urged our clients to purchase at $1[illegible] per share, is now sold, with a few lots offered under $2.00. Western Union Oil is a conservative investment at this price.

Of the cheaper stocks, we now recommend with at [illegible] payable 1-4 cash, 1-3 in 30 days, and 1-3 in 60 days from date of purchase.

Situated in the heart of a new and phenomenally rich district of Nevada, FAIRVIEW bids fair to rival the very richest of the older Nevada camps.

FAIRVIEW CENTRAL gives promise of uncovering high values, and under the conservative business management of its officers will be one of the GREAT MINES OF A GREAT DISTRICT.

But this stock and hold it for a permanent investment.

# Hearts Courageous

HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

the company with a gesture appealing and pathetic.

"Why, gentlemen," he said—"why I've known him since he was sixteen! I remember in '48 when he was a ruddy faced boy and ran my lines for me! The Whigs have misled him, maybe, but he could not take up arms against—his king!"

There was a little stir in the place, a sort of waiting silence. Then a young man arose in the back part of the room and bowed gracefully. It was M. Armand, and he held a slender stemmed glass, which he filled.

"Messieurs," he said simply, "I am not of your country, nor am I of the allegiance of your king. My country is one far away, and it is one that has learned of war to love a soldier and a brave man."

As he spoke Henry's face lighted with a great flash of surprise and pleasure. He did not see the white and red changing in his companion's cheek, did not note her uneven breath nor the wondrous beauty that came softly courtesying in her eyes.

The voice went on:

"But we of my country know one American so well—we know him because it is against our own arms that he has fought, before Duquesne. Messieurs, I pledge you a brave man, Colonel George Washington!"

Armand lifted his glass gravely as he finished and drank, and a little hushed cheer ran around the room. One could not have told from the speaker's face that he knew he had drunk alone. My Lord Fairfax had no glass, but he rose in his seat and bowed to him.

The toast drunk, Armand set down the glass with a clash on to the table. His face became all at once set and cold, and he stood very straight.

"One thing more, messieurs," he said, "we know in my country. We know the courtesy. Our postilions know what is due to the gentleman of birth. And thus"—he turned sharply upon Foy—"I teach it to you—you dog of the kennel!"

With this he flung the glass full into his face.

So unexpected had been the action that Anne gave a little scream, unnoted in the stir across the sill, and Henry let out a great oath of admiration.

Foy's countenance turned a devil's, and his sword was out before he got up.

Armand bowed to Lord Fairfax and then to Foy. "Monsieur," he asked the latter, "is the affront to your liking?"

"'Sdeath and wounds!" raved Foy in a fury. "We need go no farther than here to settle this! I killed a man at Minden for less."

The old baron got up, with the aid of his negro body servant, breathing heavily. "Sirs," he protested, "let there be no bloodshed, I beg of you!"

"My lord!" Armand's voice was quiet and contained, and it was all he said. Lord Fairfax stopped short, looked at him a moment, swallowed and stood still.

Rolph came lurching forward, his shifty eyes sobered by the outcome. "Gentlemen," he cried, "clear the room and send the servants away. We shall need to confer."

The baron crossed the room at this and held out his hand. "I beg of you," he said, "to honor me by your presence at Greenway Court tomorrow."

"I thank you, my lord," said Armand.

Then the old man, with his head up, erect and leaning on his servant's arm, passed out to his chariot. He knew very well that Foy was reputed to be the best swordsman in the colonies.

"Have you a friend who will serve?" asked Rolph. Armand shook his head.

"Aye," said Henry fiercely, and, swinging his long legs over the sill, he strode into the room. "If you will allow me, sir!"

Anne waited to hear no more, but ran back through the courtyard to the door. Her eyes, blinded by tears, scarce saw the great, gaunt figure till she felt his hand upon her hair.

"You here, my dear, in Winchester?" he said gayly. "You must ride to Greenway Court. We shall be blithe for you! I have just invited a guest for tomorrow."

Looking up as she held his hand, Anne saw two drops—little shining miniatures of his big heart—roll down his cheeks.

"The quarrel in the parlor. I was in the courtyard by the window. I know what you would do."

He looked at her uncertainly, his eyes dark and bright.

"'Twas a craven thing," she went on, "a dastardly sneer at a brave, true hearted gentleman. My Lord Fairfax is old, and the cowards, the pitiful cowards who knew him and have eaten at his table, they sat and heard and tittered behind their hands. But you must not fight! You must not!"

"And why not?" he asked. "An old man, a noble baited by a swine! Should not such be resented by gentlemen? And shall I, who have struck that scoundrel, refuse to meet him?"

"He has killed before!" she cried. "He has the quickest rapier in Virginia. It would be murder."

"Mademoiselle, I ask you—would you have me fear?"

"'Tis no question of courage," she went on hurriedly. "Must not I, who saw it, know that? Only you of them all dared to resent it. Monsieur, you are brave."

"Mademoiselle!"

"But it was in my lord's cause, and I ask it for his sake. If if you fall, he

**Deafness Cannot be Cured**

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

**SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS**

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces (excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

**SYNOPSIS OF CANADIAN NORTHWEST MINING REGULATIONS.**

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet.

The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of a royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

**Diamonds and Diamond Mining**

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 4½ mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

**THOS. PATTERSON & CO., Fiscal Agts.**
161 SIMCOE STREET, PETERBOROUGH

**100 PER CENT. ADVANCE JUNE 1**

**Present Price of Stock FIVE Cents per Share**

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**

## Do You Seek Health?

**Consult Dr. Hamilton And You Will Be Shown the Way.**

Thousands are in the same boat — all sickly, bilious and feeling far from well.

Trouble is, the system is clogged with impurities which need to be cleared away.

Before downright sickness arrives you should cleanse and purify the system with Dr. Hamilton's Pills.

At once you'll feel their mighty influence building up weak spots, clearing out disease, and putting you again on your feet.

These purely vegetable pills change your tired, worn-out condition to one of health and vigor, because they supply the body with nourishing blood that builds up and enlivens the entire system.

Mr. John Whitley, of Stanwood, P. O., Ont., knows the merit of Dr. Hamilton's Pills, and says: "I wouldn't be alive today had it not been for Dr. Hamilton's Pills. Last winter I was sick with grippe, and when spring came I was weak, bilious and rheumatic. I used enough medicine to cure twenty times, but I didn't get any help till I tried Dr. Hamilton's Pills. They purified my blood, took the yellow color out of my face, put new tone in my stomach, and increased my appetite. The bilious attacks and rheumatic pains gradually departed, and Dr. Hamilton's Pills made a new man of me. I proved their merit, and proclaim them a medicine for all men."

If better health and prompt recovery are important, get Dr. Hamilton's Pills of Mandrake and Butternut today. At all dealers, 25c per box or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

**Affecting 57th Regiment.**

The Canadian Gazette of June 2, under Canadian militia news, says:—"57th Regiment, Peterborough Rangers.—Lieutenant J. Hamilton is permitted to resign his commission, 25th April, 1906. To be provisional lieutenant, Frank Neal, gentleman, 25th April, 1906.

**Dog Poisoners Still at Work.**

Still the cowardly dog poisoner keeps busy and gloats over the losses of his fellow citizens. Another valuable dog, a collie belonging to Mr. G. Meharry, Victoria avenue, and also a collie belonging to Mr. R. Tomlin of Stewart street, have fallen victims to the poisoner's craft. The latter dog fortunately was taken in hand in time and will recover.

Lax-ets—A Candy Bowel Laxative.
If you have Constipation,
If you have a coated tongue,
If you are dizzy, bilious, sallow,
If you have Headaches, Sour Stomach, etc., risk 5 cents on Lax-ets See for yourself. J. D. Tully.

**Local Knights for New Haven.**

Mr. D. O'Connell, of Peterborough, and Mr. A. J. Gough, of Toronto, left yesterday for New Haven, Conn., to attend the national convention of the Knights of Columbus, which is expected to be the largest and most representative on record. The local organization is a very strong one, and in sending Mr. O'Connell, a good local representative was chosen.

**Lift Lock Opens June 7th.**

The Peterborough lift lock will be opened for the season on Thursday, June 7th, same as last year. This will make things hum and should enable our citizens to get relief soon from the exorbitant prices charged for fuel by bringing cordwood from Kawartha Lakes, where hundreds of cords are awaiting shipment by the canal.

Pink Lips Like Velvet. Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most highly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

**Mr. M. Neil Erecting a Residence.**

Mr. James Graham was yesterday busy in the east ward over the contract recently awarded him, for erecting a fine new residence for Mr. Harry Neil, the popular manager of the Calcutt Brewing and Malting Co. The new house will be on the west side of Rogers street, a little south of the brewery.

—Miss Ethel Turner, of New York, is home for ten days, the guest of her mother. Mrs. Tennant, of New York, accompanied Miss Turner as her guest.

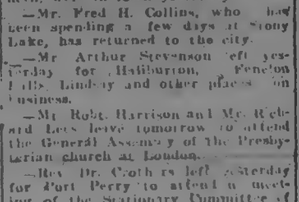
### COMMISSARY CARS

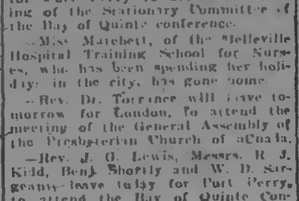
**On Homeseekers Excursion, via Canadian Pacific Railway, June 5th.**

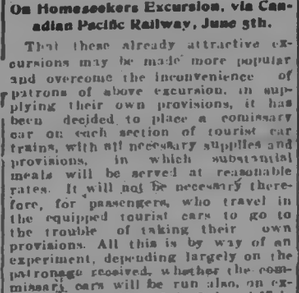
That these already attractive excursions may be made more popular and overcome the inconvenience of patrons of above excursion, in supplying their own provisions, it has been decided to place a comissary car on each section of tourist car trains, with all necessary supplies and provisions, in which substantial meals will be served at reasonable rates. It will not be necessary therefore, for passengers, who travel in the equipped tourist cars to go to the trouble of taking their own provisions. All this is by way of an experiment, depending largely on the patronage received, whether the commissary cars will be run also, on excursions June 19th, July 3rd and 17th.

**Useful Glassware on Bargain.**

See our new line of fancy and useful articles in green, ruby and crystal glass. The lot consists of sugar and creams, water jugs, pickle barrels, biscuit jars, marmade holders, catsups bottles, celery stands, salt dishes, vases and flower stands. A number of these articles are now on bargain at only 25 cents each. Don't fail to see these goods on exhibition in south window. Times Bookstore, Market Block, Peterborough.







COMING
in all its entirety, and now GRANDER and BETTER than ever before. The only big show that will visit Peterboro this year.

AT
PETERBORO
FRIDAY, JUNE 8

## READ AND YOU WILL LEARN

That the leading medical writers and teachers of all the several schools of practice endorse and recommend, in the strongest terms possible, each and every ingredient entering into the composition of Dr. Pierce's Golden Medical Discovery for the cure of weak stomach, dyspepsia, catarrh of stomach, "liver complaint," torpid liver, or biliousness, chronic bowel affections, and all catarrhal diseases of whatever region, name or nature. It is also a specific remedy for all such chronic or long standing cases of catarrhal affections and their resultants, as bronchial, throat and lung diseases (except consumption) accompanied with severe coughs. It is not so good for acute colds and coughs, but for lingering, or chronic cases it is especially efficacious in producing perfect cures. It contains Black Cherry bark, Golden Seal root, Bloodroot, Stone root, Mandrake root and Queen's root—all of which are highly praised as remedies for all the above mentioned affections by such eminent medical writers and teachers as Prof. Bartholow, of Jefferson Med. College; Prof. Hare, of the Univ. of Pa.; Prof. Finley Ellingwood, M. D., of Bennett Med. College, Chicago; Prof. John King, M. D., late of Cincinnati; Prof. John M. Scudder, M. D., late of Cincinnati; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago, and scores of others equally eminent in their several schools of practice.

The "Golden Medical Discovery" is the only medicine put up for sale through druggists for like purposes, that has any such *professional* endorsement—worth more than any number of ordinary testimonials. Open publicity of its formula on the bottle wrapper is the best possible guaranty of its merits. A glance at this published formula will show that "Golden Medical Discovery" contains no poisonous or harmful agents and no alcohol—chemically pure, triple-refined glycerine being used instead. Glycerine is entirely unobjectionable and besides is a most useful ingredient in the cure of all stomach as well as bronchial, throat and lung affections. There is the highest medical authority for its use in all such cases. The "Discovery" is a concentrated glyceric extract of native, medicinal roots and is safe and reliable.

A booklet of extracts from eminent, medical authorities, endorsing its ingredients mailed *free* on request. Address Dr. R. V. Pierce, Buffalo, N. Y.

## *Nicholl's Oval to be Kept Green*

**Owing to Smith St. Bridge Repairs Water will be Furnished.**

Mr. Richard Hall says that the grounds of East Nicholls Oval would be watered this season. Reports to the contrary arose through the fact that the water had not been supplied there because the pipe goes across the Smith street bridge and he was under the impression all along that the bridge was to be taken down and a new one to be erected in its place, which would interfere with the pipes.

However since the bridge is to be repaired Mr. Hall will endeavor to have the sprinkling arrangements carried out.

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Shoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

**Instructor for Local Battery.**

Corporal Instructor Fee of the R. C. H. Artillery, Kingston, is in the city to instruct the 24th Field Battery before proceeding to Cobourg. There was a drill last night in the east ward drill hall under command of Major Young. Everything points to our new artillery corps making a good showing at the Cobourg camp, and well sustaining the reputation of our city and of Major Young, commanding officer.

DRAW ATTENTION TO THE "NEW THEORY"

**Over 75% Winners**

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $10,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interests of the most remarkable, complete and simple racing system in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your most conservative by showing you its full earning capacity, which was the secret secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continued, and successfully. There are no "ifs" and "ands" and we stake our reputation on same.

## What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a little over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

## What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or choices. We often win on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

**NOTE—**

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

**RESULT—**

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

## ABSOLUTELY INFALLIBLE

It earned $50,000 for the originator last season in four months, $63,000 two years ago, and $57,500 three years ago, during the same period.

## It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 160 per cent. per month

This is not a Million Dollar capital system. It can be operated by you with

## A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Noting of the kind has ever been presented heretofore, and in playing the New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

**NOTICE:**

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)
Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

**GUARANTEE—**

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours 9 a.m. to 9 p.m. Sunday by previous appointment.

## British Bowlers' Tour in Canada

### Official Announcement Covers All the Games---Will Play in Peterborough on Wednesday August 1st.

Toronto, June 8.—The program of the British bowlers' visit to Canada has been completed, and is officially announced as follows:—

Arrive in Quebec in the afternoon of Friday, July 27th. Sail on Quebec over night and leave there at 8.30 on the morning of Saturday, July 28th.

Arrive in Montreal at 2.50 in the afternoon of the same day.

Spend Saturday, Sunday and Monday in Montreal, playing with the Westmount and Villefield Bowling Clubs.

Leave Montreal at 8.45 on Tuesday morning July 31st, arriving in Ottawa at 11.45 a.m. on the same day.

In Ottawa sightseeing until 11.00 p.m., when they leave by sleeping cars for Peterborough.

Arrive in Peterborough on the morning of Wednesday, August 1st, playing Peterborough and Port Hope clubs. Stay over night in Peterborough, and leave there for Toronto at 9.00 a.m. on Thursday, August 2nd, Arriving in Toronto on the same morning at 10.25.

Stay in Toronto until the morning of the 9th August, when they take the boat for Niagara Falls. Arrive there at 12.30 in the afternoon. The rest of the day will be spent sightseeing.

Leave Niagara Falls next morning at 9.20 and arrive in St. Catharines at 9.42 the same morning, playing the St. Catharines and Niagara Bowling clubs. Stay in St. Catharines over night and leave next morning at 9.42 for Hamilton, arriving there the same morning at 10.20.

Stay in Hamilton until Tuesday morning, August 14, playing Hamilton Thistle, Hamilton Beach, Dundas and Grimsby clubs, and some outside clubs. Leave Hamilton at 8.00 a.m., arriving in Brantford at 9.05 the same morning, and in the afternoon play Brantford and Paris clubs.

Stay in Brantford over night, and leave next morning, August 15, at 9.05, arriving in Guelph at 10.35 a.m., where they will play Guelph and two rinks from Brampton.

Leave Guelph on the morning of the 16th at 8.55, and arrive in Berlin the same morning at 9.19, playing Berlin, Waterloo, Galt and Harriston.

Stay in Berlin over night, and leave there next morning, Aug. 17, at 9.00 and reach Stratford the same morning at 10.00.

At this point it is proposed to split up the rinks, five rinks remaining at Stratford, and play Stratford and Owen Sound; three going on to Mitchell by the 12.01 train, reaching there at 12.20, and leaving again at 5 in the afternoon, returning to Stratford to take part in the evening entertainment.

Leave Stratford on the morning of the 18th at 9.00 for Goderich, where four rinks play Goderich and Kincardine. At Clinton, which is a station between Stratford and Goderich, four rinks stay over to play Clinton, Seaforth and Wingham, leaving Clinton at 6.40 p.m., and going up to Goderich, where they will join the rest of the party and spend sunday at Goderich.

Leave Goderich at 7.15 a.m., on Monday, 20th, arriving in London at 9.45 the same morning, spending Monday and Tuesday in London, playing three London clubs on Monday, and playing Aylmer, St. Thomas, Strathroy, Petrolia and St. Mary's on Tuesday, leaving there on Wednesday morning, August 22nd, at 7.15, arriving in Ridgetown the same day at 9.07 a.m., playing Ridgetown, Chatham, Thamesville, Bothwell and Blenheim.

Leave Ridgetown at 4.45 a.m., arriving at Chatham at 6.45 in the afternoon, and play Chatham, Leamington, Dresden, Ridgetown and Ooplegton.

Stay in Chatham for the 23rd and leave for Walkerville on the 24th by boat, at which place they will be the guests of Messrs Hiram Walker & Sons until the morning of the 27th when they leave for Woodstock by special train, arriving there at 12 noon, playing Woodstock, Brussels, Listowel, Mount Forest and Fiesenburg, and leaving in the afternoon at 6.20 for Toronto, where they will arrive at 9.15.

Tuesday the 28th will be spent at the Toronto Exhibition, leaving on the morning of the 29th at 9.00 for Kingston.

Leave Kingston at 6.00 a.m. by boat on the 30th for Montreal, running the rapids, and arriving in Montreal the same night at 6.00.

Leave Montreal the next morning, Aug. 31st, for Quebec, where they arrive at 2.55, and the remainder of that day and up to 3 p.m. sightseeing, boarding the boat September the 1st for home.

## THE MEAT SCANDALS

### British Goverment Contracts for Canned Meats Must Be With Colonies.

London, June 7.—It is stated that the Admiralty and War Office in their contracts have stipulated in all of them that the canned meats supplied must be from British colonies, none of it to come from the United States.

The managers of two of the largest West-end department stores say that the trade in canned goods has been falling off for years, and that the present exposure will probably kill it so far as they are concerned. The slump gradually increased after Upton Sinclair's novel, "The Jungle," was first noticed here, and it has extended to all canned goods, including meat, fish and fruit, whether they are American or not. The revulsion against food of this sort is shared by the humblest classes, among whom however, it must be admitted, there has always been prejudice against canned foods. The inmates of some of the workhouses are eagerly availing themselves of a plausible opportunity, and are openly protesting against being fed on canned corned beef, which is largely served in such institutions. The guardians of some of the workhouses, fearing trouble, have decided a cease using the objectionable food, while others will use less of it. The grumblings of the army and navy have been growing since the revelations began, and threaten to become troublesome.

CHEAPEST NOT THE BEST.

An Australian meat trader here said the Government had been obtaining American rather than colonial tinned meats because they were cheaper. The colonial representatives are taking advantage of the scandals to boom their meats.

## American Packers Coming to Canada

### Big Canadian Packing Plant Acquired By Americans.

Winnipeg, June 7.—The pork and beef packing business of J. C. Griffin & Company, one of the foremost industries of the West, has been absorbed by a big American corporation. The names of the new stockholders are not announced.

NO DOMINION REGULATIONS.

Ottawa, June 7.—There are no Federal regulations for the inspection of packing-houses.

PACKERS ARE OPPOSED.

Toronto, June 7.—Should the canned products of Canadian packing establishments be subject to Government inspection? is a question that has suggested itself since the accounts of the frauds that some United States firms have perpetrated have been made public.

"I do not see what use any inspector would be to us," said one of the best known men in the business here. "If the Government think it necessary and are willing to pay a man, we have no objection. But if we have to pay him, by fees or otherwise, I would decidedly object."

The representative of another large Toronto firm held a similar view.

"I would be of absolutely no advantage to us to have such inspection," said he. "Our goods are all labelled with our own name, and there is no greater stimulus for the use of the best material than the desire to build up our reputation and trade."

Both gentlemen declared emphatically that the stories about diseased hogs and other conditions mentioned in the United States papers do not apply here at all.

The cattle are inspected before being killed, and the hogs are inspected in the market, while the packers are not allowed to use veal under a certain weight.

## Recovers Power of Speech After 21 Years

Chicago, June 7.—After twenty-one years of silence, during which time he was unable to utter an intelligible sound Louis Mendelson suddenly recovered his power of speech yesterday. The return of words was as mysterious as the affliction which silenced him so long. Mendelson is 38 years old, and until yesterday had not spoken since he was 17 years old. To the surprise of his three brothers and his friends he walked into their wholesale liquor store and said, "Hello, is this hot enough for you?"

Samuel Mendelson, one of his brothers, was also shocked by the unexpected remark that he failed to answer the question. He called his two other brothers, Jules and Aaron, and to the great surprise of all three the man who had been dumb since boyhood repeated his question. The mystery perplexed all three. Louis told his brothers that he had felt a sudden tickling in his vocal cords and the impulse to attempt speech had grown so strong that he could not resist it. When he tried, he discovered that his voice resounded.

Mendelson lost his voice after an attack of fever when he was in his seventeenth year.

## ALF JURY SWORN

### Even After He Had Taken the Oath Liberals Doubted His Evidence.

Ottawa, June 7. — When Mr. Jury's examination was taken up yesterday morning in the Public Accounts Committee, an odd situation arose. Mr. Jury desired to affirm, stating that as he did not believe in rewards or punishments after death, he did not wish to take an oath. Mr. Geoffrion, however, insisted on his being sworn, and Mr. Jury accordingly kissed the Bible.

Mr. Belcourt then observed that Mr. Jury after his statement was not a competent witness, and Mr. Geoffrion followed this up by a declaration that no judge in the land would take Mr. Jury's evidence.

Mr. Chisholm, Antigonish, declared that if he gave wrong evidence he could be prosecuted for perjury whether he affirmed or swore, and Mr. Jury capped this by stating that the late Chief Justice Mr. C. Cameron had taken his evidence after he had made a similar statement.

"I doubt that," said Mr. Geoffrion.

Mr. Jury's evidence was confined to a recital of the facts connected with his procuring the Preston-Ennis letters.

## Over Three Thousand Boxes Cheese Sold

### Prevailing Price Was 10 5-8 Cents, a Few Factories Brought to 11-16 Cents.

The number of cheese sold on the local board on Wednesday was 3,241 boxes, a big increase over the number sold on the opening day.

The buyers prominent were Messrs. Kerr, Gillespie, Cook, Whitton, Brenton, Wrighton and Martin. Mr. Kerr opened the bidding at 10c, and the offers were:—Whitton, 10 1-8c; Wrighton, 10 1-4c; Whitton, 10 3-8c; Gillespie, 10 7-16c; Whitton, 10 1-2c; Wrighton, 10 9-16c; and Gillespie, 10 5-8c. This ended the bidding and at that figure Mr. Gillespie called Keene, Central South, Villiers, Westwood, Fleetwood, Buckhorn, all accepting. At the same price, Mr. Kerr called Warsaw, Warminster, Maple Leaf, Pine Grove, Young's Point, Selwyn, Trewern, Indian River, Lang, Shearer, all accepting.

Mr. Whitton also offered 10 5-8c; and called Ormonde, Melrose Abbey, Lakefield, Myrtle, all accepting. Mr. Gillespie again called 5-8c. but Mr. Brenton raised to 10 11-16c, and called Oakdale, Cedardale, Brickley, Shamrock, Peterborough, North Dummer, Mr. Cook bid 10 5-8c and calle Cavanville, Crown, Beaufort, Mount Pleasant, Hope. Mr. Kerr took East Emily at 10 5-8c.

This cleared the Board. The following factories boarded cheese, with the numbers given:

| | |
|---|---|
| Keene | 130 |
| Warminster | 120 |
| Shearer | 85 |
| Central South | 122 |
| Selwyn | 110 |
| Villiers | 85 |
| Warsaw | 120 |
| Westwood | 100 |
| Oakdale | 125 |
| Melrose Abbey | 100 |
| Lakefield | 70 |
| Pine Grove | 100 |
| Peterborough | 75 |
| Maple Leaf | 75 |
| Myrtle | 130 |
| Ormonde | 138 |
| Young's Point | 160 |
| Lang | 100 |
| Indian River | 90 |
| North Dummer | 65 |
| East Emily | 75 |
| Trewern | 140 |
| Benfort | 130 |
| Cedardale | 65 |
| Cavanville | 175 |
| Crown | 80 |
| Mount Pleasant | 83 |
| Fleetwood | 156 |
| Buckhorn | 100 |
| Hope | 30 |
| Brickley | 75 |
| Shamrock | 80 |

## Miss Flannery Now Mrs. Roberts

### Local Young Lady Becomes Bride of Welsh Gentleman.

A Pretty wedding was celebrated Wednesday evening at the residence of Mrs. Mary Flannery, 210 Auburn street, when her daughter, Miss Annie Maud, was married by Rev. J. G. Potter, to Mr. Fred Roberts, late of Wales. The ceremony was witnessed by about 40 guests, the friends of the bride, the wedding march was played by Mr. Armstrong, organist of St. Luke's church. The bride was becomingly attired in a cream costume of Bedford cord, trimmed with lace. She was attended by Miss Laura Manley, who was also dressed in cream with lace trimmings. The groom was assisted by Mr. Wesley Flannery, brother of the bride. The gift of the groom to the bride was a beautiful gold watch and chain. Mr. and Mrs. Roberts left on the midnight train for Ottawa, where they will spend a week with friends. The bride's going-away dress was of green silk, with hat to match. On their return to Peterborough, they will reside at 210 Auburn street.

## Mr. Jas. Bogue Gives His Views

### Local Contractor Claims He Has Been Unfairly Used.

Yesterday a Times' representative held a personal interview with Mr. Jas. Bogue, the local contractor who built the outfall sewer in the east ward, who who will leave this morning for a two months' vacation at a summer resort. This, if true, will possibly lead to serious complications, as Mr Bogue holds, it seems, the key to the situation of the east ward sewers. Mr. Bogue says that the city engineer is unfairly and unjustly holding him up, as regards payments for work actually completed, and that he will not do all work until he is paid what his contract calls for. If Mr. Bogue does stay away as rumored, for a long time, it looks as though the city will be in a complex situation regarding the sewer system in the east ward. It is now up to the city authorities, to see whether Mr. Bogue's contention that he should get his money is correct or not. Mr Bogue yesterday told The Times representative that the city engineer in charge at the time he (Bogue) took the contract for the outfall sewer, was Mr. W. Chipman, of Toronto.

Mr. Bogue stated yesterday that the city for reasons of its own, dispensed with the services of Mr. Chipman. Now Mr. Bogue says that after doing his work under the present city engineer, the city wants him (Mr. Bogue) to accept Mr. Chipman's decision before paying him for his work.

Mr Bogue claims that Mr. Chipman does not know anything about the work he has done. He says that the work had been contracted for under a former engineer's regime, and that the present city engineer seeks to place the responsibility upon Chipman, although the present engineer had supervised the work.

Mr. Bogue further added that the city council made the change from Chipman to the present engineer without his (Bogue's) consent, whilst his contract with the city was in force.

This was as far as our representatives interview with Mr. Bogue went. Except (perhaps he might be noted that, judging by Mr. Bogue's side of the question, he has been and is still a most unfairly used man, who has spent many more dollars on city work than the city has paid him.

## South African Veteran Here

As noted in a former issue of The Times Sergeant Fee of the Royal Canadian Horse Artillery of Kingston, is here acting as instructor for the 24th Field Battery. This soldier whilst only a young man, wears the South African service ribbon. He saw service in South Africa for nine months during the campaign against the Boers, and was in that country when peace was declared. Instructor Fee was attached to the corps known as the Canadian scouts, which were under command of "Gatling Gun" Howard previous to his death.

## An Epidemic Killing Colts

### Unknown Disease Destroying Young Horses in This County.

There seems to be an epidemic, that puzzles local "wiseacres" among young colts in this county, and many of the farmers have already suffered loss in this respect, and are anxious to ascertain the cause. In the township of Otonabee, and especially in the Stewart settlement, young colts two and three weeks old are dying in large numbers. Up to date, 14 within a radius of a few miles have died. Further east, and also in the neighborhood of Warsaw, the trouble is in evidence.

A prominent farmer of Otonabee, told The Times that if the epidemic continues, the price of horses in this county will probably advance during the coming year.

A Times' representative yesterday called upon Dr. Poole, V.S., to ascertain his views upon this seeming epidemic.

The doctor who takes all the latest medical and veterinary works extant said that this trouble is due to germs or bacteria, in the umbellical opening. It generally affects the joints of the young animal, frequently terminating in death.

It might be noted that Dr. Poole has had several cases of this trouble in pursuance of his profession, lately, with which he has had great success. He assured The Times man that 90 per cent. of these colts affected, if treated in time, are amenable to proper treatment.

## Czar in Fear For His Life

St. Petersburg, June 7.—Several strong searchlights have been mounted on the fortifications of Kronstadt to command the palace at Peterhoff, and a guardship has been stationed just off shore. These precautions indicate the extent of the anxiety for the safety of the Imperial family.

Revolutionary agitation among the sailors at Kronstadt is reported to be rampant, and the fear is expressed that they may secure and train some of the guns on the Emperor's palace across the bay.

From Odessa, Kharkoff, Elizavetgrad, Yekaterinoslav, Kischeneff and a few other southern centers strongly worded protests have been forwarded through the respective members of Parliament against the gubernatorially licensed activity of the Black Hundreds. The latter are openly and strenuously striving to precipitate political disturbances, obviously pursuant to reactionary bureaucratic instigation, and the public are becoming nervously apprehensive.

### Local Students Gain Honors.

Miss Isabel Edwards has completed her third year in arts, taking honors in Moderns. Miss Pearl Faint, of Victoria College, also obtained honors in the same course.

Misses Zetta Harper and May Roberts of Varsity, have completed their first year with honors in Moderns and science respectively.

Miss Maude McCrae, of Brantford, a graduate of the Peterborough Collegiate, in attendance at Victoria College, was also successful, obtaining honors in her course.

Berlin, June 8.—Emperor William has opened the Teltow canal. This is another waterway connecting the manufacturing suburbs of Berlin with the sea, via the Havel and Elbe canal.

## Won't be Sidetracked By G. T. P. Branch

### Company Was Refused Permission to Run Through Sudbury to Scotia Junction--Must Go Right on to Orillia.

Ottawa, June 8.—The determined opposition to the bill for the incorporation of the Grand Trunk Pacific branch lines railway was kept up yesterday before the Railway committee of the House of Commons. The fourth section of clause 2 authorizes the construction of a branch from the G.T.P. main line south through Sudbury to a junction with the Grand Trunk present system, either at Orillia or at Scotia Junction. This line is proposed instead of the branch that the G.T.P. already has power to construct from their main line to North Bay.

Counsel for the company declared that surveys had already been made of the route northerly from North Bay. These showed that a line through that district was rather impracticable. An easier and more direct line could be built through Sudbury. The company felt this would give an even better connection with the Grand Trunk System in Ontario.

Claude Macdonell of Toronto, took the ground that if the company effected its junction with the present G.T.R. line at Scotia Junction, it would leave Toronto and all Western Ontario in the cold.

Mr. Schell of Glengarry moved that mention of Scotia Junction be stricken out of the clause, so that the new company would be bound to build to Orillia.

This motion was accepted, and the sub-clause in its amended form accepted.

WINNIPEG BELT LINE.

Sub-clauses of the bill passed without question; empowering the G.T.P. Branch Lines Co. to build a belt line around Winnipeg; a line from Winnipeg south to the U.S. border within 25 miles on either side of the Red River; and a line 20 miles long to connect Neepawa with the G.T.P. main line.

The next sub-clause asked for authority to build from the G.T.P. main line to Brandon, and thence through Regina to Calgary, and also a line from Brandon to the U.S. boundary near Turtle Mountain. In deference to a protest from the C.P.R. the company abandoned its request for power to build from Regina to Calgary. The C.P.R. objected to the paralleling of their main line all the way across the prairie.

COULD EASILY STAND IT.

In the discussion that ensued, Mr. Turriff, member for East Assiniboia, declared that this prairie country would support lines at 15 or 20 miles distance from one another.

Mr. Pringle again presented the motion he had introduced two days ago making the construction of any branches the G.T.P. may build in the Prairie Provinces subject to approval by the Governor-in-Council, and that as far as practicable these branches shall not be constructed at less than 30 miles distance from any line that has already been either built or located.

Hon. Mr. Oliver protested most earnestly against this proposition. He held that Parliament would not be warranted in even inserting such a provision in the General Railway Act, much less were they warranted in saddling such a condition on one road. The whole purpose of the Grand Trunk Pacific was to give competition.

Mr. Pringle was willing to strike Manitoba out of the amendment. He offered also to insert 20 miles, instead of 30 miles, but the changes did not save the proposition which was voted down by 53 to 33. The only western member voting for Pringle's amendment was Dr. Schaffner of Souris.

## Good Results of Inspection

### Col. Young, of Kingston is Highly Pleased With 57th Regt.

Col. Young of Kingston, who inspected companies E, F, G, and H, of the 57th Regiment on Wednesday evening, and put them through squad, company, manual and firing drill, and had them perform the different movements, yesterday noted that the local boys in red did high class work.

The companies inspected were, with their respective strengths;

E Company—43.
F Company—34.
G Company—35.
H. Company—32.
Total officers—11.

E Company was in charge of Captain Bennett, F Company, Capt. McLean; G Company, Capt. McWilliams H Company, Capt. Clarke.

Last night companies A, B, C, and D, were inspected with similar gratifying results.

## Good Work By L. Aux. of Y.M.C.A.

The Ladies' Auxiliary of the Y.M.C.A. have had the parlor refitted and new curtains have been placed on the windows, the prevailing color being green, making the whole effect very pretty. The cosy corner has been reupholstered in a shade to match the walls.

The secretary's office has been supplied with a handsome new rug and curtains.

The refurnishing efforts have been directed by Mrs. E. F. Mason, president of the auxiliary and Mrs. John Nugent, assisted by other members of the society.

### Large Crowd at Jackson Park.

Last night the real rush at Jackson Park opened up the season, several hundred citizens being present. Eighteen members of the 57th Regt. Band rendered some fine selections. Mr. Larmouth will, by his up-to-date and intelligent management of the Street Car Co's attractions at this popular park assuredly impel thousands of our citizens, to take this trip nightly.

### A Handsome Delivery Wagon.

Mr. J. S. Fanning, the enterprising proprietor of Fanning's laundry, has recently put in service one of the handsomest delivery wagons in the city. Mr. Fanning's new wagon, constructed by Mr. Ben Yelland, is light, strong and strictly adapted to the laundry delivery business. The wheels and shafts are painted a bright canary yellow touched up artistically in brown.

To the driver's seat on each side of the top cover, are oval plate glass windows, a similar window being inserted in the back. The interior of the top is divided into two parts by a thin hardwood shelf for convenience of handling the parcels. Two plate glass lamps are provided for night use. The painting of the whole rig artistically done making a most attractive vehicle.

## ANOTHER WAR NOW LOOMS UP

### Japan and Russia Having a Strenuous Time

### CZAR MUST BACK DOWN

### Or Japan Will Enforce Demands at Any Cost.

London, June 7.—The conflict between Russia and Japan in the far east, which, it is generally conceded, is inevitable, may come very much sooner than anticipated unless a serious disagreement between the two countries is not speedily adjusted.

Japan is demanding from the Russo-Chinese Bank the large amount of cash belonging to Russia and said to have been in the possession of the bank at the time Port Arthur was surrendered.

Immediately before the Japanese troops entered the fortress the Russian officials succeeded in smuggling the money out of the city hidden. It is supposed, among the Red Cross supplies which they were allowed to take away, lest the wounded in Manchuria should suffer, but from the books of the banks which fell into their hands, the Japanese learned the exact amount which, it is said, was many millions of roubles.

The Japanese Government now holds that the Russo-Chinese Bank, being a government institution, the money, according to the act of capitulation, should have been turned over to the victorious Gen. Nogi. A demand for the delivery of the money has been made by the Japanese ambassador at St. Petersburg, who has also told the Czar that unless it is forthcoming the Mikado will seize the valuable holdings of the bank at Port Arthur and Dalny.

As might be expected, the money has never reached St. Petersburg. It has, in fact, never even been heard of in that city. Possibly Gen. Stoessel knows something about it or it may have found its way into the capacious pocket of some grand duke.

This matters little to the Mikado, who does not care where it comes from if he gets a similar amount. An investigation has been ordered, but investigations are not effective in Russia, and probabilities are that the Czar will pay it out of his own pocket, having had and still having all the war he wants.

### Moroccan Pretender Active.

Tangier, June 8.—Fighting between the forces of the Sultan and the Pretender has been renewed. The Pretender has driven back the Sultan's troops, inflicting considerable losses and also has devastated the territory of the loyal Riff tribe.

## REBUILD YOUR TIRED, ACHING BODY

Winter has left you in a state of fatigue and weariness.

The vitality of your blood is gone. Your nerves are wretchedly weak and you find it hard to sleep.

The temptation to "brace up" with an alcoholic mixture is great,—but it's uselessness is plain to everyone.

Better follow Nature's plan; it's always a sure one.

First create new appetite.

Improve your digestion.

Perfect the process of assimilation.

This will ensure a supply of rich, nourishing blood.

Healthy blood soon makes a healthy body, and a system fed by pure, rich blood is bound to gain in energy and strength.

To get well and stay well, use the food tonic "Ferrozone" which is composed of concentrated vegetable extracts that supply nutrition that every sickly person needs.

No matter how long you've been in poor health, Ferrozone will win you back. Like it did Mrs. Sadie E. Hislop, of Whitby, Ont., who writes: "Ferrozone not only brings health to the sick, but has power to cure quickly. After being confined to bed with sickness, I seemed unable to make any headway on the road to complete health. My vitality was low and I was in great need of strength. My nerve force was gone, and from headaches and poor sleep I was in bad straits. Ferrozone was just what I needed. It increased my strength, gave me a new feeling entirely. I used about eight boxes and was made perfectly well. My doctor thinks Ferrozone a wonderful cure."

Your druggist sells it in 50c. boxes or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

### SUBMARINE DESTROYER INVENTED

A new naval terror has just been invented. It is a destroyer of the deadly submarine ship. This is the very last cry in naval warfare, the warfare between the means of offence and defence; between gun and armor or torpedo and battleship; between the swift boat that needs but one lucky shot to destroy something a thousand times its tonnage and fleet enough to get away after the deed, and the boat that is just as swift or swifter that can chase and catch the offender and send it to Davy Jone's locker with its rapid-fire Colts and Maxims. The new submarine destroyer is the invention of Lewis Nixon, graduate of Annapolis, and former naval officer, then shipbuilder, and now an official with the Carbon Steel Company, of Pittsburg. Of course, the essentials of the submarine destroyer are kept a secret as yet, because of the valuable patent rights that must be preserved. The submarine destroyer is too important an invention for any greedy government to be allowed to capture for its own use. As yet Mr. Nixon is reticent about details, while frankly owning up that the submarine destroyer has been tested and found to be good.

### "HELLO" LANGUAGE CHANGES

That the telephone is changing the pronunciation of English is a possibility which has just attracted attention. A prominent officer of the Bell Telephone Company, in an interview, says that already he has noticed it.

To obtain the best results from the telephone a well modulated voice and a crisp, distinct enunciation are necessary. The soft drawl and the dropping of the r's, which characterize the west, would make any such change perceptible there. The telephone should have a tendency, also, to cause this drawl to disappear.

Talking over the wire naturally is accompanied by the feeling that it must be brief and businesslike. This, not only on account of the tolls charged if the distance is considerable, but because the person who "calls up" is bound to remember that the one to whom he is speaking may be busy.

Long distance telephoning, which is daily coming into greater use, must also have a certain effect in bringing the speaking of the language nearer to a common level. This, also, has been noticed in the United States, where the recent business and industrial awakening has suddenly increased the necessity for communication with other sections of the country.

Any change in the talking of English made by the telephone is sure to be for the better. It will mean tones neither too high nor too low, and terse, clear sentences, distinctly articulated.

### INOCULATION FOR TYPHOID FEVER.

A commission appointed by the British army council to investigate the value of the current methods of immunization against typhoid fever has been at work for two years, and has now made a preliminary report of progress. While it urges further experiments and investigations, it regards the present methods of immunization as sufficiently valuable to justify their use on a large scale among soldiers.

The report brings together all the available data upon the subject and asserts that they "furnish proof that the practice of anti-typhoid inoculations in the army has resulted in a substantial reduction in the incidence and death rate from enteric fever among the inoculated." The protective substances developed from inoculation, it says, are identical with those developed in an attack of the disease itself. The method is as successful with animals as with men, and experiments with animals can give reliable results of benefit to human beings. The further work recommended includes experiments for the improvement of vaccine, and wholesale tests upon troops leaving for foreign service under expert medical officers specially assigned to the work, with a view to determining the proper size of doses and the duration of the protection conferred.

The statistics presented with the report indicate that the proportion of cases of the disease and the number of deaths are only about half as large among the inoculated as among those not inoculated. So great a saving of life as this is certainly not to be ignored. Sanitation is, of course, the first duty and the greatest duty in the fight against the disease, but where sanitation is impossible in adequate degree inoculation should never be overlooked.

### BURNS DIED PENNILESS.

**His First Obituary Notice Called For Help For His Family.**

When Robert Burns died the following obituary appeared in the Edinburgh Advertiser of July 20, 1796: "On the 21st inst. died at Dumfries, after a lingering illness, the celebrated Robert Burns. His poetical compositions, distinguished equally by the force of native humor, by the warmth and the tenderness of passion and by the glowing touches of a descriptive pencil, will remain a lasting monument of the vigor and versatility of a mind guided only by the lights of nature and by the inspiration of genius.

"The public, to whose amusement he has so largely contributed, will learn with regret that his extraordinary endowments were accompanied with frailties which rendered them useless to himself and his family. The last months of his short life were spent in sickness and indigence, and his widow, with five infant children and in the hourly expectation of a sixth, is now left without any resource but what she may hope from the regard due to the memory of her husband.

"The public are respectfully informed that contributions for the wife and family of the late Robert Burns, who are left in circumstances of extreme distress, will be received at the houses of Sir William Forbes & Co., of Messrs. Mansfield, Ramsay & Co. and at the shops of the Edinburgh booksellers. It is proposed to publish some time hence a posthumous volume of the poetical remains of Robert Burns for the benefit of the author's family. His friends and acquaintances are requested to transmit such poems and letters as may happen to be in their possession to Alexander Cunningham, writer, George street, Edinburgh, or to John Syme, Esq., Ryedale, Dumfries. It is hoped that in the meantime none of his original productions will be communicated to the public through the channel of newspapers or magazines so as to injure the sale of the intended publication."

### SENATOR BANDRY PROTESTS.

Ottawa, June 7.—In the Senate yesterday Senator Landry was told that the militia regulations gazetted on May the 5th would not be printed in French. Senator Landry declared that the regulations would not become law until they were printed in French. He protested that this publication was a matter of right.

**Comb Out?** —When the hair combs out badly! That is the time you want to know exactly what to do. Here is advice founded on an experience of half a century—Use Ayer's Hair Vigor! It feeds the hair-bulbs, gives life and strength to the hair. The hair stays in, grows rapidly, keeps soft and glossy. There is handsome hair in every bottle of Ayer's Hair Vigor! J. C. Ayer Co., Lowell, Mass.

20 BROAD STREET, NEW YORK
INDUSTRIAL AND MINING STOCKS AND BONDS
A GOOD CANADIAN REPRESENTATIVE WANTED

THE BLACK HILLS
OF SOUTH DAKOTA
Is the richest 100 square miles on earth. In the last twenty nine years
$150,000,000.00 in Gold
has been produced and new mines are being opened up each year. The production is increasing at the rate of $500,000 per year. If you wish to share some of the profits of this "Eldorado" of the West. You are offered a chance to buy stock in
THE HARVEST MINING COMPANY
which is probably equal to The Homestake, that once sold for $1.00 and is now worth $84.00, after dispersing nearly $15,000,000.00 in dividends in less than 26 years.
For full information and particulars see
W. K. HALL,
379 Water Street. - - - Peterborough, Ont.

# STOCKS - THE MARKETS OF THE WORLD - BONDS.

*We call the attention of our clients to the fact that*

**BULLFROG RED OAK CO. STOCK**

We call the attention of our clients to the fact that

**WESTERN UNION OIL STOCK**

Buy this stock NOW before further radical rise takes place, which we anticipate for purchase at once, is now $1 a and with the advance that just begun.

**FAIRVIEW CENTRAL MILLING CO. Stock at 15c. per share**

which we regard our clients to purchase at 15c per share, is now bid, with a few lots offered under $30. Western Union Oil is a conservative investment at this price.

Of the above stocks, we now recommend without hesitation ... payable 1-3 cash, 1-3 in 30 days, and 1-3 in 60 days from date of purchase.

Situated in the heart of a new and phenomenally rich district of Nevada, FAIRVIEW bids fair to rival the very richest of the older Nevada camps.

FAIRVIEW CENTRAL gives promise of uncovering high values, and under the conservative business management of its officers will be one of the GREAT MINES OF A GREAT DISTRICT.

Buy this stock and hold it for a permanent investment.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

Later, in her own chamber, Anne opened her window and, leaning far out on the ledge, gazed into the night.

"'Like little stars,'" she murmured, "'wandering in the blue.'" Then, after a pause, "'A little nearer, a little closer than all else besides.'"

### CHAPTER VIII.

THE spot selected for the meeting was not near by, since Virginia's earl governor had forbidden encounters within a ten mile of a military camp. Foy rode thither with his seconds, Rolph and a lieutenant in the royal forces.

"I like not these night affairs," spoke the lieutenant. "Dew is slippery, and the light deceives. I have known of accidents."

Foy cut in with a laugh of contempt. "'Twill be an accident i' faith," he said, "if I send not his soul a-scurry to hell for that glass!"

"I mind me that fight at Minden," said the lieutenant musingly. "'Twas no white night such as this, but black as the Earl of Hell's riding boots. Hoots and slimy grass and"—

Foy cursed him, with his hand shaking on his rein. "Let that alone for now!" he snarled. "They lied an they said he slipped. They lied! 'Twas fair, I tell you!"

"Aye," said the other, surprised. "'Twas a fair thrust. None doubted it."

"Where are your wits?" said Rolph, reining close. "Know you no better topic? When you have tricked the young upstart, Foy, we shall have a teddy tonight. This air has an ague."

A lantern had been set at the byread, and at this Henry and Armand turned into the open space. The curving road on the higher Blue Ridge slope had been delicately grayed with a gossamer mist creeping up from the late downs. Here it had risen thicker, curdling more deeply against the ground and sopping the air with the smell of wet beech bark. With the sailing moon above, it was like going in some murky, dull toned world where near things were shadowy and far vanished into opaque whiteness.

The other party was in waiting, the horses, in charge of a groom, tethered near by under clusters of black scarred, white stemmed birches, which stirred dimly as if afraid. Through their moving branches fitful flashes of fog-mixed moonlight filtered whitely on Foy, striding up and down, slashing off goldenrod heads with his sword and listening to the rustle of late rabbits, scurrying.

"Gentlemen," said Henry gravely, "know you no means by which this meeting may be avoided?"

"The young cock's crowing less loudly, eh?" Foy turned to his seconds with a rolling laugh.

A quick word of anger was on Armand's lips as he faced Henry, which died as Burnaby spoke:

"Let him to his knees and ask Captain Foy to use his riding whip instead of his sword."

The Frenchman's laugh rang out clearly and loud. "I have seen M. le Capitaine ride. If he uses his sword as poorly as his whip"—

"Damnation!" said Foy. "Measure those swords, Rolph, and be quick about it."

Henry held Armand's coat and waistcoat after he had stripped them off and stood, slight and young, in his shirt. He looked at him with rising pity. All Virginia knew of Foy's sword skill. He had a black record in the army of Duke Ferdinand of Brunswick, and these tales had been whispered wide in Williamsburg. There he had come to no open quarrel as yet and was made a-boon companion by such pot tipsters as Burnaby Rolph and lesser toad eaters like young Brooke. But the better class gave him a cold shoulder as unworthy to mix with gentlemen of character and would have needed little to have named him to his face for a sneaking whelp that smelled strong of the hangman.

The young Frenchman took Henry's hand between both his own. "I have been so occupied these last three hours," he protested contritely. "Have I said to you that you are generous and kind to assist thus in the affair of a stranger? Have I said that I was grateful?"

"Colonel Washington," said Henry, "is my best friend. An I had been in the inn parlor, sir, I had drunk that toast with you."

The night was very still. Scarce a leaf stirred in the vagrant breeze or shivered in the haze. Only a dull humming chirr of night insects from the thicket and drifting across this—a gold snake on a sad carpet—the rich, plaintive bubble of a whippoorwill.

"Gentlemen," cried Rolph, "is all ready?"

"Have you no command, monsieur?" Henry asked.

The young man's eyes were soft as he shook his head. "How sweet it sings!" he said. "Listen!"

It died, and the tapping of a bell, very faint and far and tenuous, came over the still valley. Henry knew the sound. Away to the eastward on a high knoll, stood a long, low structure of limestone, with a wide veranda. Perched upon its roof were two wooden belfries with alarm bells, which had been hung twenty years before, after Braddock's defeat, when the Indians turned their tomahawks against the white chief that dwelt there. The Indians had been driven westward long ago, but the bells still rang whenever the master, with yelping hounds or by daring torches, came back to his lodge. At this moment, while Armand stood in the moonlight with a naked sword in his hand, my Lord Fairfax, for whose affront he stood, was come again saddened to Greenway Court.

Foy's voice broke in, sneeringly wrathful. "Are we come to string beans?"—

"En garde!" cried Armand, turning sharply, and the two blades rang together with a clash.

Foy's attack was wonderfully strong. He had the trick of carrying the head well back and resting the whole weight of his body upon the left leg, a sign of one whose learning had been without masks. The other's method was as different from that of his antagonist as night from day. He fought far forward, engaging much with the point.

A maitre d'escrime might have seen in his action some of the freedom and directness which later gave Bertrand, the greatest fencing master of Europe, the surname of the "Terrible." But to the watchers it seemed to be utterly without method—barren of rule—to be loose, uncontained. He possessed the appearance of a child at careless play with a serpent, not conscious of its sinister intention.

(To be continued)

### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

### SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

### SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 150x1500 feet.

The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The leases shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production as fast as we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

**THOS. PATTERSON & CO., Fiscal Agts.**

161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty, of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**
AND
**$5.00 PER MONTH**
FOR FOUR MONTHS WILL BUY
**500 Shares**
OF STOCK WHICH MAY SOON BE WORTH
**$500.00**

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

## On the Ground Ahead of the Boom

## These Medical Facts

**You Can Study With Profit.**

How few realize that twenty-five per cent. of all disease has its origin in some interference with the function of elimination.

The whole body exists by reason of the transfusion of fluids through its component parts.

Up to a certain point the body has power to object to destructive elements, but this power is limited.

When it happens that the body is loaded with wastes and poisons which it can't eliminate, fermentation, decay and germ life run riot through the blood.

Serious illness is the result unless nature is assisted by a cleansing tonic like Dr. Hamilton's Pills, which are purely vegetable, contain no mercury, no bismuth, no injurious metallic ingredients of any kind.

Such a medicine is the greatest possible assurance to every man and woman of health, spirits and contentment.

Grand results are achieved, and famous cures made every day by Dr. Hamilton's Pills, as this letter proves.

From Newfoundland, Miss Lillian Anthony, of Upper Gullies, Conception Bay, writes: "In praise of Dr. Hamilton's Pills. I must say that I have used them with grand success for three years. They never fail to cure me of indigestion or constipation. Formerly my face was full of pimples, but now my complexion is clear and ruddy. In more ways than I care to mention have Dr. Hamilton's Pills helped me; they would be good for every woman to use."

Insist on having only Dr. Hamilton's Pills, 25c. per box or five boxes for $1.00, at all dealers, or by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., or Kingston, Ont.

## TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS.

### Phonographs.

Sold on easy payments at The J. M. Greene Music Co., George street, New Opera House Building, Peterboro.

### Local Dentists Set Good Example

The local dentists have unanimously agreed to close their dental parlors Thursday afternoons during June, July and August, starting Thursday, June 7th. This is a good example for other business offices and houses to follow.

### Wanted Immediately.

Good sewing machine operators on power machines. Only first-class hands need apply. Apply to J. J Turner & Sons, Tent and Awning Manufacturers, George street, Peterboro.

### Lieut. Hodgson Gets Commission.

Mr. J. E. Hodgson has received his commission as lieutenant from the Militia Department at Ottawa, confirming him to this rank in the active militia of Canada. The document is signed by Sir F. W. Borden, Minister of Militia, and also has the signature of Earl Grey attached to it.

### Organ for Sale.

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1168.

### Request Granted--Dog Planted.

Yesterday a dead collie dog was to be seen just south of the police station near the weigh scales. It seems that Mr. Fred Tuggey owned the deceased dog, which was vicious and brought him to the station. He handed P.C. Stewart 25c for funeral expenses of the canine and the officer quickly gave him a dose that put him hors de combat. The 25c found its way into the pocket of Mr Williams, who takes charge of the city dumping ground. The dear departed lies at rest but a monument was not included in the fee.

### Men Wanted.

**Any number of Woodsmen wanted for Algoma Commercial Company, Sault Ste Marie, Ont. Highest wages paid. Apply to**

**GEO. J. CHALMERS**
**542 Water Street**
**or P. O. Box 831, city.**

### THE NEW TERM

at the

### PETERBOROUGH BUSINESS COLLEGE

opens on

**TUESDAY JAN. 2, 1906**

Intending students should make application as soon as possible.
Call at the College or address

**WM PRINGLE,**
Opposite Post Office. Principal.

## LOCAL INCIDENTS

**By The Times Man on the Street**

--The Fishery Department will, the Toronto Globe says, soon place a quantity of black bass in the Kawartha lakes.

—County Magistrate Edmison yesterday spent the day in Lakefield. He had 13 cases for trial, nine of which were for illegal fishing.

—For bargains in stationery, fancy goods and notions see our window display. Times Bookstore.

—Nothing doing in police court circles yesterday except a noise that sounded like salaries running on. This speaks well for both the city and the force.

—A gang of men was yesterday engaged in working on concrete crossings on the corner of Aylmer and Simcoe streets. A crossing is laid across the south half of Simcoe and across the east half of Aylmer street.

—Yesterday as an Emily farmer named Franks, whilst driving a load of hay into the American Hotel, Hunter street, the protruding end of horse feed caught in the drive way and was mostly dumped on the ground.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—Jupiter, Juno, Appolo, Diana, Venus and other Olympian personages were highly gratified at the manner in which their famous quondam rivals was honored. The only thing that puzzled Jupiter, was seeing a bob-tailed flush laid down on a first cruise.

### Local Jewellers Establish Speciality.

The local jewellers, Messrs. W. A. Sanderson & Co., have greatly enlarged their optical department, and have built a new sight-testing dark room, so as to make their optical business a leading feature.

### Mr. H. W. Stock Buys an Island.

Mr. H W. Stock, the Hunter street merchant tailor, has purchased McAllister's Island in Stony Lake. Mr. Stock will rent the island this summer as it is impossible for him to use it this year. His mother has now a cottage up the lakes which could be used by him if so desired.

### $9.00 New York and Return $9.00.

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 3.50 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S Lewis, Passenger Agent, 10 King street east, Toronto.

### Overheard Yesterday re Circus.

"Hey Chimmie is youse dad goin to get you a ticket?" "Naw," replied Jimes. "It's under the canvas for me if I don't hit a job carring de water The old man's all right, but these days its up to us to settheold folks an example in matters of economy. Say Tommy the show's all right aint it?" "You bet," came the answer in falsetto voice.

### 57th Badges Now Here.

The handsome new collar badges for the 57th Regimental officers uniform are now here. They are gold-plated in the form of a circle, surmounted by a crown. Inside the circle is a silver-plated beaver with the number of the regiment "LVII" underneath. The base is inscribed with the words "Quis Separabit." The badges are very pretty and will add considerably to the natty appearance of our local military powers that be. The badges are an innovation and will be greatly appreciated.

### Leading R. R. Men at Picnic.

Mr. A. J. Taylor, Toronto, Canadian Passenger Agent for the Chicago, Milwaukee & St. Paul railway; Mr. A. C Turpin, Toronto, travelling passenger agent for the Rock Island road; Mr. H. H. Bennett, Toronto, general agent for the Chicago & Northwestern; Mr. J. J. Rose, Toronto, travelling passenger agent for the C.P.R. Mr. J. A. Goodsell, travelling passenger agent for the Southern Pacific, and Mr. J. Grundy, of Omaha were among the visiting railway men who took in the Olympic Club excursion up the lakes yesterday.

## Four Simple Rules

**Follow them and Health, Happiness and Prosperity Will Be Yours.**

If one would be healthy, happy and prosperous, follow these four simple rules. (1) Keep the bowels open every day. (2) Chew your food slowly and thoroughly. (3) Avoid indigestible foods. (4) If there are any symptoms of stomach troubles, take Mi-o-na before each meal until cured.

No matter how many years you may have suffered with stomach troubles or how worried by sleeplessness, nervousness, loss of appetite, furred tongue, specks before the eyes, headaches, indigestion or other ills that are caused by a weak stomach, you can be cured by the faithful use of Mi-o-na.

Take one of the little tablets before each meal with the fixed determination to get the most benefit out of it.

Mi-o-na is not a fanciful experiment, it is not a patent medicine, it is not a cure all. It is a scientific remedy recommended but for one trouble—weakness of the digestive organs.

When Mi-o-na has been used for a few days, the digestive system will be so greatly improved that all the food eaten is converted into nutrition, so that nourishment and health are given to the whole system and there is a rapid increase in weight, strength and spirits.

If you cannot obtain Mi-o-na of your druggist, it will be sent by mail, post-paid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N. Y.

## SOCIAL AND PERSONAL

—Mrs. Benjamin Shortly is visiting friends in Norwood.

—Mr. J. McBride and bride, Campbellford, spent yesterday at the Snowden House.

—Congratulations are in order to Mr and Mrs. Meadows, 47 Bolivar street, a daughter.

—Mr and Mrs. Wm Kopsland, New York, were in the city yesterday en route to Kawartha Lakes.

—Is Richardson, the hog buyer of Omemee, was in the city yesterday a guest at the Snowden House.

—Mrs. J. Claris, New York, spent Wednesday night at the Snowden House, and went to Stony Lake yesterday.

—Dr. S. F. Ford, of Norwood, was married in Essex yesterday to Mrs. Hugell of Detroit. They will reside in Norwood.

—Mrs Elizabeth James and son David of Dixon, Ill., arrived yesterday, on an extended visit with relatives in this city.

—Mr. James Kendry, left Yesterday for Montreal. Before returning to the city he will take a business trip to British Columbia.

—Mr. Percy Reid, who has been suffering from a severe attack of pneumonia, is improving, and a rapid recovery is looked for.

—Mr J. H Cobb the well known local florist, has now completed his work of supplying both Victoria and Central parks with a beautiful lot of flowers.

—Mr Chas. J. Mills, formerly of Messrs Cressman & Co., of this city, but now travelling for a Montreal house, was in the city yesterday, a guest at the Oriental.

### Married in All Saints' Church

Yesterday a pretty but quietly solemnized wedding was celebrated in All Saints' church, when the rector, Rev. W. Major, united in the holy bands of matrimony, Miss Alice M. Mellor of this city, and Mr. John Quartermaine, a brother of Mr. Thos. Quartermaine, secretary of the local Board of Trade. The happy couple left for the east by the G. T.R. noon train, and will on completion of their honeymoon reside in this city.

### Big Docket at Lakefield.

Yesterday was Lakefield's busy day as regards that village's police court. County Magistrate Geo. Edmison was in Lakefield giving attention and consequent judgment upon 13 cases, including fine against persons for illegal fishing, most of these being from the village of Young's Point The others concerned infractions of the village bylaw as exploiting fire-crackers, etc.

### Annual Meeting of O. L. P. H. A.

Mr. A Rountree, the George street grocer, secretary of the local License Holders' Association, has received word that the annual meeting of the Ontario License Holders' Association, will be held in the office of the Association, Wellington street, Toronto on Wednesday, June 20th. A number from Peterborough will be in attendance, including Mr. J. M. Brooks, vice-president of the Ontario Association.

### Married.

QUARTERMAINE—MELLOR—At Peterborough, Ontario, Canada, on Thursday, 7th June, 1906, in All Saints' church, by Rev. Wm. Major, M.A., rector. John Saunders Quartermaine, to Alice Mildred, youngest daughter of the late Henry Polhambe Mellor, Esq., of Avonlale House, Lakefield, Ontario, both of Peterborough.

### Was Your Boy Out Early Today?

Any parent who considered that his small boy's early rising this morning was occasioned by a desire for seeking to solve an arithmetical problem, or to hold quiet meditation and prayer is dead wrong. Whilst the parents were getting in their 79th ante prandial anores, the small boy was watching the circus unload and running about 999 1-2 chances out of 1000 of getting his life snuffed out if not seriously injured.

### 24th P. Battery Uniforms Here.

Yesterday the brand new and highly attractive uniforms for the 24th Field Battery arrived from headquarters and were distributed at a parade of the corps held at the drill hall, east ward at 7.30 last night. Major Young was at the drill hall, Murray street, on Wednesday night recruiting men. Quite a number were enrolled and it is now up to the recent addition to Peterborough's soldiery to take the tips given by Instructor Fee.

## 18 Bandsmen at Jackson Park

Much favorable comment was current yesterday throughout the city over the music played at Jackson Park by the eighteen members of the band present.

A choice program was rendered under Bandmaster Gliddon. Last year the music at the park was furnished by only ten men and the large number of citizens who were present on Wednesday night were unanimous in declaring that the eighteen-piece band is a big improvement. The enterprise of Manager Larmouth is commendable and will doubtless result in large audiences at this park.

### Mr. Z. M. Harris on the Circus.

Yesterday The Times was in receipt of a communication from Mr. Z. M. Harris, press representative of Cole Bros. United Shows, the great circus which exhibits in this city today. Mr Harris wrote a very kind letter to The Times saying that never before in his widely extended experience, had he met "a better crowd than the newspaper men of Peterborough," and assuring the recipient of his letter that today's show is bona fide as advertised. He said that "it is absolutely correct, irrespective of rumors I heard on my arrival in the city to the contrary, that 53 cars will arrive in your city on Friday, bringing in the best menagerie and circus your people have ever had in their city." Mr. Harris went on to express a desire to revist Peterborough and get here, "when fishing is in season."

**OPEN PUBLICITY THE BEST GUARANTY OF MERIT.**

When the maker of a medicine, sold through druggists for family use, takes his patients fully into his confidence by frankly and fearlessly publishing broadcast as well as on its bottle wrappers, a full list of all its ingredients in plain English, this action on his part is the best possible evidence that he is not afraid to have the search light of investigation turned full upon his formula and that it will bear the fullest scrutiny and the most thorough investigation. Dr. Pierce's Favorite Prescription for the cure of the weaknesses, periodical pains and functional derangements of the organs distinctly feminine, is the only medicine put up for sale through druggists for woman's special use, the maker of which is not afraid to take his patients into his full confidence by such open and honest publicity.

A glance at the published ingredients on each bottle wrapper, will show that it is made wholly from native, American, medicinal roots, that it contains no poisonous or habit-forming drugs, no narcotics and no alcohol—pure, triple-refined glycerine, of proper strength being used instead of the commonly employed alcohol, both for extracting and preserving the active medicinal properties found in the roots of the American forest plants employed. It is the only medicine for women's peculiar diseases, sold by druggists, that does not contain a large percentage of alcohol, which in the long run so harmful to woman's delicate, nervous system. Now, glycerine is perfectly harmless, and serves a valuable purpose by possessing intrinsic value all its own, and besides it enhances the curative effect of the other ingredients entering into the "Favorite Prescription."

Some of the ablest medical writers and teachers endorse these views and praise all the several ingredients of which "Favorite Prescription" is composed—recommending them for the cure of the very same diseases for which this world-famed medicine is advised. No other medicine for women has any such professional endorsement—worth more than any number of ordinary testimonials. If interested, send name and address to Dr. R. V. Pierce, Buffalo, N. Y., for his little book of extracts from the works of eminent medical writers and teachers, endorsing the several ingredients and telling just what Dr. Pierce's medicines are made of. It's free for the asking.

## Olympic Club's Great Trip

**This Year's Excursion Like Others in the Past a Great Success.**

The far-famed Olympic Club excursion, which has been conducted for about 20 years in the past, under management to a great extent of Mr. W. E Lech, took place yesterday, and was most enjoyable. For many years this picnic has been regarded as one of the events of the season, and has always been regarded as one of the best managed and thoroughly delightful outings that our city produces. Yesterday's excursion was no exception to the custom habitual to the Olympia management.

The club and its invited guests left the G.T.R. station at 8.30 for Lakefield, the avoke Billy P[illegible] looking after the patrons of his road.

At Lakefield the pilgrims embarked on the fine steamer Stony Lake, the officers and crew of which did all in their power to make things pleasant for their patrons.

It has always been customary heretofore to have the 57th Regiment band with this excursion; however this year a first-class orchestra was provided which did good service in making the day enjoyable.

A call was made at Mount Julian when some of the party remained, the balance going to Burleigh Falls, where a specially ordered and admirably served dinner had been provided by Mine Host Tom Darcy in his recently rebuilt and admirably equipped hotel.

The day was spent in listening to the sweet strains of music and other kinds of amusement including incidentally the capture of that elusive club.

The trip round the lake was thoroughly enjoyed. The party started for home about 7.30 reaching the city about 10 o'clock. Amongst the party were a number of visitors from a distance, who knowing the attractiveness of the Olympics' annual outing availed themselves of the invitations issued

## For the Stomach Heart and Kidneys

**Dr. Shoop's Restorative is a Cause Cure—not a Symptom Cure.**

It is a common mistake to take artificial digesters for stomach troubles—or heart stimulants for weak heart—or so-called kidney remedies for diseased kidneys. These organs do not act separately or of their own accord—they have no control over themselves—and not once in 100 times is the sickness the fault of the organ. It is the fault of the nerves which control the organ—and only through these nerves can stomach, kidney [illegible], heart disorders be cured. Dr. Shoop, of Racine, Wisconsin, learned early in his medical experience that these inside nerves were the power nerves—that through them only was it possible to overcome sleeplessness, indigestion, heart [illegible]burn, belching, insomnia, backache, heart [illegible], nervousness, and Bright's disease and all other affections of the kidneys. For all of these ailments are not separate sicknesses and are not to be treated as such. They are merely symptoms of inside nerve weakness, and when the nerves are restored the symptoms and the sickness disappear. The remedy which Dr. Shoop prescribed for these ailing nerves is known as Dr. Shoop's Restorative. It relieves the pain and distress of kidney, stomach and heart trouble quicker even than those medicines designed simply to give temporary relief. Dr. Shoop's Restorative can now be had of druggists everywhere. For sale and recommended by

J. D. TULLY.

**DRAW ATTENTION TO THE "NEW THEORY"**

**Over 75 % Winners**

**This Week up to Yesterday We Played Five Horses; Result, Four Won.**

We purchased outright, at a cost of $18,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interests of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season same shows enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your sum is constantly showing you its full earning capacity, which was the greatest secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously and substantially. There are no "ifs" and "ands" and we stake our reputation on same.

### What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, pailroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

### What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or choices. We often win on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

**NOTE—**

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

**RESULT—**

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

**ABSOLUTELY INFALLIBLE**

It earned $50,000 for the originator last season in four months, $65,000 two years ago, and $57,500 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and show proportionately the same returns. It shows a profit of 10 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Noting of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

**NOTICE:**

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15 t. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)

Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

**GUARANTEE—**

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours 9 a.m. to 9 p.m. Sunday by previous appointment.

## Canadian Meats Much Better

### But Inspection Will Be Had and the Public Will Be Thoroughly Protected---Tremendous Loss to Packers.

Ottawa, June 9.—In the Senate yesterday Hon. Mr. Bernier called attention to a report that one of the largest packing houses in Winnipeg had been bought by an American corporation He called attention to the unsanitary methods of American packers recently disclosed.

In Montreal and Winnipeg health officials had recently declared that there was practically no inspection in Canada on slaughtering or in packing. There should be such inspection. Senator Bernier did not think conditions in Canada were like those in the United States. However, Government inspection would be a good investment, as it would assure foreign buyers of the good quality and proper preparation of Canadian meats. If Americans were coming to Canada and going into the packing business, an inspection of methods was all the more desirable.

Sir Richard Cartwright said the attention of the Government had been drawn to the outstanding disclosures of American packing methods, and the Government was prepared to deal with the question of meat inspection. He thought it would be rather a case of enforcing existing laws and regulations than of enacting additions to them. He did not know how much power was left to the Federal authorities or how much was assigned to the municipalities and Provinces in the matter of inspection. However, he believed there was an opportunity for co-operation of reference.

Re Canada, the disclosures referred to, furnished Canada and other foreign countries an opportunity for examining their dressed meat industry.

In reply to Senator Loughheed, Sir Richard said no official intimation had reached the Government that the British authority or authorities had decided hereafter that all preserved meats for the army should be obtained from Canada. He doubted if Canada would be able to furnish the quantity of meat required for some time. At present Canadian exports in this line amounted to about three and a half million dollars a year, which was less than the quantity that would be required.

#### LOSE 150 MILLIONS.

Kansas City, Mo., June 9.—It is estimated that the business done by the packing houses located here will suffer to the extent of $10,000,000 as a result of the agitation in connection with the President's crusade against "doctored" meats. Reports of various plants seen yesterday agreed with the estimates in the telegraphic despatches of yesterday that the business of the whole country would show a loss of at least $150,000,000.

## OLD JAPAN IS RENEWED BY WAR

### Rev. Dr. Carman Finds Western Civilization Much Advanced in Eight Years

### WOMEN AS CART HORSES

### Practice Which Was Formerly Common is Dying Out—Church Unions Popular.

Montreal, June 9.—Rev. Dr. Carman, general superintendent of the Methodist Church, has just returned from a short trip to Japan in connection with the missions of Canadian Methodism in that country, and is full of admiration for the progress which the Japanese have made since his last visit before the war. It is now, he says, a much lighter task to go to Japan than it used to be. "Think of starting, viâ C. P. R., from Toronto on Monday, spending Sabbath in New Westminster and Vancouver, embarking on one of the splendid steamers, the Empresses, the following Monday, and in two weeks' time, exactly on Monday again, in early morn, landing at Yokohama in Japan. In three weeks' time we find ourselves across the Pacific ocean—a third of the way around the globe—in an old land among an ancient people and yet in some regards the newest land, and the youngest people on the face of the earth."

#### MARVELLOUS CHANGES.

Speaking of the changes which he had noticed among the Japanese since his last visit, Dr. Carman said: "Eight years ago I visited Japan, studying Christian missions in that country and especially those of our Canadian Methodist Church. To even a casual observer marvellous changes in many regards are there manifest. The great wars have aroused the people and given them another drift and a renewal of energy. In secular affairs, improvements have been immense. In the capital Tokio, and other leading cities, electric street railways are supplanting the jinrickshas. Then eight years ago, I saw scarcely a creditable draft horse; now good strong horses abound. At that time, I saw many instances of women being hitched to carts and tugging away at heavy loads. In this visit I saw very few such cases, in

Office: 315 STAIR BLDG., 123 BAY ST., TORONTO, ONT.

dead. Great banks and factories have been erected, shipping lines started, splendid schools organized, so that Old Japan in many regards taken off the air of modern civilization. In large assemblies in the principal places, European and American garb predominates. In a conference of over thirty, some twenty wore western garments in the latest fashion.

#### RELIGIOUS PROGRESS.

"In religious matters, continued Dr. Carman, "the progress has not been so decided. Yet there have been great changes The churches are better minding their footing and wheeling into line for wiser, braver action. Church unions are the order of the day. Evangelical associations and federations are quite captivating the Japanese Christians. They hardly see why there should be such divisions, or why all should not work together. They have an association of all religions, for the examination of all religious forces, Spiritualism, Buddhism, destructive criticism and similar fancies, which from Japanese love of novelty were once in honor, are now falling into disrepute. Their folly, futility and utter failure are more and more manifest in the face of ancient heathenism and perverted, defective and corrupt systems. The directness and inclusiveness of Christian faith, and the authority, purity and universal applicability of the Christian ethics are their commendation to an awakened Japan.

## City Engineer Agrees With Bogue

### The East Ward Sewer Question Practically Settled Now.

It now looks as though the east ward sewer trouble was settled. Yesterday Mr. Jas. Bogue, the contractor for the outfall sewer, it seems, received his "progress estimate," which the city engineer, in his letter to Mr. Bogue, claims to have overlooked. The engineer, in his letter to Mr. Bogue, seems to have practically admitted the city's indebtedness to this contractor, and expresses therein a willingness to recommend that Mr. Bogue be paid the money he has earned. If this is correct as the engineer's letter, seen by The Times, says, it will enable the contractor to get money he claims to have been kept out of for a long time, apparently unjustly, and will, at the same time put the city in a position to proceed, unhampered with its badly needed improvements in the east ward. There is no doubt but what, judging by Mr. Bogue's contention, as shown in these columns, he has not had a deal at the city's hands as he, Mr. Bogue would wish.

## Lakefield Boys Before the Beak

On Thursday his Worship County Police Magistrate Edmison, had his work cut out at Lakefield police court. It seems that a number of youths of that village were haled before the seat of judgment on a charge of setting off fire crackers on Victoria Day, contrary to the village bylaw. The following youths were up before the magistrate charged with setting off fire crackers on May 24th: Thos. Foley, Vernon Graham, A. Godfrey, Michael Sabbatine, John Charlton, A. Issaker, A. Dunford, H. Hendren, A. Hanrahan and Jos. Garvin. They were each fined $1 and costs. All paid up.

## Jas. O'Neil Not the Purchaser

In view of a misconception that may have existed in this city, it is only fair to note that Mr. James O'Neil of Cobourg, denies any knowledge of a man by the name of Harrison buying horses for him. Mr. O'Neil has no one buying horses in this part of the country and says the man must be a fraud.

It will be remembered that a couple of days ago a local contemporary, contained a story of a man giving his name as Harrison, and of being a partner of Mr. O'Neil, of Cobourg. He went through the district buying horses to be delivered at the Cavanagh House. On the day the horses were to arrive Harrison left the Cavanagh House and went to the C.P.R. depot, and then left the city, paying no bills.

## News of 24th Field Battery

Major Young and Lieut. Leary of the 24th Field Battery, have been employed in the vicinity of Bethany, doing some recruiting for that corps. They secured six drivers and twelve horses, which now brings the strength of the battery over eighty, the full complement of men allowed being ninety-six. Any more horses that are needed will be supplied by Lieut. R. H. Leary. The total number of horses required is sixty-two.

## Collegiate Institute Cadet Corps

Yesterday afternoon, Col. Young of Kingston, as foretold in The Times, inspected the Collegiate Institute cadet corps. The inspection took place at Central Park. The cadets were in charge of Lieut. Hodgson, and acquitted themselves with credit. They showed a good knowledge of their drill, and went through the movement with splendid precision and steadiness, and were highly complimented by the inspecting officer.

## COLE BROS. SHOW IN PETERBOROUGH

### Street Parade Gorgeous in Appearance

### EXCEPTIONAL MENAGERIE

### Finest Aggregation of Talent in the Ring That Peterborough Has Seen For Years.

Yesterday was a typical circus day. The rain that threatened Thursday evening to mar the pleasure of thousands of our citizens, fortunately passed by, and the sun came up in undimmed brightness, and, while the day was hot a gentle breeze made the weather pleasant until after the completion of the afternoon's performance, for the thousands who turned out to see the great parade, and later on flocked to the mammoth tents to take in the matinee.

Although so great a show as Cole Bros., was well advertized to exhibit here, there was not as large a gathering of farmers and their families as generally crowd to circuses here; still the towns people turned out in thousands to both performances, and all said it was the best show in years that Canada has seen.

It was generally conceded throughout the city yesterday that Cole Bros. Circus is one of the most finished and up-to-date shows on the road. The proprietors do not claim for themselves that their's is the biggest show on earth but those who saw it feel that it does not come far from it. From beginning to end it was one continuous round of amusement.

Commencing at the main entrance one is ushered directly into the big menageries where there is a large collection of wild animals of rare species and a most valuable collection. Notable among this splendid aggregation of specimens of the animal world, conspicuous were the much talked of black camel, the big black tigers, the bears, zebras, the baby elephant, the smallest one in the world—and "Queeney" the largest one in captivity. Altogether there were fifty cages in the menagerie containing animals too numerous to mention. The "big top," as it is known, or ring tent has a seating capacity 11,000, and in entirely waterproof.

There is a two-ring show and a large elevated stage, all kinds of traps and paraphernalia for a marvelous attraction.

The great Cole Bros., shows gave two excellent performances at the exhibition grounds, one in the afternoon and one to a great crowd in the evening. The performances were exceptionally fine in every respect, the grand entry in which the entire show parades around the big track, headed by Prof. Tenny's "International" band, was loudly applauded. Here one could get an excellent idea of the magnificent stock of horses Cole Bros. possess, altogether 325 horses and 325 artists of every class.

The De la Meads won great applause in their sculpture act.

Those old-time favorites, the clowns were exceptionally funny, and were undoubtedly the best this city has ever seen.

An interesting feature was DeKepa, the champion somersault leaper. Then came the performing elephants with trainers Keys and Goodade. This performance was most extraordinary the animals doing wonderful tricks.

On a bareback steed came Miss Lynda Geal, a clever equestrienne in her many skillful accomplishments, also Miss La Plata in the same act with another in the other ring.

The La Vions on the flying trapeze was an act well worth seeing, and the Laffel Tolo on the aerial bars was exciting from start to finish.

Miss Eva Clark on the swinging ladder and Miss Oliver on the swaying ladder each do great act.

About the best act in the country of its kind is the Pachano family in thrilling acrobatic tricks.

Miss Rose Shaw and Miss Rolland, two famous four-horse drivers and experts at their business were unusually good.

Then the Onefroff family bicycle riders, undisputed the best in the country, gave a great exhibition.

The circus closes with exciting races—five horse tandem, man vs. horse, clowns, sulky, jockeys, boys trot and sack race, liberty horse acting, man and horse, standing Roman race and the four-horse chariot race.

There is no doubt but what influences have been brought to bear upon our citizens to consider that the Cole Bros. Circus was not as large as others that have been here. This underhand rumor was most emphatically contradicted here yesterday.

To give a more detailed sketch of the various acts performed at yesterday's circus will take columns of space. To condense the whole matter into a few words Cole Bros. Circus is the best that has ever struck this city. The horses are the finest and best groomed, the employes are the most satisfied and cleanest looking bunch under canvas management, the animals of the menageries are good and well chosen, the art displayed both in ring and on the platform are undoubtedly far above the average, the clowns are the most numerous and have the best and latest "gags," quips and quirks, and the out ensemble of the show proves conclusively that it is the purest, funniest, best managed and largest aggregation of both exhibits and exhibitors that this city has seen in many a year. Should Cole Bros. ever return to Peterborough, we can safely predict that their canvas will require large as it is considerable stretching to hold the audience Peterborough will greet them with. Come again Cole Bros!

## Lift Lock Is Now Open For Season

The lift lock is now open for business of this season. It has been eated thoroughly and the damage done by the recent break has been effectively rectified.

The first boat having the honor to set the fashion for this season was to have been the Sir. Stony Lake, which arrived after six o'clock last night, and consequently was held over until this morning at the Water Road However, she will be on hand this morning to take the Cordage Co excursion aboard for South Beach on Clear Lake, as noted in a former issue of The Times.

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Shoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

## EL DORADO IN NORTH QUEBEC

### Explorations About Lake Chebagomoo, Show Traces of Gold, Silver, Nickel

### ASBESTOS IS PLENTIFUL

### Several Companies are Already on the Ground—Many Montrealers are Interested.

Quebec, June 9.—The return to town from Lake Chibagamoo of two more mining expeditions, with rich samples of mineral ores, establishes beyond any doubt the wealth of the deposits in northern Quebec, and will doubtless lead to a rush of miners into the new El Dorado, 240 miles northwest of Lake St. John. One of these expeditions was headed by Mr. Kohho, a Finlander, who has been a few years in the country, and who brought back with him splendid specimens of chrome iron and silver ore.

Mr. Blake was the head of the other party, which was absent exactly three months on a tour of exploration in the Chibagomoo country, having left Quebec on the 6th of March, and occupying 29 days on the trip to Chibagomoo.

Mr. Blake made the journey with two assistants and nine Indian and half-breed guides. Nine dogs were taken from Lorette, each animal harnessed to a single sleigh and drawing a load of two hundred pounds over the snow. The weather was extremely cold towards the end of March, so much so indeed that four of the dogs perished from the cold and were frozen in their tracks on Lake Onjobiche, while the men suffered considerably and only kept themselves alive by wrapping themselves in rabbit skins. Eskimo dogs would doubtless have stood the cold, but those from Lorette are covered with too thin a coating of hair.

Mr. Blake and his party had neither the time nor the appliances for mining at any depth from the surface of the ground, but the surface indications found by them reveal a marvellous abundance of mineral wealth. Some of the specimens of asbestos brought back by them are fourteen inches in length. Other specimens show twenty-three veins in at foot and a half of ore, indicating that where they run so near together, they cannot be very far from where they run together. All the way up the Rapid River the formation is serpentine. Excellent asbestos was found near Juggler's Mountain, gold in quartz deposits, some of which was perfectly visible, and silver in calcite quartz. One vein of nickel was found measuring seventy yards in width. Some of the float asbestos brought back is classed as number one quality, and there is any quantity of the very next grade suitable for packing purposes and for the manufacture of paint, cement, etc.

Every creek examined by Mr. Blake, near Chibagomoo, showed the color of gold, and Messrs. Herb and Glad McKenzie, sons of Mr. Peter McKenzie, of Montreal, in washing out three pans of dirt from one of the creeks, cleaned up $2.75.

#### WHAT ASSAYS SHOW.

An assay of the quartz found by Mr. Blake, on Rapid River, gives "large traces of silver," and "very good traces of gold." The assay of pyrrhotite from Rapid River gives "traces of cobalt," "good" traces of silver" and "nickel very rich, qualitative."

Some light companies are already on the ground, one being represented by Captain Machin, of England, who is accompanied by his wife, the first woman to visit the new mines. The Titibi Mining Company is chiefly composed of Montrealers.

One result of these discoveries is a large increase in the receipts of the Department of Mines, at Quebec, and another is an agitation for the immediate construction of a railway to the district. The Minister of Mines, Hon. Mr. Prevost, has decided to visit Chibagomoo early in August and see for himself what the country contains and what is necessary for its development.

Mr. Blake authorizes the statement that the mineral indications of the district are richer than any that he has seen in all his experiences of the many mining districts visited by him in different parts of the world.

## One Day's Rest Must Be Given Domestics

### Lord's Day Act Provides That if Employed on Sundays They Must Be Given a Day's Rest During the Week.

Ottawa, June 9.—The bill respecting the Lord's Day, as amended by the Special Committee, has been reprinted, and it is now possible to gather a clearer conception of the provisions than was possible in the first rough draft. The exemption clause is of interest to many callings and industries, but there is one section, which provides among other things, that a domestic servant who is employed on Sunday is to have a full day off during the ensuing week.

Sections 3 and 4 read as follows:

3. Notwithstanding anything herein contained, any person may on the Lord's Day do any work of necessity or mercy, and for greater certainty, but not so as to restrict the ordinary meaning of the expression "work of necessity or mercy," it is hereby declared that it shall be deemed to include the following classes of work;

(a) Any necessary or customary work in connection with Divine worship; (b) work for the relief of sickness and suffering, including the sale of drugs, medicines, and surgical appliances by retail; (c) receiving, transmitting or delivering telegraph or telephone messages; (d) starting or maintaining fires, making repairs to furnaces and repairs in cases of emergency, and doing any other work when such fires, repairs, or work are essential to any industrial process of such a continuous nature that it cannot be stopped without serious injury to the product or to the plant or property used in such process, or if without the doing of such work on the Lord's Day such process cannot be carried on continuously and safely during the other six days of the week; (e) any work without the doing of which on the Lord's Day electric current, light, heat or gas cannot be continuously supplied for lawful purposes, (f) the conveying of travelers and work incidental thereto; (g) the continuance to their destination of trains and vessels in transit when the Lord's Day begins; (h) loading and unloading merchandise at intermediate points on or from passenger boats or passenger trains; (i) keeping railway tracks clear of snow or ice, making repairs in cases of emergency, or doing any other work of a like incidental character without the doing of which on the Lord's Day the traffic on any transportation line cannot be safely carried on; (j) work before six o'clock in the forenoon and after eight o'clock in the afternoon of yard crews in handling cars in railway yards; (k) loading, unloading, and operating any ocean-going vessel which otherwise would be delayed after her scheduled date of sailing, or any vessel which otherwise would be in imminent danger of being stopped by the closing of navigation. (l) the caring for live stock and perishable products arriving at any point during the Lord's Day; (m) the operation of any ferry or boat authorized by competent authority to carry passengers on the Lord's Day, (n) the hiring of horses and carriages for the personal use of the hirer or his family for any purpose not prohibited by this Act, (o) any unavoidable work after eight o'clock in the afternoon of the Lord's Day in the preparation of the regular Monday morning edition of a daily newspaper, (p) any unavoidable work after four o'clock in the afternoon of the Lord's Day for, or in connection with the setting of bakers' sponges, (q) the delivery of milk and ice for domestic use and the work of domestic servants; (r) the operation by any Canadian electric street railway company whose line is interprovincial or international of its cars for passenger traffic on the Lord's Day on any line or branch now regularly so operated.

#### EXCURSIONS ARE BARRED.

Clause 4 says, It shall not be lawful for any person to permit any employe other than employes on boats which do not complete their regular trips within 24 hours to do so on the Lord's Day, any work within subsections (c) to (n), inclusive, and subsections (q), and (r) of Section 3 of this Act or incidental thereto, unless such employe is given during the next six days of such week 24 consecutive hours without labor.

All kinds of excursions are stopped by clause six, which reads; It shall not be lawful for any person on the Lord's Day to run, conduct or convey by any mode of conveyance, any excursion on which passengers are conveyed for hire and having for its principal or only object the carriage on that day of such passengers for amusement or pleasure, and passengers so conveyed shall not be deemed to be travelers within the meaning of this Act.

Under clause seven Grimsby Park and similar resorts will not be able to charge an admission fee to the Sunday services. The clause says; It shall not be lawful for any person on the Lord's Day to open to the public any park or pleasure ground or other place maintained for gain to which an admission fee is charged directly or indirectly, or within which a fee is charged for any service or privilege.

#### HUNTING ON SUNDAY.

Hunting on Sunday is aimed at by clause 9. It shall not be lawful for any person on that day to shoot at any target, mark, or other object, or to use any gun, rifle, or other engine for that purpose.

Clause 10 is of interest to newsdealers. It shall not be lawful for any person to bring into Canada for sale or distribution, or to sell or distribute within Canada on the Lord's Day any foreign newspaper or publication classified as a newspaper.

Any constable is given authority under the Act to enter suspected premises other than a dwelling house.

## Praise For Intercolonial Railway

### Good Words From Famous Missionary--The Social Atmosphere of the Maritime Express.

Canada's famous train, the "Maritime Express," the I. C. R. through train between Montreal, Quebec, Moncton, St. John and Sydney, is earning fresh words of commendation from distinguished persons. According to The St. John Globe, the address of Rev. Dr. Grierson, returned Missionary from Korea, was one of the features of Wednesday's session of the Convention of the St. John Presbyterial.

Dr. Grierson spoke of the recent International students' convention at Nashville. There were 5,500 delegates at the convention, and one of the exercises was the repeating of the Lord's Prayer by them in unison. The speaker had to travel over six different railway lines to reach Nashville, but found none so well appointed and comfortable as the I. C. R.

In addition to this The Montreal Herald of May 30th has the following expression of opinion of a well known professional man:

"Talking to a reporter recently a well known professional man who travels considerably remarked: 'I always enjoy the trip by the Maritime Express between Montreal and Halifax. There is more than a mere sense of comfortable travel, there is something that always makes me thoroughly contented, and never do I feel that irritability and impatience one is so apt to feel when taking a railway journey of long duration. The splendid cars and accommodation, the inviting meals and prompt service on the dining car contribute greatly to this feeling. I know, and the passing view of so many scenes of various beauty is soothing to the senses. But there is something more, something I can hardly describe, but am inclined to attribute to the social atmosphere. You meet all classes and conditions of men while traveling, but it seems to me that on the Maritime Express one always finds himself a fellow-passenger among people of a pleasant and interesting type. Some of my happiest hours have been spent on this journey.'"

#### Accident May Prove Fatal.

Owen Sound, June 9.—Alex Holmes, a married man, aged 45, was accidentally caught in the shafting at the Sun Cement Company's works, and had an arm torn off near the shoulder and three ribs broken. He is in a critical condition.

## POLICE NEWS

### Daily Happenings in Court Room and Station.

Only one case occupied the attention of his Worship at yesterday's police court, Harry Nash who pleaded guilty to being drunk the night before. Henry not only admitted the soft impeachment, but said he was sorry for it. He was found in a helpless condition on the roadway near the Goose Pond. His little indiscretion cost Henry $2.

## ATHLETIC WORLD

### BY OUR SPORTING EDITOR

#### FOOTBALL.

Omemee will be here tonight to play the return game with the Quakers in the second round of the Midland League semi-finals. This will undoubtedly be the best football game here this season, and it should be witnessed by a large crowd. Everyone who would like to see the boys in red and white win out, should attend the game tonight.

* * * *

#### BASEBALL.

The second series of games in the C.C.F.B.L will be played this afternoon at Riverside Park, and taking last Saturday's contests as a sample, todays' games should be well worth seeing. The quality of ball played in this league is as good as was played in the Midland League. There should be a large attendance.

* * * *

At two o'clock the Machine shop aggregation will play the Brass Department. The pitchers will be Callaghan and Buck Quinlan, while at four o'clock the Tool room will battle with the Armature. A. Quinlan will do the slab work for the Demakers, while Roddy will put 'em over for the Armature.

#### Warning Against Gamblers.

New York, June 9.—A formal warning to passengers to beware of professional gamblers on shipboard was published in the official passengers list of the White Star steamer Majestic which arrived here today from Liverpool and Queenstown.

## CAN YOU RESIST DISEASE GERMS?

**Yes, and becomes "Germ-proof" by Driving Out Blood Humors and Restoring the System.**

Why are doctors and hospitals so busy in spring-time? Easily answered. People haven't made surplus vigor in the spring; it was all used up in fighting off colds through the winter. With thin blood and low vitality, the germs of disease become active and cause fevers and debility.

Your one protection is to get the abundant vigor that Ferrozone so quickly supplies; it gives spring sickness that "tired feeling," restores nerve energy and instills vim and force into every ailing organ of the body.

No ally restorative is known than Ferrozone; its influence is not temporary but lasting, laying a sound foundation of health that lasts till old age.

Mr. Nazaire Begin, of Walton, P.Q., Que., who received enormous benefit from Ferrozone, writes: "I cannot speak too highly in praise of Ferrozone. If any one had told me that any remedy could build up my nervous system so well, I wouldn't have believed it.

"Before using Ferrozone I was run down in nerve and vital energy, and in very weak health.

"I didn't get enough sleep at night and felt poorly in the day time.

"Ferrozone has filled me up with energy and vim, increased my weight and made a new man of me."

Your health through the summer depends on clearing away all traces of spring sickness; the remedy is Ferrozone. Sold by all dealers, 50c per box, or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their head quarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

## YOUNG SETTLERS FOR CANADA

Child immigration from England into Canada is now a recognized institution. The experiments was begun tentatively, and advanced cautiously, every care being taken to make sure that the system should operate for the benefit both of the transplanted children and of the colony who receives them. Although the work is in the hands of private philanthropic societies in the motherland, and is carried on entirely at their cost, there is provided regular inspection of the children in their homes by special officers of the Dominion Government, whereby the risk of abuses is virtually eliminated.

The chances are all on the side of the children, as is right and proper, for the figures show that there is no difficulty in finding the home for the child, but in getting enough children for the homes offered. Last year there were 2,800 children brought into Canada under the scheme, but the applications received by the societies for the girls and boys aggregated 17,800, an excess of demand over supply of 15,000. Therefore careful selection is possible before the new child is placed in his or her new surroundings, and in every case there is a period of preliminary trial to make sure, on both sides, that the new associations formed are likely to prove permanently satisfactory.

Most of these children are the waifs and strays of big English cities, notably London, but all receive a measure of permanent training in institutions in the motherland, such as the homes conducted by the late Dr. Barnardo, before they are pronounced to be eligible for emigration. It is this careful sifting process that accounts for the surprisingly small percentage of failures. These "English home children," as they are called, drop naturally into colonial farm life, and their regular influx has come to be recognized as a boon to the labor market, which the figures above quoted certainly seem to prove.

Now a movement is on foot that the Dominion Government should establish a large training home on this side of the Atlantic, so that the youngsters could have a year's initiation into farm work before being placed out with employers. This, it is held, would add greatly to the efficiency of the scheme, would strengthen in each child's mind the love of Canada as his or her real home, and, by taking part of the burden of preparation off the English philanthropic institutions would enable larger numbers of youthful emigrants to be sent across the seas. As Canada has her gates wide open for settlers, it is quite likely that some such development of a scheme that has proved so beneficient and so popular will be tried.

## DECEIVING THE BRITISH BUYER

Chicago Scottish-Canadian: The cold storage people of this city who object to stamping the name Chicago and date of receipt of products in the cold storage warehouse have been telling their tale how they mislead the consumer. Among others the British buyer, who wishes to favor the country, has Chicago cold storage chickens of turkeys palmed off on him as Canadian, while Elgin butter is labelled Irish. These articles may or may not be as good as the genuine produce whose name they appropriate, but the British buyer, who above all men believes in square, straight-forward dealing, will by such means be taught to distrust all things American. If the American article is thoroughly good it probably would not take long to convince so shrewd a people as the British that it would be worth trying and worth buying regularly. Canadian cheese a few years ago attained the highest reputation on the British market, but it was not long till comparisons became numerous that unscrupulous United States cheese dealers were labelling their inferior article "Canadian" in order to sell it. The same has been true to a partial extent in the bacon and apple trade. It is to be regretted that American ingenuity and business cleverness was not devoted more to the improvement of their own product than to smartness in making sales. As to the cheese question, we believe that has been remedied in some of the states at least, for of recent years a considerable number of Canadian cheesemakers have been engaged in western cheese factories, and the output has been vastly improved.

### Medicine.

Throw out opium, said Dr Holmes, which the Creator himself seems to prescribe, for we often see the scarlet poppy growing in the cornfields, as if it were foreseen that wherever there is hunger to be fed there must also be pain to be soothed; throw out a few specifics which our art did not discover and is hardly needed to apply; throw out wine, which is a food and the vapors which produce the miracle of anaesthesia, and I firmly believe that if the whole materia medica as now used could be sunk to the bottom of the sea it would be all the better for mankind and all the worse for the fishes.

The shortest system of medical practice that I know of is the oldest, but not the worst. It is older than Hippocrates, older than Chiron the Centaur. Nature taught it to the first mother when she saw her firstborn child putting some ugly pebble or lurid berry into its mouth. I know not in what language it was spoken, but I know that in English it would sound thus: "Spit it out!"

### When You Write Abroad.

In writing to France or Italy, a postmaster pointed out the other day, the address should be printed, for the printed characters of French, Italian and English are alike, but of the written ones this is not true. The capital letter T, for instance, is written in France and Italy like C. The top stroke is made as with us, but the downward stroke curves to the right instead of to the left. Our C is taken for a T abroad. Our T is taken for I or J. It is important therefore to print instead of to write proper names on foreign letters. A letter addressed in writing to, for instance, a man named Treat would be thought by the French and Italian to be addressed to Ireat, and in the general delivery department of the postoffice it would be placed in the I instead of in the T compartment. Thus when Mr. Treat called for his mail a search of compartment T would reveal nothing for him, and his letter, hidden among the I's, would never be delivered.

### Made the Bear Work.

Bill Winters uses his wit to save his strength. During a camping trip in the Maine woods Bill was easily the laziest man in the party. Finally his exasperated comrades told him that if he did not kill something besides time they would pack him off home. The next morning Bill borrowed a rifle and went off up the mountains. Two hours later the men in camp saw Bill running down again as fast as he could come, and close behind him was a bear. The men watched the chase, with loaded rifles ready. On reaching camp Bill turned and shot the bear. When the men could stop laughing one of them said, "Bill, what on earth possessed you to run that distance with the bear so close when you might have killed him on the hill and saved your breath?" Bill smiled slowly. "What's the use of killing a bear in the mountains and lugging him in when you can run him in?" he asked.

# TWO BEAUTIFUL WOMEN WHO ESCAPED SPRING CATARRH BY TAKING PE-RU-NA.

## Spring Fever Is Spring Catarrh—Nothing Robs One of Strength Like Spring Catarrh.

Miss Nellie Condon.

### Pe-ru-na Is a Fine Tonic For a Weary Woman.

A Letter of Praise.

Miss Nellie Condon, 450 7th Avenue, Brooklyn, N. Y., writes:

*"I consider Peruna the ideal spring tonic.*

*"For the past five years I have taken it at this time of the year and find that it enables me to endure the variable weather of the spring and the trying heat of the summer."*

Peruna affords the most prompt and permanent relief in all cases of nervous prostration, caused by systemic catarrh, as verified by many cures on our records.

Mrs. Hattie Hamilton.

### Gained Eighteen Pounds.

Mrs. Hattie Hamilton, R. F. D. 2, Sparta, Ky., writes: "I have taken two bottles of Peruna and commenced on the third.

"I did not really need the third one, but thought it best to take another bottle.

*"I have always weighed 102 pounds, but since I began taking Peruna I weigh 120 pounds for the first time in all my life, and I am now 33 years old.*

*"Your medicine has surely done me a great deal of good and I have recommended it to several others who have begun taking it.*

"My mother, who is 74 years old, had grown so weak she could scarcely walk.

"She took two bottles of Peruna and is fleshier and is looking well."

### A Spring Tonic.

ALMOST everybody needs a tonic in the spring. Something to brace the nerves, invigorate the brain, and cleanse the blood. That Peruna possesses such qualities is beyond all question.

We have on file thousands of letters which testify to the curative value of Peruna in cases of nervous depression and run down conditions of the system.

### A Typical Letter.

Mrs. Rhoda Stufflebeam, Bunch, Iowa, writes:

"For years I suffered with catarrh of the throat and bronchial tubes.

"I doctored with different physicians, but kept getting worse all the time.

"This spring I took a cold which settled on my lungs. I had such a cough I could not rest at night. My friends, and I myself thought I had consumption.

"A friend advised me to try Peruna. I bought a bottle and wrote to you for advice. Before I had taken one bottle, my cough was better so I concluded to give it further trial.

"I followed your directions as closely as possible, and thanks to you and Peruna, I am a well woman to-day."

*Peruna never fails to prevent spring catarrh or nervous prostration, if taken in time.*

### Pe-ru-na Contains No Narcotics.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotics of any kind.

Peruna is perfectly harmless, if taken according to the directions on each bottle. So used, it can be taken any length of time without acquiring a drug habit.

It has no bad effect upon the system, and gradually eliminates catarrh by removing the cause of catarrh.

There are a multitude of homes where Peruna has been used off and on for twenty years.

Such a thing could not be possible if Peruna contained any drugs of a harmful nature.

Address Dr. Hartman, President of the Hartman Sanitarium, Columbus, O.

## CARE OF THE EAR.

Never put anything in the ear for the relief of toothache.

Never wear cotton in the ears if they are discharging.

Never apply a poultice to the inside of the canal of the ear.

Never drop anything into the ear unless it has been previously warmed.

Never use anything but a syringe and warm water for cleansing the ears.

Never strike or box a child's ears. This has been known to rupture the drumhead and cause incurable deafness.

Never wet the hair if you have any tendency to deafness. Wear an oiled silk cap when bathing and refrain from diving.

Never scratch the ears with anything but the finger if they itch. Do not use the head of a pin, hairpins, pencil tips or anything of that nature.

Never meddle with the ear if a foreign body enters it. Leave it absolutely alone and have a physician attend to it.

### Rogers as a Story Teller.

Charles Dickens used to describe the way in which Samuel Rogers, the poet, told dinner table stories when grown old and feeble. A manservant stood behind Rogers' chair and at appropriate intervals would thus admonish his master: "Tell Mr. Dickens, sir, the story of the Hon. Charles Townshend and the beautiful Miss Cumea." The old poet would start in a slow chant: "The Hon. Charles Townshend became enamored of Miss Curzon. She was beautiful. He bribed her maid to conceal him in her chee-amber and when she arrived to dress for a ball emerged from his hiding place. She looked at him fixedly, then said, 'Why don't you begin?' She took him for the 'air-dresser.'"

### Two Ways of Putting It.

Two groups of persons were seated in a railway station, according to Lippincott's Magazine. One consisted of a fashionably attired pair, the other of a pair who looked as if they were from the country. They had been there only a few minutes when a girl came in whose complexion was as nearly perfect as anything in this world ever is. While she was buying her ticket the young man remarked to the ladies with him:

"Isn't Miss Cransford a beauty? Her complexion is as perfect as a rose."

At the same time the other man clutched his wife's arm and whispered:

"Lord, Nan, hasn't that gal got a purty hide?"

### Sterne and Garrick.

Sterne, who had the reputation of treating his wife very badly, was one day talking to Garrick in a sentimental way in praise of conjugal fidelity and love. "The husband," he declared, "who behaves unkindly to his wife deserves to have his house burned over his head."

"In that case," replied Garrick, "I hope your house is insured."

### An Exception.

"Which is the first and most important sacrament?" asked a Sunday school teacher of a girl preparing for confirmation. "Marriage," was the prompt response. "No, baptism is the first and most important sacrament," the teacher corrected. "Not in our family," said the pupil haughtily. "We are respectable."

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

A pain came into Henry's dark eyes and a paler tinge to his cheeks. He groaned inwardly as Foy suddenly came at Armand, pressing him back in a furious chasse-croisee, first the right foot forward, then the left.

The lieutenant stood close to Henry, his lips parted, watching. "They say Foy was taught of Angelo," he whispered, "and that the pupil could beat his master. Your friend is in evil case."

So indeed it seemed. Foy was a brute, and he fought like one, with face distorted and breath rattling with rage. He came on with the lunge of a hunter at a boar, his blade hate heavy, and the very fury of his rush sent the young Frenchman back to the verge of the bushes.

Armand returned with a stop thrust, parried a lunge and answered by a riposte. Then for a moment there was nothing but the du-tac-au-tac of slim steel, cutting wayward blue white flashes where the milky light caught its edge.

"End the cub, Foy," cried Rolph with an oath, "and let us to town! You could have spitted him forty times!"

"By heaven!" suddenly burst out Henry. "Bravo!"

The Frenchman's blade, beating up a flanconnade, had nicked a crimson gash on Foy's shoulder.

The latter, smarting from the prick and enraged beyond measure, came on again cursing, his chin set forward from his neck and a fleck of foam on his lips.

Armand had changed his tactics. He still had the appearance of looseness and lack of close defense; but, strangely enough, Foy's point, though wielded by the redoubtable swordsman that he was, had not so much as slit a ruffle of his shirt. He was untouched, immaculate, careless and debonair.

Now he became of a sudden winged. He turned, circled, was here and there with the rapidity of an insect. The fight turned this way and that, crushed the bushes, was all over the ground. There was a maze of pricking, whirling arrows of sulphur colored flame in the moonlight. Foy's breath was coming hoarsely in his throat like that of a strangled dog. Armand began to laugh outright as he thrust and parried.

The lieutenant wedged an exclamation amid the flick and scrape of steel. Foy's face was become a welter of sweat and rage. This was a sort of fighting new to him. He tried every attack, every feint, double engage, coupe—each ineffectual. Armand, nimble, laughing, began to hum a tune as he ran.

Nothing could have been better calculated to goad his adversary to point of impotency. Already Foy had begun to cut and lunge in utter, whirling madness. Rolph no longer called to him to end the matter. All alike saw that such ending was fast coming into Armand's power alone.

Again and again Foy laid his guard open to Armand's thrust, taking no thought, but still the Frenchman withheld it. Instead his leaping point slashed the other's coat to flapping ribbons, pricked him on the thigh, in the armpit, in the hand—wasp stings that drew blood and rage, but harmed not.

At the first spurt of crimson Rolph leaped forward, crying that it was enough, at which Armand politely lowered his blade, but Foy reviled his second with such curses that he went back to his station gritting his teeth.

The lieutenant raised his hand, withdrawing his eyes an instant from the combatants. Henry listened, and his ear caught the tattoo of hoof beats flinging over the road, mixed with the failing of a lash upon horse's flanks a frenzy of impatience in the sound. As it came nearer Rolph turned his head with a quick gleam of relief.

At the same instant Armand, swerving far forward, wounded his antagonist in the right wrist, and, Foy's fingers relaxing on the hilt, with a sweeping twist sent his sword rattling a good ten feet away.

Foy was after it to snatch it up, with a snarl more like a wild beast than a man, when an officer, at a gallop, leading three soldiers, broke into the clearing and spurred fairly between.

"Stop!" he shouted, out of breath. "Stop! In the governor's name!"

Armand tossed his sword to the ground.

"Hell and fury!" foamed Foy as he sprang back slashing at the horse's legs. "Out of the way, curse you!" The animal plunged aside, and Foy came at Armand like the madman he was.

The officer threw himself off the horse too late, as Henry rushed forward. Armand stood perfectly still, his hand pressed to his side, where a stain was spreading crimsonly among the white ruffles.

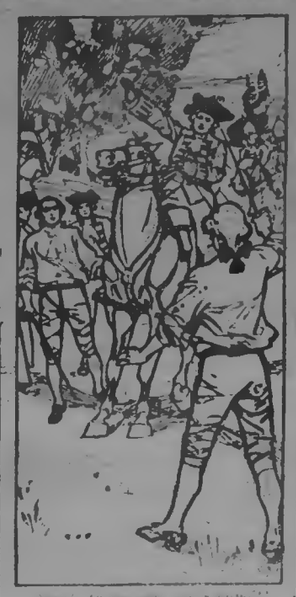
"Bear witness," Rolph said with coolness, turning to the soldiers, "that Captain Foy is not himself for liquor."

"There has been no liquor drunk lately. You meant murder!" Henry turned fiercely upon Foy, who, his rage suddenly sobered, stood biting his nails.

"Enough, gentlemen," interrupted the officer. "There will be time for that. I have his excellency's orders to bring all here in his command to the fort. Captain Foy, Mr. Rolph, lieutenant, I call on you to accompany me without delay to town."

"You are hurt, monsieur," cried Henry, throwing an arm about the young Frenchman, who staggered slightly. "Sir, you will not leave him so, bleeding, here by the roadside? Greenway Court is not far distant. In the name of humanity I ask you to assist me to take him where he can have proper attention for his wound."

"I have imperative orders, sir. Mount, gentlemen."



"Well to have him to the [illegible]" burst forth Foy in a section [illegible] white fury as he thrust in his saddle. "And you, you upstart rebel, Virginia would long have been the easier for your gibbeting!"

Their hoof beats grew fainter, then were gone in blankness and echo, and Henry, feeling the young man's form grow suddenly limp, laid him gently down upon the turf.

The baron had driven from Winchester that [illegible]

Let us give you information concerning another property in Mexico that has a future. Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. Write for plan of sale and description of property.

**SAN DOMINGO MINING CO.**

Dept. 61, Frisco Building, St. Louis, Mo

## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

## SYNOPSIS OR CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expendnd or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 43 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**

## MINING STOCK BUSINESS

### Commented Upon by R. B. Higbee, the Largest Independent Dealer in the Northwest.

People should understand that because I am able to quote prices on the great majority of mining stocks at considerably lower than the regular price asked by the company, or their financial agents, does not necessarily mean that their prices are too high, nor is it any reflection on the company itself. My business is a development of the times. People are forced to sell in many instances whether they care to or not; oftentimes these sales must be effected quickly; a man in my line of business is able to procure the cash for such parties the same they most need it quicker than he would be himself, for in nine cases out of ten the average investor does not know when to sell his stock, and could not effect a sale himself quickly. It is my business to do this as a broker, and I am able to sell many valuable stocks at lower prices and in the same time realizing more for my clients than they would be able to do on their own account.

I never advertise stocks unless I can deliver the same, or could do so at the time I made the quotation or offer. I am very particular about this, for under no circumstances will I quote lower prices on any stock than that at which I have it listed with me. In most cases where I can quote lower prices than the regular figure I have only a limited amount of the stock offered, and make my price as low as possible in order to effect a sale quickly.

Besides those people who are sometimes forced to sell, the stock is often obtained from the original prospector, promoter or attorney, who secured his stock at the very beginning of the enterprise and is satisfied to realize a small proportion of the profit that would ultimately be his if he held on with the bona fide purchaser, but many times a mining company starting out is so anxious to get things going that they give away large blocks of stock, only to have them bob up later on and cause them endless trouble. I am not saying that these prospectors, promoters or attorneys are not justified in selling their stock at low prices, for many times they have other opportunities to invest the money which they receive for the same so as to make them quicker and perhaps larger returns than they would receive by holding the security they have to sell.

In many instances, too, I represent banks who had to take the stock in order to realize on a debt, but in all cases the stocks I offered are stocks that are regularly issued by the company and are in all respects the same as those offered by the company itself.

I have made a careful study of the mining business and know that the average investor will profit more often by communicating with me when he is in line to invest in something than if he goes into it blindly on his own account. It seems strange to me that a man who has never put five minutes of actual study into a mining proposition will take the advice of some over-enthusiastic person and plunge his life's savings into some company, paying a high price for the stock, when he might have obtained the stock from me for a quarter the price, or perhaps been warned of the rottenness of the enterprise before he had parted with a dollar of his good money.

### How Dolphins Play.

The waters of the gulf of California teem with other wealth than pearls. Here are fish of every description. The tuna is abundant, and the gamy Spanish mackerel is everywhere. The dolphin seems monarch of all the gulf. In the vicinity of the great island of Carmen they are encountered by the thousand. One school, comprising many hundreds, were encountered by the steamer on which the writer was a passenger a short distance from the beautiful bay of Escondido. They were a half mile distant when they observed us going in the opposite direction. Suddenly the leaders, in a clearly evinced spirit of rollicking sea dog fun, turned every one of them and gave chase to the steamer. It was perfectly evident they enjoyed the performance as much as the spectators. For a little while the noise was deafening, as if a thousand gamins of the streets had been turned loose in a go-as-you-please bathhouse. Then, having proved their ability to catch up with the steamer, they as suddenly veered and sped southward.

### An Elder Brother.

In a case in the orphans' court of an eastern city one of the principal witnesses was asked if he had any brothers or sisters.

"I had a brother," he replied, "but he died 150 years ago."

"What? A hundred and fifty years ago?" echoed the judge, with an implied rebuke for a possible jest.

"Yes. I am telling you the truth. My father was married at nineteen years of age. Within the year a son was born to him, who shortly afterward died. Becoming a widower before he was thirty, my father married again at the age of seventy five. I was born sextuplet. I am at present ninety-four years old. If you will make the necessary calculation by adding my age, ninety-four, to the number fifty-six, which is the difference between seventy-five and nineteen, the ages of my father at the time of his respective marriages, the result will be exactly 150. So it is just a century and a half since my brother died."

### Let the Children Play.

It is too often true of the unhappy children who are forced to rise too early in their classes that they are constituted all the forenoon of life and stupid all its afternoon. The vigor and freshness which should have been stored up for the purposes of the hard struggle for existence in practical life have been washed out of them by precocious mental debauchery by gluttony and lesson bibbing. Their faculties are worn out by the strain put upon their callow brains, and they are demoralized by worthless childish triumphs before the real work of life begins. I have no compassion for sloth, but youth has more need for intellectual rest than age, and the cheerfulness, the tenacity of purpose, the power of work, which make many a successful man what he is, must often be placed to the credit not of his hours of industry, but to that of his hours of idleness in boyhood.—Huxley.

### Ants Kill a Rattler.

A hunter tells an interesting story of the way in which a colony of red ants put to death a rattlesnake which dared to disturb their abode. He was out hunting when he saw the rattler and started to put a load of shot into the reptile when he noticed that it was headed straight for an ant hill of unusual size and waited to watch the proceedings. It had hardly got halfway across the mound when a big red ant hastened to the attack and sank his nippers into the snake's body. In less than two minutes he was joined by the whole colony, which practically covered the whole body of the rattler, each one sinking its scissors-like blades into the intruder's body. The snake began to thrash and squirm, but the ants held on like bulldogs. The rattler's fury grew so great that he sank his fangs into his own body, then straightened out after a few more convulsive efforts to get away and was dead in less than ten minutes after the first ant had mounted his body.

### Should Have Been Put Otherwise.

An esteemed Perthshire minister was visiting a burly parishioner suffering from the "muffgrubs," or "Ellie Lindsay." The strong man was intensely irritated at being attacked by disease, and he greeted his minister thus: "Weel, Messjohn, I thocht-ye wad never come. I ken ye are busy wi' thinkin' whatna fresh notion ye can gie hus an the Sawbath, and I ken ye maundung yer brains—as I jalouse by readin' a' the bit bookies ye can come by to hae a crap o' profitable notions for a'body. Sit ye doon, sir, in the big chair, and, Janet, gie Mr. Pettedhead a whang o' gouda cheese, a souple scone and the grunds o' the greybeard. The bite and sup will keep his beast, puir stock. Nee, sir, it's haith lamentable and awfae, but this is the first illness I have ever had in a' my born days. I tell ye, my first illness!" "Well," replied the minister, in a voice meant to be plangent with suppressed emotion, "I most earnestly hope it may be your last."—Dundee Advertiser.

### Honeymoon Reading.

The house had quieted after the wedding. Mother and Aunt Mary were in the parlor talking it over.

"So it's over," said Aunt Mary, smiling into mother's eyes.

"Yes," said mother bravely, although a little tearfully, "it's over—and begun."

"They'll be happy, I'm sure."

"Yes. They are very well suited to each other."

"Very. I could see that. They both have studious habits."

"Yes. But, Mary"—mother paused, and the gleam of mischief evoked by Aunt Mary sooner than anybody else darted into her eyes—"Mary, they can't have much sense of humor. Though it's my own girl, I say it."

"Why not?"

"Do you know what she took to read on their wedding journey? Stevenson's 'Travels With a Donkey.'"

### Give Your Horse More Water.

Water should be before horses at all times when indoors, and at least no meal should ever be offered and no night lights ever turned out until every animal has had his chance at as many brimming buckets as he will take, says the Outing Magazine. The shy drinker may be tempted by many artifices, like mixing a little molasses, or salt, or oatmeal, or flaxseed jelly, or bran, etc., with the water, and constantly varying the flavor. Horses may even have all they want right after feeding, provided they have not been deprived of water for some time previous. Many shy drinkers, like shy feeders, who are generally nervous, take all nourishment best at night, when it is dark and quiet, and morning finds the empty manger and bucket which it had seemed, by day, almost nauseated them.

### Nelson In Wolsey's Tomb.

Lord Nelson's sarcophagus in St. Paul's cathedral has been aptly described as a secondhand national tomb, for it was originally constructed for another great Englishman, Cardinal Wolsey. Wolsey had cherished an ambition to be buried within the precincts of Windsor castle and caused his sarcophagus to be carved by one of the most famous sculptors of his time. But Wolsey died in disgrace, and the sarcophagus remained empty at Windsor until Nelson's death, when it was thriftily employed to hold the remains of the hero of Trafalgar.

### Old Time Punishment.

In "Pike's History of Crimes," volume 1, page 128, is found the following copy of the sentence of an old time traitor: "It is the order of the court that for your treason you be drawn and hanged and beheaded and that your heart, bowels and entrails, from whence come your traitorous thoughts, be torn out and burned to ashes and that the ashes be scattered to the four winds and that your body be afterward cut into four quarters."

### A Disintegrated Group.

"What did the girl do when her father discovered them eloping?"

"She burst into tears."

"What did the young man do?"

"Oh, he went all to pieces."

"What did the old man do?"

"He! Why, he exploded with rage and blew them both up."

### Just the Thing.

Young Lady (to clerk in bookstore)—I am looking for something suitable for an old gentleman who has been married fifty years. Can you suggest something? Clerk (promptly)—"A Half Century of Conflict."

As long as the heart is young and the thought is youthful old age cannot touch you.

## DISTRICT NEWS

### KEENE

A very enthusiastic, profitable and entertaining meeting was held on the park by the Sons of Rest on Tuesday night last. Putney Wade, the president, rang the bell at the opening hour and directed the members to take their respective seats. After he opened the meeting by prayer he arose and addressed the members as follows: "Dear brethren, I feel that it would be an injustice to you as well as to myself if I did not give expression to my feelings tonight, for truly my heart is overflowing with feelings of satisfaction to the members of this society for their punctuality in attending the meetings, but I must admit that sometimes my heart feels sore, when I am compelled to impose fines on the members for violating the rules of the society. Now, brethren, next Dominion day will soon be here, and it is my intention that the members of this society celebrate the day by indulging in games, races and patriotic exercises. Now, as I am at the head of this society, I feel that I have the unlimited power to appoint a committee to make arrangements for a profitable and entertaining time; I will, therefore, appoint Pothtail Pue, Stuffy Jim and Floridale Dixon to make all necessary arrangements for the occasion. Pothtail Pue arose and moved that a footrace be run between Patsy Drummond and Cockaloo Elliot, and that a game of lawn tennis be played between Hookaway Carter and Floridale Dixon, and that Fighting Archy, Tom Deackey, Limpet be appointed specifiers. Stuffy Jim seconded the motion and it was carried unanimously. The president now took his seat and left the meeting open for other general business. Pointy Moore rose and said that he felt curious to know how much money was in the treasury. The president then asked the treasurer to give a statement of the finances. The treasurer counted ten thousand dollar in the treasury at present, with a possibility of two thousand more being added to it as soon as all the fines were collected. Pointy Moore declared that he was agreeably surprised, as he never surmised that the Sons of Rest were so wealthy. Pointy Mac rose and said that he had a serious charge to lay against Shiney Jim for importing a poisonous species of snake into our village. The president told Jim that such a transaction as that could not go unpunished; he therefore would impose a fine of four hundred dollars, to be paid at once or three years in Central prison. Skunkhunter Bennie laid a charge against Tom Deackey for killing a cat in mistake for a skunk. The president took Deackey by the ear and made him scream for mercy; he then fined him fifty dollars, to be paid in two days or he would send him where the dogs would not bark at him for at least ten years. Wuky McFarlane laid a charge against Howden Doris for mowing lawns before five o'clock in the morning. The president fined Howden ten dollars, with a warning to be in bed an hour or two longer in the morning. Patty Drummond laid a charge against Floridale Dixon for murdering innocent grasshoppers. The president fined Floridale five cents, to be paid at once or two days in jail. Wolf Howson laid a charge against Nikie Lax for escorting a young lady around our streets before breakfast. The president fined Lax ten cents, to be paid in one week or two days' imprisonment. Fighting Archy now informed the president that the hour of closing had arrived. The president then asked Skunkhunter Bennie and Bobtail Pue to sing the closing ode. They sang tolerably well. The meeting was then closed until next Tuesday night.

"God Save The King."

Pink Lips, Like Velvet Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips of skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most slightly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

---

### ALF JURY SWORN

**Even After He Had Taken the Oath Liberals Doubted His Evidence.**

Ottawa, June 7.—When Mr. Jury's examination was taken up yesterday morning in the Public Accounts Committee, an odd situation arose. Mr. Jury desired to affirm, stating that as he did not believe in rewards or punishments after death, he did not wish to take an oath. Mr. Geoffrion, however, insisted on his being sworn, and Mr. Jury accordingly kissed the Bible.

Mr. Belcourt then observed that Mr. Jury, after his statement, was not a competent witness, and Mr. Geoffrion followed this up by a declaration that no judge in the land would take Mr. Jury's evidence.

Mr. Chisholm, Antigonish, declared that if he gave wrong evidence he could be prosecuted for perjury whether he affirmed or swore, and Mr. Jury capped this by stating that the late Chief Justice M. C. Cameron had taken his evidence after he had made a similar statement.

"I doubt that," said Mr. Geoffrion.

Mr. Jury's evidence was confined to a recital of the facts connected with his procuring the Preston-Ennis letters.

### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

# A PROFITABLE INVESTMENT FOR MONEY SAVERS

I am going to talk to you through this advertisement just the same as if I was looking straight into your eyes.

I make a business of finding profitable investments for money savers.

I employ the best of experts to help me determine the profit possibilities and the safety of such investments before I recommend them to my clients.

The person with $50,000 or more can live on the interest of his money, but the person who can save only a dollar a week or who has any small amount up to the $50,000 mark, feels keenly the necessity for placing his money where the possibilities of large profits exist and where the danger of losing his money is diminished as much as possible.

It is to accommodate this class, as well as to secure the money for meritorious enterprises, managed by honest and competent men, that I make a business of investigating and finding desirable investments for money savers.

I bring the investor and the meritorious enterprise together.

In making scores of investigations, and as a consequence of the thousands of letters received from investors all over the United States, I agree with the late Henry Ward Beecher, who said:

"I admire the miner's wealth. It is clean. There is neither blood nor tears on it. It is acquired away from the scheming and ordinary cut-throat ventures where the success of one man often means the disaster and downfall of another. No one has been pinched; nobody has been wrecked. The miner who digs a fortune out of the ground has the satisfaction of knowing he has not robbed a soul, even though he becomes a thousand times a millionaire."

Mining, because of its tremendous importance and its unparalleled influence upon the world, as it is the basis of our entire monetary wealth, to say nothing of its other features, suffers through the shortcomings and errors of those who take a mean advantage of the industry and the public confidence, but it should no more be condemned than should the Christian religion suffer because of the wrong it is done by the hypocrites.

I AM FIRST, LAST AND ALWAYS FOR THE SQUARE DEAL. The square deal for the investor; the square deal for the enterprise; the square deal for every interest involved in business or out of business. This policy is necessary to my success.

The Square Deal involves something more than simply common honesty, and the man who is not willing to let the Square Deal permeate his entire proposition has a mistaken idea of what is best for him and in nine cases out of ten he never succeeds.

The undertaking that will not bear the most rigid investigation, both in regard to the business itself and the men responsible for it, should be left severely alone.

The Trinity Mining Company, its officers and directors, its properties and business are subject to any or every investigation that the most exacting investor might wish to make.

Some of the several prominent men who are behind this enterprise with their money and brains are the following: H. H. Latham, of the Latham Machinery Co., 197 So. Canal Street, Chicago; I. L. Shafer, of the Jukes & Shafer Co. (Japanners), 201 So. Desplaines Street, Chicago. H. E. Procunier, President of the Moon Mfg. Co. (Electrical Equipments), 47 South Canal Street, Chicago. H. C. Reno, Mining Engineer, 140 Dearborn Street, Chicago.

If you will take the trouble to make proper inquiry through any of the commercial agencies or through Chicago acquaintances, you will discover these men are not the kind who would permit their names, to say nothing of their money, to be used or coupled with an enterprise that did not deserve every confidence and co-operation, and if these men can afford to do it, any other man living can afford to do the same thing.

I am in the investment business for life. I, naturally, will not intentionally direct you wrong. I want you as a customer.

A good block of paying mining stock is as good life insurance as any man needs. He does not have to die to enjoy the benefits of it is self-denial. It insures him a comfortable seat in a cozy corner by his own fireside when he is no longer able to work.

The directors of the Trinity Mining Company have authorized me to sell 300,000 shares of their treasury stock for the immediate use of installing additional facilities for the economical extraction of the values from their ore bodies, and for other purposes incident to the enlarged success of the corporation.

Every stockholder stands on an equal footing with every other stockholder in proportion to the amount he holds. There will be no freezing out or squeezing out of any interest. I wish to be emphatic in this particular for I realize that such things are common where the "big fish eat the little ones," and I wish to say that in this case or in any other enterprise that I may recommend to the public, such unwarranted methods will not be permitted to prevail.

Read every word that follows and let me hear from you immediately.

**PIERCE UNDERWOOD, Specialist in Profitable Investments,**
**140 Dearborn Street, Chicago.**

# A SQUARE DEAL IN MINING INVESTMENTS

### PROOF ONE:

Investigate through any commercial agency or any other channel, the men behind this enterprise. If they are not both honest and able don't invest.

### PROOF TWO:

I have in my office many receipts from the U. S. mint at San Francisco given to the bank for bullion received from the La Jojoba (pronounced La Hohova) group of mines while the Trinity Mining Company was proving the property. Ask any friend here to come and inspect—come yourself if you can.

### PROOF THREE:

Read what Mr. H. C. Reno, the eminent mining engineer and president of the Trinity Mining Co., says. He stakes his reputation on the general worth and profit producing abilities of these properties. *HE KNOWS.*

### ESTIMATED PROFIT FOR OUR STOCKHOLDERS.

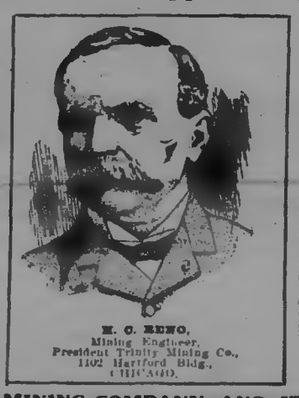
*$100,000 to $150,000 ANNUALLY*—This is a very conservative estimate and based upon *what is in sight and not upon guess work.*

REMEMBER:—The increase in value of this stock will in all probability reach several dollars a share and buyers will be eager to secure it, such increase would return to you an enormous profit aside from whatever it may earn for you in dividends.

Stock in several Mexican mining companies that originally sold for a small price per share has risen to hundreds, and in some instances, to thousands of dollars per share.

Every favorable condition seems to exist in favor of the TRINITY STOCK WILL REACH A VERY HIGH FIGURE.

In any event the investor has the advantage of knowing that his money is invested in a real mine that is a paid producer when operated and can be made one of the biggest. Also his money will not be frittered away through mismanagement. AGAIN REMEMBER: Gold mines are not usually affected by troubles that injure such as strikes, war, drought, fire, famine, trusts, etc., etc. Gold is always necessary and the demand at $20.67 per ounce is world wide—ALWAYS A MARKET THAT PAYS SPOT CASH.



H. C. RENO,
Mining Engineer,
President Trinity Mining Co.,
1102 Hartford Bldg.,
CHICAGO.

"I have staked my reputation on the general worth and profit producing abilities of the mining properties controlled by this company."

May 11, 1906.

Mr. Pierce Underwood, 140 Dearborn St., Chicago:

My Dear Sir: For twenty-seven years my time has been exclusively devoted to the examination of mining properties of the United States, Canada and Mexico, and in the superintendence of others.

I have felt that it was the time to secure the control of a property for myself, one that I could select with the advantage of my years of experience and one that I would know possessed all the necessary requisites to make myself and my associates financially independent, and I am pleased to say that I have staked my reputation on the general worth and profit producing abilities of the mining property controlled by this company.

I have based this view upon the following facts, which are within my knowledge: First, there are over 250,000 tons of visible, available and profitable milling ore exposed in view in the form of a vast quarry, which can be taken out at an expense of not exceeding 30 cents per ton; it can be milled with proper milling machinery at a cost of not exceeding $1.50 per ton, and it has been shown by actual mill runs that its average value is not less than $4.80 per ton (while some ores taken from other mines of this group have shown from $60.00 to $80.00 per ton, and in individual instances have shown as high as $460.00 per ton.) The above quantity is visible, and one is warranted in the belief that the ore will continue in depth and produce many times this amount of ore of equal or possibly greater value. This is only one of the twelve mines controlled of the company constituting this group.

My long experience justifies my statement that in the Trinity Mining Company as a corporation and in the properties controlled by this corporation the element of risk to the investor is as wholly eliminated as honesty, ability and very valuable property can accomplish. My ALL is invested in this undertaking, because I am confident of its success. Yours truly,

H. C. Reno M. E.

Shaft Machinery of San Miguel Mine.

### THE TRINITY MINING COMPANY AND ITS PROJECTS

The Trinity Mining Company is a corporation organized under the laws of the District of Columbia for One Million Dollars, divided into one million shares of a par value of $1.00 each, fully paid and non-assessable, all stock common stock.

The purpose of the company is to operate the vast LaJojoba group of mines located in the State of Sonora, Mexico. This property is twelve miles due west of Magdalena, and Magdalena is on the Sonora Railroad, fifty-six miles due south from Arizona.

### VAST MINERAL DEPOSITS CONTROLLED BY THE TRINITY MINING COMPANY.

The great LaJojoba group of mines include twelve or more individual properties, any one mine of which, it is believed, is sufficiently strong enough to earn a good interest on the entire capital stock of the company. Two of the mines have been considerably developed with a view of ascertaining as nearly as possible a correct estimate of the vast wealth contained in their veins. These properties include a surface area of 163 acres.

Mill with capacity of 40 tons daily to be increased to 150 tons.

### CONDITIONS OF PROPERTY.

The conditions of this property are ideal. As to climate, the altitude is about 2,700 feet above the sea, no severe storms of any kind and work can go forward without discomfort during the entire year. There is near at hand an abundance of hard wood for fuel and timbering, and water sufficient for all purposes.

The improvements consist of a large mill with all necessary accessories and appliances, capable of handling 40 tons of ore a day; one 55 H. P. Ames Engine with boiler, etc., etc., all of which is properly housed in substantial buildings. There are two small engines with blowers, pipes and all necessary tools and supplies for conducting an extensive business.

On the Cleopatra Mine there are surface improvements, including frame hoist, blacksmith shop tracks, etc. On the San Miguel Mine there is a new gallows frame 42 feet high, a 50-ton ore bin, a new Fairbanks-Morse & Co. double cylinder hoist, a 40 H. P. tubular boiler, blacksmith shop, tanks, pumps, etc., etc.

In addition to the equipment for the mines and mills, there is an office building owned by the company, a two-room supply building, a two-room mess building, one large five-room boarding house, two four-room dwelling buildings and several other houses for the use of miners; a 3,500 foot 4-inch pipe line connects the San Miguel Mine to the mill.

There are over 12,000 tons of mill tailings which, when run through a Cyanide plant, will leave a net profit of over $30,000.

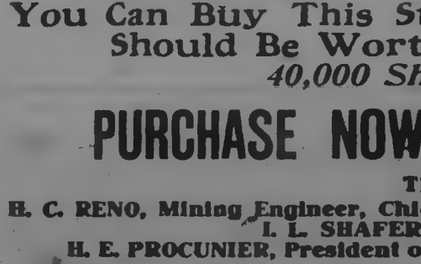
### DEVELOPMENT.

The men responsible for the Trinity Mining Company, before consenting to the sale of stock in this company to the public, felt it was not only a duty to themselves, but to the public as well to first prove these properties and see whether they were all that it was believed of them and to eliminate, if possible the element of speculation. They therefore developed the San Miguel and the Cleopatra Mines and blocked out ore in quantities sufficient, in their estimation, to guarantee themselves and investors against any possible loss, thus making the enterprise one of proven merit and not of speculation.

The development of these properties includes a shaft on the San Miguel Mine, 140 feet vertical, together with several other shafts on the vein to a less depth. There are over 2,000 feet of drifts and the ground opened up in this mine discloses a very strong vein, varying in width from two to twenty feet, and there is in sight a very large block of free milling gold ore, which, in places, runs exceedingly high. The ore is soft and can be cheaply mined and milled.

Development in the Cleopatra is extensive to a depth of about 125 feet. Ore in this mine is blocked out 60 feet wide, 400 feet long, and to a depth of 125 feet. This one block contains over 250,000 tons of ore which can be quarried and delivered in the mill for less than 40c a ton. Its average value is about $4.20 a ton and will pay a profit of about $2.00 per ton net.

There is a large amount of development and good ore bodies in the other properties. These properties together could easily produce from 300 to 500 tons of milling ore per day for many years.



Office and Supply Department.

### WHAT THE COMPANY NEEDS

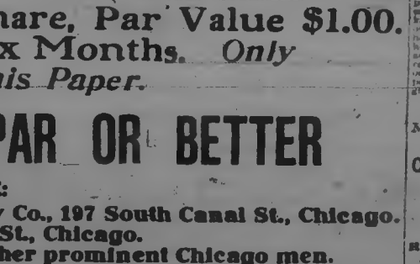
The company needs your subscription to its capital stock, and your money will be used for increasing the mill and other facilities for treating the ore in the mines controlled by the company, and it will be some satisfaction for you to know that the by-laws of this company specifically forbid the use of any of the money for the payment of official salaries or any other subsidiary purposes, except actual operation and its necessary incidents, and the acquirement of property.

The mill must be increased to 150 tons capacity. It is now only 40 tons and costs practically as much to operate as a large mill.

A tramroad should be built to the mines so that the ore can be delivered in the mill for 15c a ton instead of 60c, as it has been costing. A cyanide plant, which, as soon as installed will pay for itself twice over in profits from the tailings of the present mill.

For various purposes, the directors of the company have authorized me to sell 300,000 shares of the treasury stock, of which **40,000 shares have been set aside exclusively for the readers of this paper,** and no subscription for less than 25 shares will be taken.

The price is 50c a share cash or 55c if paid for on installments of 10 per cent down and 10 per cent a month. Par value $1.00 per share. Estimated value within one year, from $2.00 to $3.00 per share.



OFFICERS' QUARTERS.

## You Can Buy This Stock To-Day at 50 Cents Per Share, Par Value $1.00. Should Be Worth From $2.00 to $4.00 Within Six Months. *Only 40,000 Shares Allotted to the Readers of This Paper.*

# THE CHICAGO NEWSPAPERS ENTHUSIASTIC

## About the Trinity Mining Co. and the Men Behind It.

## READ WHAT THEY SAY

### CHICAGOANS SEEK MEXICO GOLD

**Opening of Large Mines Follows Inrush of American Capital.**

Special Dispatch to The Inter Ocean.

MAGDALENA, Sonora, Mex., May 16.—The gold belt of Sonora, which is in the western part of this state and one of the largest in the world, is now being rapidly developed by foreign capital, most of it from the United States and a part from England and South Africa. Large mines are now being opened and operated, particularly in the Minas Prietas and the Magdalena districts. The Colorado Cream, which has already produced $10,000,000 in gold, is now yielding a profit of $400,000 a year to its owners, who are Chicago and English capitalists. South African and American mining men are interested in the Grand Central mine at the same camp, which is becoming one of the big producers of this section.

The Trinity Mining Company, made up entirely of Chicago business men, owns a large mine twenty miles west of this town. This mine has been operating on a comparatively small scale and its milling plant is now to be enlarged and a big cyanide plant added. The company has large deposits of gold, with some silver and copper, and has its mine extensively developed. About $2,000,000 worth of ore is blocked out and ready to be milled.

*News Item from Chicago Inter Ocean, May 23d Issue.*

### PICKING UP MILLIONS FROM MEXICAN MINES

**Chicago Men Acquire Control of an Enormously Valuable Property at Sonora, and Predict That It Will Rival in Richness Anything in the Republic.**

"Only those who have had occasion to do business in Mexico can appreciate the kindness and friendly feeling with which the Mexican government and the representative men of the country regard American, and the protection and inducements they offer them to make investments there."

The speaker was H. E. Procunier, one of the directors of the Trinity Mining Company of Sonora, Mexico, and also president of the Moon Manufacturing Company of 47 South Canal street, Chicago. Trinity Company has acquired possession of a property in Sonora which expert engineers have pronounced to be of exceptional richness, and which promises to add another group of mines to the Chicagoans who have been made millionaires by investments in mines.

Mining," continued Mr. Procunier, "is like any other business. If a man is going to invest in a mine he wants to do the same as he would do in any other business—investigate it thoroughly. He has got to find out is the first place that the properties really exist, he has got to find out if they have value, and if they have, how much. Then comes the question of title and conservative Mexicanos. After these points be met and if the management is competent and if the controlling spirits are honorable. Given a favorable reply to all these questions, there is no reason why a man should hesitate any more to put money into a mining company than into a stock of groceries.

That is the way I myself acted before I put a dollar into the Trinity Company. I believe I put those plus we have got one of the most valuable mineral properties that exist, even in that prosperous mining country of Mexico, and that this property is within the next few years going to return millions of dollars to us in dividends. They go to ears high in value, and there is enough in our property to run us for scores of years to come."

Other Chicagoans who have joined Mr. Procunier in the Trinity mine are H. H. Latham of the Latham Machinery Company, 197 South Canal street; I. L. Shafer of Jukes & Shafer, 201 South Desplaines street.

*News Item from Chicago Examiner of May 24th.*

### CHICAGOANS EXPECT RICH PROFITS FROM MEXICAN GOLD MINES

**Local Capitalists Are Opening Large Gold Mines in Sonora.**

It is difficult to estimate the amount of gold which is sent from Mexican mines owned by Americans to the mints of the United States. The most active gold section in the Southern Republic is in the state of Sonora, which immediately adjoins Arizona on the south. It has been customary to ship gold bars from the mines of this belt to the American mint at San Francisco. A short time ago the Trinity Mines, which lies twelve miles south of Magdalena on the Sonora Railroad, and fifty-four miles south of the Arizona line, produced $5,000 of gold in two months. The product was molded into gold bricks or bars, taken by the manager of the mine to a large mercantile house in Magdalena, which ships a banking house. This establishment turned the gold over to the Wells Fargo Express Company, which carried it to San Francisco and delivered it to the Bank of California. The Bank of California then transferred the sum which constituted about $1,000 worth of the metal to the government mint.

In order to eliminate any inquiries which may arise for mere sentiment, and to settle at once any question of the metal the mint records the fact. The capacity of the gold bar thus accurately determined and the mint report sent in this case to the Bank of California. The bank forwards the report to Magdalena with a notice that the value of the gold bar has been deposited to the credit of the Trinity Mining Company in the Bank of California.

The Trinity Mining Company is a Chicago enterprise. Practically all the stock is held by Chicago men. Its president is Thomas F. Lawson, who is also interested in the Trinity property with Mr. H. C. Reno, well known mining engineer. The company has blocked out more than a million dollars' worth of ore and has been operating a small mill. It is proposed, however, to enlarge the capacity of the mill and add the cyanide plant. The cyanide process catches the fine gold which escapes when the original amalgamating plates are used. The company is to be enlarged and its operations very greatly increased.

*News Item from Chicago Examiner of May 25th.*

### CHICAGOANS GOING TO MEXICO TO INSTALL MINE MACHINERY.

**H. E. Procunier Talks of Gold Properties in Sonora Owned by Local Business Men.**

A number of prominent Chicago business men who have become interested in the Trinity Mining Co. of Sonora, Mexico, are contemplating a trip to that section shortly to witness the installation of massive modern mining machinery, which will be used to take out thousands of tons of rich ore already blocked out. Among the Chicagoans who are interested in the company are: H. E. Procunier, president of the Moon Manufacturing Company of South Canal street; H. H. Latham of the Latham Machinery Co., 197 South Canal street; I. L. Shafer of Jukes & Shafer, 201 South Desplaines street, and H. C. Reno, mining engineer.

Mr. Procunier, in speaking of the mines at Sonora, Mexico, owned by the Trinity Mining Co., said:

"Ours is a real mining enterprise, there is no wildcat speculation about it. The properties in Sonora, Mexico, exist, they have value, the title is clear, the capitalistic consistent, the management competent and the controlling spirits honorable. Before investing in any proposition people should always see that the above conditions are true. It is not always necessary to make a personal investigation of the property, especially well-known business men practically guarantee every representation made.

"The government of Mexico is specially favorable to American capital and safeguards it to the best degree. We expect to put our company on a plan of operation equal to any in the country and feel profitably in the future of Sonora. We have the money to do this and the public is taking great interest in our enterprise."

---

### AUSTRALIA'S IMMIGRATION

London, June 6.—The Postmaster-General of the Australian Commonwealth says: "The Canadian emigration boom has awakened us to the need of doing something to push Australia. Australia can offer as satisfactory prospects to the emigrant from Great Britain as Canada. Canada is nearer, but it must be remembered that the railways of Canada are in private hands, while the railways of Australia are in the hands of the State. The result of this, that when the emigrant arrives in Canada, the cost of transit to his destination in the interior is so considerable to the individual and the country, greater than if he had gone to Australia, where special facilities are afforded to immigrants on the railways. These things ought to be known, and preparations are being made with a view of placing the facts before intending emigrants."

---

### Moroccan Pretender Active.

Tangier, June 6.—Fighting between the forces of the Sultan and the Pretender has been renewed. The Pretender has driven back the Sultan's troops, inflicting considerable losses, and also has devastated the territory of the loyal Riff tribe.

---

### Human Bones for Sugar.

Chillicothe, Ill., June 7.—It became known today that human bones are being used in a local factory to clarify sugar. The city is taking gravel from an old cemetery, and when bones are uncovered boys take them to a junk dealer, by whom they are sold to the refinery.

---

### Gruesome Find in Vancouver.

Victoria, B. C., June 6.—In a mysterious trunk found in the rear of the new Canadian Pacific Railway hotel were discovered six skulls, one bearing a bullet mark and parts of skeletons. Some Chinese are believed to be informed as to the meaning of the gruesome collection.

## Do You Easily Tire?

**If a Day's Toil Exhausted Body or Brain, Find The Reason Why.**

We all inherit a disposition to disease. With one it's consumption, another heart disease, or perhaps nervousness.

At first you are languid, but as the fatigue increases, you lose appetite and spirit, feel as if work wasn't in your line.

Surely no clearer evidence of ill-health is needed.

Thousands have been in the same sickly condition; those who heeded us were sorry—those who used Dr. Hamilton's Pills were cured.

Your weakness proves germ life has eaten up the vitality of the blood, and a cleansing tonic like Dr. Hamilton's Pills is urgently needed.

At once your blood will redden and gain strength.

Digestion will so improve that additional nourishment will be supplied to all needy organs.

Surplus vigor will be instilled into the system till disease and weakness are completely driven out.

Truly wonderful is the tonic effect of Dr. Hamilton's Pills which are considered the best system purifier extant.

When you can renew your health with this safe vegetable remedy, the prescription of a noted physician, your duty is clear. Get Dr. Hamilton's Pills at once.

Remember this. It is the prescription of an eminent physician you use in taking Dr. Hamilton's Pills. Absolute safety and permanent results guaranteed in every case of languor, weakness, headache and debility.

Price 25c. per box or five boxes for $1.00, at all dealers, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U. S. A.

## TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS.

**Phonographs.**

Sold on easy payments at The J. M. Greene Music Co., George street, New Opera House Building, Peterboro.

**Mr. Walter Boswell Mentioned.**

Havelock Standard says: Mr. Walter Boswell, of Peterborough, formerly of Trent Bridge, and well known here, left on Tuesday, for Whitevale Lake, Alta., where he has a section of land, and where his son-in-law, Mr. Frank Cassan, is now located. Mr. Boswell will spend some time in the west.

**Wanted Immediately.**

Good sewing machine operators on power machines. Only first-class hands need apply. Apply to J. J. Turner & Sons, Tent and Awning Manufacturers, George street, Peterboro.

**Lakefield Fire Quickly Subdued.**

A few evenings ago the Dickson Co.'s saw mill, Lakefield, had a narrow escape from being destroyed by fire. A hot box set fire to a quantity of sawdust, saturated in oil, and in a moment the flames were bursting through the floor. A hose was quickly attached to the hydrant and the flames were extinguished in short order.

**Organ for Sale.**

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1168.

**Why Band Did Not Play.**

Owing to the band being engaged with the 57th Regiment in connection with the sham fight at Armour's Hill yesterday evening, the regular weekly band concert did not take place in Victoria Park. Still even with a circus in town there were a large number of people present. The public seems to have the idea that Mr. Larmouth's promises are o.k., and it seems as though they were right.

## Men Wanted.

Any number of Woodsmen wanted for Algoma Commercial Company, Sault Ste Marie, Ont. Highest wages paid. Apply to

GEO. J. CHALMERS
542 Water Street
or P. O. Box 831, city.

## LOCAL INCIDENTS

By The Times Man on the Street

—The Fire, Water and Light Commissioners met last night.

—A meeting of the Police Commissioners was held yesterday.

—No band concert was held in Victoria Park yesterday evening.

—Do you see the elephant yesterday. If not, take the gold cure.

—The police have a tape line that a gentleman found and wanded in. Who owns it?

—For bargains in stationery, fancy goods and notions see our window display. Times Bookstore.

—The directors of Little Lake cemetery have decided to allow no automobiles within the grounds.

—The primary and junior classes of Sunday school teachers have discontinued their meeting for the summer months.

—Long and Maher, the local electricians, had two attractive advertising conveyances in the circus parade yesterday.

—Rev. H. V. Mannheer, of Orono, formerly of Cavanville, has been elected secretary of the Bay of Quinte Conference.

—The Nicholls Oval Tennis Club held an enjoyable "tennis eat" at the Oval Thursday night. About 15 were present.

—The annual excursion of the Canadian Cottage and Manufacturing Co. will be held over the lift lock to South Beach, Clear Lake.

—Owing to the presence of the circus in the city there was a considerable falling off in the attendance at the schools yesterday.

—The local limbs of the law on June 20th entertain the local sons of Esculapius to an excursion via Str. Water Lily to Gores Landing, and other lake points.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—Messrs. W. F. Nelson & Co., real estate agents, have removed their office from Water street and will henceforth be found at the hardware store of Mr. W. H. G. Higgins, on Hunter street.

—Yesterday a well known farmer and horse breeder of Douro, was heard by a Times' representative to say, "Well Jim, them horses is the best bunch that Peterborough ever saw." And the farmer was right.

If you Stomach is Weak,
If your Food distresses you,
If you are Weak and Nervous,
Use Dr. Shoop's Restorative one month and see what it does for you. Sold by J. D. Tully.

—Yesterday at 8.30 a.m. a G.T.R. freight car ran off the track at corner of Bethune and Charlotte streets. This occasioned some delay to the street car service; however, Mr. Larmouth's staff quickly remedied the difficulty.

—The adv. of Calcutta' brewery, on the black camel's back yesterday, created some amusement and more notice. Should that camel feel he would certainly drain the river dry unless he ran across a keg of Calcutta lager.

**$9.00 New York and Return $9.00.**

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 9.56 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

**Worthy Son of Worthy Father Here.**

Mr. William Mitchell, press agent for Cole Bros. circus, paid The Times a call yesterday morning. Mr. Mitchell is a son of Mr. C. W. Mitchell for over thirty years, proprietor of the Ottawa Free Press, and is a gentleman who thoroughly understands the duties of his position. He is genial, courteous and obliging, and holds a warm place in his heart for members of the fourth estate.

Lax-ets—A Candy Bowel Laxative.
If you have Constipation,
If you have a coated tongue,
If you are dizzy, bilious, sallow,
If you have Headache, Sour Stomach, etc., risk 5 cents on Lax-ets. See for yourself. J. D. Tully.

## Great Sham Fight at Armour's Hill

**57th Regt. Passes Most Satisfactory Examination.**

Yesterday evening the 57th Regiment was inspected by Col. Gordon, of Kingston, district officer commanding for Eastern Ontario. The regiment assembled at Central Park and shortly afterwards Col. Gordon arrived, and was given the usual salute. The inspection then took place. The inspection completed, an exhibition of field tactics was given at Armour's Hill. The regiment was divided into two parts, an attacking and defensive section, the defensive party consisting of C and E Co's in charge of Captains Mills and Bennett respectively, in command of Major Hayes. The remainder of the regiment constituted the attacking party. The manoeuvres were gone through as quickly as possible in order that the return to the drill hall might be made in time to allow the men to attend the circus.

Brains Need Food

## Grape-Nuts

"There's a Reason"

Get the little book, "The Road to Wellville" in each pkg.

## SOCIAL AND PERSONAL

—Mr. James J. Little, of Montreal, formerly of Peterborough, is in the city on business.

—Lindsay Post: Mr. Geo. Southwell of Peterborough, was in town yesterday on business.

—Mr. Geo. Douglass, a leading Oddfellow of Pontypool, was in the city yesterday on business.

—Mrs. G. L. Stephens, Peterborough, has been here on a visit to relatives and friends.—Bowmanville News.

—Mr. and Mrs. T. Long were guests of the home of her mother, Mrs. W. H. Mitchell, Peterborough, over Sunday.—Millbrook Mirror.

—Mr. Thos. Shaw has accepted a position as travelling salesman for J. J. Turner & Sons, manufacturers, of Peterborough.—Sterling News Argus.

—Mrs. R. J. Weller of Peterborough and Mrs. Frank Reynolds of Hastings were in Campbellford for a brief stay this week.—Campbellford Herald.

—Mrs. Eugene Plouffe will not her post-nuptial receptions today and tomorrow, Thursday, 8th and 9th of June, at 173 Rochester street.—Ottawa Journal.

—Miss G. A. McClennan, of Deseronto, Peck & Kerr, left yesterday morning for Boston to attend the dedication of the First Church of Christ, Scientist.

—Miss Ethel Perkins, who has been the guest of Mrs. Turner for a few days, has gone to Toronto, where she will spend a few days prior to returning to Boston, Mass.

—Rev. J. J. Rie, of Picton, who has been elected president of the Bay of Quinte Conference, in succession to Rev. W. J. Jolliffe, is a former pastor of Charlotte street Methodist church.

## Mr. Norman Lewis Passed Away

**Sad Death of Former Peterborough Citizen.**

Yesterday Rev. Canon Davidson, rector of St. John's church, received by wire the sad intelligence that his wife's brother, Mr. Norman F. Lewis, 25 years of age, had passed away in Montreal.

The deceased gentleman was connected with the Bank of Commerce for the past eight years. He was born in Peterborough, the second son of Mr. F. J. Lewis, who for some eighteen years was manager of the local branch of the Bank of Montreal, and was afterwards moved to Montreal.

The deceased was well known and was very popular, especially as an althlete, and was one of the stars on the Bank of Commerce hockey team.

In 1898 he joined the Bank of Commerce staff in Montreal, and was moved to Toronto, then back to Montreal, and has held several subordinate positions in Simcoe, Barrie, and several other places. About two years ago he caught a cold while playing hockey, which turned to consumption. He was able to remain at his post, however, until three months ago when he was taken to his home. He died early yesterday morning.

He leaves to mourn his loss, besides a large number of personal friends and acquaintances, his young wife and many near relatives. The Times respectfully tenders its sympathies to those afflicted.

## Broken Wire is Quickly Renewed

**Yesterday's Accident Did Not Impel Circus to Break Faith.**

Yesterday afternoon as the wonderful tight wire performance was being got ready, by some oversight the thin, but marvellously strong, wire on which a lady and two male performers do a "cake walk," and other equally impressive performances, broke. As a sample of the way in which Messrs. Cole Bros. keep their promises, Mr. Mitchell of the company sent immediate messengers on horses to the supply car, on the G.T.R. siding and had a fresh wire stretched in time to keep the strict letter of the program. This act was seen and admired by too many thousands of our readers to require description—what we do call attention to the celerity with which an accidental and unavoidable accident was rectified so that the public should be kept faith with.

**Harold Knapman Bitten by Dog.**

Master Harold Knapman, the 11-year-old son of Mr. and Mrs. J. S. Knapman, London street, was badly bitten in the back by a neighbor's dog on Thursday afternoon. The boy with several companions, was playing about, when the animal without provocation inflicted a severe bite on the boy's back. A doctor was called and dressed the wound. It is likely that steps will be taken to have the dog either muzzled or destroyed.

## Another Request For Clemency

**Friends of David Doig Asking That Sentence be Put Aside.**

As noted, in a former issue of The Times, Mr. David Doig, the veteran junk dealer of this city, was recently sentenced to five months' residence, with consequent hard labor, in Castle Neabitt.

Mr. Doig's many friends, we understand, had asked his solicitor, Mr. McWilliams, the rising young barrister of this city to prepare a petition which will be circulated among the citizens. It is stated that of late years Doig has been endeavoring to lead a good life. He has worked hard and made for himself a good home. He has also kept away from trouble and now his home is left entirely in charge of two young children, who are not capable of doing the work. There are few but who will sign this petition when presented and full circumstances of the case explained.

## Are You, Tired, Nervous and Sleepless?

Nervousness and sleeplessness are usually due to the fact that the nerves are not fed on properly nourishing blood; they are starved nerves. Dr. Pierce's Golden Medical Discovery *makes pure, rich blood*, and thereby the nerves are properly nourished and all the organs of the body are run as smoothly as machinery which runs in oil. In this way you feel clean, strong and strenuous—you are toned up and invigorated, and you are good for a whole lot of physical or mental work. Best of all, the strength and increase in vitality and health are *lasting*.

The trouble with most tonics and medicines which have a large, booming sale for a short time, is that they are largely composed of alcohol holding the drugs in solution. This alcohol shrinks up the red blood corpuscles, and in the long run greatly injures the system. One may feel exhilarated and better for the time being, yet in the end weakened and with vitality decreased. Dr. Pierce's Golden Medical Discovery contains no alcohol. Every bottle of it bears upon its wrapper *The Badge of Honesty*, in a full list of all its several ingredients. For the druggist to offer you something he claims is "just as good" is to insult your intelligence.

Every ingredient entering into the world-famed "Golden Medical Discovery" has the unanimous approval and endorsement of the leading medical authorities of all the several schools of practice. No other medicine sold through druggists for like purposes has any such endorsement.

The "Golden Medical Discovery" not only produces all the good effects to be obtained from the use of Golden Seal root, in all stomach, liver and bowel troubles, as in dyspepsia, biliousness, constipation, ulceration of stomach and bowels and kindred ailments, but the Golden Seal root used in its compounding is greatly enhanced in its curative action by other ingredients such as Stone root, Black Cherrybark, Bloodroot, Mandrake root and chemically pure triple-refined glycerine.

"The Common Sense Medical Adviser," is sent free in paper covers on receipt of 21 one-cent stamps to pay the cost of customs and mailing *only*. For 50 stamps the cloth-bound volume will be sent. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets cure constipation, biliousness and headache.

## Rev. A. H. Brace Has Returned Home

Rev. A. H. Brace, pastor of Park street Baptist church, who has been assisting Rev. L. McKinnon, of Gilmour Memorial church at Selwyn Baptist church, in special services for the past two weeks, has returned to the city. Miss Ellen Pilling, vocalist, was largely instrumental in making the meetings agreeably successful. Many conversions were made, and two largely attended and impressive children's services were held. The revival was most successful, and cannot fail to bear good fruit. Revs. Messrs. McKinnon and Brace are much gratified with the result and the growth in church membership and spiritual power.

—Direct your friends who are are strangers in the city to the Times Bookstore for dainty souvenirs in china and burnt wood. Views of all places of interest hand painted on each. We also have books descriptive of the lift lock.

DRAW ATTENTION TO THE "NEW THEORY"

Over 75% Winners

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $10,000, the New Theory from the originator, who made a fortune through same and has now retired, and we therefore control the entire selling interest of this most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the New Theory," and have demonstrated that every racing season will bring enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your means increased by showing you its full earning capacity, which was the greatest secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously, and daily. There are no "ifs" and "ands" and we make our opinion the same.

### What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or hand book. Simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

### What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or chalces. We often win on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

**NOTE—**

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through years of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

**RESULT—**

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

### ABSOLUTELY INFALLIBLE

It earned $56,000 for the originator last season in four months, $63,000 two years ago, and $67,500 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successfully whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 160 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Nothing of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

**NOTICE:**

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)
(Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

**GUARANTEE—**

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours 9 a.m. to 9 p.m. Sunday by previous appointment.

## Terrible Scenes On the Congo

### Barbarities Practised by King Leopold's Soldiery and Their White Officers Recited By Missionary.

New York, June 10.—Recitals of almost incredible atrocities, cruelty and brutality are related by the Rev. R. H. Nassau, for forty-five years a Presbyterian missionary on the west coast of Africa, who has resided New York. His information concerns the Congo Free State, the personal property of King Leopold and not of Belgium, as is generally supposed. The missionary tells of hands and ears cut off and of barbarities practise by Leopold's native soldiers and their white officers.

"Certain sections of the Congo State have been depopulated fully 75 per cent. in the last twenty years," said Dr. Nassau, "and in spite of Leopold's efforts to renew the population at the expense of other sections the black race in interior Congo will have disappeared, practically in twenty years, if civilization, and particularly the Belgian government, doesn't stop the barbarities for which white men are directly responsible." Chicotting is common, but these whippings are mild punishment compared with other penalties.

TRIBUTE OR DEATH.

"Leopold's 17,000 black soldiers were selected because of their powerful stature," said Dr. Nassau. They are bushmen from the hills and hate the river tribes, over whom they are set to exact tribute, chiefly in rubber. This soldiery is established at twenty or more stations and officered by whites, few of whom have military training.

"Each village is required to furnish within a given time a stipulated quantity of rubber. Frequently the oppressed tribes are obliged to assign their women to rubber gathering to meet Leopold's demands.

"If the prescribed amount is not forthcoming one or more persons has an arm, leg or ear cut off as a penalty. Frequently several persons are killed if the alleged offence is "flagrant," while there are hundreds of instances where scores have been murdered in a single village.

"Worse than these wrongs is the debauchery practised by both white officers and their black soldiers. The soldiers have their wives in the stations, but on their collection trips they pick from the hapless tribes many women, the protests of fathers and mothers being answered by death or torture. The unfortunate women then have to choose death or a life of drudgery among their own people, which is the African code.

YOUNG WIVES TORTURED.

"A German officer caused one of his wives, a mere girl, to be lashed to a post, where he whipped her with hippopotamus hide. All night she was kept tied. On the following day honey was put upon the girl's wounds and she was left in the sun covered with bees, ants and other insects. At night the German officer beat her to death.

"In one village, which failed to give the full tribute in rubber, every inhabitant was murdered, excepting about a dozen women, who might better have died."

From the English-speaking world Dr. Nassau declares, help must come. He commends the movement being led in England by E. D. Morel and says reliance may be placed on the reports of Roger Casement, British Consul in the Congo. He calls Leopold's representatives in the Belgian parliament the king's "official apologists." He says the condition is a "shame upon civilization."

Dr. Nassau brings several cases of curios, some for Princeton University.

#### Liquor in London Camp.

London, Ont., June 11.—The London Temperance League has sent telegrams at the Military Department at Ottawa, complaining of the sale of liquor in the military camp canteen, stating that the regulations are grossly violated.

#### Canadian Northern in Toronto.

Toronto, June 11. — The Canadian Northern Railway Company have purchased for about $50,000 two more blocks of land on Beachell street for purposes of their eastern entrance into the city, and for the new freight shed they are to erect between Trinity and Beachell streets, on Eastern avenue and Front street. This purchase completes all the land the C. N. R. requires for its entrance and freight sheds.

#### Russian Giant Coming.

London, June 11.—The Russian giant Machnow, who is 9 feet 3 inches tall, and who was engaged for exhibition purposes in New York, after showing here, balked at the last moment, owing to his unconquerable aversion to the sea.

He had taken a train for Dover to embark on the steamer Pretoria, but on arriving here he refused to leave the railway car. His wife added her tearful entreaties and persuasions to those of his agent, but the giant was immovable. Finally twenty members of the Pretoria's crew were sent ashore to remove Machnow from the car.

He resisted and put up a long and tough struggle. Ultimately he was carried up the gangway amid the cheers of the crowd. He is now en route to his destination.

## 57th Regiment In St. John's

### Church Parade Well Attended Last Night.

The 57th Regiment attended divine service at St. John's church last evening. The regiment and bands are to be congratulated on their splendid military appearance. They furnished out over 300 strong, and the grand old historic church was taxed to its utmost capacity to accommodate the large attendance of both militia and civilians. The service was of a very appropriate nature, and heartily joined in by the congregation.

The good old patriotic inspiring British national anthem, sung with a much appreciated heartiness by Peterborough's volunteer defenders of not only this Canada of ours, but also, if needed, of the great empire on which the sun never sets, made the sacred edifice ring with demonstrative loyalty again and again.

Col. Miller of the regiment, read the first lesson, and Mr. K. Bardley-Wilmott read the second lesson. The rector, Rev. Canon Davidson, also chaplain of the regiment, preached an exceedingly appropriate sermon from Joshua 18, verse 3—"And Joshu said unto the Children of Israel, how long are ye slack to go to possess the land which the Lord God of your fathers hath given you?" In the course of an excellent discourse, the rev. gentleman applied his text to military matters and urged his hearers to avoid slackness in both christian and military duties, to cultivate a prompt response to the call of duty, and to aim at precision in all things.

## Did Not Punish The Newspaper Man

Ottawa, June 9.—The Government members made merry yesterday over the trial of Mr. Foster's complaint respecting the alleged libel by La Presse.

When Mr. Cinq-Mars appeared at the bar he was greeted with loud applause, and there was a disposition to howl down Mr. Foster when he moved that the clerk of the house should read the libelous article. The article then was read in French, and Mr. Buckam, Selkirk, moved to read it in English. The Opposition objected to this, as parts of the article reflected upon other members. Mr. Cinq-Mars, when called upon to explain said he wished to consult counsel. The whole affair was enlarged for a week. This will probably end the matter.

During some brief remarks the Premier inadvertently referred to Mr. Cinq-Mars as the prisoner, over which there was much fun.

#### Cost of Electric Smelting.

Ottawa, June 9.—Hon. Frank Oliver has received from Dr. Haanel, Superintendent of Mines, a preliminary report on the Government electrical ore smelting experiments at Sault Ste. Marie. The report, after setting forth the conclusions reached as a result of the experiments, gives the cost of production per ton of pig iron by electric process at $16.89, and the estimated cost of establishing a 10,000 horse-power plant producing 120 tons of pig iron per day of twenty-four hours at $700,000.

#### Huge New Cheese Industry.

Toronto, June 11.—Representatives of a New York syndicate, George A. Walters, Ernest Jacobs and August Hammerstein, are here looking over the ground for the establishment of a $500,000 cheese-making industry in Toronto or vicinity. It is proposed to operate on a large scale, the increasing number of electric and radial lines being especially suitable for the delivery of cream. Before giving any decision regarding the final disposition of the factory, the representatives will visit other centres in Western Ontario.

#### Ammunition for Rebels.

New York, June 9.—A Panama despatch to The Herald declares that passengers and officers of the City of Para, Pacific Mail, which reached Panama yesterday, say that while at Corinto, the American ship Empire, flying the American flag, was taking on coal with the knowledge of the Nicaraguan Government and left that port on June 2 to bombard San Jose, Guatemala.

There were 1,000 rifles and 1,500,000 rounds of ammunition aboard, and the ship had machine guns mounted. The revolutionists aboard were under command of Gen. Castillo.

#### Rushing Work at Ottawa.

Ottawa, June 11.—It is believed in some quarters that the present session of the House of Commons will be brought to a close by the end of June, or by the end of the first week in July at the latest. It is probable that the House and committees have never worked harder than during the present sessions. Very few days have been wasted. The debate on the Lord's Day Bill will take several days, but this will probably be the only prolonged debate which will occur between now and the time the House rises. Many members on both sides of the House express the opinion that the remaining business can be disposed of in three or four weeks.

#### British Teachers' Visit.

London, June 11. — Alfred Mosley's scheme to send five hundred school teachers, to Canada and the United States on a tour of inspection excites much interest. Discussing the subject with a press representative, Mr. Mosley says that no fixed programme has been arranged for those teachers who decided to visit Canada. They may go just where they please through the rural schools, colleges, universities, etc., as seems best to suit their search for information. Committees will be formed to show the visitors about in different places. The teachers are of all kinds from professors and public school men to elementary ones.

## SAILORS REFUSE CANNED MEATS

### Atlantic Squadron of the United States Declares Against Chicago Products

### BUSINESS LOSSES GREAT

#### Cattle Breeders' President Scores President Roosevelt for Publishing Reports.

New York, N. Y., June 9.—Sailors of the battleship and armed cruiser squadron and torpedo boat flotillas of the Atlantic fleet declare that when they assemble in New England waters a few weeks hence for annual summer manoeuvres they will not eat canned meat. This stand is taken because of the packing house revelations. Under regulations canned meat must be served up at least three times a week when ships are at sea and there is no reason to believe the regulation will be revoked. Commanding officers of the various ships under Admiral Evans will have no alternative but to place it before the men. While they are in port the men eat fresh meat.

Kansas City, June 9.—It is estimated that business done by packing houses located here will suffer to the extent of $10,000,000 as a result of the agitation in connection with the president's crusade against "doctored" meats. Reports from various points agree that the business of the whole country would show loss of at least $50,000,000.

Salt Lake City, Utah, June 9.—The Herald today publishes a letter from President Frank J. Hagenbarth, of the National Live Stock Association, which says in part:

"I must be presumed that the President of the United States is too big and broad a man to feel chagrin because of the fact that Commissioner Garfield's report exonerated the packers from certain imputed delinquincies and it cannot be thought that he harbors revenge because Judge Humphrey's decision was a measure of defeat for the Government. Nor can it be presumed that, because he failed on these two former occasions, that the President, anxious to make a record to win out, chose the present method of doing so."

Mr. Hagenbarth declares that the Neill-Reynolds report concerns principally particular occurrences and not for general conditions.

### POLICE NEWS

Daily Happenings in Court Room and Station.

Much interest was taken at Saturday's police court in the trial of a Monaghan farmer, named W. A. Nurse, charged by fishery inspectors D. Johnston and Tenison Guerin, with catching fish in the close season. Mr. Nurse only got three medium-sized bass.

Nurse pleaded not guilty to the charge of catching four bass on May 25th, claiming he found them on the bridge, where he alleged they had been left by someone else.

Evidence was given by Messrs. Nelson Nurse, Harry Clemes, George Watkins, and T. Guerin, a fishery inspector.

The bass were caught in a net at Woodduck Creek, the net being seized by Mr. Guerin.

In giving judgment, the magistrate said: "The judgment of the court is a fine of $10 and $15.25 costs to be paid forthwith, or in default of payment, 60 days in jail with hard labor." The magistrate said it was a heavy punishment for a few fish, but he was going to stamp out this disregard for law. He further noted that the farmers in that section of the county persistently defy the law and have a series of pickets out on watch for the fishery inspectors. He thought that a good heavy fine would put them in fear of the law.

Nurse, who only had about $45 with him sent out and cashed a cheque for the balance.

## Capitalists From Buffalo

### Gentlemen Interested in Big Dipper Mine in the City.

Messrs. Daniel Weiss and John G. Hero, Buffalo capitalists, largely interested in the Big Dipper Mine, were in the city on Saturday on their return from the mine, which is situated in Barrie township, Frontenac county.

Mr. Weiss expressed himself as greatly pleased with the result of his inspection of the property, saying he found everything beyond his expectations. He panned ore at different openings, and in every pan tried found gold in good quantities. The provincial inspector of mines was there on Wednesday last and he pronounced the shafts, which is about 70 feet deep, in the best shape of any he had ever inspected. The company in developing the property, have spent the money judiciously and to the best possible advantage. The vein on the Big Dipper property, which is now being worked, is between the limestone and granite walls.

## 1,000 Toronto Visitors Here

### East Toronto Orangemen Spend Delightful Day in the City.

Peterborough on Saturday, was invaded by about 1000 Orangemen and their friends from East Toronto, who took in the sights and enjoyed a trip in the steamer Water Lily over the lift lock. A special train of six coaches was run over the C.P.R. arriving here about ten o'clock after a very fast run. There were on least 650 on board, and in addition 300 more arrived on the C.P.R. noon train and on G.T.R.

The excursion was run under the auspices of the district lodges of East Toronto, and District Deputy Master J. Winnett was chairman of the committee in charge of the outing.

The Orangemen had no special program of sports, but decided to let the excursionists do as they pleased.

The steamer Water Lily was engaged and left the Wolf street wharf at one o'clock for the first trip and made three or four trips during the afternoon and evening.

A large number of the visitors in town spent the day with friends and relatives, while many others enjoyed the many beautiful parks in and around the city, and quite a crowd went down the river. The Water Lily however, drew a big crowd, as very few on the excursion had ever seen or been over the lift lock.

Diamond lodge L.O.L., threw open its lodge rooms on Simcoe street, for the benefit of the Toronto brethren, and this was made the headquarters during the day.

Among some of the prominent Orangemen here are District Master W. Steens, District Secretary Wm. Forrester, District Treasurer J. D. Farquhar, District Financial Secretary W. J. Chick, and Masters of the local lodges, James Greer, John Thompson, jr., J. B. Hutchison, C. P. Watson, C. A. Vine, Robt. Reinholt, T. W. Self and W. Chambers.

Their excursionists left by special train at eight o'clock, all present expressing themselves as highly delighted with their visit to this city.

#### Linevitch in Trouble.

St. Petersburg, June 11.—At the instance of General Grodekoff, who succeeded General Linevitch in the command of the Russian army in the far east, and General Rennenkampf, the celebrated commander of Cossacks, the Government has entered an enquiry into the relations of General Linevitch with the political strike in Siberia last January.

The railway lines of the Trans-Baikal and Usuri regions were in the hands of the strikers, and it will be remembered that Linevitch entered into negotiations with the strike committee, recognizing its executive authority.

This is the first time in Russia that a prominent military leader has been charged with abetting political disaffection. General Linevitch, who was at one time the favorite of the whole army, still retains the sympathy of the line regiments, but has lost that of the Imperial Guard.

#### Some Ugly Charges.

Vancouver, B.C., June 9.—The suspension of Police Chief North because of the "inefficiency of the force under his command" has led to the publication of ugly charges of alleged graft in the restricted district, it being claimed that women have paid what is called "protection money." There is nothing in these allegations personally implicating North, who is an Ontario man, whose personal honest has never been doubted.

A suggestion that the new chief will come from Toronto has led to letters being published in the local press, protesting against "so many positions being filled by importations from the City of Churches." One writer says it would be much better to have as chief a man from the Pacific Coast, and urges that an adequate salary be offered which North certainly did not get.

## DOCTOR EXPLAINS

### His Article in the Medical Magazine About Coffee.

One of the most famous medical publications in the United States is the "Alkaloidal Clinic" in a recent number of which an entertaining article on coffee by a progressive physician and surgeon was published. In explaining his position in the matter this physician recently said:

"In the article in question I really touched but lightly upon the merits of Postum Food Coffee. I have had several cases of heart trouble, indigestion and nervousness where a permanent cure was effected by merely using Postum in place of coffee without any other treatment.

"In my own family I have used Postum for three years and my children actually cry for it and will not be satisfied with any other beverage. Indeed they refuse to eat until they have had the customary cup of Postum and as it is a rebuilder and does nothing but good I am only too glad to let them have it.

"To get the best results we boil the Postum at least 20 minutes and it is then settled by adding a little cold water, then the addition of fresh cream makes a beverage I now prefer to the very best coffee." Name given by Postum Co., Battle Creek, Mich.

Authorities are agreed that Postum is a wonderfully quick and sure rebuilder ten days' trial in place of coffee proves it.

Look in pkgs. for the famous little book, "The Road to Wellville."

## Charity Greater Now Than Ever

### More Earnest Expressions of Hope for Union of Churches Expressed by Denominational Representatives.

London, June 10.—Following up the pal Patrick of Winnipeg said that visit Friday afternoon of the Anglican charity between the churches was deputation in the interests of church growing. There was nothing except union, the feature of yesterday morning's session of the Presbyterian general assembly was the visit of a deputation from local Methodists and Baptists, consisting of four Methodist ministers and two Baptists.

Rev. Dr. Daniels of Colborne street Methodist trusted that church union would not always be in the air, but would become material. The spirit of it was in all hearts. He tendered greetings from the Methodist Church to the Assembly.

Rev. James Livingstone of Wellington street Methodist Church said this was a cosmopolitan age. The spirit of good-will existed between the Methodists and the Presbyterians. Their questions were the same.

Rev. J. J. Ross of Talbot street Baptist Church spoke as a representative of the Baptist Union. He reviewed church doctrine and history. Both churches, he said, stood for individual constitutional national freedom. He believed that before a union that could please God could come about, there must be a more intimate fellowship with the risen and ascended Lord, and deeper spirituality in the hearts and lives of Christians.

Replying for the Assembly, Principal Patrick of Winnipeg said that charity between the churches was growing. There was nothing except the vital truths of Christianity he would not surrender for the unity and progress of the whole.

Rev. J. A. Macdonald, Toronto, spoke also.

Later, Dr. Dickson of Galt, and Mr. Macdonald must have some difficulty in editing the Globe in maintaining the ideals of truth and independence he had expressed.

The report of the Sabbath school publications committee was submitted by Dr. Fraser. School papers are progressing, he said. There was need of a new quarterly next to the primary. Dr. Ramsay, Ottawa, moved the adoption of the report, and Dr. Dickson of Galt, seconded.

The Sabbath school publications committee reported that circulations have largely increased and four new illustrated periodicals were added during the year. Notwithstanding the large expense involved in these new ventures the excess of assets over liabilities was $15,239.92, an increase over last year of $3,533.45. It was resolved, however, to form a rest fund at an early date, so as To secure the business against any possible contingency.

The assembly adjourned on Saturday till Monday. During yesterday afternoon the delegates were entertained on Sheriff Cameron's grounds by local ministers and their wives.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

BOWLING.

In view of the President vs. Vice-President contest, to be played this afternoon, skips will please arrange to play five a side in the afternoon and five in the evening. Players that can possibly get off for the afternoon game would do well to let any of the skips know of their intention to do so.

BASEBALL.

A peculiar thing happened in the Eastern League games played on Saturday, that all the losing teams were blanked. The games resulted as follows:

Montreal 4, Jersey City 0.
Rochester 7, Newark 0.
Providence 5, Toronto 0.
Baltimore 6, Buffalo 0.

LACROSSE.

The lacrosse games in the N.L.A. on Saturday resulted as follows:

Torontos 6, Montreal 3.
Tecumsehs 6, Shamrocks 4.
Cornwall 8, Capitals 4.
National 10, Quebec 6.

In the junior C.L.A. lacrosse match played at Oshawa on Saturday, between Peterboro and Oshawa, the score was two all at three-quarter time, when the Peterborough team left the field to catch a train. The referee gave the game to Oshawa by default.

## Being Sued for Breach of Promise

St. John, N.B., June 10.— George Rowley, 84 years of age, a retired carpenter, residing in the west end, has been sued for breach of promise by Ethel Grace Gibbon, a young lady about 25 years old, a native of Bayswater, but who has for the last few years been acting as nurse in Boston hospital.

The case will come up for hearing at the next sitting of the circuit court on the 19th of this month, before his Honor Judge McLeod. The action is for $10,000.

Rowley visited the girl's home last spring and fell in love with Miss Gibbon, who, believing he had money, readily accepted him.

His relatives, growing suspicious, advised the old man not to trust her and he broke off the engagement. She asked him to burn her letters, which he promised to do, and she, believing all obstacles were removed, promptly brought suit. However, relatives prevented the old man from burning the letters and, as they are somewhat sensational, it is expected the case will be one of unusual interest, as the girl would not have brought suit had she known the letters were in existence.

#### Jury Declined to Call it Murder.

Brockville, June 9.—In December last a young married Englishman named Allan died at Lansdowne. Circumstances arose lately which led to the suspicion of poisoning. The body was exhumed and the stomach sent to Toronto for examination. Traces of poison were found, and the final inquest was held yesterday. The jury found that Allen died from the effects of poison, but while acknowledging that the evidence pointed somewhat to its administration through malice aforethought, declined to say whether that was the case or that the poison had been taken in foods.

## A POPULAR HOTEL

### The Snowden House So Regarded By Travellers.

(To the Editor of The Times.)

Dear Sir,—As I am just about to leave Peterborough, after a brief stay at one of your smart hotels, will you allow me to say a few words of praise re your Snowden House.

I am an Englishman and have seen much of hotel life, more especially in Liverpool, where I belong, and many other English cities.

I am sure I may safely say that the Snowden House is one of the very cleanest, and smartest little hotels I have yet seen since I came into Canada.

It is splendidly conducted in every respect and is a credit to your fine little City of Peterborough.

Thanking you, Mr. Editor, I am,
Yours truly,
J. G. DICKINSON,
Liverpool, England.

## MR. FESSENDEN'S NEPHEW

### Depictured in Toronto Globe as Leading U. S. Engineer.

The pictorial section of the Toronto Globe of Saturday, contains an excellent photograph of Mr. R. A. Fessenden, engineer, Washington, D. C., a nephew of Mr. C. Fessenden, principa of the Collegiate Institute. Mr. Fessenden is one of the most prominent engineers in the United States, and his photo is included in a Group of others classed as Canadians in the United States.

## People Will Seize the Land

St. Petersburg, June 10.—The demand for opportunity to speak on the agrarian question in the lower house of parliament is so pressing that the rule against the house sitting on Saturday has been abandoned and the debate on this important subject was resumed yesterday. Every member seems to feel that he should make known the views of his constituents upon this issue. The leaders of the Constitutional Democrats realize the necessity for action and dare not propose to close the debate, as that would savor of restriction of the sacred right of free speech.

A month has elapsed since parliament met and the agrarian question is not consigned to a committee which must be done so that details of bill may be elaborated. The few conservatives no longer attempt to defend their views and by tacit consent the Constitutional Democrats who feel certain that their program will prevail are abandoning the field to the radicals who continue to urge the full nationalization of land.

Mannikin, one of the peasant leaders, declared that the theory that the peasants are conservative is utterly fallacious. They were now as firmly convinced that the land belongs to them as they were in 1861 that servitude should cease and were utterly incapable of grasping the idea of provincial property in land. He concluded:

"We were elected to give the people land and liberty. We find it necessary to expropriate property, all confiscate the lands of the crown and church. The government must beware or soon it will be too late, and the people will take the land if the government refuses to give it."

Prof. Vaslesky and several members of the lower house supplemented the action yesterday in accepting the government's decision to insist on a month's delay in the case of death bill by addressing an open letter to the emperor applying to him in the name of justice and humanity to suspend all action until the question of the death penalty is finally decided.

## Your 'Fagged' Feeling is Spring Sickness

**This Unhealthy Weather Will Intensify Your Exhaustion Unless You Have Good Medicine.**

Time won't help; matters grow worse instead of better if your system isn't rid of its poisonous burden.

Your blood is not only thin, but is contaminated with a whole winter's accumulation of wastes.

A stimulating blood tonic is required.

What's it going to be?

No bitters or alcoholic dope, but concentrated cure in the form of "Ferrosone" which is known as the best of all spring rejuvenators.

It creates keen appetite.
Produces prodigious digestion.
Converts food into nourishment.
Gives richness and vitality to the blood.
Makes strong nerves and hardy muscles.

Ferrosone possesses power that can't be doubted. It will do for you what it did for Walter Wood, of Beaufort Car Co., N. B., who writes: "I can say that Ferrosone has given me a new lease of life. A year ago I suffered much from nervous weakness. I was really scarcely able to drag myself around. My appetite was gone, I had no color or ambition and felt generally used up. The first box of Ferrosone started me back to health. I took a number of boxes, but it was worth while as my health was completely restored."

Get back to health with Ferrosone. Your druggist sells it, 50c. per box or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

PETERBORO, JUNE 11, 1906

### THE RIGHT KIND OF MEAT INSPECTION

It is comforting to learn from Sir Richard Cartwright that the Government is preparing to deal with the question of meat inspection to the full extent of its power, says the Montreal Star. There is no other question more uneasily at the top of the public mind just now. Such terrible revelations with respect to the great packing establishments of the meat exporting capital of the world, must lead people to ask questions with respect to other similar establishments; and the Government is exactly the party to secure the answer to these questions with independent and courageous thoroughness and then to publish the answer with authority. Who would have paid anything like proper attention to the Chicago revelations if they had come from any less source than the Federal Government? And from what other source can now come reassuring statements of reforms and a satisfactory permanent inspection?

Our Governments—be they Federal, provincial or municipal—which have power to deal with this question, should act promptly and publicly. About all we have been told thus far is that our local inspection is valueless. This leaves a great deal more to be done—if not to be said. It is hardly a matter upon which the meat packers can speak for themselves; or upon which any superficial, "personally conducted," whitewashed-while-you-wait report can be very reassuring. Sir Richard Cartwright should be in a position to tell us at once what his Government proposes to do; and it might at the same time consider whether it might not do something to protect our people against Chicago meats prepared under past conditions.

### A COSTLY WEDDING

The Spanish wedding the other day was a costly one in money as well as some other things. It is estimated that the outlay reached $10,000,000. This includes, of course, both government and private expenditure. For the government, in decorations, the restoration of State coaches and trappings, new harness and other things. Then the Prado palace had to be fitted up for the occupancy of the bride and groom, and this, it is estimated, cost not less than $1,250,000. This, of course, was a government outlay, and a pretty expensive one for a country like Spain. Another pretty penny was spent by the large group of noblemen, some 2,500 in number, who felt that the old uniforms and court dresses would not at all answer for such an occasion as a royal wedding, so they spent some $500,000 for the purpose of being refitted, and in consequence presented a most gorgeous appearance, as befitted the occasion. The great expense, however, was incurred by the women for gowns and jewels. It is estimated that not less an amount than $3,500,000 was paid out to milliners, dressmakers and jewelers. One dowager duchess bought a new tiara for the occasion, for which the price paid was not less than $50,000. Then the troops had to have new uniforms, which cost the government the pretty sum of $150,000. The Spaniards are counting themselves lucky that the wedding didn't cost the lives of the bride and groom, and they are not begrudging the money cost.

## Grocers Capture Medicine Trade

Ottawa, June 8.—Mr. J. E. Tremble, President of the Pharmaceutical Society of Quebec, went before the Parliamentary Committee on deleterious medicines yesterday and affirmed that he did not think more than five per cent. of the druggists in Canada would dispense injurious drugs. He combatted the evidence of Dr. Duke of Montreal, who said druggists were too eager to sell cheap goods regardless of their quality.

Mr. Tremble gave the opinion that the soothing syrups contained opium and morphine. He would not give them to his own children. He considered that no medicine should be handled if it contained an impure ingredient, even though the impurities were not injurious.

Mr. R. W. Williams, of Three Rivers, druggist, affirmed that the patent medicine business had gone to grocers in recent years. He thought patent medicines had a legitimate place in commercial economy. Generally they gave good results.

## To Make Dreibund Look Formidable

Vienna, June 8.—Telegrams exchanged yesterday between Emperors Francis Joseph and William, on the one hand, and the King of Italy on the other, evidently were drawn up with the view of discouraging a continuance of the reports of coldness between the German Emperor and King Victor Emmanuel, and the consequent weakening of the Dreibund. The two emperors telegraphed jointly as follows;

"As two allies we send to you, the third, a sincere united expression of unalterable friendship."

The Italian King's reply was equally warm-hearted. He telegraphed; "I share your satisfaction for unity and beg that you will accept the assurance of my true and inviolable amity."

### Had Skull Fractured.

Chatham, June 9.—Henry Bessont, of Highgate, was struck on the head and his skull fractured by a falling 50 pound weight yesterday. He is now at the General Hospital here. His injuries may prove fatal.

### Warning Against Gamblers.

New York, June 9.—A formal warning to passengers to beware of professional gamblers on shipboard was published in the official passengers list of the White Star steamer Majestic which arrived here today from Liverpool and Queenstown.

### Accident May Prove Fatal.

Owen Sound, June 9.—Alex. Holmes, a married man, aged 55, was accidentally caught in the shafting at the Sun Cement Company's works, and had an arm torn off near the shoulder and three ribs broken. He is in a critical condition.

### Moors Consider Us Dirty.

A habit of our own which we consider far more cleanly than eating with our fingers is looked upon by the Moors as filthy—that is, washing our hands or face in a basin and, still more, taking a bath where the water is not running. The cleaner we become, they say, the dirtier the water we are washing with must necessarily become, and eventually we step forth as cleansed from water which is no longer clean. A Moor to wash his hands has the water poured from a vessel over them and never by any chance dips them into the dirty water. The same way in their baths. The water is thrown over their bodies out of bright brass bowls and flows away through holes in the marble or tile floor.

### The Harvard Cross.

The iron cross burnished with gold which is over one of the entrances to the Harvard college library (Gore hall) was at the time of the 1745 siege of Louisburg taken from a Catholic chapel there and brought to Massachusetts as one of the spoils of victory. In 1877 Justin Winsor, the librarian of Harvard college library, found it in the cellar of the library and had it gilded and placed in the position which it now occupies.

# STOCKS - THE MARKETS OF THE WORLD - BONDS

*We call the attention of our clients to the fact that*

**BULLFROG RED OAK CO. STOCK**

We call the attention of our clients to the fo the fact tha

**WESTERN UNION OIL STOCK**

Buy this stock NOW before further radical rise takes place. which we advocated for purchase at 60c., is now $1 to and with the advance but just begun.

**FAIRVIEW CENTRAL MILLING CO. Stock at 15c. per share**

which we urged our clients to purchase at $1[illegible] per share, is now $40 bid, with a few lots offered under $480. Western Union Oil is a conservative investment at this price.

Of the cheaper stocks, we now recommend without hesitation

payable 1-3 cash, 1-3 in [illegible] days, and 1-3 in 60 days from date of purchase.

Situated in the heart of a new and phenomenally rich district of Nevada, FAIRVIEW bids fair to rival the very richest of the older Nevada camps.

FAIRVIEW CENTRAL gives promise of uncovering high values, and under the conservative business management of its officers will be one of the GREAT MINES OF A GREAT DISTRICT.

But this stock and hold it for a permanent investment.

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

lant old breast. When he settled back in his seat his hands trembled greatly, clasped atop his sword. The huge chariot, drawn by four wild ponies that would go at any gait except trot together, swung swaying from its leathern springs, and the road seemed very long.

"Are we almost there, Joe?" he asked more than once.

And the old negro riding behind him would reply stoutly, "Almos' dar, Mars' Torm; almos' dar."

The fog, fold on fold, shut out the beauty of the way. Lower in the wooded valley the shadows lay very thick, like dead men strewn on a battlefield. Riding, he heard the leaves fall, like the illusions of youth, like happiness, like glory, like power.

"Almost there, Joe?"

"Almos' dar, Mars' Torm; almos' dar."

Up the craggy way a flicker of light stabbed down through the drab-lace tree traceries, and the chariot, turning in to the clearing amid clamorous dogs, woke the cloistral silence of Greenway Court. A negro came out, beat back the dogs and let down the step, and the old man descended, leaning on Joe's arm.

Joe brought my lord his supper of venison and bordeaux, standing behind his chair till his master was done. This was not long tonight.

My lord took up a book, but threw it down again. Then he lit his pipe and sat long silent till the fire domed blackening. Joe came in, piled pine knots on it and went shuffling out again. The hounds yawned about the hearth or whimpered softly in their dreams.

Crackling steps roused them, and they scrambled out to bay and sniff and yelp, when the negro clubbed them back.

A heavy tread stumbled up the steps. An aged mastiff, curled under the old man's chair, hunched shoulders, growling, and the baron, sitting by the dead hearth, with the ashes fallen from his pipe, turned his head.

Henry stood on the threshold, carrying Armand in his arms.

As his bearer stood, rocking, the young man stirred, opened his eyes wide on the baron and thrust down his legs. "My lord," he cried gayly, but with weakness and husking breath, "I come early to — keep — my — appointment." He took a step and lurched forward on to the floor.

Lord Fairfax stood up like a blasted tree with two dead boughs left swinging. "Great heaven! The lad! Has Foy killed him?"

"Not yet," Henry answered. "No fault of his, my lord."

The baron shouted for his servants and for cloths, hot water and lily vinegar. "He must have a leech," he said.

"I will ride myself for the doctor at Ashby's Gap," Henry answered. "But I will dress the wound first." With Joe's help skins were spread on one of the couches and Armand laid thereon. Then, with a woodsman's knowledge of wounds, Henry drew his knife and cut away the clothing.

"It is not mortal?" asked the old man anxiously.

"No. But 'twas a foul lunge. Think not he was the poorest swordsman. Never was such a skill seen in the Virginias as he showed this night."

"Is it so?"

"Sir, he held that rat's life on the point of his steel. I swear to you he could have run him through a score of times an he would. They stopped the duel—soldiers from the fort—and that red devil of Dunmore's attacked him when he had thrown his weapon by and was empty handed."

"Ah!" cried the baron.

At length Henry stood up. "I am off to the Gap now. I shall not return with the doctor, since I must go on to Williamsburg tomorrow. But for safety's sake I shall pray him speed."

A struggle showed in the baron's face. No one had ever gone unbeseemed from his door. He kept open table at the Winchester courts, fed the poorer settlers with his own produce and would have doffed the ragged hat of a beggar with guineas. One passionate hatred he had—hatred against the enemies of his king. All were alike to him, high or low. The times, growing beyond him, had put forward patriots. But, all alike, he deemed them vipers that bit the hand that fed them.

As Henry approached the door my lord was fidgeting in his chair. The hand was upon the latch when he could restrain himself no longer.

"Joe," he thundered, "fetch a stirrup cup! You may be a rebel, sir, but, blast my whips and spurs, you shall drink before you go! I could wish you were not an enemy of the king."

"Not of the king," said Henry, and smiled. "Not of the king, but of the king's rule."

A gleam of fierceness, of the uncompromising principle of his life, shot from under the old man's brows. "I hold with no disloyalty."

"I hold," said Henry in a low voice, "with my friend Colonel Washington."

"I abet no treasons," flamed the old man.

Henry's eyes hid a sudden gleam of satiric humor. He stretched out the glass the negro had brought him and proffered it to his host.

"I must decline," he said, "to accept hospitality from any man on earth who has aught to say against the character of Colonel Washington."

The baron stood for a moment with his jaw dropped, then coughed. "God knows"—he said, his voice shaking like a child's—"God knows I"—

But he got no further. "My dear Lord Fairfax!" exclaimed Henry, and drank the glass at a draft.

CHAPTER IX.

IN the gray wreathed dawn Lord Dunmore, at the head of his Virginia troops, marched off with fife and drum for Fort Pitt, and the buff and scarlet passed the King's Arms, where Anne peered from the window to see them off. In one of the scarlet groups she distinguished Francis Hyrd. Drawing the curtains close under her chin, she put out a hand and waved to him, smiling, and he saluted her face with a flash of his sword and a wistful look as he rode by. Immediately behind the governor, near Jarrat, rode Foy, and a sting of resentment made her clinch her hands, with the steel in her eyes.

When they had gone she crept back into the warm bed and lay smilingly thinking. She should see Armand soon again, and he should never know what she had done. So thinking, she dropped to sleep and did not wake till the sun was high.

She breakfasted with gay spirits, insisted on riding horseback and, followed by John the Baptist, galloped off a half hour in advance of her aunt's chariot along the way to Greenway Court.

She entered. No one was in the hall, and her feet fell noiselessly in the thick buffalo robe on the floor.

She pushed open the door of the living room and then stopped, startled.

She saw a settle strewn with skins, a wave of curling brown hair pillowed on it, and under this a glimpse of a pale face turned away. There was a shaded window opposite, and light came through it whitely. A hand and wrist hung over to the door. There was something desolate in the silence, something appealing in the droop of that hand that brought a smart to Anne's eyes as she looked.

Suddenly she caught her breath and took quick steps forward into the room, gazing searchingly at the figure on the couch the strong hair, setting all th

Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. Write for plan of sale and description of property.

**SAN DOMINCO MINING CO.**

Dept. 61, Frisco Building, St. Louis, Mo

## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

## SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet.

The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

**THE COLONIAL DIAMOND MINING COMPANY**

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government Inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $270,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

**THOS. PATTERSON & CO., Fiscal Agts.**
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**
AND
**$5.00 PER MONTH**
FOR FOUR MONTHS WILL BUY
**500 Shares**
OF STOCK WHICH MAY SOON BE WORTH
**$500.00**

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

## A Woman's Kidneys

**What Doctors Notice and What They Don't.**

Disease in the kidneys is one of the last ailments for which a doctor looks when treating women. This is a great mistake.

Women are very prone to kidney trouble and in fact many physicians attribute a woman's languor and ill health to a derangement of the genital organs, when it's simply plain kidney disease, and nothing else.

Many so supposed female complaints are either kidney or bladder diseases.

Sick kidneys of course make associate organs sick also.

The result is back pains, bearing down sensations, utter weariness and headache.

But Dr. Hamilton's Pills go right to the spot.

They put life into the kidney that makes a worn out woman feel like new.

Indirectly the blood and nervous centres are assisted by Dr. Hamilton's Pills, and the result is a proper performance of the function and a painless fulfillment of nature's command.

Thus it is that a woman can gain much happiness and abundant good health by the regular use of Dr. Hamilton's Pills.

From her home near Portland, Ont. Mr. A. B. Coburn writes:

"For two years past I have been sickly and weak. My color was dull and sallow, and I felt exhausted and weary, as if all my strength were being eaten up with some hidden trouble. I heard of Dr. Hamilton's Pills and decided to use them. The change in a few days was surprising. They regulated my kidneys and bowels and cured all my suffering; today I am perfectly well."

You can rely on Dr. Hamilton's Pills with implicit confidence; their effect is wonderful. Sold by all dealers Price 25c. per box, five boxes for $1.00, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U. S. A.

## TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS.

### Phonographs.

Sold on easy payments at The J. M. Greene Music Co., George street, New Opera House Building, Peterboro.

### Barn Hit By Electric Bolt.

During the heavy electric storm of Friday night a barn belonging to Mr. Alex Watts, near Warsaw, was struck. The bolt seemed to have made a glancing contact, as the structure did not take fire.

### Brooch Lost.

On Saturday evening on Water by George streets, between McDonell and Charlotte street, a gold crescent brooch set with pearls. Finder will be well rewarded by leaving it at Times Bookstore.

### Wanted Immediately.

Good sewing machine operators on power machines. Only first-class hands need apply. Apply to J. J. Turner & Sons, Tent and Awning Manufacturers, George street, Peterboro.

### Organ for Sale.

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1168.

### Mr. McClellan Superintending Work.

Mr. J. H. McClellan, superintendent of the Trent Canal, went to Lindsay on the noon train Saturday. Considerable work was done under his supervision on the Scugog river. A number of stumps in that river were removed, the gang working up to midnight to complete the work. Considerable work will also be done at Bobcaygeon and at Rosedale.

### Men Wanted.

Any number of Woodsmen wanted for Algoma Commercial Company, Sault Ste Marie, Ont. Highest wages paid. Apply to

GEO. J. CHALMERS
342 Water Street
or P. O. Box 831, city.

THE NEW TERM

at the

PETERBOROUGH BUSINESS COLLEGE

opens on

TUESDAY JAN. 2, 1906

Intending students should make application as soon as possible. Call at the College or address

WM PRINGLE,
Opposite Post Office. Principal.

## LOCAL INCIDENTS

By The Times Man on the Street

—The Board of Health will meet this morning.

—The Board of Works will meet this morning.

—The Strangers' Fellowship Club of the Y.M.C.A. met Saturday night.

—The Children's Aid Society acknowledge the gift of $5 from Mrs. James Wood.

—The merry-go-round for Jackson Park has arrived and is being erected. It will be started running early this week.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—The Orangemen's excursion from Toronto boarded Mr White's steamer and went over the lift lock on Saturday afternoon.

—A regular meeting of the Board of Education will take place at the secretary's office, 437 George street this evening at 7.45 p.m.

—A number of local Oddfellows went to Lakefield yesterday to join the Triple link brethren of that village in observing decoration day.

—The dredge Emmerson and tug Empire were taken over the lift lock Saturday morning, and proceeded to Nassau, where they will be engaged dredging for some time.

—The Peterborough Jail assizes will be held as follows:—Non-jury sittings before Chief Justice Meredith, will open on Wednesday, Nov. 1st, and the jury sittings before Judge Britton, on Monday, Oct. 8th.

—Direct your friends who are are strangers in the city to the Times Bookstore for dainty souvenirs in china and burnt wood. Views of all places of interest hand painted on each. We also have books descriptive of the lift lock.

—The 25th annual meeting of the Y.M.C.A. will be held on Friday night June 15th, at 8 o'clock, in the club room. All active members are requested to be present. Officers will be elected and reports for the year presented.

—Mr. A. R. Taylor, representing the Heintzman Piano Co., of Toronto, is in the city. Mr. Taylor noted on Saturday to a Times representative that he has disposed of eleven new pianos within the past 30 days in this city. This is going some.

—Mr Arthur Roumtree the Hiebrge street grocer took a cash order from Messrs. Cole Bros. circus for supplies, amounting to $68.85, in value. This good order was taken in the face of another local grocer taking a trip to Lindsay, the day before to secure the order.

—The annual meeting of the West Peterborough Farmers' Institute, will be held next Saturday at one o'clock in the city council chamber. This meeting will doubtless be largely attended as election of officers and other important business will be transacted. President T. M. Hunter will preside over the meeting.

### $9.00 New York and Return $9.00.

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days, good on regular express trains leaving at 9.55 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

### Lightning Breaks Stove.

During the recent heavy storm, lightning entered the chimney, and smashed a stove in the residence of Mr. W. Leslie, Smith street. The chimney was also shattered, but further than this no damage was done.

### Mr. David Rogers Here.

Mr. David Rogers, son of Col. Rogers, the popular Peterborough postmaster, a successful barrister in Victoria, B.C., is visiting his father. His many friends in the city are pleased to welcome and see him looking so well.

### Mark Street Church Notes.

Yesterday owing to the absence of their pastor, at the conference, Mr. Chas Noyes conducted the morning service in Mark street church. Mr. Lewis' morning class was led by Mr. J. C. Miller. The evening service was in charge of the Epworth League, and took the form of a song service. Short addresses were given by Mr. W. W. Mitchell and Mrs. J. G. Lewis.

This evening Dr. E. V. Frederick will deliver a health talk before the league.

## Ensnaring Victims

**Steps Should be Taken at Once to Prevent Further Trouble.**

Here in Peterboro, as in other cities and towns, dyspepsia or stomach troubles are ensnaring victims in a most insidious way.

Nearly every mother's son of us and daughter, too, expects the stomach to accustom itself to all manner of ill-treatment, but the time comes when we cannot abuse it with impunity. How much better it would be to take steps at once to strengthen the stomach and prevent further trouble.

Use Mi-o-na now and soothe the irritated walls of the stomach, and strengthen the gastric follicles so that they will pour out their daily supply of digestive materials with regularity. Then the headaches, sleeplessness, specks before the eyes, poor appetite, tired feelings and nervousness will disappear, and you can eat what you want at any time you like.

Mi-o-na is a combination of remedies, some of which are but little known in this country, and is a positive guaranteed cure for all diseases of the stomach excepting cancer.

Just one little tablet out of a 50 cent box before meals, for a few days, and you will soon regain perfect health and strength, and have no fear of indigestion or stomach troubles.

If you cannot obtain Mi-o-na of your druggist, it will be sent by mail, post-paid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N. Y.

## SOCIAL AND PERSONAL

—Mrs. (Rev.) E. A. Lingfield is in Orillia visiting.

—Mr. Fred Jopling, Bridgenorth, was in the city Saturday.

—Mr. H. J. Bartlett, Orillia, was in the city Saturday on business.

—Messrs. J. L. and H. W. Hopwood, Montreal, were in the city Saturday.

—Mr. and Mrs. A. H. Stratton leave for England today via New York.

—Mrs. T. Newberry is visiting her mother, Mrs. Redpath, 247 Charles street, Toronto.

—Mr. E. C. Rockwell, Buffalo, was in the city yesterday registered at the Snowden House.

—Miss Hamilton, of Peterborough, was in town yesterday visiting friends.—Lindsay Post.

—Mr. Murphy, engineer for the Dominion Bridge Works Company, went to Kirkfield yesterday.

—Capt. W. H. and Mrs. Morden, of Toronto, are the guests of Mrs. W. Major, at All Saints' rectory.

—Mr. J. W. Mitchell, of Kingston, was in the city Saturday on business a guest at the Snowden House.

—Mr. Percy Fitzgerald left Saturday morning for Bowmanville, where he refereed the Cobourg-Bowmanville game.

—Miss Kelly, who has been a nursing training at the Nicholls Hospital, left for her home in Picton on Saturday.

—Mr. and Mrs. John Maxwell, of Toronto, were the guests over Sunday of Mr. and Mrs. F. J. Turner, jr., Water street.

—Invitations are out for the marriage of Mrs. Leona J. Doyle to Mr. George Sandham McCartney of Peterborough, on Tuesday, June 12, at the home of her parents, Mr. and Mrs. John Adams, Rainnie street, Campbellford.—"Campbellford Despatch."

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

## Brook Trout in The Otonabee

A few days ago Mr. John F. Ballantyne received and deposited in the Otonabee river, two cans of speckled trout from the department of marine and fisheries at Ottawa. There were about 700 trout in each can and Mr. Ballantyne says it will not now be necessary for "the boys" to go to Cavan creek to catch the speckled beauties and be eaten alive by mosquitoes.

In three or four years the young trout just placed in the river will have grown to a length of about six inches and may be caught by those who know the proper place to go.

### Bell Co. Get Off Light.

It speaks well for the way in which the Bell Telephone service is installed in Peterborough, when during the recent severe electrical storm, only a few instruments were burned out. The company consider they got off very fortunately—much more so than on other occasions.

### Deposit Boxes in Ontario Bank.

Fire and burglar safety deposit vault boxes have been included in the splendidly arranged and up-to-date fixtures of the local branch of the Ontario Bank. This enables owners of valuables, at a small yearly cost to feel that their important documents and other property is safer than at home.

### Doig's Petition Being Largely Signed

The petition being circulated throughout the city asking clemency for Mr. David Doig, sentenced in May to five months' imprisonment for stealing brass wire from the W. Hamilton Mfg. Co., is being very generally signed. This document will be presented to the Minister of Justice, Ottawa.

### Campbellford Notes.

Campbellford Dispatch says: Mr. Henry Bakes is residing in Peterborough, where he has a position with the Canadian General Electric Company.—Mrs. Austin Dunn, of Peterborough, is visiting friends in town.—Miss Mudnie Adams is visiting her sister, Mrs. J. Doyle, at Peterborough.

### A Good Street Car Service.

Great credit was given by those attending the evening circus at the manner in which those caught in the pouring rain, to Mr. Larmouth, manager of the street car system. This gentleman late at night was personally at the grounds to see that the travellers to and from the circus should be systematically and promptly handled.

### Lady Frightened by Stone.

On Saturday night, Mr. John McGrath, of 177 Harvey street, called into the police station today a complaint. It seems that on Thursday night, as his wife alone with two small children, sat in their front room, a large rock, brought to the station by Mr. McGrath, crashed through the front window, the broken pane measuring 8x4 inches. Mr. McGrath is very seriously annoyed as his wife is in delicate health, and received a great shock by this heavy stone crashing in at a late hour at night. The local police are investigating the matter, but have very little to work on as to detecting the perpetrator of this outrage.

## Is Disease a Crime?

Not very long ago, a popular magazine published an editorial article in which the writer asserted, in substance, that all disease should be regarded as criminal. Certain it is, that much of the sickness and suffering of mankind is due to the violation of certain of Nature's laws. But to say that all sickness should be regarded as criminal, must appeal to every reasonable individual as radically wrong.

It would be harsh, unsympathetic, cruel, yes criminal, to condemn the poor, weak, over-worked housewife who sinks under the heavy load of household cares and burdens, and suffers from weaknesses, various displacements of pelvic organs and other derangements peculiar to her sex.

Frequent bearing of children, with its exacting demands upon the system, coupled with the care, worry and labor of rearing a large family, is often the cause of weakness, derangements and debility which are aggravated by the many household cares, and the hard, and never-ending work which the mother is called upon to perform. Dr. Pierce, the maker of that world-famed remedy for woman's peculiar weaknesses and ills—Dr. Pierce's Favorite Prescription—says that one of the greatest obstacles to the cure of this class of maladies is the fact that the poor, over-worked housewife can not get the needed rest from her many household cares and labor to enable her to secure from the use of his "Prescription" its full benefits. It is a matter of frequent experience, he says, in his extensive practice in these cases, to meet with those in which his treatment fails by reason of the patient's inability to abstain from hard work long enough to be cured. With those suffering from prolapsus, retroversion and retroversion of the uterus or other displacement of the womanly organs, it is very necessary that, in addition to taking his "Favorite Prescription" they abstain from being very much, or for long periods, on their feet. All heavy lifting or straining of any kind should also be avoided. As much out-door air as possible, with moderate, light exercise is also very important. Let the patient observe these rules and the "Favorite Prescription" will do the rest.

Dr. Pierce's Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send to Dr. R. V. Pierce, Buffalo, N. Y., 21 one-cent stamps for paper-covered, or 50 stamps for cloth-bound.

If sick consult the Doctor, free of charge by letter. All such communications are held sacredly confidential.

Dr. Pierce's Pleasant Pellets invigorate and regulate stomach, liver and bowels.

## Lindsay Editor Passes Away

**Death of Mr. Geo. Lytle Editor of the Watchman-Warder.**

Word was received in the city on Saturday that Mr. George Lytle, editor and proprietor of the Lindsay Watchman-Warder, had passed away. The deceased had been failing for some time and expired Saturday morning. He first published the Watchman, with which the Warder was afterwards amalgamated. The late Mr. Lytle was widely known and many friends in Peterborough and elsewhere will regret to learn of his death.

The funeral took place in Lindsay yesterday afternoon.

### Cordage Excursion Well Attended.

The annual outing of the employes of the Canadian Cordage and Manufacturing Company took place on Saturday on the steamer Stony Lake over the lift lock, their objective point being South Beach on Clear Lake. Between 300 and 400 passengers enjoyed a very pleasant outing.

—Reeve McNeil, of Cavan township, has gone on a trip to the west.

## Twenty Minutes Time Enough?

**To Cure the Worst Headache From Any Cause—New Reduction Method.**

Most headaches and pains yield instantly to the new Reduction Method—Dr. Shoop's Twenty Minute Headache Cure. The cause for these pains is congestion—a rushing of blood to the nerve centers—which distends the veins to nearly the bursting point. Swollen and enlarged, these veins and capillaries exert an irritating pressure on the myriads of nerve branches and fibres. Then there's pain, and finally that excruciating, cease-less ache. The new Reduction Method disperses the blood, distributes the overflow, and di-rects it to the proper channels. It frees the nerve centers from all irritation—the pains and aches disap-pear because their cause has been removed. You may try a thousand other remedies—you may drug and stupify the nerves into submission—but the remedy which brings prompt relief and permanent cure will be successful because it reduces the congestion—it must embody Reduction Method. Medicine has been found a way—simple and sure, yet the only way—to thoroughly overcome these attacks of Headache and Neuralgia. The effect of Dr. Shoop's Twenty Minute Headache Cure is prompt—perfectly suited to all forms of Headache and absolutely positive in every temperament. For sale and recommended by

J. D. TULLY.

DRAW ATTENTION TO THE "NEW THEORY"

Over 75% Winners

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $15,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interest of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season means enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this? So chance to lose your original capital, and your mode conservatively showing you its full earning capacity, which was the secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously and successfully. There are no "ifs" and "ands" and we stake our reputation on same.

### What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in any system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

### What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or choices. We often win on horses at 3, 4, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

### NOTE—

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through scores of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount. If I cannot, the information and the entire plan is yours." We accepted. It was fair and square.

### RESULT—

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

### ABSOLUTELY INFALLIBLE

It earned $50,000 for the originator last season in four months, $61,000 two years ago, and $87,500 three years ago, during the same period.

### It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $22,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 100 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

### A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

### Absolutely Impossible to Lose Your Capital

Nothing of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

### NOTICE:

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)

Complete, Payable Strictly in Advance

No Additional Payments of any Kind are Made After Purchase of the System

### GUARANTEE—

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours: 9 a.m. to 9 p.m. Sunday by previous appointment.

## Board of Works In Busy Session

### Tenders for Construction of Sewers to Be Advertised for---Also for Handling Dredging From the Government Dredge.

The Board of Works met on Tuesday night when there were present, Chairman Ald. Hicks and Aldermen Bethel, McIntyre, Wilson, Johnston, Elliott, Hall and Mayor Best.

GRANOLITHIC WALKS.

A petition for a granolithic walk west side of Water from Dunbar to Antrim streets was received, and will be built as soon as practicable. This walk cannot be built this year as the filling in thereof is not yet firmly settled.

Petitions for walks on the south side Donegall street, from Hunter to Brock streets, and north side King from Park to Maitland avenue were granted.

A petition for a granolithic sidewalk on Mark street, from Hunter to James street was referred to the engineer to report on and advise as to whether the walk shall be built outside the trees or inside.

A petition for granolithic walk on east side of Reid, from Charlotte to King streets was granted; also one on south side of Sherbrooke street, from Park street to the boundary; and one on south side of Hunter street; one on south side of London street from Reid 114 feet on London street, one on west side of Stewart street from Dalhousie to Townsend streets.

N. Lush petitioned against a granolithic walk on Bethune street, from Antrim to London street. This was left with the engineer to act in his best judgment.

A petition for a walk on west side Reid street, north of McDonnel and London streets, outside the trees was not acted upon.

A petition against a walk on south side of Douro street, east ward, was received, and the walk will not be built. A petition against one on west side of Reid street, between Murray and Brock streets, was granted. A petition against a granolithic walk on north side of Brock in front of Jane Mason's property, was not granted. Also one against J. J. Turner & Son's property fronting on George, King and Water streets; the walks on Water and George will be built, the other not.

A petition against a cement walk on Aylmer from Edinburgh to Antrim streets was granted.

The sidewalk on Sherbrooke street, from George to Reid street, will be built outside or inside the trees as decided upon by the Board after inspection.

PETITIONS FOR SEWERS.

A petition for a sewer on Bolivar street to western limit of lot 20, was granted; for one on Perry street, from Stewart to Park street, was found insufficiently signed.

A petition for a sewer on Dublin from Water street east, was found insufficiently signed. Queen Murray from Downie street east was granted; also one on Cedar street; one on Downie street, from London to Smith street; one on Smith from Downie to Reid and one on Reid from Smith to Stewart street.

Mr. Albert Dickson's request for a sewer connection with his property north-west of the city, will be granted if a sufficiently signed petition for a sewer on Aberdeen and Manning avenues is received. This work would have an outlet at Bairnardo avenue.

TO CROSS THE TRACKS.

Ald. Johnston moved, seconded by Ald. McIntyre,—That the solicitor be requested to ask the consent of the G.T.R. to cross their tracks, with the proposed extension of George street south—Carried.

TO PAY FOR MIXER.

The Board decided to accept and pay for the concrete mixer sent here on 30 days' trial by the Automatic Cement Mixer Co.

STREET WATER CART.

Chairman Ald. Hicks reported that there has been ordered by consent of the council a new steel water cart.

BENSON STREET SEWER.

The question of constructing a trunk sewer from Smith street along the G.T.R. track, south to Edinburgh, where it would join the Aylmer street sewer in order to furnish an outlet for the proposed Benson street sewer, will be submitted to the ratepayers at the earliest opportunity. This work would cost $1,500.

TENDERS FOR SEWERS.

Tenders will be advertised for the construction of sewers, of which notice has already been given; also for those recently petitioned for.

TO MOVE STAND-PIPE.

Ald. Graham moved, seconded by Ald. McIntyre,—That the stand-pipe in front of the priests' residence, be moved further north to a point to be designated by the engineer.—Carried.

REDEEMING WASTE LAND.

Regarding the matter of handling the dredging from the Government dredge in the river, and dumping into the flooded land west of the G.P.R. track on the water front, south of Hunter street was taken up. Ald. Hicks figured the cost of this work of redeeming waste land at from $1300 to $1500. Chairman Hicks was authorized to advertise for tenders for this work.

The Board adjourned to meet on Thursday night.

**Body Upright in Water.**

Providence, R.I., June 10.—The East Providence police begin an investigation today of the death of Thomas Carroll of Olneyville, an employe at Crescent Park, whose body was found in the water at Bullock's Point, near Narragansett Bay last night. The body was found by boys in a row-boat. The fact that the body was standing upright and held in this position by an anchor rope, led the police to suspect foul play. Medical Officer Anderson said that he could find no external marks of violence, and it was not likely an autopsy would be held.

Pink Lips, Like Velvet. Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most highly satisfactory healing ointment, in glass jars at 25c. Sold by J. D. Tully.

## That Runaway Wife Episode

### Mr. Wescott Chases Penrose the Abductor of His Wife From Orillia.

Our readers will remember that a few days ago The Times contained the original report of trouble existing in the Westcott family on Sherbrook St. We noted that Mr. Wescott's wife and six-year-old boy had eloped with a man named Penrose to Orillia and that the injured husband had written the chief of police at Orillia where the guilty wife and her paramour fled to, to try and get his boy back.

Mr. Wescott went in person to Orillia, and made a systematic search for the guilty couple. Penrose, it seems got wind of Wescott's search and fled with the woman and child to Barrie. Evidently fearing recognition at the railway station, Penrose accompanied by the woman and her boy, took the railroad ties, walking the whole way to Barrie.

Mr. Wescott says that Chief of Police Goodman of Orillia, gave him every assistance in his search. Wescott, however, who does not want the woman back, got tired of the chase and after making arrangements to eventually get his little son back, came back to Peterborough. Wescott intends to sell out his business here, and go to the United States, to live with a sister he has there.

## Stolen Goods Are Recovered

### Silver and Other Ware Stolen Years Ago From Mr. T. F. Matthews.

Many of our readers will remember that nearly seven years since the residence of Mr. T. F. Matthews, who he lived on Wolf street, was burglarized and a large quantity of valuable property stolen.

These goods were never recovered nor were the thieves captured; it was supposed at the time that tramps, who then flourished more abundantly here than now, stole the goods.

On Sunday as a boy named James Gorman was playing about a deserted building, in the east ward, he discovered practically all the stolen articles hidden away. He brought the goods to his mother, who saw that the police were at once notified and sent the stuff to the station. The goods recovered consisted of one silver fish knife; silver salad set; six silver dessert spoons; silver nut crackers; silver napkin ring; silver bread fork; dozen silver forks; five silver berry spoons; six silver plated knives; six celluloid handled dinner knives; one handsome carved wooden Chinese card case; one Chinese carved ivory card case; and other articles. The celluloid handled knives were in a flannel case, divided into partitions, one knife in each. The knives, although having steel blades, were not at all rusted, although lying so many years subject to changes of temperature and climate. The flannel case, however, was badly damaged by moths.

Mr. Matthews went yesterday to the Chief's office and identified the goods.

**Immigrant Cuts Throat.**

Belleville, June 10.—N. Parker, a young English immigrant, only 20 years of age, tried to commit suicide near Picton, Prince Edward County. The young fellow was in ill health had no work, no money, and no friends.

He is very bitter on immigration agents in England who, he says, told him "fairy stories" About Canada.

Parker tried to cut his throat with a bread knife. Two doctors patched him up, and now kind-hearted friends him up, and now kind-hearted people are looking after him.

**Two Travellers Circle Globe.**

Montreal, June 12.—Alfred T. Shaughnessy, son of the President of the C. P. R., and Mr. Chas. T. Anstey, of the head office, Montreal, have returned, after having circled the world. On January 19 they left Montreal on board the C. P. R. steamship Monteagle, and throughout the journey never travelled otherwise than by C. P. R. railway or steamship lines.

The Monteagle conveyed the travellers to Yokohama, the Empress of Japan from there to Vancouver, and the balance of the journey was made by rail. In all 30,000 miles were covered.

## CATTLEMEN ARE AFTER ROOSEVELT

### Angry at Loss of Foreign Market They Insist on Action

### THEY WILL ACT AT ONCE

### House Introduces Motion Calling Upon President to Make All Other Reports Public.

Washington, D. C., June 12.—President Roosevelt is now face to face with more serious possibilities than he could have contemplated, when he started out to expose the unsanitary practices in the Chicago packing houses and to force a more drastic inspection law upon beef trust. He is hearing forcibly from the Live Stock interests of the United States.

They see the foreign market, which has meant higher prices and larger sales for them, threatened with partial extermination, and they desire that the evil which has been done be quickly remedied and confidence in American meat be restored at home and abroad.

Congress is hearing not only from the live stock interests, but from banks and business houses throughout the stock raising States. They demand that whatever bill is necessary be passed quickly. If this is not done, they fear the demand for 180,000 meat animals daily in Chicago will be decreased, the prices of live stock dwindle and the foundation of the credit system of many communities wrecked.

That the Neill-Reynolds report is resented as discrediting the entire meat industry because of certain specific conditions at Chicago seems to be shown by a resolution introduced in the House by Representative Fulkerson of Missouri.

It calls on the President and the Secretary of Agriculture to immediately make public any and all information they have or may be able to secure, from the great army of men inspectors employed by the Government, or from any other source that will tend to credit or discredit products of any plant where meat products are prepared.

## Bird-Nesting Boys Self Besieged

Two boys belonging to this city, got a scare on Sunday last that will effectually prevent any thoughts of birdsnesting on city roofs entering their minds for some time.

The youths in quests of birds' nests had climbed on the flat roofs of the buildings lying south of Hunter and west of Water streets, and by means of a plank scaled the roof of the Bank of Commerce building, which is about twelve feet higher. When they tried to return to terra firma the plank slipped, crashing through a window below.

After being prisoners for over an hour they happened to notice a board loosely attached to the roof. By wrenching it loose, and placing it down onto the roof on the west side, they clambered down the surrounding roofs and ultimately to safety.

## Board of Health Met Yesterday

### Plans of Isolation Hospital Show an $8,500 Building.

Yesterday morning a meeting of the local Board of Health was held in the City Clerk's office. There were present Chairman Eyres, Messrs. Dr. Burnham, Dr. McNulty, Shell, W. Parker, Dr. Bingham, M.H.O., and Chief Ilosel.

The minutes of last meeting were read and confirmed.

Mr. Murphy, the agricultural implement dealer, entered a very strongly worded complaint that the yards and premises on each side of his place of business are in a most unsanitary state. He said the stench arising is so great that he cannot open his upstairs windows. A motion carried ordering that a strict investigation be instuted at once.

A letter from Dr. Hodgetts, secretary of the Provincial Board of Health, Toronto, was received. The letter said:

Dear sir,—Your letter of 28th ulto received. The same will be referred to the Provincial Board of Health at its next quarterly meeting, and in the meantime an inspection of the district will be made by either a member or an officer of this Board.

Yours truly,
CHAS. A. HODGETTS, M.D.,
Secretary.

To S. R. Armstrong, Esq., City Clerk.

This letter referred to the pollution of the Otonabee River.

The matter of the Italian shop on Hunter street, which was complained of as being unsanitary, was taken up. The Chief noted that he had looked into this matter, and reported that the cellar complained of, is all right now.

The matter of Peterborough's ice supply was brought up by Chairman Eyres, who said one of the icemen had asked that some legislation be enacted by the Board with a view to their conduct next winter. This was due to the recent favorable reports made by the Toronto Board of the local ice.

Dr. Burnham moved that two more samples of the lake ice be sent to Dr. Amyott for further analysis. Dr. Bingham objected to his sending these samples as suggested, as it might look like a trap and would possibly be considered a dishonorable act on his part. The Board, however, decided to have the samples sent, without saying where the ice came from.

The matter of the public notices originally ordered in connection with customers using the ice was taken up. It was decided to delay action until the analysis of the further samples be received.

Architect Blackwell produced the plans for the new Isolation Hospital. It will be remembered that a former set of plans had been submitted, and that others showing some suggested changes to be made. The plans submitted yesterday were very favorably regarded by the Board. The hospital, as per the plans viewed yesterday show accommodation for twenty-four beds altogether, irrespective of those for nurses or help. A brick wall runs the whole height of the building between the male and female wards. Architect Blackwell said that his estimate of $8,500 included the heating by steam, plumbing, etc. The help will sleep in the basement. One janitor will look after both parts of the building. To the rear will be a wooden kitchen for cooking in hot weather.

It was moved by Dr. Burnham, seconded by Mr. Neil, that the plans be shown by Dr. McNulty to the local medicalmen for criticism and suggestions. Carried.

The Board will meet again by call of the chairman, as soon as the local doctors look over the plans, when the plans as presented or changed by possibly adopted suggestions, will be accepted and work on the building begun.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

**BASEBALL.**

Yesterday's Eastern League games resulted as follows;

Buffalo 0, Rochester 5.
Providence 4, Jersey City 1.
Newark 1, Baltimore 2.

* * * * *

Toronto and Montreal did not play their scheduled game yesterday as the Torontos were not able to make train connections. They will probably play a double header today.

* * * * *

Last night a fair-sized audience saw the second game between George street and Charlotte street, as the first was protested after four innings were played. The batteries were, for Charlotte street, Roddy and Lang, and for George street, Parnell and Curtis. Whiteroft held the indicator. Charlotte street won out by a score of 6—4.

* * * * *

**THE TURF.**

Two Peterborough horses enter the great races which begin today in London, taking part in the 2.40 class. It seems that London does not do things by halves when getting up races. In the 2.40 class alone there are twenty-five entries, in fact so many that the 2.40 class race had to be split up and divided over two days, Tuesday and Wednesday.

In this 2.40 class Lady Gothard owned by Mr. Martin Connors, races today, and in the same class Harry Direct, owned by Mr. Harry Nesbitt, will contend for the long green on Wednesday. The purse hung up for the 2.40 class was originally $300, but owing to having by the number of entries to split them up over two days, the London people, hung up an additional purse of $300 for this race for the second day. We hope to see Lady Gothard get there today, and Harry Direct on Wednesday.

**Snow in June.**

Montreal, June 12.—Trainmen arriving from the north state that there was quite a heavy fall of snow in the Laurentian Mountains last evening.

In the neighborhood of Trembling Mountain, sixty miles north of Montreal, a full two inches was on the ground.

This is almost unprecedented for June.

## Board of Education Holds a Meeting

### Hot Discussion Over Mr. Eastwood's Bill for Tearing Down Part of Murray Street School.

Last night the Board of Education met in their usual place, those present being, Messrs. Ferguson in the chair. Dumble, Fair, Dr. Burnham, Ackerman, Crane, Pringle, Hayes, Hill and Morrison.

The minutes of last meeting were read and confirmed.

The following applications for re-engagements by teachers of the local schools were passed as read.

To Board fo Education:

Gentlemen,—We the teachers of the George street school desire to make application for the ensuing (Sg.t.)

Lillie Pratt.
Minnie R. Walker.
Ethyl Dawson.

The following teachers of Park St. school applied for re-engagement;

E. L. Thomas.
D. J. Hall.
O. Cairns.
Jas. McCreary.

The following of North Ward school made a similar application.

M. H. Morrow.
E. M. Morrow.
L. Perrin.
W. H. Walkey.

The following also of South Central school, made a like application, viz;

H. A. Tenney.
W. J. Stacey.
F. E. Kerr.
M. J. Dunne.
M. Ross.
M. R. Rannie.
I. Noble.
B. L. Thompson.
S. G. Davidson.

For the East Ward school a similar application was made by

J. W. Kelly.
L. A. Lockhead,
M. F. Erskine.
J. Lightfoot.
F. E. Coveney.

The Central teachers applied also as follows;

W. Smyth.
J. C. Smyth.
T. J. Wallace.
M. A. Nicholls.
L. Oulton.
H. Perry.
A. E. Peters.
N. Jenkins.
E. Ogrey.
M. R. Warner.
E. Cameron.

An application was received from Messrs. J. J. McBain & Son for insurance on the new south ward school, as well as for part of the general school insurance. They noted that the companies they represented were very strong and carried a variety of policies. The applicants further noted that they carried none of the Board's insurance and gave good reasons why they should have a share of same.—Received.

The following report was presented by Mr. Hayes for the Finance Committee:

Gentlemen,—Your Financial Committee beg leave to report and recommend payment of the following accounts;

| | |
|---|---|
| Peterboro L. & P. Co. | $10.05 |
| Peterboro F. & Cart. Co. | 10.20 |
| Kingan Hardware Co. | 17.90 |
| Water Commission | 12.75 |
| Alexander & Miller | 2.90 |
| Water Commission | 41.80 |
| Hicks & Co. | 6.50 |
| Peterboro W. W. Co. | 5.00 |
| Times Pig. Co. | 4.50 |
| Mail & Empire | 11.25 |
| W. Reid | 1.20 |
| G.N.W. Co. | .50 |
| Mrs. Fowlds | 13.50 |

The following accounts were received and referred to the Finance Committe.

| | |
|---|---|
| Alex. Gibson | $ 6.60 |
| E. B. Clegg & Co. | 16.00 |
| Kingan Hardware Co. | 14.04 |
| Review Co. | 12.50 |
| Review Co. | 11.80 |
| A. H. Stratton Co. | .50 |
| P. L. & P. Co. | 5.00 |
| For supply teachers | 24.75 |

MONIES RECEIVED.

| | |
|---|---|
| City Treasurer | $3000.00 |
| Text book fees | 203.82 |
| Materials for S.S. building, from Hicks & Co. | 476.00 |

The inspector of high schools' report was read and received.

A communication from Mr. V. Eastwood, quartermaster of the 57th Regiment was read, in which the writer said his expenses incidental to work done in moving the separate school building amounted to $135. Referred to Property Committee with instructions to report.—

Mr. Dumble moved in amendment that as such action would make those who might agree with the payment stultify themselves by sharing in the crime that has been committed. He thought this was a hole and corner way of doing business. It is stated by the military that the military had been encouraged in this matter by some of the Board.

Dr. Burnham said he had never led Mr. Eastwood on in this matter.

Mr. Morrison said he asked Mr. Eastwood, in the first place why he had not consulted the Board in this matter, and Mr. Eastwood said he did not want to get the Board into trouble.

Mr. Hill said he had no dealings with Mr. Eastwood, the latter saying Mr. Hall, M.P., was his authority for his action.

Mr. Fair never authorized the building being torn down.

Mr. Hill asked, had the Board received the money for the part of the building torn down before the Board took hold of the matter.

Mr. Hayes' motion referring the matter to the Property Committee with instructions to report, was carried Mr. Dumble's amendment not getting a seconder.

Mr. Dumble took exception to the amount charged by the Water Commissioners for water for public school.

Mr. Hill explained that the rate was 15 cents per annum per pupil.

Miss M. H. Burns made a request for extension of leave of absence owing to being compelled to go to Toronto for an operation. A certificate from Dr. McCollough was enclosed.

Miss L. H. Rush made application for position on the kindergarten staff of the city.

The report of the Supervision Committee re text book purchase contracts was read. These figures have appeared in a former issue of The Times.

Mr. Pringle presented a detailed and new schedule of prices to be paid to and qualifications to be furnished by all teachers in the local schools and collegiate institute. This showed a material expense in the prices to be paid by the city for teachers. Only male teachers shall be employed as principals in Peterborough schools. Whilst the increased salaries show ultimately a very great addition to this city's expenses Mr. Pringle showed that to attain the total annual increases it will take six years to be reached in full. The increase in local schools amounts to about $260 for first year and about $60 for the Collegiate Institute, with a similar annual increase for six years when the maximum is attained.

After a long discussion the report was adopted.

Mr. Crane as chairman of the Property Committee brought in a report of suggested improvements and other matters coming under his committee's duties. These matters included extensive improvements in the West Ward school. Probably aggregating $1200. Architect Blackwell said that this sum would not begin to cover the proposed expenditures. The improvements include plumbing and excavation of a cellar, etc.

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Shoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

## Whole Tribe Suicides In Northern Russia

St. Petersburg, June 12.—The whole tribe of the Tshuktcheeh, numbering about 2,000, have perished by their own hand rather than face starvation. They inhabited one of the bleakest parts of Northern Russia, and obtained a precarious living by rearing reindeer. Early last year a disease appeared among the deer and killed the whole herd. The people endured great suffering during the winter, hoping for better things in the spring. Disappointed in this, and seeing nothing but starvation ahead, the elders discussed the situation and decided that each father should kill his family and then himself. This was done and only a few old men without families remained. The terrible tragedy was carried out in a general assembly in the open air.

Come Up Where You Belong

Perhaps you know why you fail in the plans for money, fame and position.

Some Don't

Just why the brain does not produce practical money making results is a puzzle to many men.

Strong, healthy, natural brains can be made from food, and good brains can work keenly when they have their proper food.

Unsuccessful brains often come from improperly selected food.

A DISTINCT IMPROVEMENT in mental power will follow in a week or ten days, when the brain-building food

Grape-Nuts

is used twice a day.

There are well established and very clearly understood reasons for these sure results from the change in food. You can make Money, Position, Fame, if you have the kind of Brain that works that way.

There's a Reason

## Damp Spring Weather Ruinous to Health

### Causes Weakness, Headaches and Feeling of Unrest; the Cure Is Simple.

That peculiar weakness so common in the spring, is demoralizing to body and mind alike.

Stupid, absent-minded and dull,—You feel the need of a stimulating tonic.

To impart quickness and great vitality to the entire system nothing acts like Ferrozone.

In a short time it makes you feel fit and fine, creates a feeling of youth and strength that's surprising.

Ferrozone revives and braces the sickly because it nourishes and builds up the organs that are weak. As a spring tonic, appetizer and blood-strengthener it is unequaled.

A well known resident of Utopia, Ont., Mr H. H. Postle, writes: "From long experience I am convinced that everyone requires medicine in the spring. As a rule the blood is thin and impure and the whole system is congested with poisons that should be carried off. I use Ferrozone because it clears up the system, gives you an appetite and makes you sleep well. One winter I had serious palpitation of the heart, nervous headaches, and an extreme tired feeling. Sleep was not restful and by spring I was in bad shape. I took six boxes of Ferrozone and was made the picture of health."

Ferrozone makes permanent cures. Absolutely safe because it is purely vegetable and contains no alcohol. Concentrated cure in tablet form,—that's Ferrozone, 50c. per box or six boxes for $2.50 at all dealers or by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

PETERBORO, JUNE 11, 1906

## THE HOUSE OF LORDS AS AN ISSUE AGAIN?

It was in connection with the home rule question that John Morley raised the cry of "mending or ending the House of Lords." In the last decade the liberal platforms and orators have left the "lords" severely alone. The upper house, in fact, has in recent years claimed to have regained the respect and affection of many of its former assailants.

Certain indications, however, point unmistakably to the revival of the "mending or ending" agitation. Two members of the Bannerman ministry have intimated pretty plainly in recent speeches that the opinion of the country might before long be deared on the question of the "lords" authority and prerogatives. There is much talk in liberal organs touching the possibility of dissolution of Parliament in the event of the rejection by the House of Lords of the education bill now under discussion in the Commons. The Government, it is said, does not propose to see its important measure slaughtered by a bourbon, irresponsible, obstructive body, and stands ready to take the question to the democracy whose mandate it is trying to carry out.

Whence these murmurs and warnings? Are they purely speculative? By no means. Their origin is found in the rejection by the Lords of a simple bill which passed the House of Commons without opposition or debate. The bill was a labor measure, for which the Government assumed no responsibility whatever. It amended the anti-alien act (the act regulating and restricting immigration) by providing that foreign workmen shall not be imported under contract during a trade dispute or strike to take the place of strikers. Mr. Chamberlain and other unionist leaders favored it, and those who did not thought it prudent to suppress their dislike so as not to offend the labor group and the organized workmen generally.

But the House of Lords rejected it as a piece of "class legislation." This action has greatly disturbed the unionists, who need the support of labor for their fiscal programme. The liberals rejoice more or less openly, while the labor group is indignant and defiant. "How long," asked Keir Hardie in the Commons, "are you going to tolerate the existence of another place, totally irresponsible to the country, which has power to mar and mutilate measures passed by representatives of the people?" Another labor member, Mr. Crooks, declared that the masses would "rise and end" the upper house if this sort of thing continued.

There is a feeling, however, that the House of Lords may not treat Government measures as unceremoniously as it did the private labor bill. It may not be desirous of reviving the issue of its future existence and power.

## NO FEAR OF CLASH BETWEEN MEXICO AND UNITED STATES

### H. C. Reno Returns from Mexican Gold Fields and Describes Situation.

H. C. Reno, President of the Trinity Mining Company of Sonora, Mexico, returned yesterday from the Mexican gold fields. He declares that the stories of the recent uprisings in La Cananea, Mexico, are greatly overdrawn. "The trouble was more in the nature of a barroom brawl, in which an American policeman and a saloon-keeper were the chief actors," said Mr Reno. "I have seen worse uprisings on a Saturday night in many of the mining camps in Colorado, but the outside world never hears of the fracas.

"The 'invasion' of Mexico by the American miners who were taken down to La Cananea by Colonel Green to replace the shiftless and unreliable Mexicans made Greene and his imported men very unpopular. The Mexicans made a demand upon Colonel Greene for a raise in wages from $3.50 to $5 per day, which he refused to grant, and fearing a general strike and further trouble from the Mexicans, he imported American miners to replace them. That was all there was to the 'uprising.'

"President Diaz acted promptly and vigorously in dispatching troops to the scene immediately with orders to shoot to kill, but before they arrived the 'uprisers' had fled to the hills.

"Some timid people in this country thought that serious complications might arise between the two countries because of this affair, but their fears are groundless. There is too much of a money bond between the two countries to admit of any misunderstanding going far enough to provoke war. American interests in Mexico are too vast for any such foolishness. Over $70,000,000 are invested in Mexican mines alone and more is going in every month. Business interests on both sides of the border are too great to permit of any but a perfect understanding between both countries.

"The Trinity Mining Company of which I am president, controls a large property in the State of Sonora and we are entirely satisfied with the local conditions down there. American business methods, machinery and brains, by good American money, are going to be large factors in the development of the Mexico of the future, and it is quite certain that no clash between a handful of drunken miners need cause any of us to worry as to the future of American enterprises in our sister republic."

## VALUE OF MEAT INSPECTION

### Beef and Pork Imported and Sold as English Product.

London, June 10.—John Burns, member local government board, has requested the foreign office to communicate with the state department at Washington and ascertain to what extent reliance can be placed on meat inspection undertaken by the bureau of animal industry.

In announcing that he had taken this action as a medium of a reply to a question put to the house yesterday by Mr. Widfield, National member of the St. Patrick's Division of Dublin, and president of the Irish Stock-Owners' Association, Mr. Burns added that he had ascertained that a quantity of boneless beef and pork is imported into this country from America and converted into sausages, which are sold as English products.

He admitted that there were serious difficulties in the way of efficent British inspection of some of these imported goods. He said the local government board had taken action to see that the local authorities exercised their powers to the full extent.

# STOCKS - THE MARKETS OF THE WORLD - BONDS

*We call the attention of our clients to the fact that*

**BULLFROG RED OAK CO. STOCK**

We call the attention of our clients to the fact that

**WESTERN UNION OIL STOCK**

Buy this stock NOW before further radical rise takes place, which we advocated for purchase at 6c., is now $1.10 and with the advance but just begun.

**FAIRVIEW CENTRAL MILLING CO. Stock at 15c. per share**

which we urged our clients to purchase at $1 that price, is now $ bid, with a few lots offered under $1.50. Western Union Oil is a conservative investment at this price.

Of the cheaper stocks, we now recommend without hesitation

payable 1-3 cash, 1-3 in 30 days, and 1-3 in 60 days from date of purchase.

Situated in the heart of a new and phenomenally rich district of Nevada, FAIRVIEW bids fair to rival the very richest of the older Nevada camps.

FAIRVIEW CENTRAL gives promise of uncovering high values, and under the conservative business management of its officers will be one of the GREAT MINES OF A GREAT DISTRICT.

But this stock and hold it for a permanent investment.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

paleness of the face in a shadowy frame; the blue circles under the closed lids, the young mouth, the upward sweep of the rounded chin. She began to tremble exceedingly, her lips unsteady, her great blue eyes misting, her whole face caught in a quaking terror. She had gone whiter than a moon flower.

"They were too late!" she whispered. "You fought, then? Ah, while I was so glad!"

She crouched down by the settle, her hand pressed tight against her heart, full of a joyful anguish she had never known. Something she had fought down hitherto rose in her throat and choked her at sight of this hurt, this helplessness.

At last, yielding all at once, with a little sob and a gesture of pride and longing and surrender, she bent slowly, like a swaying lily, and kissed him on the forehead.

He stirred and opened his eyes with wonder in them to see her face so near.

"Mademoiselle!"

"You have been wounded!" she breathed.

He tried to rise and, failing, smiled at her. "It is a little thing. The doc-

*She bent slowly, like a swaying lily.*

tor has told me that. And you care! Then it is nothing—less than nothing."

"You make light of it."

He lifted himself on one elbow and stretched out an uncertain hand toward her. "Mademoiselle," he said, "was I dreaming when you came or did—or did"—

She was on her feet now, and her eyes turned their gaze away.

"No, no," she answered; "you were asleep."

"As I opened my eyes just now it seemed—as if you had—kissed me on the forehead. Was that a dream, mademoiselle?"

"It was a dream," she said hurriedly, her voice wavering.

"You kissed me?" Joy was in his look.

"No."

"Ah, mademoiselle!" He fell back on the skins.

With suddenly rosying cheeks she ran toward the door to meet the old baron entering from the hall.

There was at last a long November week while Anne was at Winchester and when she and Armand, his wound healed, rode together along the valley ways. The young Frenchman still remained a guest, for the baron would hear no word of departure. He swore he should not leave him till the season opened again at Williamsburg.

The day before their return to Gladden Hall the ladies spent at Greenway Court. As the mild November afternoon faded Armand and Anne sat in the rustic house, built of twisted grapevine, set where the round spur on which the lodge was built fell steeply down. A book lay on her knee.

Far away against the long sashes of sapphire light the sweep of ragged Blue Ridge stood lattiessly. The river bottom was a violet gray reach of stain soaked grasses, hung with wreaths of trailing Virginia creeper, dabbled in the summer's blood, or as if the peaks ran down with red wine wasting.

Anne pointed where just below the river wavered like a sheet of span silver, edged with soaked velvet.

"The Indians call it Shennando," she said, "Daughter of the Stars."

He leaned forward and lifted the little book, its binding of parchment, pale yellow, like antique ivory. "It is a tale of my own land," he said softly, "of Normandy, in the old days when the troubadours sang."

"I have not yet read it," she answered. "Tell me the story."

"It is of the son of a poor woodcutter. Tolling once by his hut in the forest, he saw by chance the daughter of a king as she rode past with her cavalcade. He brought her a cup of water, and she smiled on him. So fair she was that he loved her to desperation and could not rest nor sleep from thinking of her face. He traveled far and came by night beneath her window and sang songs to her, songs delicate and beautiful, in phrases that only his great love had taught him, and when he sang he touched the strings of his own heart. The lady listened, and her tears fell down from the window in the palace wall. She was a great lady and he the lowest of the land, and in the hopelessness of his passion he sang that he was a prince of a hostile country, wooing in attire of rags the darling to whose presence he might not rightly come. His were not like the songs of the gilded courtiers that flocked her father's gate. They were more noble and true, and his love climbed upon them as if on stairs of gold and drew her heart out to him over the sill. One night she slipped out to his arms in the darkness. Then he knelt on the yellow forest leaves and told her the truth and pleaded us excuse his great love. And he would have gone from her and left her to go back alone."

"What then?" demanded Anne.

"She took his hand and kissed him and went away with him to his hut in the forest."

Both were silent a moment.

The vivid tints in the sky were paling. The river's silver dulled to mauve. The gloom, all luminous, seemed an impatient suitor stealing amorous upon the drowsy day. The day stirred, glowed again and spread out a tawny flood as a woman drops her hair under some golden lamp to please a lover's whim.

"Think you," he asked then very low, "that such a love might be?"

"'Twas for love of her," she said softly.

When he spoke again she felt a thrill in his voice.

"Mademoiselle, suppose a man loves with a love that fills all the sky; that for him there was but the one woman in the world. Suppose she found that he was not what she had thought him when she first loved him; that the idol she had worshiped was just clay. If he stood mean and small before the world before her—but still loving her, adoring her! If it were not a princess going to a hut in the forest, but a woman prideful and—and ashamed! Could she still love him as before? Could she? Could she?"

Her eyes could not meet his burning ones.

"Monsieur," she said, quivering, "when a woman loves, she will forgive anything—everything—in the man she loves save"—

She stopped. There was a muffled sound of horse hoofs from the clumbing road.

(To be continued)

**One Hundred Dollars in Two Years Brings One Hundred Thousand Dollars.**

The stock of the Two Stars Mining Company in old Mexico sold at $10.00 per share. Today it is selling at $10,000.00 per share. That is not the only mine in Mexico or the last opportunity. Let us give you information concerning another property in Mexico that has a future. Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. **SAN DOMINCO MINING CO.**

Dept. 61, Frisco Building, St. Louis, Mo

**SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS**

ANY even numbered section of Dominion Land in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

**SYNOPSIS OF CANADIAN NORTHWEST MINING REGULATIONS.**

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet. The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

**Diamonds and Diamond Mining**

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

**THOS. PATTERSON & CO., Fiscal Agts.**

161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

**Present Price of Stock FIVE Cents per Share**

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE.

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**

## A Mexican Mine of Promise

Great Opportunity for Getting in on Ground Floor
—Now Offered.—

# 'El Paso Parral' Mining Co.

Offer for sale at 15 cents per share, for a limited time only, stock with par value of $1.00. Their Mine, situated in the heart of Mexico's richest gold producing district, contains some of the most promising veins in the state of Chihuahua, and near the Mexican Central Railroad, so that cheap transportation is assured.

**BUY NOW!**

As the Company retains the right to withdraw the sale of stock at present price.

For full particulars call on or communicate with

W. KELSEY HALL, Fiscal Agent,
PETERBORO, ONT.

NOTICE is hereby given that the rights of the government on the waterpowers hereunder mentioned will be put up at auction to be held in the sales room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long leases, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ke rapids on the Quinze river, county of Pontiac, about 13 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot No 26, 3rd range of the township of Grandison, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manicouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the River aux Outardes, on the north shore of the Saint Lawrence, about 7 1-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Gabelle," on the Saint Maurice river, about 12 miles (in a straight line) from Three Rivers.

7. The Coteau Rapide on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermilion river, about 21 miles above La Tuque, county of Champlain, on the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 6 1-2 miles from the confluence of these rivers and about 90 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Sault," river Rimouski, township of Duquesne, county of Rimouski, 16 miles from Rimouski.

11. The "Rapid Malin," river Bonaventure, about 6 miles from the Hazeltons of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 2 1-2 miles from the village of Saint Felicien and 18 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 63 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Pelletier, county of Lake Saint John.

15. The three falls on river "Nault-au-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power of these water-powers, the extent of the surrounding land which the above mentioned concessions comprehends, apply to the Department of Lands and Forests, Quebec.

ADELARD TURGEON,
Minister.

Department of Lands and Forests,
Quebec, 16th May, 1906.

## FIRST CARRIAGE IN MAINE.

**How a Minister Came to Be Rich and Why He Sold It.**

The Rev. Francis Winter was a native of Boston and a graduate of Harvard college. He went to Bath early in 1767 and, after preaching on probation for the orthodox church, was invited to settle, which invitation he accepted. He was ordained in the autumn of the same year. He went to Bath on horseback in company with Lemuel Standish. Mr. Winter came from Boston, where he had associated with such eminent men as Adams, Otis and Warren, himself becoming an ardent patriot, taking the lead in the Revolutionary measures adopted in Bath during that memorable period.

Mr. Winter married Miss Abigail Alden in 1768, and it is through her that the Winters of today trace their ancestry back to the "Puritan Maiden of Plymouth."

Three years after the marriage of the Rev. Francis Winter and Abigail Alden they started to visit a sister of Mrs. Winter living in Connecticut and intended to ride all the way on horseback, but Mrs. Winter became so fatigued that Mr. Winter sold one of the horses for a carriage and harness. It was the first carriage that ever came into Maine and was called a chaise. Traveling was so difficult that two negroes were employed to accompany them with shovels and axes to clear the road. Several times the chaise had to be taken apart and lifted over fallen trees. The minister's parishioners thought that it was putting on too much style for their pastor to ride in a carriage, and in consequence Mr. Winter sold it. This was in 1771. It was a two wheeled chaise, the body resting on leather braces, which were attached to wooden springs.

## A DAZZLING EFFECT.

**Old Time Illumination With Lanterns and Candles.**

In these days of electric lights, with all their capabilities for brilliant illumination, it is amusing to read what the subjects of George II. considered a dazzling effect. A Frenchman visiting in London at the time of the coronation of that monarch in 1727 writes enthusiastically in praise of the lighting of the city as well as of a banquet display.

"Most of the streets," writes M. Sausseure, "are wonderfully well lighted. In front of each house hangs a lantern, or large globe of glass, inside of which is placed a lamp which burns all night. Large houses have two of these suspended outside the doors by iron supports. Some even have four."

How one are light would have dazzled the good people of that day!

"When the coronation procession entered Westminster hall," the writer continues, "the light of day was beginning to fade. Forty chandeliers, in shape like a crown, hung from the ceiling, each having thirty-six wax candles.

"On the king's appearance all suddenly lighted, and every one in the room was filled with astonishment at the wonderful and unexpected illumination. Little cords of cotton wool, imperceptible to the eye, saturated with sulphur of saltpeter, spirits of wine and other ingredients, had been prepared and arranged so as to carry the flame rapidly from one candle to another. The arrangement had been so skillfully prepared that scarcely a candle failed to take fire."

**For Dosing Cassoff.**

A physician recommends rochelle salts for amateur doctoring. He says that it is an excellent thing, several times a day, to take as much of the salts as may be put on a cent in a little water. That will sweeten the stomach and act as a very desirable spring medicine. He also speaks highly of soda, having no patience with those timid people who have an idea that it is a dangerous dose, doing some vague harm to the coating of the intestines. "Why, everything we eat, almost, has soda in it," he cried in disdain. "It is an admirable thing to take half rochelle salts and half bicarbonate of soda, as directed, several times a day. I know of few gentler and still more beneficent general medicines."

**A Poisonous Frog.**

People in general look upon all species of the frog as being perfectly harmless. Should you be traveling in New Granada (United States of Colombia), however, you would do well to let a certain little tree croaker severely alone. He secretes a poison equally as deadly as that of the rattlesnake. It exudes from his skin in the shape of a milky liquid and is used by the natives as a poison for their arrows.

**Write as You Feel.**

If you would write to any purpose, you must be perfectly free from within. Give yourself the natural reign; think on no pattern, no patron, no paper, no press, no public; think on nothing, but follow your impulses. Give yourself as you are—what you are and how you see it. Every man sees with his own eyes or does not see at all.—Emerson.

**Wouldn't Trust Him.**

"Of course," said the sarcastic man, "you always do your wife's bidding."

"Gracious! No!" replied Mr. Henpeck. "She wouldn't let me. When she goes to an auction sale she never takes me with her."

**Contradictory.**

"Has your son arrived at years of discretion?"

"Oh, yes. He's about to be married."

"How do you contradict yourself?"

All pain must be to teach some good to the end.—Browning.

**Barn Hit By Electric Bolt.**

During the heavy electric storm of Friday night a barn belonging to Mr. Alex Watts, near Warsaw, was struck. The bolt seemed to have made a glancing contact as the structure did not take fire.

## William Walker's Body Found in The Water.

Guelph, June 10—The body of a young man named William Walker was discovered floating in the water near Goldie's mill by a man on his way to work about seven o'clock yesterday morning.

The discovery clears up a mysterious happening which has brought sorrow to two homes in the Royal City. On Wednesday of this week the residence of Mr. and Mrs. William Smith, Norwich street, was to have been the scene of the nuptials of their youngest daughter, Miss Mary, but the pleasant expectancy and proposed good wishes were changed to grief and disappointment when the intended groom, William Walker, failed to appear. The wedding was announced for three o'clock. At that hour the officiating clergyman, Rev. James Harris, and a few friends were present. When the groom did not put in an appearance, the feeling of rejoicing was turned to one of sorrow, and much sympathy was felt for Miss Smith, a bright, engaging and amiable young lady.

The young man who failed to appear as the same person whose body was found yesterday morning. He is reported to have last been seen about midnight on the date when he should have been married. He was living in vicinity of where his body was discovered. Nothing seems to be known as to the motive which prompted his strange doings or his untimely end.

By trade he was a printer, but for some time he has been working in Crowe's Iron Works. It is even said that some life insurance he carried had been lately made payable jointly to his intended wife and his mother.

So unexpected was the desertion at the altar that one paper published an account of the wedding as having actually taken place.

## People Will Selze the Land

St. Petersburg, June 10—The demand for opportunity to speak on the agrarian question in the lower house of parliament is so pressing that the rule against the house sitting on Saturday has been abandoned and the debate on this important subject was resumed yesterday. Every member seems to feel that he should make known the views of his constituents upon this issue. The leaders of the Constitutional Democrats realize the necessity for action and dare not propose to close the debate, as that would savor of restriction of the sacred right of free speech.

A month has elapsed since parliament met and the agrarian question is not consigned to a committee which must be done so that details of bill may be elaborated. The few conservatives no longer attempt to defend their views and by tacit consent the Constitutional Democrats who feel certain that their program will prevail are abandoning the field to the radicals who continue to urge the full nationalization of land.

Mannikin, one of the peasant leaders, declared that the theory that the peasants are conservative is utterly fallacious. They were now so firmly convinced that the land belongs to them as they were in 1861 that servitude should cease and was utterly incapable of grasping the idea of provincial property in land. He concluded:

"We were elected to give the people land and liberty. We find it necessary to expropriate property and confiscate the lands of the crown and church. The government must beware or soon it will be too late, and the people will take the land if the government refuses to give it."

Prof. Vylesky and several members of the lower house supplemented the action yesterday in accepting the government's decision to insist on a month's delay in the case of death bill by addressing an open letter to the emperor applying to him in the name of justice and humanity to suspend all action until the question of the death penalty is finally decided.

**Cost of Electric Smelting.**

Ottawa, June 9.—Hon. Frank Oliver has received from Dr. Haanel, Superintendent of Mines, a preliminary report on the Government electrical ore smelting experiments at Sault Ste. Marie. The report, after setting forth the conclusions reached as a result of the experiments, gives the cost of production per ton of pig iron by electric process at $18.89, and the estimated cost of establishing a 1,000 horse-power plant producing 12 tons of pig iron per day of twenty-four hours at $300,000.

**Daring and Dexterous.**

For a feat of dexterity and nerve it would be difficult to surpass that of the Boajeeman of South Africa, who walks quietly up to a puff adder and deliberately sets his bare foot on its neck. In its struggles to escape and attempts to bite its assailant the poison gland secretes a large amount of the venom. This is just what the Boajeeman wants. Killing the snake, he eats the body and uses the poison for his arrows.

**Lowell's Motto.**

In a eulogy which appeared in the Century Magazine just after Lowell's death are these words: "This is Lowell's legacy as a patriot, not the sentiment, 'My country, right or wrong,' but 'My country—it shall never be wrong if I can help it.'"

**No Disguise.**

Husband (admiringly)—There's no use trying to disguise the fact that you are smarter than I am, my dear. Wife (complacently)—The fact, my love, has never been in disguise among those who know us.

**Diaries.**

If the people who keep diaries are wise they never put into them the things that would make them most interesting to other people in the years to come.

No man likes to be surpassed by men of his own level.

## PIANO EXPERIMENTS.

**Playing by Sweeping the Strings With a Feather.**

Open wide your piano so that the wires are exposed. Over the wires place sheets of music, and when you strike a tone you will find that it has a rattling sound. If now you play a tune in the same manner, with the sheets of music still lying on the strings, it will sound as if the instrument were a banjo. Anyhow, it is a good imitation.

Now remove the music sheets and press down gently, but firmly, the keys belonging to any cord. Take the simple cord C, E, G, for example. The keys must be pressed down without sounding them and held down while some one gently brushes the strings with a feather or a straw. The effect will be as if the cord were played far away and is heard by you as very soft tones.

Change the cord, always pressing down the keys without sounding them, while the feather still sweeps the strings lightly. In this way you may modulate or play a slow piece, and the effect will be very beautiful, indeed, as if heard from a great distance.

The reason of this is that ordinarily a damper rests against each string, but when the corresponding key is struck or pressed down the damper is raised. In sweeping the strings with the feather, lightly, only the strings that are undampered sound, the others being held mute by the dampers, but if the touch of the feather is too heavy even the other strings may sound, so your care must be in making a light and delicate touch.

Now press down a key gently and hold it. Strike very hard the octave above this key, but do not hold it after striking the tone. When the wire of the tone struck has been sufficiently dampered, so that it does not sound so loud, the pressed down key will be heard to "sing" clearly, even though it was not struck. This is because every note struck is composed of several notes, being in reality a cord in itself, and each note contained in that cord causes the corresponding note in the keyboard to vibrate, or "sing," in sympathy if held down in like manner.

The other notes that will sound under these conditions will always be the fifth above the octave, the second octave and the third and fifth above that, and these tones that sound are called "overtones."

For illustration, if C in the lower part of the piano be struck, any or all of the notes that follow will sound if their keys are first pressed and held down.

## POINTED PARAGRAPHS.

When you are all done but finishing, you are just half done.

If you have time to boast about being worked to death, you have not much to do.

Some people are so unfortunate that their troubles make people laugh instead of cry.

A man who underestimates himself may be tiresome, but he is not a circumstance to the man who brags.

People may disdain a compliment, but they feel a tender little spot in them where it hit and refused to be dislodged.

It is a theory growing in conviction that the man who says a mean thing about another isn't as mean as the man who carries it.

The man who travels over the path behind you wisely looks at your footprints and sees where you could have avoided many a pitfall.

**Tiny Trees.**

The midget of the whole tree family is the Greenland birch. It is a perfect tree in every sense of that term and lives its allotted number of years from 75 to 180 just as other species of the great birch family do, although its height under the most favorable conditions seldom exceeds ten inches. Whole bluffs of the east and southeast coast of Greenland are covered with "thickets" of this diminutive species of woody plant, and in many places where the soil is uncommonly poor and frozen from eight to ten months a year a "forest" of these trees will flourish for half a century without growing to a height exceeding four inches.

**Strange Dances.**

Queensland's government aboriginal settlement on Fraser's island holds a weekly dance for the blacks. Among the bundles of old clothes sent to the settlement there are often ball gowns, so the gins sport decollete dresses. Neither sex wears boots. The sexes have to dance separately.—Sydney Bulletin.

**Shrewd Guess.**

Senior Partner—We must be careful not to give Billings any more credit. He's evidently losing money. Junior Partner—How do you know? Senior Partner—I heard his remark today that "life is full of ups and downs." No man ever admits that until he begins to strike the down.

**Rejected.**

"I have called," said the confident young man, with a manuscript sticking out of his pocket, "to see whether there is a vacancy in this office."

"No," replied the melancholy editor as he looked round the place; "I'm sorry to say there is none. Even the waste paper basket is full."

**A Change.**

"Well, well! There goes Miss Strong. When I saw her last she was posing as a bachelor girl. That's her hobby."

"All that's changed now. She dropped her hobby for a hubby."—Exchange.

**Canadian Northern in Toronto.**

Toronto, June 11—The Canadian Northern Railway Company have purchased for about $1,000,000 two more blocks of land on Beaconhall street for purposes of their eastern entrance into the city, and for the new freight shed they are to erect between Trinity and Beaconhall streets, on Eastern avenue and Front street. This purchase completes all the land the C. N. R. requires for its entrance and freight sheds.

## THE CUPEY TREE.

**One of the Most Curious Growths of the West Indies.**

The cupey, or, as it is sometimes called in the English possessions, "the attorney," is one of the most curious, as it is one of the most picturesque, denizens of the virgin forests of the West Indian islands. It belongs to the parasitical family of trees or plants; but, terrible to relate, it invariably, with the basest ingratitude, destroys all life in the unfortunate tree that cherishes it in its early growth. The seeds are borne on the wings of the wind and deposited on the branches of other trees, when they burst into roots, which are dropped toward the ground all around the "nurse" tree. In time these roots reach the ground and strike into the soil.

From this moment the roots grow stronger and stronger until they resemble a lot of rope ladders thrown over the tree. Next the parasite sends down a great cord, which twines around the trunk of the supporting tree, at first as though in loving embrace, but it grows tighter and tighter, eventually strangling its benefactor out of existence. The nurse tree thus killed rots to decay, and from the immense fibrous roots of the destroyer now springs a great trunk, which rises high into the air. When a cupey is full grown it presents a magnificent spectacle, for the cordlike root rises often to fifty or sixty feet and supports in midair the vast tree itself.

## MARIE ANTOINETTE.

**Two Dramatic and Contrasting Episodes in Her Life.**

Thistelton-Dyer, in his "Royalty In All Ages," describes two dramatic and tragically contrasted episodes in the life of Marie Antoinette, the lovely and ill fated queen of France. Once, in the days of her greatest popularity, when she went to the opera of "Iphigenia," when Achilles came to the line "Let us sing and celebrate the queen," he turned toward the radiant young sovereign and sang two additional impromptu lines of charming compliment. This graceful and unexpected homage so delighted the audience that "all was shouting and clapping of hands, and – what never happened at the opera before—the chorus was encored, and there were cries of 'Long live the queen!' at which expression of feeling her majesty was so affected that she shed tears."

On the next occasion when Marie Antoinette's sun of popular favor had set and she was nearing the tragic close of her life, one of the actresses in "Unforeseen Events" bowed to her as she sang the words "Ah, how I love my mistress!" In a moment all was in uproar, and the theater was full of hoarse, angry cries of "No mistress! No master! Liberty!" and "No master! No queen!" and it was some minutes before the tumult quieted down and it was possible to proceed with the play.

## SOUPS AND BROTHS.

**They Are Stimulating, but Have Little Nutritive Value.**

Soups and broths made of the meat pieces alone and without the addition of meat substance, eggs, vegetables or cereals have little nutritive value, although they do possess stimulating properties.

A dog would starve to death in ten days if fed upon beef broth pure and simple.

Soup interferes with digestion whenever a full meal is eaten. I consider it as being entirely superfluous and advise its discontinuance in a substantial dinner menu.

Soup, being practically all water, plays an important part in conjunction with the large quantities of other liquids injected during mealtime in delaying and interfering with digestion and laying a foundation for stomach trouble. Through it and the other liquids used the stomach is not only overfilled and unnecessarily burdened, but the gastric secretions are so weakened by dilution that they can act but slowly upon the food mass. Here again we have the food remaining in the stomach for too long a period, and there is likely to be produced all of the symptoms and signs of an intoxication due to the absorption into the system of the products of decomposed foods.

Soup eaten by itself or with a light meal, as a rule, does not act harmfully. —What to Eat.

**Card Etiquette.**

"Hand in a lot of cards," said the elder woman.

"Why?" was the hurried inquiry.

"Well, if you don't hand in enough," she said, as her companion dived deep into her case, "they will say you don't know what is right. If you give too many, however, they will think that you know better than they do and that there is some new style they have heard nothing about. Hand him a lot."

**At the Hotel.**

Mr. Verdant—Let's try this here demitassy at the end of the programme. Say, waiter, bring us some demitassy. Mrs. Verdant—Now, par, you promised me you wouldn't take nothin' stronger'n tea or coffee.

**Unappreciated Liberality.**

"You are going to be tried before a very liberal judge," said a lawyer to his client.

"I am glad of that."

"You needn't be. If you are found guilty he'll give you all the penalty the law allows."

**His Specialty.**

Bacon—When he was out camping did your brother kill much? Egbert—He nearly killed everybody in the camp. He was the cook.

**Rushing Work at Ottawa.**

Ottawa, June 11.—It is believed in some quarters that the present session of the House of Commons will be brought to a close by the end of June, or by the end of the first week in July at the latest. It is probable that the House and committees have never worked harder than during the present session. Very few days have been wasted. The debate on the Lord's Day Bill will take several days, but this will probably be the only prolonged debate which will occur between now and the time the House rises. Many members on both sides of the House express the opinion that the remaining business can be disposed of in three or four weeks.

**Ammunition for Rebels.**

New York, June 9.—A Panama despatch to The Herald declares that passengers and officers of the City of Para, Pacific Mail, which reached Panama yesterday, say that while at Corinto, the American ship Empire, flying the American flag, was taking on coal with the knowledge of the Nicaraguan Government and left that port on June 2 to bombard San Jose, Guatemala.

There were 3,000 rifles and 1,500,000 rounds of ammunition aboard, and the ship had machine guns mounted. The recalcitrants aboard were under command of Gen. Castillo.

**Accident May Prove Fatal.**

Owen Sound, June 9.—Alex Holmes, a married man, aged 55, was accidentally caught in the shafting at the Sun Cement Company's works, and had an arm torn off near the shoulder and three ribs broken. He is in a critical condition.

SUBSCRIBE FOR THE TIMES.

**Warning Against Gamblers.**

New York, June 9.—A formal warning to passengers to beware of professional gamblers on shipboard was published in the official passengers' list of the White Star steamer Majestic which arrived here today from Liverpool and Queenstown.

# A PROFITABLE INVESTMENT FOR MONEY SAVERS

I am going to talk to you through this advertisement just the same as if I was looking straight into your eyes.

I make a business of finding profitable investments for money savers.

I employ the best of experts to help me determine the profit possibilities and the safety of such investments before I recommend them to my clients.

The person with $50,000 or more can live on the interest of his money, but the person who can save only a dollar a week or who has any small amount up to the $500.00 mark, feels keenly the necessity for placing his money where the possibilities of large profits exist and where the danger of losing his money is diminished as much as possible.

It is to accommodate this class, as well as to secure the money for meritorious enterprises, managed by honest and competent men, that I make a business of investigating and finding desirable investments for money savers.

I bring the investor and the meritorious enterprise together.

In making scores of investigations, and as a consequence of the thousands of letters received from investors all over the United States, I agree with the late Henry Ward Beecher, who said:

"I admire the miner's wealth. It is clean. There is neither blood nor tears on it. It is acquired away from the scheming and ordinary cut-throat ventures where the success of one man often means the disaster and downfall of another. No one has been pinched; nobody has been wrecked. The miner who digs a fortune out of the ground has the satisfaction of knowing he has not robbed a soul, even though he becomes a thousand times a millionaire."

Mining, because of its tremendous importance and its unparalleled influence upon the world, as it is the basis of our entire monetary wealth, to say nothing of its other features, suffers through the shortcomings and errors of those who take a mean advantage of the industry and the public confidence. But it should no more be condemned than should the Christian religion suffer because of the wrong it is done by the hypocrites.

I AM FIRST, LAST AND ALWAYS FOR THE SQUARE DEAL. The square deal for the investor; the square deal for the enterprise; the square deal for every interest involved in business or out of business. This policy is necessary to my success.

The Square Deal involves something more than simply common honesty, and the man who is not willing to let the Square Deal permeate his entire proposition has a mistaken idea of what is best for him and in nine cases out of ten he never succeeds.

The undertaking that will not bear the most rigid investigation, both in regard to the business itself and the men responsible for it, should be left severely alone.

The Trinity Mining Company, its officers and directors, its properties and business are subject to any or every investigation that the most exacting investor might wish to make.

Some of the several prominent men who are behind this enterprise with their money and brains are the following: H. H. Latham, of the Latham Machinery Co., 197 So. Canal Street, Chicago; I. L. Shafer, of the Jukes & Shafer Co. (Japanners), 201 So. Desplaines Street, Chicago. H. E. Procunier, President of the Moon Mfg. Co. (Electrical Equipments), 47 South Canal Street, Chicago. H. C. Reno, Mining Engineer, 140 Dearborn Street, Chicago.

If you will take the trouble to make proper inquiry through any of the commercial agencies or through Chicago acquaintances, you will discover these men are not the kind who would permit their names, to say nothing of their money, to be used or coupled with an enterprise that did not deserve every confidence and co-operation, and if these men can afford to do it, any other man living can afford to do the same thing.

I am in the investment business for life. I, naturally, will not intentionally direct you wrong. I want you as a customer.

A good block of paying mining stock is as good life insurance as any man needs. He does not have to die to enjoy the benefits of it is self-denial. It insures him a comfortable seat in a cozy corner by his own fireside when he is no longer able to work.

The directors of the Trinity Mining Company have authorized me to sell 300,000 shares of their treasury stock for the immediate use of installing additional facilities for the economical extraction of the values from their ore bodies, and for other purposes incident to the enlarged success of the corporation.

Every stockholder stands on an equal footing with every other stockholder in proportion to the amount he holds. There will be no freezing out or squeezing out of any interest. I wish to be emphatic in this particular for I realize that such things are common where the "big fish eat the little ones," and I wish to say that in this case or in any other enterprise that I may recommend to the public, such unwarranted methods will not be permitted to prevail.

Read every word that follows and let me hear from you immediately.

**PIERCE UNDERWOOD, Specialist in Profitable Investments,**

# A SQUARE DEAL IN MINING INVESTMENTS

### PROOF ONE:

Investigate through any commercial agency or any other channel, the men behind this enterprise. If they are not both honest and able don't invest.

### PROOF TWO:

I have in my office many receipts from the U. S. mint at San Francisco given to the bank for bullion received from the La Jojoba (pronounced La Hohova) group of mines while the Trinity Mining Company was proving the property. Ask any friend here to come and inspect—come yourself if you can.

### PROOF THREE:

Read what Mr. H. C. Reno, the eminent mining engineer and president of the Trinity Mining Co., says. He stakes his reputation on the general worth and profit producing abilities of these properties. *HE KNOWS.*

H. C. RENO,
Mining Engineer,
President Trinity Mining Co.,
1102 Hartford Bldg.,
CHICAGO.

**"I have staked my reputation on the general worth and profit producing abilities of the mining properties controlled by this company."**

May 11, 1908.

Mr. Pierce Underwood, 140 Dearborn St., Chicago.

My Dear Sir: For twenty-seven years my time has been exclusively devoted to the examination of mining properties of the United States, Canada and Mexico, and in the superintendence of others.

I have felt that it was the time to secure the control of a property for myself, one that I could select with the advantage of my years of experience and one that I would know possessed all the necessary requisites to make myself and my associates financially independent. And I am pleased to say that I have staked my reputation on the general worth and profit producing abilities of the mining property controlled by this company.

I have based this view upon the following facts, which are within my knowledge: First, there are over 200,000 tons of visible, available and profitable mining ore exposed in sight, in the form of a vast quarry, which can be taken out at an expense of not exceeding 50 cents per ton; it can be milled with proper milling machinery at a cost of not exceeding $1.50 per ton, and it has been shown by actual mill runs that its average value is not less than $4.80 per ton (while some ores taken from other mines of this same group have shown from $60.00 to $400.00 per ton, and in individual instances have shown as high as $680.00 per ton.) The above quantity is visible, and one is warranted in the belief that the ore will continue in depth and produce many times this amount of ore of equal or possibly greater value. This is only one of the twelve mines controlled by the company constituting this group.

My long experience justifies my statement that in the Trinity Mining Company as a corporation and in the properties controlled by this corporation the element of risk to the investor is as wholly eliminated as honesty, ability and very valuable property can accomplish. My ALL is invested in this undertaking, because I am confident of its success. Yours truly,

H. C. Reno M.E.

### THE TRINITY MINING COMPANY AND ITS PROJECTS

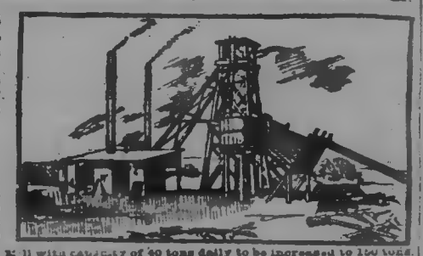
The Trinity Mining Company is a corporation organized under the laws of the District of Columbia for One Million Dollars, divided into one million shares of a par value of $1.00 each, fully paid and non-assessable, all stock common stock.

The purpose of the company is to operate the vast LaJojoba group of mines located in the State of Sonora, Mexico. This property is twelve miles due west of Magdalena, and Magdalena is on the Sonora Railroad, fifty-six miles due south from Arizona.

Shaft Machinery of San Miguel Mine.

### VAST MINERAL DEPOSITS CONTROLLED BY THE TRINITY MINING COMPANY.

The great LaJojoba group of mines include twelve or more individual properties, any one mine of which, it is believed, is sufficiently strong enough to earn a good interest on the entire capital stock of the company. Two of the mines have been considerably developed with a view of ascertaining as nearly as possible a correct estimate of the vast wealth contained in their veins. These properties include a surface area of 162 acres.



Mill with capacity of 40 tons daily to be increased to 150 tons.

### CONDITIONS OF PROPERTY.

The conditions of this property are ideal. As to climate, the altitude is about 2,700 feet above the sea, no severe storms of any kind and work can go forward without discomfort during the entire year. There is near at hand an abundance of hard wood for fuel and timbering, and water sufficient for all purposes.

The improvements consist of a large mill with all necessary accessories and appliances, capable of handling 40 tons of ore a day, one 85 H. P. Ames Engine with boiler, etc., etc., all of which is properly housed in substantial buildings. There are two small engines with blowers, pipes and all necessary tools and supplies for conducting an extensive business.

On the Cleopatra Mine there are surface improvements, including frame hoist, blacksmith shop tracks, etc. On the San Miguel Mine there is a new gallows frame 42 feet high, a 50-ton ore bin, a new Fairbanks-Morse & Co. double cylinder hoist, a 40 H. P. tubular boiler, blacksmith shop, tanks, pumps, etc., etc.

In addition to the equipment for the mines and mills, there is an office building owned by the company, a two-room supply building, one large five-room boarding house, two four-room renting buildings and several other houses for the use of miners, a 2,500 foot 4-inch pipe line connects the San Miguel Mine to the mill.

There are over 12,000 tons of mill tailings which, when run through a Cyanide plant, will leave a net profit of over $30,000.

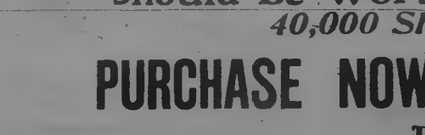
### DEVELOPMENT.

The men responsible for the Trinity Mining Company, before consenting to the sale of stock in this company to the public, felt it was not only a duty to themselves, but to the public as well to first prove these properties and see whether they were all that it was believed of them and to eliminate, if possible the element of speculation. They therefore developed the San Miguel and the Cleopatra Mines and blocked out ore in quantities sufficient, in their estimation, to guarantee themselves and investors against any possible loss, thus making the enterprise one of proven merit and not of speculation.

The development of these properties includes a shaft on the San Miguel Mine, 160 feet vertical, together with several other shafts on the vein to a less depth. There are over 2,000 feet of drifts and the ground opened up in this mine discloses a very strong vein, varying in width from two to twenty feet, and there is in sight a very large block of free milling gold ore, which, in places, runs exceedingly high. The ore is soft and can be cheaply mined and milled.

Development in the Cleopatra is extensive to a depth of about 185 feet. Ore in this mine is blocked out 40 feet wide, 400 feet long, and to a depth of 185 feet. This one block contains over 250,000 tons of ore which can be quarried and delivered in the mill for less than 40c a ton. Its average value is about $4.80 a ton and will pay a profit of about $2.00 per ton net.

There is a large amount of development and good ore bodies in the other properties. These properties together could easily produce from 300 to 500 tons of milling ore per day for many years.



Office and Supply Department.

### WHAT THE COMPANY NEEDS

The company needs your subscription to its capital stock, and your money will be used for increasing the mill and other facilities for treating the ore in the mines controlled by the company, and it will be some satisfaction for you to know that the by laws of this company specifically forbid the use of any of the money for the payment of official salaries or any other subsidiary purposes, except actual operation and its necessary incidents, and the acquirement of property.

The mill must be increased to 150 tons capacity. It is now only 40 tons and costs practically as much to operate as a large mill.

A tramroad should be built to the mines so that the ore can be delivered in the mill for 15c a ton instead of 60c, as it has been costing. A cyanide plant, which, as soon as installed will pay for itself twice over in profits from the tailings of the present mill.

For various purposes, the directors of the company have authorized me to sell 300,000 shares of the treasury stock, of which 40,000 shares have been set aside exclusively for the readers of this paper, and no subscription for less than 25 shares will be taken.

The price is 50c a share cash or 55c if paid for on installments of 10 per cent down and 10 per cent a month. Par value $1.00 per share. Estimated value within one year, from $2.00 to $8.00 per share.

OFFICERS' QUARTERS.

## You Can Buy This Stock To-Day at 50 Cents Per Share, Par Value $1.00. Should Be Worth From $2.00 to $4.00 Within Six Months. *Only 40,000 Shares Allotted to the Readers of This Paper.*

## THE CHICAGO NEWSPAPERS ENTHUSIASTIC

### About the Trinity Mining Co. and the Men Behind It.

### READ WHAT THEY SAY

### CHICAGOANS SEEK MEXICO GOLD

**Opening of Large Mines Follows Inrush of American Capital.**

Special Dispatch to The Inter Ocean.

MAGDALENA, Sonora, Mex., May 16.—The gold coast of Sonora, which is the eastern part of this state, and one of the largest in the world, is now being rapidly developed by foreign capital most of it from the United States and a part from England and South Africa. Large mines are now being opened and operated particularly in the Minas Prietas and the Magdalena districts. The Colorado Cluster, which has already produced $10,000,000 in gold, is now yielding a profit of $500,000 a year to its owners, who are Chicago and English capitalists. South African and American mining men are interested in the Grand Central mine at the same camp, which is becoming one of the big producers of this section.

The Trinity Mining Company, made up entirely of Chicago business men, owns a mine twelve miles west of this town. This mine has been operated on a comparatively small scale and its milling plant is soon to be enlarged and a big cyanide plant added. The company has large deposits of gold, with some silver and copper, and has the mine extensively developed. Ample $2,000,000 worth of ore is blocked out and ready to be milled.

*News Item from Chicago Inter Ocean, May 23d Issue.*

### PICKING UP MILLIONS FROM MEXICAN MINES

**Chicago Men Acquire Control of an Enormously Valuable Property at Sonora, and Predict That It Will Rival in Richness Anything in the Republic.**

"Only those who have had occasion to do business in Mexico can appreciate the intensely friendly feeling with which the Mexican government and the representative men of the country regard American capital and the protection and encouragement they offer them to make investments there."

The speaker was H. E. Procunier, one of the directors of the Trinity Mining Company of Sonora, Mexico, and also president of the Moon Manufacturing Company of 47 South Canal street. The Trinity company has acquired possession of a property in Sonora which expert engineers have pronounced to be of exceptional richness and which promises to add another group of names to the Chicagoans who have been made millionaires by investments in mines.

Mining, continued Mr. Procunier, is like any other business. If a man is going to invest in a mine he wants to do the same as he would do in any other business investigate it thoroughly. He has got to find out in the first place that the properties really exist, he has got to find out if they have value, and if they have, how much. Then comes the question of title and conservative capitalization. After these points he must find if the management is competent and if the controlling spirits are honorable. Upon a favorable reply to all these questions, there is no reason why a man should hesitate any more to put money into a mining company than into a stock of groceries.

That is the way I feel about it. When I put a dollar into the Trinity Company I believed and more that we have got one of the most valuable mineral properties that exist, even in that wonderful mining country of Mexico, and that this property is within the next few years going to return millions of dollars to us in dividends. Ore per ton assays high in value, and there is enough in the property to run us for hours of years to come.

Other Chicago men who have joined Mr. Procunier in the Trinity mine are H. H. Latham of the Latham Machinery Company, 197 South Canal street; I. L. Shafer of Jukes & Shafer, 201 South Desplaines street.

*News Item from Chicago Examiner of May 24th.*

### CHICAGOANS EXPECT RICH PROFITS FROM MEXICAN GOLD MINES

**Local Capitalists Are Opening Large Gold Mines in Sonora.**

It is difficult to estimate the amount of gold which is sent from Mexican mines owned by Americans to the mints of the United States. The most active gold section in the Southern Republic is in the State of Sonora, which immediately adjoins Arizona on the south. It has been customary to ship gold bars from the mines of this state to the American mint at San Francisco. A short time ago the Trinity Mine, which has twelve miles south of Magdalena on the Sonora Railroad, and fifty-four miles south of the Arizona line, produced $8,000 of gold in two months. This product was molded into gold bricks or bars taken by the manager of the mine to a large mercantile house in Magdalena, which is also a banking institution. This establishment turned the gold over to the Wells Fargo Express Company, which carried it to San Francisco and delivered it to the Bank of California. The Bank of California then transferred the bar which contained about $1,600 worth of the metal, to the government mint.

In order to eliminate any imperfection which any gold bar might contain, and to arrive at the exact quantity of the metal, the mint remelts the bar. The quantity of the gold is then accurately determined and the mint report sent in this case to the Bank of California. The bank forwards the report to Magdalena with a notice that the value of the gold bar has been deposited to the credit of the Trinity Mining Company in the Bank of California.

The Trinity Mining Company is a Chicago enterprise. Prominent Chicago business men are interested in the property with Mr. H. H. Latham, well known mining engineer. The company has invested over more than a million dollars' worth of ore and has been operating a small mill. It is proposed, however, to enlarge the capacity of the mill and add the cyanide plant. The cyanide process catches the fine gold which escapes when the original amalgamating plates are used. The company is to be enlarged and its operations very greatly increased.

*News Item from Chicago Examiner of May 23d.*

### CHICAGOANS GOING TO MEXICO TO INSTALL MINE MACHINERY

**H. E. Procunier Talks of Gold Properties in Sonora Owned by Local Business Men.**

A number of prominent Chicago business men who have become interested in the Trinity Mining Co. of Sonora, Mexico, are contemplating a trip to that section shortly to witness the installation of massive modern mining machinery, which will be used to take out thousands of tons of rich ore already blocked out. Among the Chicagoans who are interested in the company are: H. E. Procunier, president of the Moon Manufacturing Company, 47 South Canal street; H. H. Latham of the Latham Machinery Co., 197 South Canal street; I. L. Shafer of Jukes & Shafer, 201 South Desplaines street, and H. C. Reno, mining engineer.

Mr. Procunier, in speaking of the mines at Sonora, Mexico, owned by the Trinity Mining Co., said:

"There is a real mining enterprise; there is no wildcat speculation about it. The properties in Sonora, Mexico, exist; they have value; the title is clear, the capitalization is adequate, the management competent and the controlling spirit knows what he is doing, which cannot be said of all. Before investing in any proposition people should always see that the above conditions are true. It is not always necessary to make a personal investigation of the property, especially if well-known business men profitably guarantee every representation made.

"The government of Mexico is specially favorable to American capital and safeguards it to the last degree. We expect to put our company on a plan of operation equal to some of the very largest and most profitable in the State of Sonora. We have the money to do this and the public is taking great interest in our enterprise.

# Sin Against Health

**Why the Usefulness of All Organs is Destroyed by Costiveness.**

Most important to health and comfort is proper action of the bowels.

By nature these organs are intended for the removal of the waste particles of matter which accumulate in the system.

Retain these wastes and you poison the blood, ruin digestion, bring on nervousness and anaemia.

Habitual costiveness is best overcome by Dr. Hamilton's Pills, which establish regularity that is exactly consistent with nature.

Not a drastic purgative—not even a pain or sensation of grip, because Dr. Hamilton's Pills are vegetable and free from irritating mineral substances found in so many widely advertised remedies.

In every case Dr. Hamilton's Pills do cure and bring sure relief from headache, biliousness and other manifestations of constipation.

Jas. McConnell of Walkerton writes "Since I was comparatively a young man I have not enjoyed real good health.

"My appetite was good and strength kept up, yet I knew something was wrong.

"Frequently I took bilious attacks and violent headaches. My stomach was disordered, skin was murky, under my eyes were heavy dark rings.

"Last winter I read through the Poison's almanac and decided my trouble was constipation. I used Dr. Hamilton's Pills, and can hardly tell the help they have been. I am now as fresh, strong and well as a boy."

Just try the wonderful magic of Dr. Hamilton's Pills. Sold by all dealers, 25c. per box, or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., or Kingston, Ont.

## LOCAL INCIDENTS

By The Times Man on the Street

—The next sitting of the first division court will be held on Friday, June 29th.

—Both the Boards of Education and Works met last night. Particulars elsewhere.

—A large number from the May will attend the annual picnic of Smithsmore parish, at Tara Grove today.

—A Japanese student of Trinity College, Toronto, will preach at both services in St. John's church next Sunday.

—Mr. S Holland, proprietor of the American hotel, who underwent an operation on one of his feet some time ago, is now able to get about.

—Street car passengers now have to transfer at the corner of Water and Smith streets, on account of the new Water street sewer now being built.

—Mr. James Kearney, proprietor of the Lakeview House, Young's Point, has recently repainted his hotel, and made a number of other improvements.

—The Times has to thank Mr. J. J. McBain, who with Mrs. McBain is visiting in British Columbia, for kindly thought in sending us some papers from Vancouver, B.C.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—A meeting of the city council in committee of the whole will be held tonight. The matter of making a grant to the Peterborough Industrial Exhibition will be considered, as well as other matters.

—Recent militia orders contain the following announcement: "Authority has been granted for Lieut. O. E. Bradburn, 10th Brigade, C.F.A., to be attached to the 24th Field Battery, C.A., for annual training.

—The Synod of the Church of England, will be held in Toronto, Tuesday, Wednesday and Thursday of this week. It is expected that the appointment of a coadjutor to his lordship Kewatenaw will be held over until later.

—In Saturday's Toronto Globe there appeared a fine group portrait of the first convention of the Canadian Theater Managers, held recently in Ottawa. Among the representatives are Mr. R. H Bradburn, proprietor of the Grand opera house.

—Rev. Dr. Crothers, Rev. J. P. Wilson, Rev. U. J. Rae are among those elected as ministerial delegates by the Bay of Quinte Conference to the meeting of the Ecumenical Conference. Dr. Ford, Norwood, Dr. Clark, Lindsay, and John Hull of Lakefield, are among the lay delegates chosen.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

**T. A. S. is Rapidly Increasing.**

At the meeting of St. Peter's T.A.S. Sunday afternoon thirty-two new members were received. This makes an increase of nearly a hundred and fifty within four weeks. Committees were appointed to arrange for the annual picnic of the T.A.S. down the river on Monday, July 2nd.

**$9.00 New York and Return $9.00.**

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 7.55 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

## *Lady Objects to Drunken Boarder*

Yesterday an elderly lady living on Simcoe street, at corner of Bethune street called at the police station and asked for police assistance. She told the chief a man named S. Inglis who had been boarding with her was under the influence and tried to get into the house, his trunk being there. It seems, by the lady's story the man had been boarding with her and had run a little "shy" on his account. When he arrived at the house drunk, she managed, to get him to the front door and suddenly locked it. Then, she alleged, he went round to the back door and tried to kick it in. The chief promised to help her out.

## *The 57th Regiment In Brantford*

Referring to the coming demonstration on July 2nd in Brantford, in which the 57th Regiment will take part, the Courier says;—A meeting of the sub-committee in connection with the military demonstration on July 2nd, was held at the officers' quarters on Tuesday evening. Major Ashton was elected chairman and Capt. Ward general secretary. The program was outlined and includes the parade of both regiments at one p.m., review and march past at two p.m., and the ceremony of trooping the colors at 2.30 p.m. A baseball match between the Dufferin Rifles and Waterous teams will commence at four o'clock.

## SOCIAL AND PERSONAL

—Mr. J. G. Murray, of Ottawa, was in the city yesterday.

—Mr Geo. Hall of Toronto, is in the city for a few days.

—Rev. Father Lynch, of Port Hope, was in the city yesterday.

—Mrs. Wm. McIlroy and family are visiting relatives in Galt.

—Mr. Ernest Rundle, of Toronto, is in the city renewing old acquaintances.

—Mr. Reg. F. Hack, of Toronto, is the guest of Mrs. G. Stone, Bethune street.

—Mr. J. B McRae, C.E., of Ottawa was in the city yesterday on his way to Orillia.

—Mr. Pee of the local Bank of Toronto staff has been transferred to the Keene branch.

—Rev. E. A. Langfeldt left yesterday for Toronto, to attend the meeting of the Synod.

Mrs. M. N. McCallum left yesterday for Orillia, where she will spend a few days with friends.

—Mrs. V. Thewlis, and child, of New Bedford, Mass., are the guests of Mr. and Mrs. Frank Mason.

—Col. H. A. Ward, M.P., of Port Hope, who has been seriously ill, is able to be around again.

—Mrs. Roland Denne, who has been visiting Mrs. W. H Graham, Kingston, has returned home.

—Mr. Benj. Shortly has returned from attending the Bay of Quinte Conference at Port Perry.

—Capt W. H. Mbden and wife, of Toronto, are the guests of Mrs. W. Major at All Saints' rectory.

—Miss Madeleine Stone, of Toronto, is visiting her mother, Mrs. G. Stone, Bethune street, for a few days.

—Dr. Poole and family have leased Mr. Overend's cottage at Chemong Park, and will move there this week.

—Mr Thomas Hetherington has sold his brick house on George street to Mr. A. J. Warne grocer, 699 George street.

—Mr R. S Tedd of the American Cereal Company's office staff, left yesterday for Kingston to spend his holidays.

## *Death of Former Lakefield Man*

Yesterday the last mortal remains of the late Mr. John Madill, a former resident of Lakefield, who died in hospital in this city Sunday night were taken to his former place of abode.

The late Mr. Madill had been seriously ill for several days and was very low when brought to the hospital the day he died.

Deceased was about sixty years of age and was highly respected in Lakefield. For many years he was employed in Mr. W. H. Casement's hardware establishment but of late had been living retired. He is survived by his wife and three children, two sons and a daughter. The sons are Wallace of Peterborough, and Walter, of Lakefield. The daughter is Miss Florence Madill of Lakefield. Mr. Madill was a member of the Presbyterian church.

Interment will take place today.

**County Court Opens Today.**

County Court and General Sessions of the Peace will open this afternoon at one o'clock before his Honor Judge Weller. There are only two cases on the docket, one of which is to determine the ownership of certain property. The plaintiffs are Agnes Quinn and Robert Duff, and the defendant John Fairman, all residing in Smith.

## *Captured Prizes at P. H. School*

It will interest many of our readers to learn that at the closing exercises of Trinity School, New York, Valentine Wildman, son of Dr. Wildman, New York City, carried off the McVickar prize of $20, as well as the Greek prize of $25.

Mrs. Wildman is a niece of Peterborough's great benefactor, the late Mr. Robert Nicholls. Mr. Wildman will, like his father, enter Columbia College for the purpose of studying medicine.

**Funeral of Late Donald Nicholls.**

The many friends of Mrs. W. J. Nicholls (nee Miss Gertrude McCleiland), will regret to hear of the death of her little son Donald, which took place in Toronto on Sunday. The funeral will be held from the residence of Mrs. Scarmer, 581 Perry street on this (Tuesday) afternoon at 3 o'clock, to the Little Lake cemetery for interment.

## REMARKABLE TEST

**Hyomei Has Been Known for Years and is Guaranteed to Cure Catarrh**

We have given Hyomei a most thorough and remarkable test.

The remedy has made so many cures that we have urged its use in the most chronic cases of catarrh.

Breathed for a few minutes four times a day, through an inhaler that comes with every outfit, it soothes the irritated mucous membrance of the nose, throat, and lungs, kills the catarrhal germs, and restores complete health. Its healing, antiseptic fragrance penetrates to the most remote air passages, as no medicine taken into the stomach can possibly do. Immediate relief almost always follows, the use of Hyomei, and great benefit is seen after a few days' treatment.

The complete Hyomei outfit costs only $1, and consists of an inhaler that can be carried in the pocket or purse, and will last a lifetime, a medicine dropper, and a bottle of Hyomei. If this is not sufficient for a complete cure, additional bottles of Hyomei can be obtained for 50 cents.

Compare this small expense with the fees charged by specialists.

If you cannot obtain Hyomei of your dealer, it will be forwarded by mail, postage paid, on receipt of price. Write today for consultation blank that will entitle you to services of our medical department without charge. The R. T Booth Company, Hyomei Building, Ithaca, N. Y.

## A Valuable Agent.

The glycerine employed in Dr. Pierce's medicines greatly enhances the medicinal properties which it extracts and holds in solution much better than alcohol would. It also possesses medicinal properties of its own, being a valuable demulcent, nutritive, antiseptic and antiferment. It adds greatly to the efficacy of the Black Cherrybark, Golden Seal root, Stone root and Queen's root, contained in "Golden Medical Discovery" in subduing chronic, or lingering coughs, bronchial, throat and lung affections, for all of which these agents are recommended by standard medical authorities.

In all cases where there is a wasting away of flesh, loss of appetite, with weak stomach, as in the early stages of consumption, there can be no doubt that glycerine acts as a valuable nutritive and aids the Golden Seal root, Stone root, Queen's root and Black Cherrybark in promoting digestion and building up the flesh and strength, controlling the cough and bringing about a healthy condition of the whole system. Of course, it must not be expected to work miracles. It will not cure consumption except in its earlier stages. It will cure very severe, obstinate, chronic coughs, bronchial and laryngeal troubles, and chronic sore throat with hoarseness. In acute coughs it is not so effective. It is in the lingering coughs, or those of long standing, even when accompanied by bleeding from lungs, that it has performed its most marvelous cures. Send for and read the little book of extracts, treating of the properties and uses of the several medicinal roots that enter into Dr. Pierce's Golden Medical Discovery and learn why this medicine has such a wide range of application in the cure of diseases. It is sent *free*. Address Dr. R. V. Pierce, Buffalo, N. Y. The "Discovery" contains no alcohol or harmful, habit-forming drug. Ingredients all printed on each bottle wrapper in plain English.

Sick people, especially those suffering from diseases of long standing, are invited to consult Dr. Pierce by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for paper-covered, or 50 stamps for cloth-bound copy.

## POLICE NEWS

Daily Happenings in Court Room and Station.

Only one case was before his Worship's notice at yesterday's Police Court. Two young men named respectively Mike Murphy and G. Gautier were charged with disorderly conduct, to wit, having entered into a mix-up on Friday night. Mr. Jas. Allen testified to having seen the fight. Murphy was fined $1, with $2.80 costs, and Gautier $2, with $4.75 costs, said sums to be paid within ten days.

## *Local Man Hears Lightning Bolt*

**Mr. Tom Marshal Present When Jas. Regan's Barn was Burned.**

Mr. Thos. Marshall, of this city, was an auditor of a severe stroke by a lightning bolt which struck Mr. Jas. Regan's barn in Ennismore on Sunday. As Mr. Marshall was driving along the road near the Ennismore Cross, he heard a distinct report delivered against Mr. Regan's barn, and at once went to investigate. By the time of his arrival, the barn, a fine up-to-date solid wooden structure was in flames. As this barn was situated some distance from where the owner lived, the neighbors came to assist but too late. In the barn were 200 bushels of oats, five tons of hay, a cultivator, a seeder and a gang plow, only the last named being saved.

There was some insurance on the barn but not enough to cover the full loss. Mr. Marshall was informed whilst in Ennismore that Mr. Regan lost another barn some time ago.

DRAW ATTENTION TO THE "NEW THEORY"

## Over 75% Winners

This Week up to Yesterday We Played Five Horses; Result, Four Won.

We purchased outright, at a cost of $15,000, the "New Theory" from the originator, who made a fortune through same, and has now retired, and we therefore control the entire selling interest of the most remarkable, complete and simple racing System in existence.

For months past our experts have been at work on the "New Theory," and have demonstrated that every racing season it has been enormous earnings, NEVER showing a loss.

Are you conservative? Can you grasp the meaning of this?

No chance to lose your original capital, and your monthly increase showing you its full earning capacity, which was the greatest secret of Pittsburg Phil's wonderful success.

The "New Theory" MUST beat the races continuously, not only occasionally. There are no "ifs" and "ands" and we stake our reputation on same.

## What the 'New Theory' Will Do

It will withstand twenty-six consecutive losses, although it has never shown more than five.

It has shown a profit each season never shown before in the system.

It averages thirty-two plays a month or a trifle over one play a day.

It can be played personally by anyone.

It can be operated at the racetrack, poolroom or hand book, simply leaving the selections to be played with your bookmaker or commissioner. All that is required are the entries each morning.

Copyrights are now pending.

## What the 'New Theory' Will Not Do

It will not make you rich over night.

It is not depending upon favorites or chokes. We often win on horses at 8, 10, 15, and 20 to 1.

It requires no handicapping of any kind.

It requires no paper or other consensus selections.

It requires no progression or doubling when a loss occurs.

**NOTE—**

The arrangements of the originator of this system with us were as follows:—

"I can prove to your satisfaction, black on white, through copies of past performances, just what I have accomplished and what I have to offer before I enter into retirement. If I CAN, you pay the amount of I cannot, the information and the entire plan is yours." As proved. It was fair and square.

**RESULT—**

Our experts have worked on the "New Theory" for over three months, and have proven same to be exactly as outlined, and the facts can now be substantiated by us through the racing chart books.

We now KNOW the "New Theory" to be

## ABSOLUTELY INFALLIBLE

It earned $50,000 for the originator last season in four months, $61,000 two years ago, and $57,500 three years ago, during the same period.

## It Does Not Require Our Selections Five Thousand Dollars Forfeited

If anyone can disprove any statement made regarding the "New Theory."

IT TAKES EXACTLY ONE MINUTE a day to discover what plays you have to make and leave no possible room for argument.

The system will be mailed entirely complete, with charts showing exactly every play that has been made and how the earnings have accumulated. Every thousand dollars showed clear returns of $32,500 last season.

The "New Theory" made a quarter of a million dollars for the originator in four years. It can be played just as successively whether the small capital of $100 is employed or $10,000, and shows proportionately the same returns. It shows a profit of 160 per cent. per month.

This is not a Million Dollar capital system. It can be operated by you with

## A Hundred Dollar Capital

as well as a Five Thousand Dollar capital, and the returns on same are proportionately as large. The originator started each year with a Twenty-five Hundred Dollar capital, and the returns are as stated above.

No matter how much you have lost in the past, we can prove to you how with the "New Theory" you can not only recover all losses sustained with any moderate capital, but are assured an independent income.

**Absolutely Impossible to Lose Your Capital**

Nothing of the kind has ever been presented heretofore, and in playing the "New Theory" we are following the outlined plan of a man who has made an independent fortune through the same, and is considered the best authority of finances.

You will admit the infallibility of this system the moment you see the plan and look up the records.

**NOTICE:**

This week the System called for eight plays. Result: 75 per cent. winners. Prices ranging to 15-1. Let us prove it to you.

TERMS: TWENTY-FIVE DOLLARS, ($25.00)

Complete, Payable Strictly in Advance.

**No Additional Payments of any Kind are Made After Purchase of the System**

**GUARANTEE—**

We are willing to send you the "New Theory" with the understanding that if you can give us the slightest grounds for dissatisfaction, the purchase price will be refunded. You will consider the outlay for the system the best investment ever made. Every day you miss playing the "New Theory" it means just so much money you allowed to slip through your fingers. Correspondence solicited. Remit by money order, telegraph, or certified cheque.

Office hours: 9 a.m. to 9 p.m. Sunday by previous appointment.

## City Grants $400 to the Exhibition

### Providing the County Gives $250---May Enforce Sewer Connections with Terraces---Will Invite Their Majesties to Peterborough.

The City Council met in Committee of the Whole last night to consider the question of what amount should be granted the Peterborough Industrial Society this year.

There were present, His Worship Mayor Henry Ross presiding, and Aldermen Johnston, Wilson, Ball, Hicks, Elliott, Graham and McIntyre.

The Industrial Exhibition Society notified the council that unless they are given a guarantee of $1,000 or a cash grant of $600 they could not see their way clear to run an exhibition this year.

Ald Elliott, who has had considerable experience with Peterborough's fair, and had with others in 1889 and 1890, worked the exhibition from a state of bankruptcy up to a flourishing condition, without any monetary assistance, the Norwood show, a highly commendable and flourishing event, from year to year, does not get one dollar from the village of Norwood, which incidentally reaps a benefit from that fair. The Peterborough Exhibition is mainly of county interest, and of special concern with farmers and stock breeders, and as should be, above all things an agricultural effort. The County of Peterborough gives $700, divided amongst all the county fairs. He would be in favor of giving the Peterborough Industrial Exhibition people an equivalent with that which the county council grants them.

Ald. Hicks urged that the city should perhaps give a little more than the county.

Ald. Elliott replied that it might be good policy to arrange that the society get $600 between the county and the city.

Ald. Elliott moved, seconded by Ald. Graham,—That the city give them a grant of $400, providing the county grant them $250.—Carried.

Ald. Johnston moved, seconded by Ald. McIntyre,—That the City Council be represented on the Board of Directors by A. E. Hicks, Mason and Elliott.—Carried.

The council were assured that Ald. Hicks and Mason have been appointed on the Board of Directors of the exhibition.

ENFORCE SEWER CONNECTION.

A communication from the Board of Health asking that steps be taken to enforce sewer connection with terraces and other dwellings where sewer accommodation is available, came up for action.

Ald. Hicks offered that while enforcing sewer connection with terraces would be a matter in the right direction, he thought to take arbitrary measures with some small property owners might be a hardship just now.

Ald. Elliott pointed out that the chairman of the Board of Health refers particulary to two terraces on McDonnell street, which are a menace to the health of the city. This particular case is a standing shame to the city.

Ald. Ball moved that the matter be referred to the Board of Health.—Carried.

Ald Ball took exception to the remarks of the chairman of the Board of Health at the last council meeting, when Mr. Eyres condemned both the wells of the city and our water system, so what are we to do. Then they send some ice from the "Little Lake to Toronto for analysis, which is returned as all right, when another piece of ice labelled "Little Lake" is again sent to be condemned. Now I think the Board of Health are stretching a point and are a lot of old women. If they direct their attention to some of the scandalous stuff from Chicago and other outside points sold in this city, and go to our slaughter houses, they might be characterized as attentive to their legitimate business.

AND THE KING WILL COME

Ald. Elliott moved, seconded by Ald Hicks,—That this city endorse the action of other municipalities in inviting a visit to Canada from their majesties, the King and Queen, and visit to include Peterborough.—Carried.

The council then adjourned.

## Frank White Has Bad Accident

Yesterday morning as Mr. Frank White recently of the Snowden House, was working at the shovel factory, one of those seemingly unavoidable accidents that inevitably occur occasionally in all large factories, came within a very small fraction of an inch of depriving him of sight in one eye.

A piece of an emery wheel flew out and entered the white of his left eye. He at once went to a physician when by use of a strong magnet the foreign substance was withdrawn. Mr. White will be laid up for a few days. Had the steel come in contact with the covering of the pupil it would have destroyed his eye.

## Why Lord Dufferin Succeeded Here

London, June 12.—In a eulogy of the Marquis of Dufferin at the unveiling of the Belfast memorial, Lord Londonderry said the secret of Dufferin's success in smoothing away difficulties in Canada was getting into sympathy with those among whom he was cast. "This Canada of ours" was a favorite phrase. Lord Londonderry was certain Canada would speak of help as "This Dufferin of ours."

The Bristol Observer quotes a gentleman who lived several years in Canada in endorsation of a writer in Toronto who says that the Canadian of today is the heaviest and strongest man of the white race. The gentleman says that he was struck when in Toronto by the number of tall, fine-looking men. The average Ontario height was five feet eight, equal to the best in Great Britain.

## The Ennismore Picnic a Success

### Many Local Citizens Enjoyed a Splendid Outing.

Yesterday many of our citizens irrespective of creed or politics, attended the annual Ennismore picnic held, under auspices of the Ennismore Cross church, at Tara Grove, about half a mile this side of the Cross.

For perhaps the first time in Ennismore's history several automobiles from Peterborough, including those of Messrs. Lundy, McPherson and LaPlante rooted and puff-puffed their way through that richly endowed and successfully farmed township in the procession of vehicles from this city.

On arrival the city visitors were made to feel thoroughly at home, and were accorded the warm welcome that true Irish hearts are always noted for.

Mr. W. Rudkins, chairman of the event, made a welcoming and appropriate opening address. He was followed by eloquent speeches from Rev. Father McColl of St. Peter's church, Rev. Father McGuire, and Father Fitzpatrick of Ennismore. The speakers all referred in kindly terms to Messrs. J. R. Stratton, ex-M.P.P., R. R. Hall, M.P., and T. E. Bradburn, M.P.P.

A letter of regret over his inability to be present from Hon. J. R. Stratton was read. Messrs. T. E. Bradburn, M.P.P., and R. R. Hall, M.P., both gave addresses suitable to the occasion. Councillor Geo. Elliott made a speech referring to the possible new road through the swamp, advocating its construction and adding that when such was accomplished automobiles could more easily visit Ennismore. Mr. Harry Phelan and other local gentlemen also gave brief addresses.

The picnic taken as a whole was a complete and perfect success, the crowd was a record one; the games were interesting and well contested, and the refreshments served by fair-featured and pleasant ladies were such as worried appeal to the taste of Epicurius. One great feature of the picnic was the dancing on a specially adapted platform, on this some of those of mature years as well as their younger and giddy friends tripped in on "the light fantastic toe," to the accompaniment of most excellent music.

Among the visiting clergy present were Rev. Father Phelan of Young's Point; Rev. Father Scanlon of Grafton, and Rev. Father O'Leary, of Kinmount.

The Ennismore picnic in the fewest words was "It."

## Peterborough Man Now a Benedict

Yesterday Mr. Geo. S. McCartney of this city, became a benedict in Campbellford, his bride being Miss Leona Doyle, fourth daughter of Mr. John Adams, Rannie street, in that village. The ceremony was performed by Rev. A. C. Reeves, B.A., of the Presbyterian church, Campbellford. The bride is a graduate nurse of Nicholls Hospital. The groom was for some years been connected with the staff of Robt. Fair & Co., and on the eve of his marriage was presented with a beautiful marble clock by the other members of the staff. Mr and Mrs. McCartney will reside at 346 Dublin street.

## Enormous Rat Bit Little Leo Cahill

St. Catharines, June 12.—For the Made-in-Canada Fair in aid of the hospital, which opens here shortly in the new armories, a novel feature has been introduced in the shape of dolls dressed in the uniform of nurses in hospitals all over the country. Each hospital in Canada was invited to send a doll, dressed in the uniform of that particular institution, and many have responded. Already about forty have arrived, and they make a sweetly quaint show, arranged in a room of the nurses' home. The uniforms are all cleverly made. One doll came from Halifax, and Montreal and Toronto are well represented. Each hospital adopts its own style of uniform. The dolls will be auctioned off to the highest bidder.

A little boy, Leo Cahill, son of Walter Cahill, was playing in the yard on Saturday, when he saw what he took to be a kitten sitting on the ground and picked it up. It proved to be an enormous rat which had been hurt, and could not run, and the moment the child touched it the rodent bit him severely on the hand. The wound was cauterized, and there is not much fear of blood poisoning setting it.

## G.T.P. Trains will be Running This Fall

Winnipeg, June 12.—So rapid has G.T.R. construction progressed that many miles will be carrying trains by the fall. All surplus labor has been taken from the rural districts by the high wages paid in construction camps, and if Ontario harvesters do not help the West out, harvesting will be utterly impossible. As high as $3 per day is paid in some railway camps.

Yesterday morning the contingent of Ontario newspaper women left for the West. The excursion was so large that the women had to be divided here. George Ham accompanied the Eastern Canadian crowd.

### Death Due to Dirty Cells.

Winnipeg, June 12.—The coroner's jury empanelled to enquire into the found dead in the police station, after having been locked up for drunkenness, rendered a verdict charging death to the filthy and unsanitary condition of the cells, and laid the onus on the City Council.

### Aged Clergyman Killed.

Binghamton, N. Y., June 13.—Rev. George Horton, a retired Presbyterian clergyman, was instantly killed while driving into his yard near Oxford. The wheel of the waggon caught, throwing him out, and breaking his neck. He was 75 years old.

### Yachting Party Drowned.

New York, June 13.—Three men were drowned in the bay when the yacht Lottie, with a fishing party on board, was capsized during a sudden storm. The dead are: Wm. A. Bummerman, Paul Smith and George Gise, all of Brooklyn. The bodies of Smith and Gise are still in the yacht, which sunk at the quarantine dock.

## Another Man Caught Fishing

On Monday, at midnight, as Deputy Fishery Inspector Richard Thorndyke was quietly paddling down the placid Otonabee, in pursuance of his duty, he discovered, when about five or six miles below the locks, that suspicious goings on were in progress at Hall's Creek. He at once got busy and succeeded in catching a man illegally fishing with a gill net. He secured the net and also the name of the midnight fish-murderer. The man caught yesterday drove to the city and settled matters with Fishery Overseer Johnston, who inflicted a fine and permanently seized the net.

## Bishop's Address at the Synod Meeting

### His Lordship Takes Objection to the Teachings of the New High School Geography.

Toronto, June 13.—The Anglican Synod was called together at St. James' Cathedral at eleven o'clock yesterday morning. Morning prayers were held and Bishop Sweatman's charge was followed by Divine service and communion.

In presenting his report on the state of the Diocese, the Bishop first alluded to those who had been taken away by death, among whom were the Rev. Mr. Anderson, Rev. Joseph Cowell, Rev. Dr. Sheraton, and on yet the day before Bishop Bombay, the pioneer missionary of the West. Two lay members who had rendered great services were also taken away by death.

There are now 191 clergymen in the Diocese including nine superannuated ones. Fourteen have left the diocese in two years, but seventeen have been received by ordination, and ten from outside places. Confirmations and baptisms throughout the diocese showed a steady and healthy increase. The increase in the Church population all told is over 10,000. Revenues have grown five and one-quarter per cent. in two years, while two churches destroyed by fire are being rebuilt, and two new ones are in course of construction. In addition several pastors' houses and school houses are being built, and many churches are being altered and enlarged.

MORE CHURCHES NEEDED.

The Bishop referred to the overcrowding in Toronto churches, and said Toronto must face the problem of building some new churches, as the population was rapidly increasing, and the over-taxed seating capacity of these churches threw an unfair burden on the members of these churches.

There had been several vacancies, but no difficulty was found in filling them.

The mission fund was in a very healthy state, so that better salaries could be paid, and more efficient work done. Great praise was given to the Mission Fund Committee. The hope was expressed that the congregations would keep up their good work in this respect.

All the Church educational institutions were prosperous and doing good work. The need of religious instruction was never more felt.

BOOK NOT ORTHODOX.

Exception to the new High school geography was taken on the ground that its teaching on certain matters was opposed to Christian doctrine and religious teaching. It put forth evolutionary ideas on the creation of the world, and presumed to say the universe was not the work of a creator. Pages 12 and 147 of the high school geography were particularly cited as being dangerous in their teachings to Christian faith.

The passages on the pages cited deal particularly with the evolution of the world in a gradual process and with nebular hypothesis as explaining the origin of the universe. In both cases the Church teachings are rather directly contradicted. The Bishop, however, was cautious in his criticisms, and stated that the Synod could only pass resolutions advising against the use of the books in the schools.

The enriching and changing of the Ritual and Book of Common Prayer along lines suggested by a convention of bishops at Montreal on April 18th, would be one great matter to come before the Synod. The Bishop then delivered his charge to the brethren, asking them to approach their work with patience, good-will, and free from prejudice.

## Baltimore Also Has Scandal

Baltimore, June 12. — According to statements made today by Dr. John F. Fulton, secretary of the State Board of Health, and Alvin N. Bastable, president of the Union Stockyards Company, a most lamentable condition prevails in the Baltimore slaughter-houses and the meat inspection is practically a farce.

Mr. Bastable says cattle dead from disease and old bulls unfit for selling as even the poorest class of fresh beef, are hung up in storage until blue and so far gone as to hold water like a sponge and then ground up with potato flour and red pan to give it the color of cured hog meat and sold under the appetizing name of "pure Baltimore-made sausage."

"There is a law in Maryland which makes it a misdemeanor to slaughter, or offer for slaughter, any animal which, by reason of disease or injury, is unable to walk," says Dr. Fulton. "Every slaughter-house of any size keeps a wagon for use as an ambulance to haul animals which have been disabled, to the killing-room."

## Enterprising Lady is Now in the City

### Mrs. M. J. West of Toronto Representing Fleming Aerial Ladder Co.

The Times yesterday had a call from Mrs M. J. West, of Toronto, who is spending a few days at the Oriental Hotel in the interests of the Flemming Aerial Ladder Co., of Toronto.

This lady, who successfully disposed of stock to leading Peterborough capitalists, a few years ago, in other now prosperous concerns, is offering stock in the above named vast enterprise.

As our readers have already seen, with outspoken interest the pictures and prospectus of the Flemming Aerial Ladder Co. in this journal and are comparatively well acquainted with the wonderful possibilities in its future, we can only say that we think Mrs. West will meet with success in her canvas.

Leading merchants and manufacturers of Toronto, Brantford, and other cities candidly acknowledge their conviction that the Flemming Aerial Ladder Co stock will within two years rise two hundred per cent. in value.

The company is about to begin their factory and as soon as the ladders are once placed on the market, their broadly extended usefulness will at once create a demand hard to supply.

We advise such of our readers as Mrs. West calls on to give the proposition she presents careful and earnest consideration, as the Flemming Aerial Ladders will soon supersede scaffolding, derricks, and other appliances used by bricklayers, builders, painters, firemen, and many other trades.

## THE FISH GOT "FULL"

### Kentucky Distillery Leaked and the River Was Loaded.

Frankfort, Ky., June 12.—The flake stand at a distillery broke down yesterday, and more than 13,000 gallons of whiskey was lost. It made its way to Benson Creek, only a few feet away.

Farmers living along the banks of the stream later noticed hundreds of fish, either floating lazily on the surface or else leaping playfully on the surface, and altogether unafraid of the presence of men. The farmers caught them by the bushel, and it was not until the news of the break at the distillery became known that the mystery was solved.

The fish had become intoxicated. The loss to the distillery will reach about $25,000.

## THE GUELPH TRAGEDY

Guelph, June 12.—The mystery of "what happened to Walker," the young man who disappointed his fiance at the marriage ceremony, and whose body was found in the river on Saturday, seems to be deepening. Credence is generally given to the theory that becoming despondent he went to the river and threw himself in. He spent the evening before what was supposed would be his wedding day in the company of his fiance and her mother, leaving there about 11.30 for home. He spoke to his mother and then left the house. That appears to have been the last seen of him alive. Walker is said to have been a good swimmer. When found the body was slightly decomposed, and the face was covered with blood, which the doctors attributed to bleeding from the nose, ears and mouth. An inquest was ordered, a jury impannelled and they adjourned until tonight. In the meantime a post-mortem has been held. Though the doctors are reticent, it is said the result of their examination does not bear out the theory of suicide. Death by drowning is not indicated by the condition of the lungs of the deceased, so the report says.

### American Bandit Caught in Canada.

Vernon, B.C., June 13.—Another desperado from the United States has seen his finish in British Columbia. The latest is the notorious American half-breed Peon Flin, who was captured south of Penticton, on the trail leading to the "Land of the Free." Peon was seen in Vernon late Thursday.

### Western Homestead Entries.

Ottawa, June 13.—A return brought down in the House of Commons, at the request of Mr. Lake, M.P., shows that the total number of homestead entries from 1873 to 31st December, 1905, was 212,525. Of this number there have been patented 63,669, and cancelled 59,549. The total number which have neither been patented nor cancelled is 89,939.

### Canadian Northern's James Bay Line

Toronto, June 13.—The new steel bridge of the James Bay Railway over the Don River was finished on Saturday, and the line completed as far as track and bridge work is concerned, north of Beaverton. The completion of the bridges over the Don permits of the ballasting train coming down, and the work of ballasting and levelling the track will be pushed from today on. It is hoped to have the road open in time for Muskoka tourist travel.

### MADE ICE DURING FIRE.

Hopkinsville, Ky., June 12.—When the ruins of the ice factory, which was destroyed by fire last Thursday were examined yesterday, it was found that 16,000 pounds of ice had been made during the progress of the flames. Just before the fire started 320 freezing cans, each with a capacity of 50 pounds of ice, were lowered into the tank of brine beneath the floor. An examination showed that each can contained a block of pure ice.

## Another Possible Libel Suit Ahead

### Mr. D. Johnston, Fishery Inspector, will Demand Retraction by the Examiner.

Yesterday a Times representative was interviewed by Mr. David Johnston, fishery overseer, regarding an article which appeared in Monday's issue of the Peterborough Examiner, in which serious charges were made against that official.

Regarding this article, Mr. Johnston, in the first place, told our representative that he has never held any animosity against Mr. Nurse, nor has he any reason to suppose that Mr. Nurse had any ill-feeling towards him. In the next place, Mr. Johnston, as far as instituting the proceedings against Nurse through ill-feeling was concerned, it was not he but Fishery Inspector Teniece Guerin, who made the discovery of the illegal fishing and who practically laid the information. Mr. Johnston, as Guerin's superior officer, was absolutely compelled to institute proceedings under the circumstances.

Mr. Johnston further denied in toto the charge preferred concerning the alleged understanding in connection with a permit to catch eat-fish, and said that was a most malicious and libellous statement. He told The Times man that he has good reason to know that the absurd statement about the net referred to in the Examiner's report, being given by Inspector McAllister, of Gore's Landing, to Nurse is incorrect, as he (Mr. Johnston) knows where Nurse got it otherwise. The statement made by the Examiner that this net has been in a local hotel is also quite wrong the net when seized by Johnston was brought to his home and has been there ever since. The net in question, Mr. Johnston declared, was captured by him as stated in the report of this affair in The Times, containing the facts as noted in our report. Mr Johnston was evidently much annoyed by the Examiner's report, and will demand full satisfaction by way of a retraction or proceed with a libel suit.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

### BASEBALL.

A meeting of the Guild League Executive was held last night in the Y.M.C.A. parlors.

The standing of the C.G.E.B.L. is as follows.

| | W | L |
|---|---|---|
| Armature | 2 | 0 |
| Brass | 1 | 1 |
| Tool Room | 1 | 1 |
| Machine | 0 | 2 |

Games next Saturday, Machine vs. Tool Room, 2 p.m.; Brass Dept. vs. Armature, 4 p.m.

Manager Barrow, of the Toronto Eastern League team has released the veteran catcher, Jack Toft, at his own request.

Catcher Doran of Detroit, has signed to play with Toronto.

Eastern League games resulted as follows yesterday;

Montreal 2, Toronto 5.
Providence 4, Jersey City 1.
Rochester 0, Buffalo 1.
Newark 1, Baltimore 7.

### BOWLING.

The long heralded game between President and Vice-President of Brookside Bowling green was well attended and furnished much amusement and excitement to those present. The result of Monday's play during both the afternoon and evening resulted as follows: President, 135; vice-president, 112. Majority for president, 23.

### Terrorists Again Slay.

Bielostok, Russia, June 13. — Chief of Police Derkatchoff, against whose life several attempts have been made, was shot and killed yesterday by several unknown persons, while he was out driving. His coachman was severely wounded. At the same time the secret police were attacked in another portion of the town, one of them being wounded.

### 3,000 People at Jackson Park.

Last night perhaps the largest crowd on record took advantage of the Street Railway Company's admirable attraction at Jackson Park. Fully three thousand people by their attendance and enthusiastic appreciation of the moving pictures and other attractions, fully testified to Mr. Larmouth's enterprise in the interest of his company. The street car service was complete and handled the crowd both coming and going to perfection.

### ROYAL HONEYMOON.

Madrid, June 12.—King Alfonso and Queen Victoria will go on Tuesday to Le Granja, where is situated the celebrated palace built by Philip V, standing nearly 4,000 feet above the sea level and surrounded by magnificent grounds. The royal couple will stay there several weeks and then go to San Sebastian.

### A Woman's Story.

It has been said that women cannot tell stories. We believe this to be a gross libel on the fair sex, for whom this g. f. j. has a great regard. A Times representative happened to be present when a bright and beautiful matron, who was born and educated in this city, told the following story: "A man, for some unusual reason, was given the privilege of visiting heaven. As he went around looking at the people and their happiness and gazing on the beautiful scenes, he saw one sight which seemed out of harmony with all the rest. It was a man chained to a heavy log. He asked good St. Peter what it meant, saying: Why should a man be chained in heaven? St. Peter answered, 'He's from Peterborough, and we have to chain him to keep him from going back.'"

## Mr. Leary Does Much Driving

### Eighteen Horses Escape From the Exhibition Grounds.

Yesterday Mr. G. H. Leary drove a good many miles in search of four of four of his horses which escaped Monday night from the exhibition grounds.

Mr. Leary had eighteen horses pastured in these grounds, and during the night some one opened a gate and left it open. He got word early yesterday morning that the horses had all left the pasture and at once set out in a buggy to search for them. Fourteen of them, during the morning, returned to the pasture, after having strayed in a bunch some four miles away. This fact he ascertained from a milkman, who had seen them at that distance from the grounds. Up to noon Mr. Leary was still searching for the four still missing; these four were a grey horse, a bay mare, and two bay horses. He was caused more anxiety owing to the fact that these four originally came from different townships, and thus much more difficult to locate.

Last night at eight o'clock a Times' representative interviewed Mr. Leary just as he handed out a $5 bill to a farmer to bind the bargain on a horse he then bought from him, and was told by him that his four missing horses had not been recovered, nor had he obtained any word of them.

## The Beef Scandals at Chicago

Chicago, June 13.—Foreign Governments, through Chicago Consuls, are to take a hand in the investigation of conditions of the packing houses at the stock yards as the result of allegations in the report submitted to President Roosevelt by Messrs. Neill and Reynolds, it was learned last night.

BRITISH CONSUL REPORTS.

Alexander Finn, British Consul in Chicago has made a personal investigation of conditions in the packing plants, and will forward his reports to London in a day or two. This report is said to be generally favorable to the packers and in distinct contradiction of the Neill and Reynolds report. Baron Schlippenbach, Russian Consul, last night declined to reveal the nature of his report.

UNIVERSITY PRESIDENT.

President Edmund J. James, of the University of Illinois, yesterday accepted a position on the expert commission which is to aid the Illinois Manufacturers' Association, and probably the Chicago Commercial Association in the investigation of the Chicago packing houses in the light of the Neill-Reynolds report.

PROTECT BRITISH PUBLIC.

London, June 13.—Mr. David Lloyd-George, President of the Board of Trade, said yesterday in the Commons that Britain used annually $10,-$10,000 worth of American preserved meats. Mr. John Burns said that everything possible would be done to protect the British consumer, and, if necessary, he would ask for greater powers for the local Government Board.

## Being Tried on an Awful Charge

Montreal, June 13.—There was a crowded court room at the resumption of the Hackett trial yesterday morning, many of the spectators being women. The charge is of assaulting and murdering the little Abern girl. The feature of the forenoon's proceedings was the story of a carter, who swore that he saw Hackett near Abern's house early on the afternoon of the fatal day.

F. X. Roehon, carter, St. Eugene, was the first witness called yesterday morning, and he swore he met the prisoner between 3.30 and four o'clock on April 3rd. He knew both Abern and Hackett, and the distance from the spot where he saw Hackett to Abern's house was about one acre. He was positive Hackett was drunk at the time. In spite of severe cross-examination, Roehon's statements remained unshaken.

Constable Arsenault, who inspected the remains, was called, and gave evidence as to the finding of the body.

## Pin Your Faith on Ferrozone

### A Tine Honored Cure for Spring Ailments that Every Physician Recommends.

But every year has seen the popularity of Ferrozone increase, and today it is used by the people of many nations for weakness, debility and the characteristic ailments of spring.

Let Ferrozone help you!

It enriches the blood supply and thereby vitalizes the quickens the whole body.

Humors and impurities are driven off. Disease germs of every kind are destroyed.

Nutritious material is supplied for restoring the waste, and day by day the process of rebuilding goes on till health that outlasts old age is established.

Mr. W A. Renwick, of 125 Hunter street, Hamilton, Ont., writes: "A year ago I became run down and lost my health. My strength was greatly reduced and on account of the weakness of my heart I was afraid to take up work.

"On going up stairs or walking fast my heart would beat like an engine. I would gasp for breath and get exhausted quickly. At night I would wake up in an excited condition and find my heart going like mad.

"In this terrible state nothing helped me but Ferrozone. Such good it did me I can hardly explain. It built up my strength, put new life in my heart and made me feel like a new man."

Even in advanced cases of weakness Ferrozone is unfailing. Your druggist sells it at 50c. per box or six boxes for $2.50, at all dealers, or by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

### THE ENGLISH IN AMERICA

An article on "The English in America" in Munsey's Magazine for May contains a notable appreciation of what England has done for, and Englishmen are doing in, the United States. The English, the author says, have the dominant factor in the making of the United States. George Washington was the great grandson of a Yorkshire man, while nearly two-thirds of the Presidents and Vice-Presidents have been of English blood. "Every chapter of American history," he writes, reveals the predominance of English names. It was from England they got their first iron works, cotton mills and railroads. English capital—hundreds of millions of it—have been invested in American industries. English books still occupy the shelves of highest honor in their libraries. English skilled labor laid the foundation of most of their trades, as English learning did for their professions." According to "Who's Who in America," England stands first among foreign countries in the production of genius. There are only ten States out of the forty-five which have produced more great Americans than England. Of the list of famous English-Americans the first thing to be noted, says this writer, is its diversity. There is no predominance of judges and clergy, as among the Irish; of professors and musicians, as among the Germans; or of business men, as among the Scotch. It is a well balanced list. Twenty-six professors—men of books—are offset by twenty-four capitalists—men of action. There are twenty each of engineers and actors; a dozen artists and eighteen journalists. The English while versatile as a nation are not so as individuals. Each can do one thing well, but only one. Yet England has produced and still produces, more varieties of genius than any other country. It was the home of Darwin and Shakespeare, of Bacon and Cromwell, of Marlborough and Milton, of Stephenson and Shelley, of Newton and Nelson, of John Locke and John Wesley.

Among English-Americans there are Goldwin Smith, of Toronto; President Buckham, of the University of Vermont; Dr. Paton, of Princeton; Prof. James Woodrow, of South Carolina; Prof. Fryer, of California; Prof. Richard Green Moulton, of the University of Chicago; all noted educators. Of English born authors there are Ernest Thompson Seton, Richard Le Gallienne, Frances Hodgson Burnett, Mrs. Amelia E. Barr, Archibald Clavering Gunter, Ben Pitman, besides others. Among journalists are given James Keeley, of the Chicago Tribune; Samuel T. Clover, of the Los Angeles Express; A. Maurice Low, of Washington. Among actors there are Richard Mansfield, William Faversham, Henry Miller, E. H. Sothern, Mary Mannering, Julia Marlowe, and Eleanor Robson; while the man who stands as American umpire in the world of art is an English newcomer, Sir Caspar Purdon Clarke, now at the head of the New York Metropolitan Art Museum. We have not space to mention the long list in law, finance, business, and other lines. It is sufficient to say that the English in America have made their mark and have done credit to the land of their birth in the land of their adoption.

## SANITY AND A SQUARE DEAL IN MINING INVESTMENTS

### If Ordinary Business Sense is Used the Element of Risk is No Greater Than in Any Other Line of Industry

(By Pierre Underwood.)

Some men should never be allowed the handling of money of any description in the investment. As surely as they do have any responsibility placed upon them of a financial nature, they are apt to buy gold bricks, or place their money in an utterly impracticable proposition.

Yet these are the very class of men who systematically decry investments in mines, and class every mining project as a sure loser. As a matter of fact, more American fortunes have been accumulated in mining than in any other single industry, and they are still piling up into the millions every year. A great part of the wealth of the late Levi Z. Leiter and Marshall Field came from their investments in mines, while Senator Clark of Montana, Senator Newlands of Nevada and Senator Patterson of Colorado are conspicuous instances of men now living who have amassed colossal fortunes from mining.

As in every other business, there are two kinds of mining propositions. One has its existence on paper, the other is a tangible fact. A mine that has ore bodies, that is conservatively capitalized, that is owned and managed by men of reputation, is just as safe an investment as a metropolitan business, or the stocks and bonds of a railway or other corporation.

The trouble with most men, however, when they come to consider a mining investment, is that they lose all sense of prudence and acumen, such as they would bring to the consideration of any other business proposition. In the first place, they do not investigate, but accept the statements of unprincipled dealers implicitly. In many cases they will put their money into some handsome lithographic representing stock, and won't have the slightest information if the particular property has any mineral merit, or if it really has an existence.

There is no excuse for such neglect on the investor's part. A good mine is just as much open to investigation as is a well-managed bank. The latter gives the widest publicity to its affairs, so does the genuine mine. The investor does not take any more chance in such a mine than he does in a bank. It is his duty to first find out that the property really exists and that the company claiming ownership has an indisputable title. These facts being ascertained, he should find out what the value of its ores assays, and the quantity that is in sight. Then he should consider the subject of capitalization, and determine whether this has been conducted on a conservative basis. Lastly, he wants to know all about the personal character of the men in control of the property, and whether the management is efficient and responsible.

These are not difficult facts for the investor to discover, and every legitimate mining company will readily do all that is within its powers to help the intending investor get at them. It is the shady mining scheme that steers clear of the precise and accurate information that the legitimate concern is only too glad to give. Therefore you can put it down as a safe rule of conduct to follow as regards all mining investments that the concern that withholds all this detailed information from the investor and deals in glittering generalities instead of hard and concrete facts, is the one that is safe to pass by. The honest proposition has nothing to conceal; the dishonest one has nothing that is so fatal to its prospects as the truth.

From a financial standpoint there is no other line of business that pays such handsome returns to the investor as a good and well managed mine. There are thousands upon thousands of persons living in this country today in ease and luxury solely because of the small investment they made at some times or other in a mine. The cases are not at all infrequent where the investments of a few hundreds or thousands of dollars are bringing in dividends each year several times the amount of the original investment. With the better methods that now obtain in treating the low grade ores mines are now being conducted at a handsome profit that some years ago would not have paid expenses. One of the greatest mines in the world is the Treadwell, of Alaska, which works on ore that assays only a few dollars a ton. You can't buy its stock, and its stockholders are all rich.

I am heartily in favor of a government commission being established to pass upon mining properties and to prevent the selling of stocks or bonds issued in favor of worthless properties.

Considering the fact that mining, next to manufacturing and agriculture, is the chief industry of this United States, it is but reasonable and right that our government should take such steps as may be necessary and consistent to safeguard the interests of the legitimate mining companies and the investing public.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

"Save what?"

"Save lack of love for her."

The hoof beats were coming nearer. She made a desperate effort to compose herself. He had bent toward her, so near she could smell the fragrance of hazel bushes in his hair.

"Then it would not matter, she would not care?" he cried joyously. "He might be either the prince or the woodcutter, mademoiselle?"

The last shaft of the sunlight stumbled and tangled on her brow. Dark loomed near. Only a gold brush was laid lightly upon the middle distance.

"If a woman loved and was loved so naught else would count, not even—even if he were despised by all the world—even"— Her lips were tremulous. She felt his hand on the bench beside her suddenly touch her own.

There was a trampling behind them. Both turned to the porch, where Lord Fairfax stood leaning on Joe's arm to welcome the two riders who had just dismounted. The young man made an exclamation.

"Why," exclaimed Anne, "'tis the governor himself, returned from Fort Pitt!"

As they approached, the girl crimsoning with the memory of her night errand to the Winchester fort, the earl was bending bulkily over the hand of Mrs. Tilloteon in the doorway.

"You honor my poor house with this visit," said the old man, beaming. "Anne, you know his excellency."

The governor bowed to her courtesy and set his eyes on the paler face of the figure at her side. First a low chuckle began in his throat; then he slapped his thigh.

"So that was how the land lay!" he guffawed. "Not content with quarreling with my soldiers, eh? And incognito yet, I'll be bound!"

The baron stood staring, and Anne looked a bit frightened.

The governor reached a thick arm and prodded the young man genially in the ribs.

"Sly dog, eh?" he winked. "Tut, tut! Would you still deny us poor Virginians? Haith, then, come here! Ladies, my Lord Fairfax, it pleasures me to present to you M. le Marquis de la Trouerie."

CHAPTER X.

THE Marquis de la Trouerie was a huge success. Williamsburg's wealth and beauty vied in entertaining him, and no rout was complete without him.

At the Raleigh tavern, whose low wooden walls were kept a-throb with packs of new devilries brought by young bloods of the navy from the sloop of war Fowey, come to anchor in York Roads, he was the center of observation when he diced. Commissions in the royal navy went for gold in that rotten reign, and their holders were younger sons with as much money to spend as the younger sons of the broad manors of Virginia.

Young Brooke, who, by aid of half the broken fortuned harpies and rooks of London, had long ago run through all he could lay hands on and whose talk was always, "When I hunted at Tunbridge Wells with my Lord This," or "When my Lord That had me at Hendron castle for Easter," had now nobility near at hand to descant upon.

"A great man in France," he would enlighten the roomful, smoothing his ruffles, "favorite of Marie Antoinette's, they say, and as rich as John Dory. Egad, I'd like the pattern of the coat he had on this morning!"

As for the marquis, he took his honors quietly, superbly. More than once it was reported that he had dined privately with the royal governor, but he himself clearly thought it scarce worth mentioning.

An interesting story of a duel with Captain Foy gained currency for a time. The captain was said to have wounded the marquis slightly by foul means, but Foy was absent much of the time on business for the governor, and the story was forgotten save for the passing glamour it cast upon the new favorite.

The nobleman's preference for the beauty of Williamsburg was soon perceived, and very early Mrs. Byrd had begun to hint at broken hearts and the folly of young girls who set their eyes too high.

Anne herself was never so beautiful never so brilliant, never so willfully captivating, as now, when a scarf of gayety hid the passion of many hearts fermenting.

On an afternoon they two, Anne and Armand, walked slowly under the pines that stretched down from the gateway of Gladden Hall.

Just before the marbletted gateway he stopped.

"You are cruel to me, mademoiselle." His voice was anxious, vibrating, longing.

"Why cruel, monsieur?"

"Ah, I need not tell you that?" he said, looking at her earnestly. "Is it that I have failed? Am I not somehow what you would wish in—a nobleman? Is there something lacking?"

She shook her head. "No, no!"

"Yet something is different. I have searched so hard to find what it is. I have seen you at the routs and have danced with you, but you are not the same. At Greenway Court, there where the leaves were falling—I wish it could have been so always, us two, in the forest—you were kinder and not so cold to me!"

"Marquis!" There was a splendor of color in her face, bent sweet to him. Her eyes, tinted and lustrous, were gay beneath the warm glimmer of her hair.

"Marquis!" repeated the young man, flushing. "I was not that to you in the forest. I found then that you were not like the [illegible] of my land, who know naught save grandeur and titles, but that you could be above such things, that you were such a one as I have dreamed must be somewhere. I ask you only to be to me as you were then as you were that day when the governor came back when I sat with you on the hillside. Can you forget, mademoiselle, that I am not just the same that I was then?"

"You are so much more. Then I did not know who you were."

"I would the governor had not come," he said. "I would have remained to you just the same as I had been the same as when for one moment I held you in the broken coach, and that moment when I opened my eyes at Greenway Court and saw your face!"

She felt her hands trembling, her heart beating its way through her breast. His voice was very low as he went on:

"A man finds some time the one of all the world he would not have cold to him. He may never have seen her—her whom he has looked for all his life—the woman in his heart! But he always knows her when he hears her speak! He can never know when or where that may be. It is not the ball or walking in the street or riding in a coach. That day, mademoiselle and it was before you knew I was just M. Armand, not the Marquis de la Trouerie. I was not great then, but just a man and unworthy!"

"No," she said, her tone tremulous; "not unworthy. That night at the tavern in Winchester—that was the bravest thing I had ever seen—the noblest! Do you think anything, anything, could make me forget that?"

"And you would have come to me! But now—but now!"—

She looked at him with a little vibrant thrill of pride. How sweetly blind he was! "Now?" she asked.

(To be continued)

—Dr. Poole and family have leased Mr. Overend's cottage at Chemung Park, and will move there this week.

**One Hundred Dollars in Two Years Brings One Hundred Thousand Dollars.**

The stock of the Two Stars Mining Company in old Mexico sold at $10.00 per share. Today it is selling at $10,000.00 per share. That is not the only mine in Mexico or the last opportunity. Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. Write for plan of sale and description of property.

SAN DOMINCO MINING CO.

Dept. 61, Frisco Building, St. Louis, Mo

## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even-numbered section of Dominion Lands in Manitoba or the Northwest Provinces (excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

## SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet. The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The leases shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after is exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

338 Schofield Bldg., Cleveland, Ohio.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay enormous returns on even the present par of the stock, which has enhanced in value many times during the last few years.

THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

THOS. PATTERSON & CO., Fiscal Agts.
161 SIMCOE STREET, PETERBOROUGH

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty, of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

## On the Ground Ahead of the Boom

**$5.00 DOWN**
AND
**$5.00 PER MONTH**
FOR FOUR MONTHS WILL BUY
**500 Shares**
OF STOCK WHICH MAY SOON BE WORTH
**$500.00**

# Beware of Mercury

**You May Be Using This Harmful Drug and Not Know it.**

A favorite method of administering this deleterious drug is in cathartic pills. Beware of quick-result articles, they may do more harm than good.

Drastic cathartics will weaken the strongest. With old people they are a positive menace to life.

Merely to restore normal bowel action and gently stimulate the liver is all that the wise physician recommends.

To keep the system pure and clean, nothing is so effacious as the vegetable pills of Dr. Hamilton, which are composed of such herbs as mandrake, butternut and dandelion; they contain not an atom of any substance that could injure even an infant.

By their certain action on the liver Dr. Hamilton's Pills cause bile to be secreted which forms the stimulus that moves the bowels: this is nature's own method and the best one.

Mr. W. Hamly, of French River, Ont., writes as follows: "I was inclined to bilious attacks and frequently was too ill to work. Most remedies purged and weakened my bowels but Dr. Hamilton's Pills gently stimulated my liver, and by strengthening the stomach made a perfect cure. My health has been just splendid since I used Dr. Hamilton's Pills.

Get Dr. Hamilton's Pills from your druggist or storekeeper. 25c. per box or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., or Kingston, Ont.

## LOCAL INCIDENTS

By The Times Man on the Street

—Nothing doing at the police court yesterday morning.

—Wanted at once, woman to do cleaning. Apply at Times Bookstore.

—Mr. Robt. Howden yesterday shipped a mixed car of sheep and cattle to Toronto.

—The annual meeting of the Ist from L.O.L.'s was held in Keene yesterday evening.

—New concrete crossings have been laid at the intersection of Aylmer and Simcoe streets.

—County Court opened before His Honor Judge Weller yesterday at one o'clock with a light docket.

—The new uniforms for the 57th regiment arrived yesterday and were given out at the drill hall last night.

—The local medicos and limbs of the law will hold their annual excursion down the river on June 26th.

—An open session of St. Paul's Sunday school will be held on Sunday, June 23rd. The session will be in the church.

—Our thanks are due to Mr. Geo. J. Chalmers for a sample of mountain trout caught 70 miles north of Sault Ste. Marie.

—The 57th has now a complete and entirely new outfit of 369 uniforms, including serges, tunics, trousers, helmets, caps, plate and badges.

—There will be a meeting of the teachers, officers and S.S. committee of Mark street Sunday school this evening to make arrangements for the annual picnic.

—Mr. John Jeffries of the Collegiate Institute teaching staff will be the presiding examiner at the entrance examinations to be held in Peterborough this year.

—The annual picnic of Fraserville and Fairmont Sunday schools was held down the river yesterday to Idel Wyld. The North Star carried a large number of excursionists.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—Mr. Thos. McKee has been appointed "clerk of the works" of the new public school in south ward by the Board of Education, and will be under their supervision. His salary will be $3 per day.

—Mr. D. Hall the Charlotte street tonsorial artist is placing a new entrance to his barber shop in the Snowden House. This new entrance has been made higher than the old one and will contain windows on each side suitably emblazoned with his trade adv.

—Among the lay delegates in attendance at the synod of Toronto, meeting are Frank Wise, W. Bullet and J. H. McClellan from All Saints' church, R. B. Rogers, G. F. Warle and T. H Adams from St Luke's, and D. Campbell, H. Rush, sr., and R. Fair from St. John's church.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### Bridgenorth Man's Success.

Mr. Robert William Mann, of Bridgenorth, who recently graduated in medicine at Toronto University, was successful in enquiring the gold medal and certificate of honor. He is now identified with the Erie County hospital, Buffalo.

### Wanted Immediately.

Good sewing machine operators on power machines. Only first-class hands need apply. Apply to J. J. Turner & Sons, Tent and Awning Manufacturers, George street, Peterboro.

### Plans for New Armouries Here.

The plans for the new armories, were received yesterday by Lieut.-Col. Miller, from Chief Architect Ewart, of the Public Works department. As soon as the plans are approved it is expected that tenders will be invited and the contracts let.

### $9.00 New York and Return $9.00.

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 7.56 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

### Local Delegates in Ottawa.

Messrs. J. R. Metheral, Dr. Harvey, Dr. Bradd, Geo. Stenton, A. Martin, W. Batten, of Court Peterborough; Mr. Robert Mulligan, of Court Little John, and Mr. S. Kemp, of Court Langton, are the delegates at the annual meeting of the High Court of the Canadian Order of Foresters, which formerly got down to business in Ottawa yesterday.

—Mr. W. J. Ferguson, of J. Sutcliffe & Sons store Lindsay, is in the city assisting in the advertisement work in connection with the big sale here.

## Pretty Wedding at St. Peter's

**Miss C. V. O'Dette Becomes the Bride of Mr. J. Jones.**

Yesterday morning, in the presence of a large number of invited guests and friends, Rev. Father McColl, in St. Peter's Cathedral, united in the holy bonds of matrimony, Mr. J. Jones and Miss Catharine Violet O'Dette eldest daughter of Mr. and Mrs. John O'Dette, 25 Crescent st.

The bride was becomingly attired in white mousseline d'esprit over white taffeta, and wore the conventional veil adorned with lilies-of-the valley. The bride was assisted by her sister, Miss Margaret O'Dette.

Mr. W. Collins of this city, supported the groom, Miss M. Doherty presided at the organ during the ceremony.

After nuptial mass the wedding party drove to the bride's home on Crescent street, where a beautiful wedding breakfast was served. There were some thirty-five guests present.

A large number of valuable presents were received. Mr. and Mrs. Jones left during the afternoon on a wedding trip to Toronto, Niagara Falls and Buffalo. The bride's going-away costume was of dark green broadcloth with hat to match.

On their return to the city, Mr. and Mrs. Jones will reside at 25 Crescent street.

## Decoration Day Will be June 20th

The local brethren of the mystic triple links have decided to decorate the graves of their deceased brethren at Little Lake cemetery on Wednesday afternoon, June 20th. They will assemble at the Central park at 2.30 o'clock, and march to the cemetery in a body. Mr. F. J. W. Mason is secretary of the joint committee. The local clergy will deliver addresses in the cemetery.

## Coal Dealers to Visit Burleigh

This city will be visited on Friday by a number of wholesale men of Buffalo, who with the coal dealers of Ontario, east of Toronto, will take a trip up the lakes to Burleigh. There will be between fifty and sixty coal men on board. The object of the excursion is to create a more intimate acquaintance between all the coal dealers of Ontario.

Let us hope their hearts and prices will not be reached upon by the hardness and solidity of Stony Lake rocks.

## Car 13 Collides With Road Roller

**$300 Worth of Damage Done to Car on Local Car Line.**

Yesterday morning as car No. 13 was coming south on George street, at London street, the motorman saw the steam roller backing round the nor. corner of London street at its full speed. The motorman did his best, acting quickly and succeeded in stopping the car. Unfortunately the man in charge of the steam roller's machinery, owing to its well known noise, did neither heard the car approaching nor did he, it seems, notice it. The roller struck the car "on the diagonal," and hustled it directly across the track facing London street west. The car was badly damaged. The buffer beam and steel chantel in front were bent in; several of the platform supports, were broken as well as the vestibule and corner post were damaged. Several panes of glass were shattered, the roof damaged, and the flange was knocked off one of the wheels. Altogether it will cost between $200 and $300 to repair the car.

On the damaged car were Messrs. A. M. Taggart of this city, and W. Boyle, of Bobcaygeon, and also a lady who at once left the scene of the accident before her name could be ascertained.

## Treating Wrong Disease.

Many tired women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, a mother from liver or kidney disease, another from nervous exhaustion or prostration, another with pain here and there, and in this way they all present alike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he, assuming them to be such, prescribes his pills and potions. In reality, they are all only *symptoms* caused by some uterine disease. The physician, ignorant of the cause of suffering, encourages this practice until large bills are made. The suffering patient gets no better, but probably worse, by reason of the delay, wrong treatment and consequent complications. A proper medicine like Dr. Pierce's Favorite Prescription, *directed to the cause* would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "a disease known is half cured."

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native medicinal roots and is perfectly harmless in its effects in *any condition of the system.*

As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

As a soothing and strengthening nervine "Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea, St. Vitus's dance, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency.

Dr. Pierce's Pleasant Pellets invigorate the stomach, liver and bowels. One to three a dose. Easy to take as candy.

## C. G. E. Co. Have a New Plant

The Toronto Star says.

Canadian General Electric was firm again in the local market this morning, selling about 146. The Canadian General Electric Co.'s new water pipe and gas pipe plant at Davenport is nearing completion and will go into operation in about six weeks. At present this branch of the company's business is being handled in the old St. Lawrence foundry, King street east. It was found over a year ago that the output of the St. Lawrence plant was insufficient to keep up with the demand, and besides it was expensive to cart the iron in from the railway and to cart the finished product out to the railway for shipment, there being no railway connection direct with the plant. The new plant has been constructed on the most approved plans, and is up-to-date in all particulars. The railway siding runs direct into the new factory yards. The new plant has four times the capacity of the old St. Lawrence works and will be able to produce quite $5 a ton cheaper. The capacity will be 60 tons a day, and as there is an excellent and increasing demand for water and gas pipe, especially from the growing towns in the Northwest, the inauguration of the new plant is expected to add materially to the General Electric Company's profits.

—Mr. Alex. Elliott the well-known Simcoe street, wholesale and retail liquor merchant, went to Hastings yesterday in the interests of his wholesale importing trade.

## The Signs of Heart Trouble

**You can Surely Secure Heart Health and Strength through Dr. Shoop's Restorative.**

Heart weakness which can be dealt with at all is nerve weakness. Just as your hand trembles when its nerves are weak, when your heart nerves are weak your heart flutters and palpitates. Other signs are shortness of breath after slight exercise, fainting spells; pain or tenderness about the heart caused by irregular heart action; choking sensation as if the heart was in the throat; uneasy sensation in the chest, showing that the heart isn't working right; pain when you lie on one side—usually the left side, but frequently the right, painful and difficult breathing; smothered feeling. There is absolutely only one way to treat a weak heart. That is to bring back natural and permanent strength to its nerves. Can you imagine how anything else can be done? Dr. Shoop's Restorative will bring back the strength to the heart nerves always. There is nothing in this remedy to stimulate; nothing that leads to reaction. The strength that it gives is natural and permanent. It is just the same strength as Nature gives to those who are well. Dr. Shoop's Restorative, or nerve strength which extends over the whole inside nerve system—it overcomes the cause of the trouble as well as the result. For sale and recommended by

J. D. TULLY.

For Weak Hearts

## To CONTRACTORS

SEALED TENDERS, addressed Chairman of Board of Works and endorsed "Tenders for Dredging and Levelling Dredged Material," will be received at the office of the City Clerk up to 2 p.m.

## Thursday, June 14, 1906

For the removal from the derrick grades and depositing in the basin between the shore line and embankment of the Canadian Pacific Railway spur line, and south of the property of the Peterborough Cereal Co., all material from the channel now being dredged by the Department of Public Works in the River Otonabee.

Measurements to be made as directed by the Board of Works, either in place or by the number of scales dumped.

Forms of tender will be supplied on application.

Tenders must be accompanied by an accepted bank cheque for the sum of $25.00.

Specifications may be seen at the office of the undersigned.

T. A. S. HAY,
City Engineer.

## General Assembly for Church Union

### Amendment to Drop Negotiations Defeated By a Vote of 179 to 22 After a Strenuous Debate---Won in Quebec.

London dons in When the church ... of long ... with what is ... dubbed ... known as the French problem, and ... afternoon ... Woodstock, this was ... the only way to make ... the Methodist ... for peace in Canada." ... the works of God ... Mr. Faulkner, Quebec, predicted ... found in the ... the unless the Bible is introduced ... Dr. Scringer. ... into the homes of French-Canadians ... was open for ... the present moment there might ... against the principles for which the ... be a repetition of the religious ... Presbyterianism stood. ... experienced in France during ...

Dr. Ramsay, Ottawa, ... that, after ... looking into the ... of Church ... he found ... of organic ... union impracticable.

Rev. J. A. Macdonald supported the motion because he found that the people ... did not ... church matter as he could in politics.

Rev. T. C. Jones, Charlottetown, P.E.I. said the Acadians were more impressed with the fact that Christians love one another than by any specific church denomination.

Rev. Dr. Robert Campbell, Montreal, who has written a book on ... indulged in a red-hot tirade against ... Russian ... pictured God wrong. The Assembly called him to time as a "religious snob."

Principal Scringer favored Union. Methodists had made such concessions in their doctrine for union that the basis of it might be called Presbyterianism.

Principal Patrick said the reason Rev. Mr. McKay, Montreal, objected to union was because he was "full of isms." He would not call him a Pharisee exactly.

Rev. Mr. McKay protested against personal attack.

Principal Patrick called him a christian gentleman and the clash was avoided.

The vote on Dr. Patrick's motion for continued efforts at organic union won over the McKay amendment to drop the matter of union permanently, by 179 to 22.

LAYMEN WANT UNION.

Principal Patrick thought they had not got the spirit of Christ's prayer yet, much less the letter. They had prayed for union, and now the Lord was answering their prayers, they wanted to get out of it. Now success was in sight, they began to be afraid. Some were in favor of federal union. Wasn't that organic? He was Scotch to the backbone, and would hang the Blue Presbyterian flag as high as possible, but he would put the cross of Christ above it. He did not believe the laymen of the Church were against union. They had too much practical sense. He supported the resolution.

Dr. Gregg, as an old man of 80, claimed to know something, and he voted against the resolution. Let them get rid of heresy and infidelity among themselves instead of uniting. Let the Churches leave union alone and clarify themselves.

Dr. Lyle opined that Christ's prayer for unity must mean organic union.

Sir Thomas Taylor was not opposed to church union, but thought a good thing might be bought at too high a price. When it could only be obtained by abandonment of principle, it ceased to be good and became evil. He was not prepared for that, and appealed to all elders to support the amendment.

ILLITERACY IN QUEBEC.

French evangelization work in Eastern Canada was the great subject in the evening. Dr. A. J. Mowatt, chairman of the French Evangelization Board, occupied the rostrum.

"Why does Quebec still exist in darkness and ignorance?" he asked. "To the other Provinces ... that the illiteracy in Quebec is appalling. Many officials hold good positions in that Province who don't read or write. It is unquestionable ... darkening Quebec from the intellectual torpor which characterizes ... Roman Catholic countries is due in no small degree to the missionary work of the evangelical churches. The people realize the ... they have been ... ed. A decade ago the priests of the Roman Catholic Church would have terrorized, where today, she ... seeks to flatter and plead."

Rev. E. H. Brash, French missionary, said "Christianity must be the ... part of a fuse. Witness then went home to get ready to move his family in, but a day or two after he was told that the house had been burned down.

Albert Davis, next witness, said he discovered the house to be on fire at 2 p.m., Dec. 21st.

Thos. Davis corroborated the evidence of his brother, and said he had traced the tracks of the man from the road to the house then to the barn and back through the woods to Mr. Hunt's.

Crawford Hunt gave evidence to the effect that John Winters, the prisoner, had worked for him ... the morning of the fire, Winters went to the woods just north of the Lundy property to get a saw. When Winters came back he said that Sunday's house had been burned the night before.

To his Honor witness said that it was snowing that morning and ... all days. It was snowing when Winters left and also when he got back. He was away between an hour and a half and two hours.

Mr. T. T. Meld, for the defence, stated that he had no evidence to offer except that of the prisoner, who then went into the box.

Winters said he had been sent for a saw through the woods, as above stated. It was a stormy morning and he took a short cut across the fields and through the woods. He found the building had been burned but he did not go near the house. He knew nothing of the fire.

To Mr. Wood witness stated that he did not know whose tracks they were, leading from the burned house, nor where they came from. He denied wanting to get possession of the place.

Constable Geo. Cochrane said that the prisoner had told him that he had seen no tracks whatever on the road nor he had not gone near the house.

After the lawyers for prosecution and defence had their say, the jury retired.

At two o'clock the foreman of the jury announced that they had agreed upon a verdict, which was "Not guilty." Winters was accordingly discharged by the judge.

## George Rickerby is Not Guilty

Yesterday afternoon a case of much local interest was tried before his Honor Judge Weller, at the county court in which Mr. George Rickerby was tried under a charge of obtaining money under false pretences.

Our readers will remember that this case was originally ventilated in the police court and sent for trial to the higher court.

After many witnesses had given their testimony the case went to the jury and they returned a verdict of "Not guilty."

This case was based upon an alleged statement that the defendant had rented a certain piece of pasture land, part of the Sullivan farm, to Mr. W. Eyres, that did not belong to said defendant.

This is the second suit that Mr. Rickerby has successfully won in this matter.

## Another Church Parade on June 24th

There was a large attendance on Tuesday night when the regular meeting of Court Stanley, A.O.F., was held in the lodge room, Hunter St. The proceedings were of an interesting nature. Brother Wilson, of Court Hope, Toronto, was present, and gave an address. One new member was initiated.

It was decided to hold the church parade of Court Stanley on Sunday, June 24, to All Saints' church.

## Winters Was Not Guilty

### The Celebrated Harvey Arson Case Results in Prisoner's Acquittal.

Yesterday morning at 10 o'clock his Honor Judge Weller opened the second sittings of the county court. The first case called was that of John Winters, charged with setting fire to a house in Harvey township last December, and was a jury case.

County Crown Attorney T. R. E. Wood addressed the jury, and reviewed the facts of the case which would be presented by the prosecution. It appears that Winters is alleged to have set fire to the house by carrying an armful of hay from the barn and putting it in the cellar and then setting fire to it by the use of a fuse. The morning after the fire a man by the name of Davis saw the house burned. He found traces of a man around the house and then through the woods to Hunter's house. There he learned that Winters had been through the woods to get a saw and when he returned reported that the house had been burned.

Wm. Coons, the first witness, testified to having rented the farm from Mr. T. J. Lundy, on which he house was burned. When he went into the house it was full of smoke. In the cellar were ashes and the hay round the trap door was partly burned and

## Appaling Is the Seer's Forecast

### Chicago Prophet Says We Are Certainly In for It Now.

Chicago, Ill., June 14.—Like the warning voice of the ancient Sibyl crying "Beware the ides of March" comes the gloomy forecast of a Chicago prophetess. It was she, Mme. Seera, who, at the time of the great sun spot, February 4, 1906, predicted disaster, horror, and wholesale death.

"I foresee some awful catastrophe in the distance," said the seeress from her "dim-draped" den in Randolph street. Then came the San Francisco earthquake, with its train of fire, and Mme. Seera says she has "made good."

"Beware of June 29" was the danger signal that madame displayed this morning. This warning comes in conjunction with the prediction of Horace Johnson, the New England prophet, who foresaw earthquakes, electrical disturbances and pestilence.

Mme. Seera blames the forthcoming catastrophe on the planets. There is a terrible mixup in the vast planetary realms, she says.

As Mme. Seera sat brooding in her den last night, wondering in fancy over star-strewn ripias, through spaces sprinkled with star dust, to the rims of cold, dim worlds vibrating in the planetary waste, she made this prophecy: "The earth will now be visited by a supreme upheaval. The earthquake shocks which began January 5 will continue during the year. June 29 is culmination of the most dangerous position of the planets relative to the earth is to occur. In what manner this disturbed ball will pass the conjunction of Uranus and Capricorn only can be a conjecture. Seismic disturbances may be the least of the disasters to occur.

"Even the fishes of the sea will feel this planetary influence. There will be fire, war, death and assassination. In opposition to the earth at the same time, the sun, Mars and Neptune will cause oceanic disturbances, resulting in shipwreck and disaster. We are entering an era of misfortune. The conditions on our little planet are the most appalling of any existing in all the peopled worlds of thy unbounded universe."

## Local Orangemen To Visit Lindsay

The Orange Lodges of Peterborough District will this year celebrate the Glorious Twelfth at Lindsay. A monster celebration will be held at that town, which nestles by the River Scugog, in which the local lodges will participate. Arrangements are now being made for running an excursion, and it is expected that a large number from Peterborough will be in attendance. Among the lodges from this district which will attend are: Diamond Lodge, No. —, of Peterborough; Jubilee Lodge, of Smith; Col. Sanderson Lodge, Downer's Corners; Wellington Lodge, of Nassau.

The Twelfth will also be celebrated at Norwood, but as this village is not in the local district the Peterborough Lodges will not attend.

### Canadian Robbed in Italy.

Venice, June 14. — Dr. Wm. Oldright of Toronto, Canada, who is in Italy attending the medical congress, was robbed in Padua yesterday of his purse, containing personal papers and a letter of credit for $1,500.

### Guard Against Bad Meat Supply.

Winnipeg, June 14.—The council will take prompt steps to guard against all impure meat supply. It is suggested that a bylaw be enacted providing that all meat sold in the city shall bear the certificate of an inspector, and that regular hours be fixed for slaughtering to enable the inspector to be present.

## THE ANARCHIST IN ENGLAND

### Public Opinion Divided on the Point

### PRESS DISCUSSING SUBJECT

### London Police Deny That Plot Against Alfonso was Hatched in London

London, June 11—The desperate attempt on the lives of King Alfonso and Queen Victoria closely touches the people of Great Britain, bringing home to them the question of harboring anarchists, which has long been kept in the background. It is now expected that this will immediately be presented to the government upon the reassembling of parliament after the Whitsuntide recess, when an effort will be made to secure the passage of a law excluding anarchists from their long enjoyed harborage in Great Britain. The effect of the agitation is problematical. Much depends upon the result of the investigation being made by the Scotland Yard authorities and other officials.

A PACT BROKEN.

The authorities at Scotland Yard are inclined to doubt that the Madrid plot originated in London. The evidence so far adduced does not warrant full acceptance of the claim that this city has been used as the rendezvous of anarchists, and as the base of their murderous operations. The general idea is that judgment must be suspended pending the disclosures of proofs and details of the conspiracy. If it is established that London was used as a base the demands for governmental action will be immensely strengthened and the prospects of legislation against anarchists will be enhanced.

There has long been a deep rooted sentiment in Great Britain against closing the doors to any political refugees or plotters, however violent, and apparently there has been an agreement among the anarchists not to molest members of the British royal family as long as the former enjoyed freedom of access to the country and immunity from persecution when within.

It has often been asserted that the British secret police had made the immunity of members of the royal family the subject of a definite pact with anarchists and that it was enforced by the treaty of vigorous exclusion in case of the agreement being broken. If such a pact exists it was broken by the attack on the Queen of Spain. A clause in the offences against the person act passed during the reign of Queen Victoria gives the police power to take action if a conspiracy is hatched in Great Britain, but it would be difficult to obtain a conviction under that law, although it reached the case of the late Herr Most, in 1881, and the Walsall anarchist group, in 1891.

This clause provides that "All persons who shall solicit, encourage or persuade, or endeavor to persuade, or who shall propose to any person to murder any other person, whether the subject of Her Majesty or not, and whether he be within the Queen's dominions or not, shall be guilty of a misdemeanor, and being convicted thereof shall be liable to penal servitude for any term of not more than ten years."

SETTLEMENT BY SCOTLAND YARD.

As an outcome of an investigation ordered by the government, an authoritative statement was issued yesterday on behalf of Scotland Yard, according to which for months past no person known to be an anarchist has left British shores; while two men concerned in the attack on King Alfonso in Paris a year ago have been for weeks under observation in London.

The Daily Telegraph admits that Great Britain's attitude perhaps might be modified with advantage with regard to the asylum offered anarchists, but contends that it is a subject beset by difficulties and calling for most careful investigation.

Wm. Melleville, late chief of the special police service in Scotland Yard, who during his tenure of that office was in the closest touch with the anarchist movement, informs the Daily Telegraph that seven years ago, the London police frustrated an attempt to assassinate King Alfonso and his mother by the discovery of a plot against them in London and the pursuit and capture of the plotters at Bordeaux while they were on their way to San Sebastian.

## British-Russo Entente Near?

### King Edward Declared Striving to Make Kaiser's Isolation More Lonely.

London, June 14.—King Edward of late has been working hard to bring about the much desired entente between Russia and England. In this matter the King above all is inspired by chivalrous sentiment towards his nephew, the Czar, whose hopeless helplessness he seeks to alleviate. Never before has such wire pulling between sovereigns existed and it is all on account of King Edward's diplomatic instincts. He has undoubted talents in the gentle art of diplomacy.

Emperor William's visit to Vienna is, as is well known in the Foreign Office here, a direct reply of Germany to England's pro-Russo-Franco policy in the game of political chess which has been going on so long between the King and Kaiser. The former so repeatedly has checkmated the younger player that Wilhelm no longer is reckoned in the world of diplomacy as anything like a match for his uncle.

HARD KNOCKS FOR GERMANY.

The Franco-Anglo entente at Algeciras the Spanish marriage, and lastly the probable and almost arranged understanding with Russia has been a success in which King Edward has had all to say and in each of which Germany has received a severe political defeat. King Edward certainly will go down in history as le roi diplomat.

According to a diplomatist the latest impulsive move of Emperor William in rushing off to Vienna is by no means appreciated in the Austrian capital but on the contrary is regarded as making an awkward situation. The German Emperor was not invited, but proposed it himself as is his wont, and of course there was no saying nay.

The manner in which the King of Italy was approached in order to obtain from him a declaration of adherence to the Triple Alliance was of a crudity beyond description, and caused much comment of a disparaging order in the diplomatic world. Kaiser Wilhelm's grand plan is to give Austria a free hand in the Balkans and in return receive Austria's support in Turkey, especially in Asia Minor, when the inevitable moment arrives.

MAY BE SECOND ALGECIRAS.

In the meantime Sir A. Nicholson, primed with instructions from the King and with an endless practical information from Sir Charles Harding, whose knowledge of Persian matters is unending, is given the mission of bringing the Russo-Anglo understanding to a conclusion with all possible rapidity.

The fact of such negotiations being actively pushed forward has aroused the Wilhelmstrasse pulse to the highest beating point, for it can see nothing but a deep set plan to hurt Germany's interest in Asia Minor in the whole thing. Indeed, should the Russo-English entente become an accomplished fact, founded, as it will be, on a thorough understanding for mutual benefit upon the basis of England and Russia being the most interested countries in Persia, Germany's pretensions in the Shah's domains will suffer the severest shocks and Germany will find herself with a second Algeciras question on her hands and only Austria to support her.

## G. T. R. Changes Local Trains

### New Schedule for Lakefield Trains Beginning Monday.

Mr. Frank Sandy, the local agent of the Grand Trunk Railway, gave The Times a call yesterday, and noted that commencing Monday next, there will be three trains a day on the Lakefield branch of the G.T.R. The morning train will leave at the same hour as at present, viz., 8.30. The noon train will leave at 11.55 instead of at 12.20. In addition to these there will be another train in the evening leaving Peterborough at 5.40 o'clock, arriving at Lakefield at 6.10.

A new train will leave Lakefield at 6.20 p.m., arriving in the city at 6.50.

These changes will be appreciated by the thousands of G.T.R. summer trippers to Kawartha Lakes.

### Buys Electric Works in Russia.

St Petersburg, June 11.—It is stated that the Westinghouse Company has bought of the Belgian owners the immense works of the Central Electric Company, for the erection of dynamo machines at Moscow, for $2,000,000.

### One Thousand Immigrants Per Day

Quebec, June 14.—Since the opening of navigation, 29,894 transatlantic passengers arrived at Quebec, being an average of 1,000 per day up to and including Saturday, the 9th inst, the majority of the immigrants being bound for the North-West.

### BUILDING FOOD

### To Bring the Babies Around.

When a little human machine (or a large one) goes wrong, nothing is so important as the selection of food to bring it around again.

"My little baby boy fifteen months old had pneumonia, then came brain fever, and no sooner had he got over these than he began to cut teeth and, being so weak, he was frequently thrown into convulsions," says a Colorado mother.

"I decided a change might help, so took him to Kansas City for a visit. When we got there he was so very weak when he would cry he would pink away and seemed like he would die.

"When I reached my sister's home she said immediately that we must feed him Grape-Nuts and, although I had never used the food, we got some and for a few days gave him just the juice of Grape-Nuts and milk. He got stronger so quickly we were soon feeding him the Grape-Nuts itself and in a wonderful short time he fattened right up and became strong and well.

"That showed me something worth knowing and, when later on my girl came, I raised her on Grape-Nuts and she is a strong healthy baby and has been. You will see from the little photograph I send you what a strong, chubby youngster the boy is now, but he didn't look anything like that before we found this nourishing food. Grape-Nuts nourished him back to strength when he was so weak he couldn't keep any other food on his stomach." Name given by Postum Co., Battle Creek, Mich.

All children can be built to a more sturdy and healthy condition upon Grape-Nuts and cream. The food contains the elements nature demands, from which to make the soft gray filling in the nerve centres and brain. A well fed brain and strong, sturdy nerves absolutely insure a healthy body.

Look in pkgs. for the famous little book, "The Road to Wellville."

## Girl Weds a Married Man

### Knowing He Had a Wife, He Told His First Wife the Other Had Suggested the Marriage---Sentence on Bigamist Deferred

Toronto, June 14.—The two wives of John Mansel met face to face for the first time in the police court yesterday morning—his first wife, Mary Ann Phillips, whom he married in Oshawa in 1898 and Isabella Robinson, whom he victimized on March 28 of this year.

Mansel himself stood in the dock and tried to look unconcerned, while his first wife broke down and sobbed just after she had testified that the marriage between herself and the defendant was solemnized by Father Jeffcott at Oshawa, November 24, 1898. She testified that after their marriage they lived together till April 16th of this year. During February he went away, but returned, and she supported him then and until he left her finally.

"Did he tell you that he was going to get married again?" questioned Mr Corley.

"Not exactly, but he told me that the girl he was going with proposed that they get married, and that he'd serve his time and then go and live with her after his release."

"Then you prosecuted him for bigamy?"

"No. I didn't say anything about bigamy. I merely charged him with non-support."

The marriage certificates of 1898 and 1906 were then submitted, and as the latter was read, Mrs. Mansel asked for a chair, but down ... buried her face in her hands, while the tears trickled through her fingers.

Rev. Dr. Pearson, rector of Holy Trinity, took the stand, and testified that the second marriage had been solemnized by him, and he identified the defendant.

Miss Isabella Robinson admitted the marriage.

"Did you know he was married before?" asked the Crown Attorney.

"Yes," she answered, before the magistrate could tell her that she didn't need to answer that question.

Mr. Robinette, after the defendant had been pronounced guilty, made a plea for a light sentence, citing facts to show that the man had previously borne a good character.

But Crown Attorney Corley thought that an example should be made of this man, and said:

"This dodging of the marriage tie in Canada is becoming very prevalent. The idea that if a person gets a kind of a semi-divorce, going to Detroit or some other American city, and putting in false papers of citizenship, he is free to marry again, is getting too common, and I would ask that he receive a punishment which would deter others."

"He ought to be punished for the condition of the poor woman he married, as well as for his wife's sake. Her child will have to come into this world without a name and with its future blasted."

The magistrate remanded Mansel till today for sentence.

He is liable to seven years imprisonment, and will probably get about three years.

As she left the room Miss Robinson's pent-up feelings overflowed, and she broke down completely, having to be led from the room by the Detectives.

## POLICE NEWS

### Daily Happenings in Court Room and Station.

Yesterday morning his Worship S. R. Armstrong presided at the morning session of the police court. His energies were not severely taxed only one case of juglet-being on the docket. The jugger paid $2 for his juglet.

Yesterday afternoon a special session of the police court was held with Magistrate S. R. Armstrong presiding. James Watson who was arrested on Water street yesterday by P. C. Rutherford, as a vagrant, pleaded not guilty, and was remanded until next Tuesday.

A man named Innes who was gathered in by P. C. Stewart, was accused and convicted of having dallied too long and frequently with the Extract de Seagram and Gorby," was assessed $2 for said indiscretion. As Innes did not have the price on his pockets, he retired to the jail for ten days or till such times as his friends put up the "chinco."

## House Boat for Kawartha Lakes

Lindsay Post says:

Mr. J. H. McGill, of Washington, D.C., who is related to the General manager of the Ontario Bank, has been in Lindsay, since June 1st, superintending the construction by Messrs. Baker and Bryans of a house boat after a rather novel plan. Mr. McGill has spent his holidays on the Kawartha Lakes for some years past, and his experience has taught him a few things. In making his plans he eschewed the leaky scow for pontoon style and stipulated for a solid timber raft, 20 x 40 feet, and 30 inches thick, made of three tiers of 10 x 10 boom sticks bolted together in traverse layers, of which a ton was required. On this stout foundation a two-storey frame residence is being constructed, which is to be finished in first class style. The floor will be a foot above the raft and in rought weather the waves will sweep underneath the dwelling without meeting with any obstruction. The house boat will be towed from one lake to another by a steamer, and anchored in any desired spot. Mr. McGill has a fine gasoline yacht, which he will use for making excursions, returning to his floating residence when the fancy seizes him. It is said the outfit will represent an outlay of $5,000.

## St. Paul's Y.M.G. Outing Today

It is expected that a great crowd will take in the annual excursion of St. Paul's Young Men's Guild today. The program includes a trip up the lakes to Burleigh, where supper will be served and games and other amusements indulged in. The start will be made at 8.25 a.m., taking the regular G.T.R. train to Lakefield and there connect with the steamer Stony Lake and proceed up the lakes. A stop will be made at Clear Lake for dinner and during the afternoon the steamer will continue to Burleigh.

All baggage and wraps will be looked after by the committee in charge, composed of Mr. R. F. McWilliams, chairman; Rev. A. Bright, Messrs. G. E. Hodgson, Dr. Wightman, J. H. Connal, A. P. MacLean, W. S. Davidson, Ross Cameron, D. Downie M. Rosenburgh, R. Hall, C. Allowson, and H. Dodds.

## ATHLETIC WORLD

### BY OUR SPORTING EDITOR

THE TURF.

Mr. Chas. Fife of Keene, has two horses in training at the local track. They are half sisters of Maud Kenwick, the famous queen of the turf. One is a trotter and the other a pacer. They are fast getting into form and give promise of doing some good work this season.

• • • •

BASEBALL.

Following were the results of the Eastern League games played yesterday.

Montreal 7, Toronto 0.
Buffalo 3, Rochester 1.
Providence 2, Jersey City 3
Baltimore and Newark, no game.

• • • •

The Charlotte Street Guild League team will play an exhibition game in Havelock on June 30, and another in Campbellford on July 1st.

• • • •

The barbers and wine clerks are said to be arranging for a baseball match, which will be played in the near future.

• • • •

FOOTBALL.

The Peterborough Quakers will play the Lakehurst team at Riverside Park on Saturday afternoon at four o'clock. This is the first game in the finals and should attract a large crowd.

## Special Visit to This City

### "Woodmen" of Toronto to Visit Peterborough on July 14th.

This city will probably have an invasion, and a welcome one, by the "Woodmen of the World," from Toronto on Saturday, July 14th. The Woodmen of that city are on about date running an excursion from the Queen City to Bobcaygeon and Peterborough via C.P.R. This excursion promises to be a very large one, as they have made arrangements whereby baggage, etc., may be sent to the Union Station in advance, and marked "Woodmen's Excursion for ——" They have chartered a special train which will arrive here early and leave the same night at 8.15. As a new lodge of the Woodmen has recently been established in Peterborough, the visiting brethren will probably have a hearty fraternal welcome.

## A Marriage in The East Ward

A pretty wedding was celebrated Tuesday evening at the home of Mr. and Mrs. William Faint, Hunter st. east, when their daughter, Clara Elsie, became the wife of Mr. Wilton G. Walker, of Winnipeg, formerly a resident of this city.

The ceremony was performed by Rev. J. G. Potter in the presence of only a few most intimate friends. The bride was prettily gowned in Alice blue Dresden silk and carried a shower bouquet of white carnations. She was attended by her sister Miss Pearl Faint. Mr. Maurice Van der Water of Toronto, acted as best man.

Mr. and Mrs. Walker left on the nine o'clock, G.T.R. train for Toronto, en route to their future home in Winnipeg.

## Terror of Spring is Sickness

**What Are You Doing to Protect Your Weak Body Against Spring Fevers?**

A delay gives the germs and weakness a better chance to take hold.

Don't wait, think of your small resisting powers, and begin building up today!

For weakness, overwork and debility the doctors prescribe Ferrozone; let it help you now.

Vitality and power are instilled into the blood; this means new strength for all weak organs.

The fire of youth will dance in your veins, and new found energy will increase your desire to work.

Ferrozone supplies the nourishment and tissue-building material your system lacks. Isn't this a reason why.

From Comfermere, Ont., Mrs. Jno. Oram writes as follows: "For a number of years I was sickly in the springtime. I felt tired, nervous and had headaches. My blood was weak and damp days brought on rheumatism. My nervous system was unstrung, and I felt utterly worn out. Ferrozone revived me in a short time. In two days my appetite increased and I could feel a building up process going on. This great tonic made a new person of me, and I don't think a more strengthening medicine for the spring can be found."

Wouldn't it be just fine to get back your old time spirits and vigor? Easily done with "Ferrozone;" commence today. Sold by all dealers, 50c per box or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

### SACRIFICE OF ROJESTVENSKY

Since the world has grown more intimate with Russian governmental methods there will be little surprise at the action of the Naval Court of Inquiry that has returned an indictment against Vice Admiral Rojestvensky, who commanded the ill-fated fleet in the battle of the Sea of Japan. It is also not surprising that the penalty for Rojestvensky's alleged incompetency is death.

The unfortunate admiral is only one of many gallant Russian naval and military officers who have been or are to be sacrificed upon the altar of grand ducal greed. For years the uncles of the Czar have conducted systematic thieving from the government in a manner that puts every other known graft to the blush. In the main the stealing on government contracts has been open and brazen. It was so long unrestrained that it had gained a certain current legitimacy, as a logical result of such an exalted bad example. Russian affairs became permeated with graft from the lowest petty official in an obscure post to the Emperor himself.

At the outbreak of the war with Japan the army and navy establishments were demoralized almost to the point of dissolution. Army contracts had been the subject or graft for so long that the meager supplies on hand at the various stations were of the poorest possible quality. It was shown by exposures that eluded the vigilance of the censors that the soldiers and sailors were insufficiently clothed and were half starved. The money appropriated for them had been stolen. The ships of Rojestvensky and other commanders were old and out of repair. No ammunition being available for target practice, the men could not shoot, and the ammunition that was hurried to them at the last minute was so bad that it was little better than none at all.

The army graft was even worse. Hundreds of thousands of blankets that were purchased by the government were stolen by the grand dukes and sold at half price. The army at Harbin went without shoes for an entire winter because the high authorities had stolen the money set apart for their purchase. A gift of 250 army blankets given by a rich Moscow merchant was appropriated by the grand dukes and sold back to the donor at 50 cents on the dollar. In another instance it was found that certain shells delivered at an army post were filled with sand instead of powder.

Under the circumstances the world must applaud Rojestvensky for the gallant, if losing, fight he and his men put up in the face of what they knew was almost certain death. The conditions of that battle were all against the Russians. They were far from home, without an available base or coaling station and in every way unprepared for a sea battle. But Rojestvensky dared not complain. He was not permitted to tell the world how desperate was his situation, for it would not only warn his enemies but expose Russian official graft. Therefore he went deliberately to a fate he knew only too well awaited him. Now Russian "honor" demands that he be sacrificed on the charge of "incapacity," notwithstanding the circumstances of his unequal contest and the fact that he wears the orders of bravery and competency in former campaigns and was always considered one of the best officers in the Russian navy. The grand dukes must be shielded at the cost even of the lives of brave men.

### BIG MONTREAL TERMINALS

**G. T. R. Acquiring Land to Rebuild on Much Larger Scale.**

Montreal, June 13.—The Grand Trunk Railway has formulated a plan for the rebuilding of the Montreal terminus on a tremendous scale and already a great deal of property in the neighborhood has been quietly acquired for this purpose. Directly to the east of the present Bonaventure station is a park of considerable size, the property of the railway, and to the east of that again stands a series of small hotels. These hotel properties are now being acquired, the London House having been sold to the company for the sum of $75,000, while the St. James Hotel property, larger and more valuable, is being negotiated for. A property in this neighborhood changed hands some time ago, presumably for the purpose of erecting a branch postoffice, but it is now believed to have been purchased for the railways. The present plan, when carried out, will give the Grand Trunk one of the most extensive terminals in Canada.

Pink Lips, Like Velvet. Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most highly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

### OFFERED A BIG BRIBE TO CHANGE EVIDENCE

Winnipeg, Man., June 13.—James Shuttle, the London convict whose evidence sent Hugh Watt, the British M.P., to the penitentiary for employing crooks to murder his wife, was discovered in Winnipeg yesterday working as a window-cleaner in the Union Bank building. He was discharged, and then went to the newspaper offices and asserted that a large sum had been offered to him by a local detective agency to swear that the evidence given in the Watt case was false. A local law firm admits having negotiations with the convict.

Shuttle was given money and a ticket by the British Government and shipped to Winnipeg on March 22 under the name of James Edwards. He was a famous diamond thief in London, and in the past two months three big diamond robberies have occurred in Winnipeg. He claims now to be reformed. He took the Western Transcontinental last night.

### MAN OF NINETY KILLED.

St. Catharines, June 13.—David Henderson, an old and highly respected citizen was killed by being struck by an early morning train on the Grand Trunk yesterday. He evidently was walking along the tracks and must have stepped to one side, but not sufficiently to clear the train, as he received two scalp wounds, and both of his arms were broken. The body was picked up by the local freight train and brought to the station. The ambulance was called, and as they were about to place him in same, he breathed his last. Deceased was 90 years of age. He leaves beside a widow eight daughters to mourn his death.

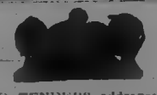
The Celebrated English Cocoa.

**EPPS'S**

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**COCOA**

The Most Nutritious and Economical.



SEALED TENDERS addressed to the undersigned and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart and Wilton, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the check will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

**Your Liver.** You cannot possibly enjoy good health when the liver is inactive and the bowels constipated. You must keep the liver active. You must have daily action of the bowels. Ask your doctor if this is not true. Ask him at the same time if he knows a better laxative than Ayer's Pills. All vegetable, sugar-coated. Dose, only one pill, at bedtime.

We have no secrets! We publish the formulas of all our medicines! J. C. Ayer Co., Lowell, Mass.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

"Now I can only ask you to remember that it was M. Armand, not the marquis, who knelt to you when you laid your hand on his head that night at Winchester, with the whippoorwill and the moonlight, and who told you—what he is trying to tell you now, what he tried to tell you when you saw him lying at Greenway Court, only you would not listen."

She turned to him a look that was all melting, all tenderness, all confusion of impulses, a look that caught him and held him spellbound.

"You kissed me," cried Armand in a triumphant voice. "You kissed me! It was not a dream! Look in my eyes."

She looked at him, paling, feeling her hands imprisoned in his own. He laughed with a low, fierce delight, for her breath was quick, her eyes like mist and fire.

"Do you love me?" he breathed, a sudden passion leaping in his voice. "Do you love me?" He caught her close to him. The whole world turned beneath her feet, and the stars shook. "My gold rose! Tell me! Is it so?"

She moved her head with a mingled gesture of pride, of shame of yielding, of assent. Then with a little cry, frightened yet joyful, she felt his arms, masterful, draw her close to him and stood trembling, joyous, a wave of love engulfing her.

"Answer me," he said. "The night we sat in the rustic house and the sun was a big red flower closing. You remember what I asked you?"

"Yes."

"If the man you loved—if I—should come to be mean and unworthy before the world"—

"But you are not."

"If I were?"

"My king!"

"If you saw me sneered at, despised, but still loving, still worshiping"—

"I would love you! I would love you!"

A light came over his face, brilliant and pale. "With the love that is the all, that is greater than the world, that is above station, above honors, above name? That outlasts them all?"

Her arms went up about his neck, and their lips met in a first long kiss.

"All," she whispered. "All! All! Louis! My beloved!"

* * * * * * *

Anne peered into the warm library of Gladden Hall, all aglow with her strange new delight. The fire was low, and doming embers made the dusk rosy and uncertain. She smiled as she saw the dim figure sitting with feet outstretched, just the top of the powdered perruke showing over the back of the big chair.

*Her arms went up about his neck.*

With her finger on her lips in that instinctive pantomime that belongs to woman, she stole across the floor on tiptoe and, swooping suddenly, clapped her cold palms over the eyes of the solitary occupant and laughed gayly as he started and put warm hands to her chill ones.

"I have a secret to tell you," she breathed with a fluttering laugh, "and you mustn't look at me when I say it. I wonder if any one in Virginia can be as happy as I am. The Marquis de la Trouerie—uncle, he has asked me to wed him"—

She ended with a subdued scream and, stumbling, went back a few steps, for the figure that had risen from the chair was not Colonel Tillotson. Even in the dim light as she retreated she could see the glare of flaming malice in his look and the sneer curling his full lips.

"I tell you, Captain Jarrat," she said in a wave of fierce anger, "I hate you! I hate your face and your crafty ways! Ah," she ended, stamping her foot, "no gentleman would have let me speak—would have listened."

"I am no marquis," Jarrat rejoined, with a ghastly smile. "I am only sorry I did not hear the end of that sweet confidence. The fair Mistress Tillotson answered that she would joy to wed the noble gentleman, I suppose."

"Aye, and if she did?"

He laughed—a jarring, mirthless laugh.

"Why, then, I, who have failed to win her with a simple soldier's name, should wish her joy of the tinsel of her title."

"You mistake," she cried passionately. "As you were the king himself I would not look at you. The man I love, I would wed the same were he poor and nameless and of no report—aye, a laborer in the fields instead of the nobleman he is!"

A voice in the hall struck across the quivering tones:

"Rashleigh, a bottle of my best canary, and stir your bones about it. Come in, come in, marquis. We shall have a glass to this, I promise you." The door opened, and Colonel Tillotson came forward, blinking in the blaze of the branched candlestick he carried.

"Ah, here you are, Anne, intrenched in the dusk with re-enforcements, eh? Well, the battle is over, and I have surrendered."

She had raised her hand to stop him. "Uncle," she warned, "you have a guest."

The colonel stopped at sight of the other in some confusion.

"Why," he exclaimed, "I am indeed sorry! Rashleigh, you black rascal, why did you not tell me the captain was here?"

"I did but call to bear a message to your niece, colonel," Jarrat answered

[To be continued]

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Shoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

LADY DOCTOR DEAD.

New York, June 13—Dr. Mary Putnam Jacobi, who was the wife of Dr. Abraham Jacobi, and was a distinguished specialist in children's and nervous diseases, a writer of many books on general and medical subjects, and at one time an ardent woman suffragist, died on Sunday at her home in east 47th street. Her illness extended over a period of four years.

**SAN DOMINCO MINING CO.**

Dept. 61, Frisco Building, St. Louis, Mo

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly, the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, etc., & c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, have paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence the Gold Leaf Mining, Milling & Drainage Co. forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $14,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**

AND

**$5.00 PER MONTH**

FOR FOUR MONTHS WILL BUY

**500 Shares**

OF STOCK WHICH MAY SOON BE WORTH

**$500.00**

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

**W. KELSEY HALL,**

Fiscal Agent. 375 Water Street, PETERBOROUGH

## What Does It Mean?

### Dr. Hamilton Gives a Full and Satisfactory Explanation.

Look at your tongue!

Sometimes it's heavily coated sometimes it's clear and red.

Study this out and you'll find some interference with the functional activity of the body.

This means the bowels are not regular, the liver is sluggish and the blood is contaminated.

Strong cathartic pills act so destructively on the intestines as to provoke deathly sickness, this often frightens people from taking medicine when they badly need it.

To the multitude of dangerous purgatives now on the market, Dr. Hamilton's Pills are a notable exception, they neither gripe, cause sickly feeling or headache, for they cleanse and purify the entire system in one night. No other laxative acts with such mildness and certainty. Giving proper stimulus to the liver and kidneys, strengthening the stomach and toning valuable aid to digestion. It's small wonder that such marvellous results accompany Dr. Hamilton's Pills.

Mr Geo O'Hagarty of Amherst, N. S, writes, "Last winter I worked in a lumber camp and neglected my health. I was dreadfully constipated and had a headache that fairly made me reel at times. I was sick and miserable, and hadn't the slightest ambition to work or stir around. I felt heavy and dull and had a bad taste in my mouth. I sent into the city for Dr. Hamilton's Pills, which I knew were good for my condition. They fixed me up very quickly and have kept me in good condition ever since. There are other men in the camp that use Dr. Hamilton's Pills also. They say they wouldn't be without the pills for ten times their price.

Every dealer in the land sells Dr. Hamilton's Pills—25c per box or five boxes for $1.00. By mail from N. C. Polson and Co., Hartford Conn. U. S. A. and Kingston, Ont.

Opposite Post Office. Principal

## LOCAL INCIDENTS

### By The Times Man on the Street

—The next session of the Bay of Quinte Conference will be held in Bowmanville in June, 1907.

—The West Peterborough Farmers' Institute will meet for election of officers on Saturday in the city council chamber.

—The Mission Band of Murray street Baptist church will hold its annual picnic to Jackson Park on Saturday afternoon.

—A gang of thirteen men has been employed for nearly two weeks rebuilding the fences along the C.P.R. tracks near Springville.

—The stone crusher which the town of Omemee purchased some time ago from the Good Roads Company, of Hamilton, has arrived.

—Mr. J. W. McKimmid has bought the house and lot at 65 Weller street from Mr. McFarlane, who removed some time ago to Fort William.

—A special meeting of the Girls' Guild of St. John's church was held in the school room last night, to arrange for the fellowship tea on Sunday afternoon.

—The Non Jury Sittings will open today at one o'clock. Chief Justice Falconbridge presiding. There is only one case on the docket, J. D. Clark vs. the Union Stock Company.

—Mr. James Kendry and Miss Campbell are the representatives of the George street church W. M. S. and Miss A. Davis of the Mission Band at the annual meeting being held in Port Hope.

—Chemong Park gives every evidence of being more popular than ever this season. The auto service which will soon be established will make things hum, and cook the duets out of doubters' pockets.

—Mr. W. Warren, head gardener for Hon Geo. A. Cox in this city, has gone to Toronto to look after his property there. His place here will be filled by Mr. W. James, a gardener with extended experience in England.

—The annual meeting of the Woman's Missionary Auxiliary of the Bay of Quinte Conference was held in Port Hope yesterday. Among the delegates from Peterborough in attendance were Mrs. (Rev.) Campbell, Mrs. James Kendry, Mrs. Kilgour Mrs. J. K. Moore and Mrs. M. W. Mutchett.

—Mr. Heyes of Heyes Bros., Toronto, representing the Shield Brand of pipes, was in the city yesterday. Mr. Heyes placed an order for Shield Brand brier pipes with O'Brien, the George street cigar man, amounting to seven gross, which are all sold under a strict guarantee, that if defective the price is returned.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

**Rev. W. D. Harris on for Keene.**

In the final draft of stations by the stationing committee of the Bay of Quinte Conference, it was decided Quinte in the Campbellford District, Rev. W. D. Wilson, of Keene, goes to Sidney, and Rev. W. D. Harrison, of Woodville, to Keene.

**$9.00 New-York and Return $9.00.**

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days stood on regular express trains leaving at 9.52 and 7.15 a.m., 7.15 and 8.42 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 18 King street east, Toronto.

**Chief After Stone Throwers.**

Chief Russel says the stone throwing game must be stopped, especially when it comes to throwing them at the residences of citizens. This is due largely to the report contained in The Times of a case in which a Sherbrooke street resident had a large front window broken.

**Old Fireman Visiting Here.**

Mr. Alex. Paisley, of Bracebridge, is in the city, on a visit to his brother-in-law, M. Wm Wm. Clarke. Mr. Paisley is a former resident of the city and was one of the charter members of the old Fire Brigade band, which was organized twenty-seven years ago.

**Speakers in Gospel Hall.**

Tomorrow, at eight p.m., Mr. and Mrs. Edward J. Blandford who are passing through Canada on their way to China, will address a meeting in the Gospel hall, corner George and Brock streets. Mr. Blandford's last visit to Peterborough was thirteen years ago.

**Park Street Church Notes.**

The monthly meeting of the finance committee of Park street Baptist church with Mr. T. G. Gillespie, showed that the envelopes and plate offerings last Sunday were a record netting $26 for the day. The election of officers for the year took place, resulting in the re-election of Mr. T. G. Gillespie as chairman, and David Holt as secretary pro tem.

**New Books at Public Library.**

The following new books have been recently added to the Public Library:

Great Events.

Silver Bells, Haggard.

In the Heart of the Canadian Rockies, Cutram.

Duck Lake, Young.

Fenwick's Career, 2 copies, Ward

Pain Decides, Von Hutten.

Lady Baltimore, Wister.

## SOCIAL AND PERSONAL

—Miss Lillian Moore went to Toronto yesterday.

—Mrs. L. M. Hayes is at her cottage at Chemong.

—Miss Mabel McGuire, New York, is home on a visit.

—Miss Mary Nicol is to Norwood, spending her holidays.

—Mr. J. G. Parent, of Quebec, is a guest at the National.

—Mr. C. G. James of Bowmanville was in the city yesterday.

—Mr. Walter Bates, grocer, of Lakefield, has removed to Huntsville.

—Mr. W. E. Forsyth, of Montreal, was registered at the Oriental yesterday.

—Mr. W. A. Baker and bride, of Warkworth, are spending a few days in the city.

—Rev. Dr. Carthers has returned from attending the Bay of Quinte Conference at Port Perry.

—Rev. J. G. Lewis returned yesterday from attending the Bay of Quinte Conference at Port Perry.

—Mr. Stanley Johnston, of New York, formerly of the Ten Store Co., is visiting friends in the city.

—Mr. L. Richards, traffic manager of the American Canal Company, Chicago, was in the city yesterday.

—Mr. and Mrs. Howson, who have been visiting their daughter, Mrs. Geo Buck in Norwood, have returned home.

—Mr. George Gibson, who has been living in Peterborough for the last three years, has moved back to Springville.

—Only two mounted pictures of the Trent Valley canal deputation taken at Ottawa, left, and will be sold for $1.00 in order to clear them out. Don't miss this chance. Times' Bookstore.

—Mr. Robt. Fair leaves this morning to attend the Anglican synod now in session in Toronto, as a delegate from St. John's church congregation.

Laxets—A Candy Bowel Laxative.

If you have Constipation,

If you have a coated tongue,

If you are dizzy, bilious, sallow,

If you have Headache, Sour Stomach, etc., risk 5 cents on Laxets. See for yourself. J. D. Tully.

**Candidates for R. S. Degree.**

It will interest the local Orange Brotherhood to know that a meeting of the Royal Scarlet Chapter of L.O.L. No 80, will be held tonight in the lodge room on Simcoe street. Four brethren will be elevated to the Royal Scarlet degree, and the occasion will be marked by the usual ceremonies.

**Mr. Taylor Does Good Work.**

Mr. W. Taylor, caretaker of the local custom house has just finished his work about the grounds inside the yard of this public building. Mr. Taylor certainly deserves great credit for the tasty and well finished appearance of the custom house grounds. "Daddy," as his personal friends call him is a good gardener, and keeps the place in good shape.

**Mr. R. H. Leary Horse-Hunting.**

Mr. R. H. Leary was still on the hunt, and no "still hunt" at that, for the horses which as noted in yesterday's issue of The Times, escaped from the exhibition grounds on Monday night. During the afternoon he received a telephone message from Springville that the equines were seen in that vicinity, so he drove there to get them.

**Lightning's Work at Springville.**

Springville was visited by the electric devastation during Friday's storm. The barn of John D. Clark, near that village, was struck. Some shingle were torn off the roof and the ridge board splintered. The fluid glancing off killed two or three sheep in an outside pen. Just across the road a clothes line was struck and the rope burned.

**Large Crowd at Jackson Park.**

The moving pictures, band, fresh air, restful greenery of the surroundings and other incidentals charmed many hundred nickels from citizens' pockets last night. Jackson Park has certainly lost none of its last year's attractiveness as last night notwithstanding the cool weather, there was a tremendous crowd of these beautiful resort. Every night the crowd seems to grow greater.

**Local Contractor Kept Busy.**

Mr. John T. McCoy, the local contractor, yesterday completed the tinsmith work of the fine new residence being built by Mr John Corkery, deputy postmaster. One interesting feature of this handsome residence is a horse-shoe shaped window, the original idea of which was introduced here by Mr McCoy some three years ago. Mr. McCoy has seven more contracts on hand in the city.

HYOMEI CURES CATARRH

**Its Healing Balsams Kill All Catarrhal Germs.**

There is no more common disease than catarrh, and none that is more dangerous. It weakens and debilitates the whole system, if it is allowed to run, leads to serious and sometimes fatal complications.

No dangerous drugs are taken into the stomach when Hyomei is used. Breathed through the small pocket inhaler that comes with every Hyomei outfit, its healing balsams penetrate to the most remote cells of the throat, nose, and lungs, killing the germs of catarrh, healing the irritated mucous membrane, and making complete and lasting cures.

The complete Hyomei outfit, consisting of an inhaler that can be carried in the purse or vest pocket, a medicine dropper, and a bottle of Hyomei, costs only $1. The inhaler will last a lifetime, while extra bottles of Hyomei can be procured, whenever needed, for only 50 cents.

If you cannot obtain Hyomei of your dealer, it will be forwarded by mail, postage paid, on receipt of price. Write today for consultation blank that will entitle you to services of our medical department without charge. The R. T. Booth Company, Hyomei Building, Ithaca, N. Y.

**A Heavy Load to Carry.**

Along with dyspepsia comes nervousness and general ill-health. Why? Because a disordered stomach does not permit the food to be properly digested, and its products assimilated by the system. The blood is charged with poisons which come from this disordered digestion, and in turn the nerves are not fed on good, red blood, and we see symptoms of nervousness, sleeplessness and general breakdown. It is not head work, nor over physical exertion that does it, but poor stomach work. With poor, thin blood the body is not protected against the attack of germs of grip, bronchitis and consumption. Fortify the body at once with Dr. Pierce's Golden Medical Discovery—a rare combination of native medicinal roots without a particle of alcohol or dangerous habit-forming drugs.

A little book of extracts, from prominent medical authorities extolling every ingredient contained in Dr. Pierce's Golden Medical Discovery will be mailed free to any address on request by postal card or letter. Address Dr. R. V. Pierce, Buffalo, N. Y.

Many years of active practice convinced Dr. Pierce of the value of many native roots as medicinal agents and he went to great expense, both in time and in money, to perfect his own peculiar processes for rendering them both efficient and safe for tonic, alterative and rebuilding agents.

The enormous popularity of "Golden Medical Discovery" is due both to its scientific compounding and to the actual medicinal value of its ingredients. The publication of the *names of the ingredients* on the wrapper of every bottle solid gives full assurance of its non-alcoholic character and removes all objection to the use of an unknown or secret remedy. It is not a patent medicine nor a secret one either. This fact puts it *in a class all by itself*, bearing as it does upon every bottle wrapper The Badge of Honesty, in the full list of its ingredients.

The "Golden Medical Discovery" cures weak stomach, indigestion, or dyspepsia, torpid liver and biliousness, ulceration of stomach and bowels and all catarrhal affections no matter what parts or organs may be affected with it. Dr. Pierce's Pleasant Pellets are the original little liver pills, first put up 40 years ago. They regulate and invigorate, stomach, liver and bowels. Much imitated but never equaled. Sugar-coated and easy to take as candy. One to three a dose.

## *Military Orders Are Issued*

The following are the orders issued for guidance of our local soldiery:

Headquarters, Peterborough.

June 12, 1906.

Orders by Lieut.-Col. J. W. Miller, Commanding 57th Regiment, Peterborough Rangers.

No. 1—Detail of duty for week ending June 12th, 1906.—Captain for the week, Captain McWilliams; next for duty, Captain McLean, Subaltern for the week, Lieut. Hodgson, next for duty, Lieut. Clarke.

No. 2—The regiment will parade with both bands in drill order at the armories at eight p.m., on Tuesday, June 19th, for ceremonial drill.

No. 3—At the conclusion of drill on Tuesday, June 19th, a muster parade will be held—which all officers and men will attend and answer to their names.

No. 4—The commanding officer has been pleased to make the following promotions.

No 5 Co.—To be lance corporals, Privates Young and Watson.

No. 6 Co.—To be corporals, provisionally, Privates Lightfoot and Ackerman.

By order,

D. WAEKER,

Capt.-Adj't.

If you Stomach is Weak,

If your Food distresses you,

If you are Weak and Nervous,

Use Dr. Shoop's Restorative one month and see what it does for you. Sold by J. D. Tully.

## *Farmers Today Go to Guelph*

The annual outing of the Farmers' Institutes of East and West Peterborough and East Durham will be held today to the Ontario Agricultural College, Guelph.

The excursionists will go and return by G.T.R. special train. The special leaves Campbellford shortly before six o'clock, and will leave Peterborough at seven o'clock sharp. The excursionists will depart from Guelph for home at seven o'clock in the evening.

BEST ADVERTISING MEDIUM IN EASTERN ONTARIO

VOL XXXIV, NO. 144 PETERBOROUGH, ONTARIO, FRIDAY, JUNE 15, 1906. PRICE TWO CENTS

## Notice to Be Given of St. Extensions

### Board of Works Met Last Night and Decided to Proceed with the Opening of George and Aylmer Sts. After Giving Due Notice to That Effect.

The Board of Works met in the town with Mayor Best in the city clerk's office last night. The matter of carrying over to next year were present: Chairman Ald. Hicks, Graham, Wilson, Adams, Elliott, Stevenson, Burnham and His Worship Mayor Best.

TENDER FOR DREDGING.

P. Conroy was the only one who tendered to take away from the dredge and depositing on city property between C.P.R. spur line and Hall, where front. His tender for the work and labor, furnishing teams, etc., was 13c per cubic yard.

On motion of Ald. Adams, the contract was awarded P. Conroy.

Mr. J. H. McClelland waited upon the Board with a view to having a reason why the sidewalk on Gilmour street, granted last year, has not yet been built.

Ald. Hicks replied that several walks petitioned for, and granted in 1905, could not be built last year, but Gilmour street walk will be taken up in its turn as the men work upward from the lower end of the city where they commenced work on concrete walks.

STREET OPENING PUZZLE.

The Board once more took up the vexed question of how to proceed with opening up both George and Aylmer streets without causing any friction.

After further discussion it was decided that the city could keep within its appropriation for street opening purposes by adopting the course embodied in the following resolution.

Ald. Wilson moved, seconded by Ald. Adams,—That the city give notice of its intention to open George street 66 feet wide from Lake to Lansdowne street, and Aylmer from the new school south to Westcott street.

The city this year count upon an additional $2,500 in revenue from unlooked for sources.

The Board then adjourned.

## Fishermen Are Getting Ready

The local nimrods are hunting up their bait boxes, fixing the joints of that rod that shrunk from being placed near the box air register last winter and furnishing up their tackle store of American anecdotes preparatory to Saturday when most fishing, under legal procedure, opens. One Peterborough man yesterday spent one whole hour in a George street jewellery store explaining how a "bait" receptacle locked owing to the thread of the top cover being out of order. He complained that last summer, depending upon this flask he pulled 17 miles trusting to said pocket assistant bringing him out at the end of his journey. He remarked, "Say ——— I nearly went wild when I went to take a little refreshment on arrival at Buck-nigger Island, and found the whole stuff had been absorbed by my coat lining and had destroyed the cigars in my vest pocket. His bait can was fixed.

**Big Mining Tracts Being Taken Up.**

Quebec, June 15.—Large tracts of mining lands are now being almost entirely taken up at the Parliament House here in the Lake Chibougamau district, several square miles having been secured today by Lord Templeton, of England.

## Improvements in Allen House

Yesterday a Times representative by request made a tour of recent improvements made in the Allen House. The front of this hotel is being freshly decorated by a coat of paint. The new proprietor, Mr. Waters and his assistant, Mr. Allen are overhauling the whole house. On the ground floor, as at present, two handsome and spacious corridors have been placed in great advantage. The bar, back of central floor and upstairs five rooms adjoining new and beautifully lighted wash proper. On the first floor a handsome new linoleum has made the place look more homelike and bright some. Under the new management there is no doubt but what this hotel will get a large share of local patronage.

## Many Ills Are Due to Eye

### Headaches and Curvature of Spine are Among Those Caused By Strains.

Boston, June 14.—A large share of the ills that flesh is heir to is due to eye-strain, according to Dr. George Gould of Philadelphia, who spoke before the section on the practice of medicine of the American Medical Association, which has ended its convention here.

To eye-strain he attributed nine-tenths of all the headaches and many gastric disturbances, and he estimated that 15,000,000 persons in the United States, or nearly one-fifth of the population are suffering from lateral curvature of the spine, due to straining of the eyes.

"Some of the medical profession are awake to the true situation," said Dr. Gould "but the leaders of the medical profession and the writers of text-books on headache, and on ophthalmology are asleep or indifferent."

The obvious remedy in Dr. Gould's estimation is properly fitted glasses.

SYMPOSIUM ON HEADACHES.

It was a symposium on headaches that the physicians listened to, eight experts telling of eight different causes of chronic suffering. A paper of general interest was that of Dr. George L. Walton, of Boston, who talked about "constitutional headache." He described these as the most common of chronic headaches and said that in most cases the victims are high strung, intense and unable to relax, either physically or mentally, with strong likes and dislikes, perhaps given to faulty mental habits, which may be analyzed into obsessive tendencies, a condition for which I have ventured to coin the word obsessia.

"The cause of the pain in such cases is confined to probably two-fold. In the first place, the patient's inability to relax involves the failure from cerebral processes, and, in the second place, the patient's susceptibility to pain from such fatigue is greater than the normal.

"The headache is not as a rule distinctly localized, though it may simulate the reflex headache from eye strain, nasal or other disorder. In point of fact such sources of reflex headache are apt to be present in these cases, simply furnishing further signs of deviation from the normal. Treatment, however, of the various sources of reflex irritation, as eye strain, proved ineffective in these cases.

THERE HARD TO CURE.

"The treatment of constitutional headache is obviously not hopeful, for its eradication would involve an entire change in the patient's inherent make-up, including his susceptibility to fatigue. The correction of obvious ocular, nasal or other defect is important in order to give the reflex element the benefit of the doubt. Special drugs are of no value, though the patient's general system should be built up as far as possible by drugs, exercise, diet and the regulation of the habits. Obsessive tendencies can be influenced only by mental training."

Dr. Cornelius G. Coakley, of New York, told of headaches due to nasal swellings, which he said are becoming more common. Surgery is the cure Dr. Phillip Hammond, of Boston, discussed headaches due to ear diseases or malformation, and he ascribed much trouble to artificial obstructions in the ear tubes.

Dr. Alfred C. Crofton, of Chicago, closed the symposium with a paper on headaches due to renal origin, to which cause he ascribed much trouble. Proper medical attention to this cause when it exists, he said, almost always effects a cure.

The association chose Atlantic City as the place for next year's convention.

## Fred C. Lutes' Gallant Deed

### Rochester Fireman Well Known Here Saves Lives.

Referring to a gentleman who has many friends in this city, and who has frequently been a guest of ex-Ald R H. Leary, as well as having been an annual visitor to Stony Lake, the Rochester Union & Advertiser, says;

"That several people were not killed or seriously injured by a runaway horse on Main street near the Four Corners this morning, was due to the prompt action and gallant stop made by Frederick C. Lutes, a fireman of Engine 2, who threw himself in front of a running horse and brought it to a stop just before the animal was about to dash into a crowd of women and children.

"The horse which caused all the trouble belongs to Ely Buell of University avenue. The animal took fright at something and started down the street on a run. Policeman Klein was standing at the corner of Clinton avenue and Main street, when he saw the horse rapidly approaching the corner. Klein rushed to the middle of the street, and made a grab for the bridle, but missed it. Before he could recover himself the wagon swerved, around and hit him and the unfortunate man was thrown high in the air and landed on his back on shoulders.

Meanwhile the horse, having clubbed the policeman, continued his mad flight down Main street, narrowly escaping running into an automobile and finally coming in collision with a wagon of the Atlantic and Pacific Tea Company which was standing in front of the store of the company. The force of the collision tore the horse loose from the wagon. The horse dashed down Main street, across St. Paul, narrowly missing two old ladies.

"Several persons who saw the horse coming, made feeble efforts at stopping it between St. Paul and Front streets, but the horse rapidly approached the Four Corners. There were a number of people standing on the south side of the street, waiting to take cars, and when a shout of warning was raised, women and children scattered in all directions, many running directly into the path which the horse was taking.

"It looked for a minute as if there was going to be a bad accident and just as people were holding their breaths and turning their faces away, Lutes, who had just stepped from a street car, dashed into the street directly in front of the horse which by this time was coming at frightful speed. Lutes made a grab for the bridle and just missing it his hands slipped along the horse's back and when he managed to grab the lines which were trailing along behind The fireman braced himself and threw all his weight into one big pull which nearly threw the horse and brought it to a standstill when the animal was grabbed by people who had witnessed the heroic act.

"Lutes turned the horse over to a policeman and then modestly walked away and it was only after long inquiry that his name was obtained. Those who witnessed the act were loud in their praise and all agreed that it was one of the most gallant stops that have been seen on the streets of Rochester for some time. The prompt action of the fireman unquestionably saved a number from serious injury, if not death.

## Labor Council After T. R. Preston

On Wednesday night the monthly meeting of the Trades and Labor Council was held, with President C. P. Murty in the chair.

Communications were received from the Dominion Congress and two of three trade and labor councils in reference to the investigation recently conducted at Ottawa in connection with the North Atlantic Trading Company.

After some discussion President Murty and Secretary Walter Tighe were appointed a committee to draft a resolution, a copy of which will be sent to Sir Wilfrid and also to Mr. R. R. Hall, M.P. The resolution will call upon the Government to dispense with the services of Mr. Preston and will also condemn the action of the Government in bringing undesirable immigrants to this country. The trade and labor council believing that quality is what is needed rather than quanity.

## WHOLE AMERICAN NATION IMPUGNED

### The Recent Revelations Have Shaken European Confidence.

### SEND CRIMINALS TO GOAL

### This Will Be the Only Action Which Will Restore to United States Markets of Europe.

London, June 15.—Spirited talk is heard on all sides as to the probable effect of the insurance, meat and graft scandals on Anglo-American relations. F. C. Vanduseer, honorary secretary of the American Society in London, said to a press correspondent: "Every American interest will be seriously damaged. We are made to feel humiliated wherever we go. The way the British commercial class is exploiting the shame brought upon us by our own people will breed bitterness in America."

R. Newton Crane, a well-known American lawyer, now in London, said: "Britain is extremely friendly to America, but the feeling against our business methods runs high. I cannot express my indignation at certain politicians in Washington, who are disposed to defeat any effective inspection of meat and food products. Honest American goods need fear no damaging hostility from Britain."

Col. Millard Hunsaker, the European manager of the United States Steel Corporation, said: "We have seen the worst of the insurance storm. The British people, recognizing that the companies are solvent, are quieting down, but the meat scandals are disastrous. The recovery of this trade under the most favorable circumstances is likely to be slow."

ARMOUR'S MANAGER SPEAKS.

J. R. Wilson, Armour & Company's European manager, said: "Englishman are usually sportsmanlike, but in the present crisis no voice has been raised against the stories that we can offal rats and human beings, notwithstanding the fact that there are hundreds of Englishmen in London, some in positions of authority, who have been all over the Stockyards in Chicago and know that 95 per cent. of the alleged revelations are malevolent rubbish."

It is frequently said here that American memories are short and the American public most tolerant of abuses of any in the world; but the manufacturers of American food products will not find either of these characteristics among European consumers.

Effects of recent disclosures will last at least half a generation. Prejudice which has been created makes no discrimination.

ROTTEN BUSINESS METHODS.

The Old World has come to believe in general terms that American business methods are rotten. It is a sad thing to write of the reputation of a country, but it is the simple truth, and the truth better to be told without disguise.

It will take more than a paper reorganization of the great life insurance companies and a cleaning of the Augean stables at Chicago to restore European belief in American honesty and fair dealing. It will be a long time before public opinion on this side of the Atlantic will have any confidence in American corporate reform.

One thing, and one thing only, will have any real effect in Europe. When America begins to send its greatest criminals to gaol, Europe will begin to believe that there is a real standard of morality in the country.

Administration of justice in the United States is the subject of open ridicule and contempt throughout Europe.

There is nothing an Englishman resents more than an intimation that the American judicial system is similar to England's and the chief argument adduced against the pending bill to create court of criminal appeal is the danger that it will prove to be the opening wedge for American evils.

THE SPECTATOR'S COMMENTS.

The Spectator, at the end of a long article on the beef scandal, goes so far as it dares in friendly criticism, when it says:

Englishmen will be of the opinion that the recent disclosures ought to be followed by criminal prosecutions, and in the event of convictions, by severe punishment. It remains to be seen whether the American authorities will adopt an equally rigorous reading of their duties. The two worlds have been shocked and infuriated. Chicago packing houses appear to combine pretty well all the characteristic evils which degrade our civilization. They are recklessly selfish.

It is the whole American people who stand today at the bar of public opinion before their sister nations.

Never before has American commercial honor been so attacked abroad.

Never before have the American people been so criticized for neglecting their primary public duties.

England and France and Germany and the other nations are waiting to see how America will vindicate herself before the eyes of the world.

## Mr. Fagen Finds Two Dead Wolves

Yesterday a Times' representative interviewed Mr. Christie Fagan, one of Peterborough's veteran river drivers, foremen. Mr. Fagan has just returned from an extended engagement with the Spanish River Lumber Co., out near the North Shore. Mr. Fagan is a mine from which can be extracted a multitudious series of interesting anecdotes of river driving life.

This well known expert in the science of bringing logs from the primeval forest to the unromantic buzz saws that rend these monarchs of the glen into everyday 12x10 planks when questioned about the deer in that locality, said, "Deer! why they are thicker than cattle on my farm. You can't go anywhere through the woods without either seeing deer or their traces."

A few days ago as he was going from one camp to another he came across two dead wolves that had either fought one another or had been poisoned to death. He quickly gathered in their scalps and afterwards reaped the Government reward of $30.

Mr. Fagen when asked about the black flies and musquitoes, said that they were so bad the men simply had to quit the place. He said for many nights he could not sleep in bed for the musquitoes, but lay on the floor with only a blanket over him and a "smudge" on each side of him.

### Mr. and Mrs. I. W. Mann in Town.

Mr. and Mrs. W. Mann, of Medora Station Man., who own 900 acres of good land there have arrived in the city and are visiting Mrs. Mann's parents, Mr. and Mrs. Milson Blewett, Chemong road, and Mr. Mann's parents, Mr. and Mrs. Jas. H. Mann, of Bridgenorth. They are accompanied by their two children. They have resided in the West eight years, not having been home in that length of time.

## An Interesting Society Event

### Miss Mary I. Rush Becomes the Bride of Mr. S. Dickson Hall.

Yesterday morning those in the vicinity of All Saints' church, could not but see that an event of some moment was being transacted, as both sides of the street, were crowded by throngs of women awaiting the arrival of the fair bride to be. Although so much interest was openly in evidence, the actual wedding within the portals of this sacred building was witnessed by comparatively few, only the invited guests, who filled perhaps half the church being admitted.

When the carriage containing Mr. Thos. Rush and his two charming daughters, the bride to be and Miss Lilian H Rush, drove to the carpet stretched from the church to the pavement's edge, everyone in the surrounding crowd was on tip-toe straining to get a glimpse of the lovely bride as she walked into the church.

When Miss Mary Isabel Rush, the second daughter of Mr. and Mrs. Thos. O. Rush, 249 Aylmer street, with her father came into All Saints' church it was generally admitted that never a prettier bride did Peterborough ever see.

The ceremony was performed by the rector, Rev. Wm. Major.

All Saints' church was specially decorated for the occasion with carnation and roses. Miss Dutton as the wedding party entered the church, played Mendelssohn's wedding march. The bride was preceded up the main aisle by the ushers, Messrs. Harry Rush and Dickson Davidson, then came the bridesmaid, Miss Lillian Hamilton Rush, sister of the bride, followed by the fair bride leaning on the arm of her father. At the altar they were met by the bridegroom and Mr. R. Hamilton Hall, brother of the bridegroom, who supported him.

The bride, was married in her travelling costume, a most becoming semble of cream French serge, adorned with Persian and cream lace trimming. She carried a bouquet of cream roses and lilies-of-the-valley.

The bridesmaid, Miss Lillian H Rush, was dressed in pink flowered organdie over white silk taffeta.

After the blessing was bestowed by the officiating clergyman upon the bride and bridegroom, the choir sang "The Deus."

After the ceremony and while the young people were signing the register, Miss Daisy Sawers, cousin of the bride, sang with fine effect, "Oh Fair, Oh Sweet, Oh Holy."

The wedding party, after leaving the church, drove to the G.T.R. station where they left by the 11.45 train. Mr. and Mrs. Hall will spend their honeymoon on a visit abroad, sailing from New York on the Oceanic of the White Star line on the 20th inst, on a ten weeks' trip to the Old Country and the continent. On their return they will take up their residence at 25 Dennistoun avenue.

Ottawa, June 15.—Two Government cruisers will be employed this season in the patrol of the waters of the far North. One, under Major Moodie will be assigned to Hudson Bay, the other, under Captain Bernier, will be sent further north to explore Baffin Bay, Lancaster Sound and Smith Channel, probably as far as Cape Sabine, which was visited by Mr. Lowe three years ago. Major Moodie will transfer the headquarters of the Mounted Police from Fullerton to Fort Churchill. A new post also will be established on Baker Lake, at the head of Chesterfield Inlet, on the west coast.

## Stabbing Affray Yesterday Evening

### Mikelo Lovengia Charged with Using a Knife on "Tony" Sylvestrie.

That our local Italian Colony has not yet learned that Britons and Canadians settle their disputes either in court or by recourse to fisticuffs was demonstrated last night.

It seems that two of the sons of sunny Italy had been working for Mr. Frank Marino, the local labor contractor on a sewer contract.

These men named respectively Tony Silvestric and Mikel Lovengia, were boarding at 351 Bethune street. Lovengia had been discharged, and wanted his money. Yesterday evening he spoke to Sylvestie about the matter and the latter advised him to see Mr. Marino about the matter. They went to a local hotel where Marino sometimes does business. Here they either did or did not find Marino, as the prisoner as stated later on, does not speak English. The Times could not get full particulars on this point.

In any case they returned together to 351 Bethune street, and here an altercation arose, it is said between them. Only one witness, an Italian being named Vincenso Setucci saw the affair. Loud words were heard in their dispute and Sylvestie ran out bleeding profusely from a serious wound on his forehead above the left eye.

The police were at once telephoned to, and P. C. Adams with his customary celerity hustled to the spot, and placed Lovengia under arrest. On searching Lovengia, Constable Adams found no weapons of any kind. The injured man, Sylvestie was taken to Dr McNulty's office and his wound was dressed. The injured man did not seem, at a late hour last night to be in any serious way.

A Times representative late last night tried to interview the prisoner Lovengia, but without much success. The Times was on short on Italian as the prisoner was on English. By a series of sign language borrowed from our aboriginal forerunners, the Indians, The Times man learned from the prisoner that Sylvestie was very drunk and fell; the inference being that in his fall he received the cut in his head.

At this morning's police court, by means of an interpreter, perhaps a semblance to the truth will be obtained.

# You Should See Them Wiggle

When the Doctor says "if's coffee, stop it if you want to get well."

Oh dear, what a mean doctor, but then plain facts are best to know, so we may cut out the things that hurt.

About 4 years ago a Cin. man went to Germany for his health and to consult one of the famous physicians in Berlin.

The Dr. found him a nervous wreck suffering from loss of sleep and constipation and about 50 lbs off his usual weight.

But let him tell his own experience:

"The Dr. surprised me very much by asking at once if I was a coffee drinker and on my telling him I used it two or three times a day he said 'It is poison to some persons.'

"After carefully examining me he told me there was nothing the matter with me whatever but what could be entirely cured in 30 days by letting coffee and other stimulants alone and dieting.

"So I put back home and wife got some Postum Food Coffee for me.

"The first trial didn't please me but we found it hadn't been boiled enough. The next meal it was fine.

"I seemed to begin to get well at once and kept it up until I gained back my 50 lbs. and all the old sick times from coffee left for good. Now I am in prime health, fine appetite, and sleep like a boy.

There's a Reason for

POSTUM

## Pope's Sister Will Not Wed

### Proposal For the Hand of the Pontiff's Sister.

New York, June 15.—Archbishop Farley will within a few days receive a message from Rome asking him to perform a peculiar personal service for his sovereign, Pope Pius X. He will be requested to locate a wealthy gentleman of this city named Webber and present to him the pontiff's compliments and inform him that it is impossible for his proposal for the hand of the pope's sister to be entertained.

The letter is the outcome of a letter postmarked New York, which arrived recently at the Vatican. The writer described himself as a Catholic and a very wealthy bachelor, and added that nothing would make him happier than to marry the pope's youngest sister. Mindful of the etiquette of sovereigns, the writer addressed his formal demand for the lady's hand to the pontiff, to await his consent before addressing his proposal to the lady herself.

Maria Sarto, the pope's younger sister, is 60 years of age, and a simple woman of the peasant class.

Pius X. and the cardinal secretary of state were at first inclined to consider the proposal as a joke, but a closer examination of the love missive showed that it contained so many particulars and gave such good references the writer that it was not possible to doubt the latter's sincerity and the religious source of his motives.

The matter was discussed at length by the pope and the cardinal, and it was agreed that the sending of any direct reply would be cut of the question. Besides, the pope felt that his sister's age and the fact that the writer of the letter had never even seen her would make serious consideration of the proposed marriage ridiculous in the eyes of the world.

It was finally agreed to deal gently with the infatuated American lover and to communicate with him indirectly through the New York archbishop. Accordingly, an official document was drafted, addressed to Mgr. Farley, Archbishop of New York, requesting him to look up the writer of the letter and inform him that under the circumstances the pope had come to the conclusion that the proposed marriage was all impossibility. At the same time the New York prelate was instructed to convey to the love-stricken writer that the pope was rather displeased at the way the American love-stricken millionaire had proceeded in the matter, and that it would have been more in accord with modern social customs if he had presented himself at the Vatican with proper introductions and submitted his proposal personally to the pope.

Maria Sarto, according to the cable dispatches, was greatly surprised when told that she had an American suitor. She told the pope she would never marry, not even an American millionaire.

## Italian Laborer Seriously Injured

Last night about nine o'clock, Dr. Gray was called to the C.P.R. station to attend a section hand who had been seriously hurt. On his arrival the doctor seeing the serious condition of the man, had him at once conveyed to St. Joseph's hospital.

It seems that the man, an Italian named Tussetti, who was employed with the gang of men working on the C.P.R. road-bed about four miles east of here. Last night as the men were coming home on hand cars, three or four of these being employed to take the men home, the men on the first hand car, seeing an engine approaching them from an opposite direction, got off their car to remove it from the road to let the engine pass. It seems that the second car following them, not noticing the engine ran into the men on the first hand car, hitting Tussetti in the back, and knocking him down, the hand car passing over him before it could be stopped.

His condition at a late hour last night was very critical.

For POPULAR PRICED— CLOTHING

COME TO

THE MARKET STORE, 328 George St.

Men's Suits, ready-to-wear, $5.00 to $15.00

We make BUTTONS to order. The Market Store, Peterboro

## REBUILD YOUR TIRED, ACHING BODY

Winter has left you in a state of fatigue and weariness.

The vitality of your blood is gone.

Your nerves are wretchedly weak and you find it hard to sleep.

The temptation to "brace up" with an alcoholic mixture is great,—but it's uselessness is plain to everyone.

Better follow Nature's plan; it's always a sure one.

First create new appetite.

Improve your digestion.

Perfect the process of assimilation.

This will ensure a supply of rich, nourishing blood.

Healthy blood soon means a healthy body, and a system fed by pure, rich blood is bound to gain in energy and strength.

To get well and stay well, use the food tonic "Ferrozone" which is composed of concentrated vegetable extracts that supply nutrition that every sickly person needs.

No matter how long you've been in poor health, Ferrozone will win you back like it did Mrs. Sadie E. Mislop, of Whitby, Ont., who writes: "Ferrozone not only brings health to the sick, but has power to cure quickly. After being confined to bed with sickness, I seemed unable to make any headway on the road to complete health. My vitality was low and I was in great need of strength. My nerve force was gone, and from headaches and poor sleep I was in bad straits. Ferrozone was just what I needed. It increased my strength, gave me a new feeling entirely. I used about eight boxes and was made perfectly well. My doctor thinks Ferrozone a wonderful cure."

Your druggist sells it in 50c. boxes or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

# Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $4 per year, strictly in advance.

### A POLITICAL PRIEST

There has been a great deal of talk recently about rich tax dodgers, but nothing to show that tax dodging is peculiar to the rich alone, the truth being that the visits of the assessors represents artful dodgers by the thousand. It stands as proof of perjury upon perjury. If the millionaire is guilty so is the man of half a million, and the man in moderate circumstances, and the man who is just beginning to save. There is the same story all down the line of sneaking evasion on the part of people who claim to be honest and respectable and whose claim is generally allowed.

Cases of perfect veracity are so rare that they must give the assessors a shock. On the other hand, these same public servants are thoroughly prepared for a hardened conscience in every one who approaches. They expect returns that are the result of strange mental and moral gymnastics. If there are to be accusations let the entire public stand accused. The question is wholly apart from the question of a graduation of taxes such as is proposed in our new tax law. It is a simple question of honesty applied to every class, and it results in a showing of general depravity.

Furthermore, there is not the slightest hope of reform with this kind of self-imposed tax. It works now as it always has worked and always will, making of the people a grand congregation of perjurers.

Amid all the iniquity it is difficult to distinguish the bright light of truth anywhere, but there is perhaps a glimmer from the soulless corporations, [illegible] to be "up against it" if they falsify too boldly because of the necessary publicity in their affairs. While they make tentative efforts at veracity, the natural person remains a natural liar.

### EVERYBODY DODGES

In the course of a recent address to the Roman Catholic Bishop, of St. Boniface, the Roman Catholics of Wolseley, Sask., thanked his Grace "for his timely instruction as to how they should vote at the Provincial elections held last fall," and in his reply the Archbishop thanked his people for their unanimous response to his instructions, and assured them that it was now, and at all times, their duty to vote under the instructions of their spiritual advisers.

As the Weekly Sun puts it, where the spirit represented in this address and reply prevail popular government is a mockery. The theory of popular government is that each elector shall exercise his own individual judgment. Where his political conscience is committed to the keeping of his spiritual adviser we have, to that extent, not a democracy, but a theocracy. Fortunately his Grace of St. Boniface stands very much alone, in Western Canada at least. If all Roman Catholic bishops adopted this attitude, and had an equally subservient following, the natural effect would be to solidify Protestants in opposition, and the ultimate consequences would be as bad for the Roman Catholic church as for the country at large.

## *Say New Law Is Much too Severe*

Ottawa June 13.—Representatives of the Allan, Dominion, Reford, and Donaldson SS. Companies, the Grand Trunk and Canadian Pacific Railways, interviewed the Minister of the Interior yesterday regarding the bill he has introduced to give the Government fuller authority to order the deportation of insane, diseased, pauper, criminal, and other undesirable immigrants. At present the law compels the steamship companies to carry back to the point of embarkation any immigrants who, after medical examination, are refused admission by the immigration authorities. The bill now before the house however, would compel the companies to carry immigrants back if it is shown that they belong to the criminal class, or become incapacitated through sickness or accident to earn a living, or become an inmate of a jail, hospital, or other charitable institution. This would apply against railways as well as steamship companies, and both submit that the law proposed by the Minister is unfair to them. They profess a sincere desire to co-operate with the Government in seeing that none but a desirable class of settlers are brought into the country.

## *Local Pastor Kindly Greeted*

The Hamilton Times says: — Rev MacNab street Presbyterian church Sunday morning, Rev. Dr. Torrance, of Peterborough, preached a capital sermon on Contentment. He took his text from Philippians, iv. 13, 14, 15. Dr Torrance said it was necessary to learn contentment through suffering and trial to properly appreciate it; also that one enjoys it more when learnt that way than is obtained by prosperity. He spoke of how Paul exhorted the Philippians to be content whether abased or abounding, and how he thanked them for their liberality in his time of need. Paul, he said, was a man who thought much of little things and did all in his power to repay a kindness. Dr. Torrance's words carried much force with them and were food for deep thought. It was a most edifying and well delivered sermon.

## *Carnegie Medals Asked for Rescuers*

Niagara Falls, N.Y., June 13. — At the meeting of the common council last night a resolution offered by Ald. Baron was carried, requesting the mayor to present to the trustees of the Carnegie hero fund the names of Harry Bates, desk sergeant at police headquarters, and Fireman Thomas Conroy for the heroic rescue of Amos Schweitzer last week.

After the resolution was passed, Ald. Maloney arose and stated that while he commended the action of Conroy and Bates, he believed they assumed a worthless risk. "Instead of going out there and taking chances on their lives, I believe it would have been better to get a pike pole and shove Schweitzer over," said the alderman. An outburst of laughter followed.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### ZULUS DEFEATED.

Durban, Natal, June 13.—Col. MacKenzie's column yesterday attacked the rebel natives who had sought shelter in the bush. The latter climbed trees, whence they hurled assegais on the troops, but bullets dropped them out of the branches. Over forty were thus killed, and altogether one hundred and sixty natives were slain. Darkness ended the operations of the troops, but the rout of the rebels is regarded as practically complete.

The Celebrated English Cocoa.

**EPPS'S**

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**COCOA**

The Most Nutritious and Economical.

**We Tell** We have nothing to conceal. All No secrets to hide! We publish the formulas of all our medicines. You will find them in Ayer's Almanac for 1906. If you do not have a copy we will gladly send you one. Then show the formulas to your doctor. If he does not approve, then do not buy; if he approves, then buy, and keep these standard family medicines on hand.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart and Wilson, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

"I have delivered it. I must offer apologies for being an intruder at such a moment."

"Tut!" said the colonel. "Rashleigh, set that tray here. Another glass for the captain. Captain, we drink unending happiness to a fair woman and a gallant cavalier."

Jarrat raised the slim glass with its topaz liquid, and his smile lingered darkly on Anne's face, still auger white. The smile had a quality that made her shiver.

"A fair woman," he repeated, "and—a noble gentleman! What more pleasant toast? Now must I leave you and back to Williamsburg. Mistress, I kiss your hand. Marquis, my most blithe felicitations. Colonel, I beg you will not disturb yourself. I will get my horse myself. Gentlemen, I bid you good day."

## CHAPTER XI.

THE tension in Virginia was grown thin. Again and again the hurly Earl of Dunmore prorogued the assembly on the pretext of popular excitement. The burgesses submitted with a bow, and the fiddles played in their town houses. Dunmore thought himself a diplomat and went on wining his Tory favorites at the palace. But under the music was an ominous muttering.

News came of the king's speech on the opening of parliament. The colonies' protests were "unwarranted attempts to obstruct the commerce of this kingdom by unlawful combinations" and showed "a most daring spirit of resistance and disobedience to the law." This pronouncement was received in Williamsburg with an intense astonishment.

And what, meantime, had Henry been doing?

Restless, eager, he had ridden hither and thither like a sallow shadow—at courthouses calling the minutemen, overseeing the election of the committees recommended by the congress, at Alberti's poring over lists with Jefferson, uniting north and south in a network of nerves, laboring, tireless and convincing.

It is a thing to note, since rebellion commonly springs from the people rather than from the quality, that it was contrary in Virginia. There the aristocracy was not Tory. There were few enough, like my Lord Fairfax, who, born noble, held nobly to their loyalty. Those who held with the king, besides the toad eaters, were for the most part the lower classes, officeholders, tradesmen who looked for sales, lawyers just over from London. The stanchest rebels were the great landed planters. Sedition was in the club room and the parlor. One must to the tavern bar for toasts to the king.

And so came about this strange thing: That Williamsburg, the miniature copy of the court of St. James, aping the manners of the royal palace, its old church graveyard and college chapel standing for Westminster abbey and St. Paul's—that this spot should prove "the heart of the rebellion." If this fact alone remained it might well make the world wonder at the enduring blindness of the king's ministers and whether God had not indeed covered their eyes because he would have it so.

It was little George cared for the actions of the first congress, halting, ineffectual, or for the petitions of British merchants. He had set his jaw. In vain the Earl of Chatham moved in the house of lords to withdraw the troops from Boston. Instead the colonies received a bill offering pardon to repentant rebels, and the patriots of Virginia heard with shocked surprise that this excepted Patrick Henry!

On the day this news was printed in the Williamsburg Gazette Henry and Jefferson met at Alberti's and set out on horseback for Richmond. There, in St. John's church, the new Virginia convention, mindful of the bloody threats of the sinister governor, had elected to meet, and thither had gone a half of Williamsburg, leaving Dunmore with his troops at his palace to bite his nails in impotent anger.

The 23d of March dashed over Richmond's unwonted bustle in a quivering wizard haze of intense blue, where cloud puffs swam like lazily pluming swans. Anne had arrived the night before at Goochland and drove in that morning in the Payne chariot. Spring was up, the earth quick with it. All along the way wild crab apple boughs droned with clinging bees, and by the snake fence rows of peach trees had pitched their tents of bloom.

She met Henry in front of the Indian Queen inn and walked with him up toward the churchyard, now filling with a vast throng.

"Tell me," she questioned eagerly, "Will it come today?"

He looked down at her with that rare smile which seemed to be the higher part of him, gilding and transfiguring his other self. "What faith you have in me!" he said.

"I know," she answered. "I have seen it in your face. No one in Virginia can do it save you—none of them. It must be the voice before the arm."

"The spark before the explosion," he muttered, "and the train is nearly laid." His hands moved restlessly.

"I have longed—prayed—for some new overt act of Dunmore's that should be spark to powder. But he lies low. And it must come from us. You were right when you said that last fall at Winchester. Boston is trodden on, but she lies quiet. The colonies look to us. It is the voice of the south, of Virginia, that is wanting."

He stopped. Jefferson was hasting toward them. He bowed to Anne.

"Have you heard the buzz from London?" he asked Henry hurriedly. "'Tis all among the delegates. 'Tis declared that our petitions to the king are graciously received, that all the acts will be repealed save the admiralty and declaratory and that North and Dartmouth will be replaced."

"Aye," blurst Henry fiercely. "Another Tory tale! And they will waver again. Tom, Tom, it must be now or never!"

He stopped abruptly and strode across the churchyard over the matted ivy on the shrunken mounds and, threading his way between the old slate tombstones, upright like black lichened coffin lids, entered the edifice.

* * * * * * *

From her seat in the west gallery, whither Jefferson had taken her, Anne surveyed the scene below.

The first proceedings interested her little—the reading of Jamaica's late memorial to the king—and her gaze wandered. Through the open windows she could hear the hum of the great crowd about the building and catch a glimmer of the foaming James. The space below her was packed and full of a strange intentness.

Here and there she could see faces which she knew. The ladies of Richmond were scattered through both galleries. Freneau and young St. George Tucker were leaning over the rail opposite. Jefferson and Colonel Benjamin Harrison of Berkeley sat together just below Peyton Randolph, the president.

(To be continued)

### Guard Against Bad Meat Supply.

Winnipeg, June 14.—The council will take prompt steps to guard against all impure meat supply. It is suggested that a bylaw be enacted providing that all meat sold in the city shall bear the certificate of an inspector, and that regular hours be fixed for slaughtering to enable the inspector to be present.

**One Hundred Dollars in Two Years Brings One Hundred Thousand Dollars.**

### SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

### SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 150x1500 feet. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expendnd or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior. The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

# Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, coal, iron, and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appliances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

The company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production in full, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

**100 PER CENT. ADVANCE JUNE 1**

**Present Price of Stock FIVE Cents per Share**

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

**On the Ground Ahead of the Boom**

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

## Improve Your Complexion

### Give Up Cosmetics and Seek the Cause of Your Bad Color.

When it's so easy to bring back the bloom of youth, to remove the blemishes and fill the hollows, isn't it foolish to plaster on [illegible]

Sallowed skin and fallen in cheeks are produced by disorders of the alimentary canal.

Remove the cause—correct the condition that keeps you from looking as you ought. Use Dr. Hamilton's Pills and very soon you'll have a complexion to be proud of.

Just imagine how much happier you will feel when those pimples and murky look have gone.

Dainty looks came to Miss Vroman, a well-known resident of Belfast, from using Dr. Hamilton's Pills. Read what she says:

"My friends all think that I have a very delightful complexion. This I owe entirely to Dr. Hamilton's Pills. I used to look so yellow I thought it might be jaundice. There was no color in my cheeks at all. Today my skin is clear and never looks that murky, dull appearance it had before. Dr. Hamilton's Pills have also given me a good appetite and improved my general health also."

Not only the complexion, but every organ of the body is strengthened cleaned and made healthy by Dr. Hamilton's Pills. Buoyancy, vim and a feeling of vigor invariably follow their use. Sold in yellow boxes by all dealers: 25c. per box; five boxes for $1.00, or by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## LOCAL INCIDENTS

### By The Times Man on the Street

—Board of Works met last night.

—The 25th annual meeting of the Y.M.C.A. will be held in the building this evening at eight o'clock.

—The Young People of All Saints' church held a moonlight excursion down the river yesterday evening on the steamer Water Lily.

—The Farmers' Institute excursion to Guelph yesterday morning was largely patronized. Over three hundred entrained at the local station.

—All members of No. 5 Company of the 57th regiment who require new uniforms or other necessaries, are requested to apply at the armories on Monday next. By order, Col. Sgt. Sturgeon.

—The Ladies' Aid of St. Andrew's church are arranging to run a moonlight excursion to Chemong Park on the 21st inst. The date and other particulars will be announced later.

—It is expected that the ferry ground will be in full operation at Jackson Park on Saturday. So far four cottages and a dozen tents are erected and only a few details remain to be completed.

On Saturday evening on, Water or George streets, between McDonell and Charlotte street, a gold crescent brooch set with pearls. Finder will be well rewarded by leaving it at Times Bookstore.

Contractor Bugue has been working on his sewer all week. The big rain storm last week caused a cave-in on his sewer and he has been two or three days getting the dirt shovelled out again.

—Reys Stratton and Phelps, who arranged the charming excursion to Thousand Island Park last season, have decided to conduct another on Saturday, July 28th, returning on Monday 30th.—Lindsay Post.

—The annual excursion of the young men of St. Paul's Guild was held up the lakes yesterday. Over 200 left the G.T.R. station at 8.30 o'clock in the morning, and at Lakefield, the steamer Stony Lake was taken.

—Mr. R. Sheehy yesterday completed his contract on the Union and Edinburg streets sewer. This job including 1008 feet 24 connections with, was only begun June 1st. This is perhaps a record in local sewer building. The work was done under Mr. Sam. Belcher's supervision.

**$9.00 New York and Return $9.00.**

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 9.55 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

**Death of Mr. John Deyell.**

Mr. Geo. Graham yesterday received a telegram stating that his old friend, John Deyell, of Rochester, N. Y., died suddenly during the morning. The deceased was an old resident of this city and has relatives in Otonabee. He was about 52 years of age and had a large circle of friends.

**Graphaphone at Excursion.**

Mr. Chas. Munden yesterday accompanied St. Paul's Y.M. Guild excursion to Stony Lake, and took with him his largest graphaphone. This furnished great amusement to all present. His selections were very varied, from rag-time pieces to funeral dirges and from Rule Britannia to Wearing of the Green.

**Dr. Claris of Buffalo Here.**

Dr. Claris of Buffalo, who is well-known to many of our local citizens, for his annual visits to Kawartha Lakes every summer for years, arrived in the city yesterday morning, and registered at the Snowden House. Our readers will remember that the doctor took a leading part in the great Elks demonstration in Buffalo recently. Dr. Claris rejoined Mrs. Claris at Stony Lake during the day.

**Contractor Robson Strikes a Spring.**

A contractor's work is not all fun and profit as sometimes erroniously thought. Contractor Robson has had his men laying pipe in the Hunter street sewer all week. He has been compelled to put on pumps to keep the water out so that the pipe men could work, as there seems to be a spring just opposite Mr. Scott's residence and the water is running into the trench continually. This causes much increased expense in doing the work.

## Four Simple Rules

**Follow them and Health, Happiness and Prosperity Will Be Yours.**

If one would be healthy, happy and prosperous, follow these four simple rules. (1) Keep the bowels open every day. (2) Chew your food slowly and thoroughly. (3) Avoid indigestible foods. (4) If there are any symptoms of stomach troubles, take Mi-o-na before each meal until cured.

No matter how many years you may have suffered with stomach troubles or how worried by sleeplessness, heaviness, loss of appetite, furred tongue, specks before the eyes, headaches, indigestion or other ills that are caused by a weak stomach, you can be cured by the faithful use of Mi-o-na.

Take one of the little tablets before each meal with the fixed determination to get the most benefit out of it.

Mi-o-na is not a fanciful experiment, it is not a patent medicine, it is not a cure all. It is a scientific remedy recommended but for one trouble—weakness of the digestive organs.

When Mi-o-na has been used for a few days, the digestive system will be so greatly improved that all the food eaten is converted into nutrition, so that nourishment and health are given to the whole system and there is a rapid increase in weight, strength and spirits.

If you cannot obtain Mi-o-na of your druggist, it will be sent by mail, post-paid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N. Y.

## SOCIAL AND PERSONAL

—Mr. L. A. Turner [illegible] yesterday.

—Mr. E. J. Boyle, of [illegible] is in the city.

—Mr. R. R. Hall, M.P., [illegible] of from business trip to New York City.

—Mr. E. J. W. Burton, [illegible] of customs, Port Hope, was in the city yesterday.

—Mr. G. Gilhespy of Peterborough, was in town today on business.—Lindsay Post.

—Miss Elizabeth Ingram of Rosemount was one of the visitors to the city yesterday.

—Mr. Firth Jeffers, Belleville, was in the city yesterday a guest at the Snowden House.

—Mr. and Mrs. F. C. Cubitt, of Peterborough, were visiting in town this week.—Bowmanville Statesman.

—Mr. Michael Thomas, of Toronto, district passenger agent of the Irrectional Railway, was in the city yesterday.

—Mrs. T. C. Seaghoe and family of Port Hope, have removed to Shedden, and taken up their residence on John street.

—Mr. Roland J. Hemmick, of Port Hope, late United States commercial agent for Peterborough, was in the city yesterday.

—Mr. John Rothwell, local district manager of the Metropolitan Life Co. left at noon yesterday per G.T.R. on a business trip to Port Hope, Cobourg and Belleville.

—Mr. Alex. Elliott, the Simcoe street wholesale liquor dealer, was in Port Hope yesterday on a business trip. We understand that "Alex" received a very large order from a leading Port Hope house yesterday.

## Grand Jury's Presentment

**Grand Jury Present an Address Complimentary to Existing Conditions.**

On Wednesday the grand jury made its usual presentment as follows:

To His Honor Judge Weller:

The grand jury beg to submit the following presentment:—

In the first place we must compliment the county on the absence of crime. Our duties have been exceedingly light, only two cases having been brought before us. We finished our work in connection with these. Then we visited the jail. Here we found everything in first-class condition. The building is clean and well ventilated and the prisoners are very well satisfied with their treatment. We are glad to note that the people detained here on account of no crime but through the force of circumstances, are being provided for by a splendid home in the house of refuge, which is being erected by the county council at a cost of $35,000.

We have visited all the public institutions and have found everything in perfect order.

We also wish to compliment your Honor on your apparent good health and hope you may be able to perform your duties for years yet to come.

JOHN C. ARMSTRONG,
Foreman.

## Work on the New Fire Hall

Yesterday a Times representative whilst on his usual rounds investigated the new fire hall or rather the great big hole that will eventually be covered by this public building. He found that the water works service has been put in and everything is ready for the stone work. The delay in getting stone has been caused by a shortage of flat cars, but the contractors stated that a couple of cars will arive this week, so that a start can be made.

## 2,000 People at Jackson Park

Last night at least 2,000 people patronized the splendid and most interesting entertainment at Jackson Park. It is not perhaps too fulsome praise to say that Mr. Dermouth, the manager of the Street Car Company who provides this pleasant pastime for our citizens, deserves commendation for the active personal interest he takes in these evening performances, as he, unlike many other men in similar positions, nightly visits the park and looks after the convenience of his patrons.

The 5th Regt. Band, some twenty strong, under personal control of Prof. Gliddon, rendered the following program.

March—Turenne.
Overture—King Dodo.
Irish airs by Godfrey.
Selections from Floradora, in which "Tell me pretty maiden," aroused enthusiastic applause.
Cake walk—Happy Home from the opera Hoity Toity.
Medley Sunny Tennessee, and one or two others by special request.

The moving pictures, which are given by a first-class outfit recently purchased by the Street Car Co. gave the following selections of views all of which were put on as well as it was possible, viz.:

Socialism (to Nihilism.
First night out.
A frightful night.
Trout fishing.
Funny Yacee.
Country man in Paris.
Improvised suit.
Compromising spots.

**A Record Barn Raising.**

On Wednesday a record barn raising was in evidence in the township of North Monaghan. It seems that Mr. Andrew Dobbin of that township, who lives about four miles out of town had sent out requests to 50 of the neighboring farmers to assemble at his place that day and help him put up a barn. This, it might be explained, is a very customary procedure among farmers.

In response to the fifty invitations sent out, there were 130 personal responses and in person at that. If any one wants a token of popularity let him send out 50 requests for assistance and get 130 people answer in person and thereby is the answer. The neighbors got busy and raised the barn up in no time.

A funny incident of the raising is that two leaders, Messrs. R. Bailey of Rose's Station, and Mark Hooten of Smith, chose sides as to which of them and their followers would get their respective sides of the barn up first. We will not say which of the leaders it was, but one of them seeing a couple of men carrying some rafters, to get them placed, thought the two were making a mistake as to the side they were working on. He at once interfered and stopped their work, thus losing his side the credit of doing the quickest work, although the two in question were actually helping his own side. The barn raising was a great success as from a starting point of only a nine-foot concrete wall to begin with, a splendid barn was erected during the day.

## Mr. McPherson Solves Problem

Mr. Jas. McPherson the local contractor, who as noted in a former issued of The Times obtained among other recent contracts, the job of Messrs. Kinnear & Company's fine new wholesale grocery warehouse on George street, at the C.P.R. station, yesterday was enabled to put in the first lot of joints. This is a record celerity in building operations, and demonstrates Mr. McPherson's push.

Another point in this contractor's work worth mention is that he has solved the problem of coloring cement bricks to any tint desired. He yesterday, in his contract for the Peterborough Cereal Company's fine new office building on Simcoe street, successfully stained the cement bricks used therein a special tint and shade adopted to requirements of the work. When Peterborough men get boss they get there.

**Changes in Bank of Nova Scotia.**

Mr. J. F. Stevens, teller and accountant of the local branch of the Bank of Nova Scotia, left yesterday evening for their Montreal branch. His position is taken by Mr. H. G. Huffman, who was ledger keeper. The latter's place is taken by Mr. R. L. Kidd.

## More Cars For Local Service

Yesterday Mr. Dermouth returned home from a [illegible] trip to Ottawa. Whilst there he ordered a new and up-to-date car from the Ottawa Car Company, which will be ready to ship early in July. Mr. Dermouth says that a couple more trailers will also be purchased and added to the present system. The business has increased so largely lately owing to the attractions at Jackson Park and the trip to the Otonabee boat house at the southern terminal of the car line, that the company cannot give the satisfactory service with their present equipment that they would like to.

## In Womanly Ailments and Weaknesses

**Dr. Shoop's Night Cure Soothes, Heals and Cures while the Patient Sleeps.**

The best remedy which physicians know for Female Weaknesses is composed of parts of a certain white lily. To this are added other remedies which draw out the poisons and heal the inflamed membranes. This soothing antiseptic local application is known by druggists and physicians everywhere as Dr. Shoop's Night Cure—because it cures while the patient sleeps and the [illegible] morning finds the pain, the inflamma[illegible]tion, the discharges, abated. The lives of [illegible] many women are records of martyr[illegible]dom. They suffer, they are sick [illegible] they never know a well day—yet [illegible] all this suffering and sickness [illegible] is unnecessary. Every ailing [illegible] woman may be made strong [illegible]—may be made to re[illegible] possess the vigor and vi[illegible]tality of perfect and perfect[illegible]ly healthy womanhood. It is to [illegible] this over-increasing [illegible] sufferer Dr. Shoop sends [illegible] his message of hope and life and good [illegible] cheer. It is to these sick and ailing women [illegible] that Dr. Shoop's Night Cure will come as a Balm of Gilead. You may not know your trouble by the same physicians give it, but remember Dr. Shoop's Night Cure may be relied upon in all cases of womb ulceration, falling of the womb, pains in the womb or ovaries, leucorrhoea, (whites), inflammation, congestion, irregular or painful menstruation. Ask for Dr. Shoop's Night Cure. Recommended and sold by

J. D. TULLY.

## Quarter Century's Successful Work

### 25th Annual Meeting of Peterborough Y. M. C. A. Was Held Last Night---Reports Presented and Officers Elected.

The annual meeting of the Peterborough Y.M.C.A., which was held last night in the Association building revealed the fact that the past year has been a most successful and satisfactory one. The reports and the twenty-fifth annual business meeting of the association, and the reports presented were very encouraging.

The report of the general secretary, Mr. G. H. Williamson, covered the work of the past year. It was as follows:

Mr. Vice-president and members of the Y.M.C.A.,—

This annual meeting marks the close of a quarter of a century of work for the all round development of the young men and boys of Peterborough. Has the association served the purpose that it was organized for? Has it justified the expenditure of time, money and effort that has been necessary to sustain it? The answer to these questions is old in the thousands of young men who have come under its influences, 'of the counter force it has been to the character destroying evils that have confronted young men, of lives changed—of men brought into the service of Christ and whose energies have been directed for His glory. For all that has been accomplished we express our gratitude to God.

This annual meeting also celebrates the ninth anniversary of the opening of the new building and of the same number of years service of the general secretary in this association.

RELIGIOUS DEPARTMENT.

We are pleased to report that the most encouraging feature of the year has been in the religious work. There has never been a year since the new building has been occupied in which greater results have been seen. The Evangelistic Band has directed a strong campaign of individual effort, and has made the Sunday meetings for men a greater power than ever before. Thirty-two meetings were held with a total attendance of 2,100. Almost every Sunday since the year opened there have been definite results. Through the meetings and personal work 16 men are known to have professed Christ.

103 men and boys have been enrolled in the eight Bible classes conducted, with a total attendance of 2068. The Saturday Bible club has been the heart of the week day work, being organized for the summer, and made a permanent feature at the request of its members.

During the winter, a number of the young men occupying the dormitories conducted an informal Gospel song service in the parlor, at the close of the church service.

The shop Bible classes, three in number have been conducted, with 42 sessions, and a total attendance of 1060. The interest on the part of the men has been most marked and in one shop a second class was organized by request of the men in that department. This work has been helped by the efforts of Messrs. W. E. McCann, Stanley Fife and A. E. Walker, who have played the organ. Mr. G. F. Schneider has given most faithful service as pianist in the men's meetings. A mission to men held in April, was conducted by Rev. J. G. Potter. Eight meetings were held and deep interest manifested. The attendance was as large as could be expected, in view of the interest in the season.

The foreign work department has been reported for by its treasurer. We urge a larger number of members will take a share in this work, for the millions of young men in India. Mr. Fairquhar our foreign representative will visit us during the coming autumn.

EDUCATIONAL WORK.

Six educational classes were conducted, embracing the following subjects; arithmetic, mechanical drawing, electricity, first aid, show card writing, and orchestra music. The total enrolment was 73.

A start was made in the equipment of a commercial laboratory. A telegraph [illegible] described in the [illegible] and made use of by a number [illegible] in order to practice.

The reading room is the most used department, being supplied with 40 different periodicals and magazines. A [illegible] not using it is unintended. A gift of a few hundred dollars is required to make a start. The Debating Club had an enrolment of 20, and its work during the season was the best yet. Fourteen sessions were held.

SOCIAL.

The pops were continued this year, eight of fourteen being presented. The total attendance was 650. The funds raised were cost of talent and expense were applied to purchase a stereoscope for the building.

The social committee made a study of the subject of better social games for the rooms, but were unable to recommend any satisfactory solution to the problem that would be acceptable at the present time. The Strangers' Fellowship Club has continued its excellent pioneer work for the association, and for strangers, that has been going on for the past six years. Connected with the club's work, the officers have issued visitors tickets, directed 230 young men to boarding houses and assisted many in securing employment. Regular weekly visits have been made to the hospital, and 82 men visited, literature given to them and helped in many ways.

DORMITORIES.

There has been no difficulty in keeping the ten dormitory rooms occupied. Since they have been opened in fact we have had as many as five applications to refuse in two days. There have been thirty different occupants. The interest of these young men in the general work in the building has been deepened as a result of their residence in it. The dormitory has been a splendid success and a gift of $500 from some generous citizen or citizens would add thirty more rooms to our present building, and in an addition to helping young men would place the work of the association on a more independent financial footing.

PHYSICAL WORK.

The physical work has been very well sustained. Seventy-five men and 105 boys and intermediates were enrolled in the classes. Mr. E. V. Lord had charge of the senior classes and proved a capable and painstaking instructor. Mr. G. H. Roger, assistant secretary conducted the boys' classes with a good measure of success. Greater interest was shown in basketball than during the last three years, the Arrow Club being responsible for much of this activity. A Harrier Club of fifteen members has been organized. The baths continue to be an all-year attraction, a number of boys and men have learned the art of swimming.

BOYS' WORK.

At the opening of the season the house committee had the boys' game room painted and improved, thus making the boys' work more attractive. The boys Friday meetings have been held with an average attendance of twelve. The meeting has developed the boys as the majority of the topics have been taken by them. The eighth annual boys' camp was attended by 38, and proved to be the best of the outings yet held. We believe the time has now arrived for the securing of a permanent camping ground for the association, where a lodge could be erected and the benefit extended to a larger number in the membership. We trust that interested friends may see the value of this and provide the funds needed to make this project possible.

FINANCE

We regret that we are unable to close the year free of debt. We believe, however, that in the near future by increased membership, and contributions the present deficit will be provided for.

MEMBERSHIP.

The membership of the association is now 715 including, sustaining, limited, and full members. The boys and intermediates number 160. There have been [illegible] deaths in the membership, the late Cedric Sanderson, a Collegiate student, was for one year a member of the association. The late A. C. MacCallum who died in California, was for many years an active worker in this association, and for several years a member of the board of directors. Since our last meeting, Sir George Williams the honored and beloved founder of the association movement, passed away in London, England, after having lived to see the work develop to such large proportions and established in nearly all the nations of the earth. He was buried in St. Paul's Cathedral. An appropriate memorial service was held in our building on the Sunday following the funeral.

In closing our report we wish to thank all who have made the work possible for another year, particularly the heads of the large manufacturing the business concerns and all who have assisted us. We wish to thank the Ladies' Auxiliary for their splendid year's work, and the pastors of the city for the hearty co-operation they have given.

All of which is respectfully submitted. G. H. WILLIAMSON, Gen. Sec.

The officers elected for the year 1906 were;

Pres.—Robt. E. Harding.
1st Vice-Pres.—J. C. Shook.
2nd Vice-Pres.—R. J. Kidd.
Treas.—J. J. Hewden.
Directors—R. E. Handy, A. E. Dixon, J. C. Shook, G. L. Gulley, Andrew Macfarlane, A. M. Bunt.

## Fielding Warns Insurance Men

Ottawa, June 16.—In the Banking and Commerce Committee yesterday, the first bill passed was that to incorporate the Sterling Life Assurance Company with head office in Toronto. The capital of the company is to be $2,500,000. Mr. Fielding announced that it must be understood that insurance charters granted this session will be subject to any legislation hereafter passed as a result of the insurance investigation.

The British American Assurance Company's bill was also passed. It authorizes an increase of capital to the extent of one million dollars to enable the company to meet losses incurred in the recent catastrophe in San Francisco.

A similar bill to meet similar circumstances was passed for the Western Assurance Company.

## Bambaata, Rebel Chief Killed

Durban, Natal, June 16.—It is now definitely known that the rebel chief, Bambaata, the cause of all the recent trouble, was killed in the fighting, which occurred June 10.

His death had previously been reported and denied, but his body has been fully identified.

The revolt is now expected to speedily die out.

### Another Fine Ennismore Residence.

Mr. Michael Sullivan of lot 9, con 6, Ennismore, has just completed a handsome new residence, Mr. D. J. McPherson fixing contractor for the work. An interesting feature of this job is that the new home replaces a log house that was built some eighty years ago, and afterwards supplemented by a frame building which was erected by Mr. Angus McPherson father of the present contractor. The old house has been turned round so that it now faces the south and is an up-to-date and comfortable residence, quite in keeping with the prosperity of Ennismore.

## Steamer Manita Burnt at the Dock

### T. V. N. Co. Has Fine Boat Partially Destroyed.

Yesterday morning a disastrous fire at Bobcaygeon partially destroyed the fine steamer Manita, of the Trent Valley Navigation Company's fleet. The steamer at the time of this disaster was lying snugly moored at the Bobcaygeon wharf. The steamer was advertised to connect at Sturgeon Point with the Esturion of the same line for Bobcaygeon and intermediate points.

As soon as the fire was discovered the Bobcaygeon fire bell was rung and the village engine was soon on the spot, and had their hose playing on the flames.

A spectator who arrived in the city yesterday stated that the whole village was aroused and turned out many being in their night garb. After about half an hour's fight with the flames the fire was extinguished, but not before the whole upper portion of the boat was badly damaged. The vessel's hull and engine were not injured.

The Manita was to have taken the route of the Esturion yesterday, the latter having another excursion. The Manita was built about a year ago, and had a carrying capacity of about 150 passengers.

On learning of the catastrophy, The Times, at once telephoned to the Trent Valley Navigation Company's offices at Caygeon, and learned that the loss is fully covered by insurance.

The enterprising company owning the Manita are already making arrangements for her being rebuilt and expect that she will in ten days or a fortnight resume her former route.

In the meantime another steamer will be put on the Manita's route. The fire is supposed to have originated by a spark from the steamer's engine.

It is also announced that the Str. Empress will leave Lakefield on arrival of the 5.40 train from Peterborough on Saturday night, calling at intermediate points en route to Burleigh Falls.

LOCAL AID OFFERED.

Yesterday afternoon Commodore Calcutt of the Calcutt Line of steamers, learning of the burning of the Manita, with his proverbial good nature, requested Mr. W. H. Robertson to notify Mr. Boyd "that the services of the Str. City of Peterborough, were freely offered in the meantime. However this kindly offer was declined as the "City" is too large to get through the locks at Rosedale, and thus unavailable for the northern waters.

## All Saints' Trip a Success

The moonlight excursion per str. Water Lily, given under auspices of All Saints' church was a great success. The steamer was crowded to its fullest capacity and many more would have gone had they been able to go aboard.

A jolly time was spent by all on board, the route being to Hall's Bridge and return.

## No Exhibition Here This Year

The directors of the Peterborough Industrial Exhibition met yesterday afternoon and decided to hold no fair this year. Although the city council offered to give the fair a grant of $400 provided the county council would give $200, they have been unsuccessful in securing sufficient capital to guarantee them against a deficit in case of bad weather.

This seems a pity in view of the money this fair would circulate among our citizens. Still no fair is better than a poor fair. Next year let us hope Peterborough's great fall fair will be in evidence.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

LACROSSE.

The secretary of the Junior Shamrock Lacrosse Club received word yesterday to the effect that Oshawa will be here next Saturday, June 23rd, to play their scheduled league game.

• • • •

BASEBALL.

The games in the Eastern League yesterday resulted as follows;

Montreal 2, Toronto 7.
Buffalo 6, Rochester 0.
Providence 1, Baltimore 8.
Newark 3, Jersey City 2.

• • • •

The games in the C.G.E.H.L. at Riverside Park will be well worth seeing. The first game will be called at two o'clock when Fred Whitcroft's bunch tackle the Armature Department. The batteries will be A. Quinlan, Patterson and Gillespie; Roddy and Derocher. The second game will be started at four o'clock, when the Brass Dept. and the Machine Dept. will mix up. The batteries will be Callighan, Derocher and Lang; Buck Quinlan and Curtis.

• • • •

GOLF.

The following is the draw for the second round for the Stratton trophy, the round to be finished by Saturday, 23rd June;—

Mr. Currier v. Mr. Matthews.
Mr. Ray v. Mr. Hollingshead.
Mr. Watson, v. Mr. Bradburn.
Mr. Easton v. Mr. E. H. D. Hall.
Mr. Walker v. Mr. Blanchette.
Mr. Merritt v. Mr. Wood.
Mr. Merritt, b. of m., v. Mr. Coulthardt.
Mr. Harry Hall v. Mr. W. T. Dill.
Mr. Mulholland v. Dr. McFall.
Mr. Morrow, bye.

• • • •

BOWLING.

Mr. C. E. Frost, the George street jeweller, has generously contributed a beautiful silver cup for an interrink competition, between members of the local bowling club. The schedule for this trophy will be started next Monday evening, and it is expected that it will excite keen competition.

• • • •

Mr. John Crane of the Ontario Bank; Dr. Boucher and Mr. Greer have each generously contributed a set of bowls for competition. The bowls given by Mr. Crane are for the winner of the final games in the singles, and the bowls contributed by Drs. Boucher and Greer are for the winners of the final games in Scotch doubles.

• • • •

THE TURF.

Mr. Arthur Rountree, secretary of the Peterborough Turf Club, was yesterday in receipt of a letter from Mr. T. King Dodds, proprietor and editor of the Canadian Sportsman, Toronto, asking whether and when the club intends holding races this summer in Peterborough. Mr. Rountree has not yet replied to this communication. He will likely see whether the Street Car Co., who would be the largest financial gainers, in case races were put on, will contribute as generously as they might in such case.

## 84 of 57th Regt. For Cobourg

The two composite companies from the 57th Regiment, Peterborough Rangers, including 84 officers and men, who will spend four days in camp at Cobourg, will leave Peterborough about the 26th. The respective captains will be Captain G. W. Bennett and Captain R. F. McWilliams. The lieutenants attached will be Lieuts. Wallace, Best, Clarke, and McLean (captain.)

## Sir Wilfrid Faced a Crisis

### Quebec Liberals Wanted to Support the Journalist But Were Cowed by Premier's Threat of Resignation.

Ottawa, June 16.—The impression prevails this morning that Sir Wilfrid Laurier faced a sharp little crisis yesterday over the Cinq-Mars case.

At the outset it looked as if Mr. Cinq-Mars would be supported by the entire Liberal party. Mr. Ames-worth's advocacy being noticeably uncompromising.

As the debate went on it got abroad in the Government ranks that the Premier had decided to support Mr. Foster, and there was intense indignation, especially among the Quebec Liberals. A hurried caucus of French-Canadian members and one or two others, it is understood, was held, and it was decided to see the Premier, and inform him of their determination to support Mr. Cinq-Mars.

COULD NOT COERCE LAURIER.

This was done, but Sir Wilfrid Laurier was not to be coerced.

The threat had no effect at all on the Premier beyond making him more than ever determined to persevere in his course. His reply was that if they voted against his resolution he would resign and appeal to the country.

The Liberals submitted, though with great reluctance, and many of them called out "No" to the resolution, though they did not challenge a division. They also cheered Mr. Cinq-Mars defiantly when he was brought in to receive the formal censure of the House.

Afterwards a species of indignation meeting was held in the smoking-room, the headquarters of the French-Canadian members, and much feeling was shown.

### Trevor Cuff, Aged 10, Saves Life.

Yesterday as a number of boys were playing around the foot of Sherbrooke street, Brownie English, the five-year-old son of Wm. G. English, 237 George street, fell into the river and was drowning as he could not swim. The boys all yelled for assistance.

Little Trevor Cuff of 255 George street, aged 10 years, has already distinguished himself for bravery, and who can hardly swim himself, jumped into the river and made his way out to the drowning boy. He pulled him into shore just as assistance arrived. The little fellow was nearly gone. Trevor Cuff deserves great credit for his heroism, and should receive substantial recognition from the Humane Society.

On Saturday evening on Water or George streets, between McDonell and Charlotte street, a gold crescent brooch, set with pearls. Finder will be well rewarded by leaving it at Times Bookstore.

## Senate Reform is Talked of

### Senators Edwards and Wood Discuss the Upper House and Its Work.

Senate, Ottawa, June 15.—In the Senate yesterday Senator Edwards, resuming the debate on Senate reform said it was distasteful for a body to discuss itself. This had been forced on the Senate. A sentiment against the Senate had been created by the irresponsible portion of the press. As the Commons had discussed the senate it would not be out of place to the Senate to discuss the Commons. He had experience in both chambers. At one time he thought the second legislative chamber superfluous. His opinion had changed. He thought Ontario should have a second chamber, and there were stronger reasons for a Federal second chamber. As a business man when he went to the Commons he soon came to the conclusion that a committee of three would run the business of the country better than the whole House. He thought, too, that the business was put through too slowly. This opinion had changed. He now thought bills were put through the Commons, and the Senate too hastily. However, they got better consideration in the Senate than in the Commons.

THE TALKERS NOT THE WORKERS

Senator Edwards did not think that there should be much change in the organization of the Senate. He did not agree with Sir Richard's proposal to have a portion of the members elected by the provinces, and the remainder from among former lieutenant-governors and judges. He had no objection to men with cabinet experience, and favored appointing lawyers. The present age provisions met with his approval. The popular opinion was that the important men of the House and Senate were those who made long speeches. He regarded such men as the least useful members. They prolonged sessions to gratify their vanity. There was less of this sort of thing done in the Senate than in the Commons. The most important work of Parliament was done in committee by members who were seldom heard in the chamber.

Senator Edwards said the Senate was largely a judical body, and like judges, Senators, when appointed, should largely abandon their political predelictions. Some system should be devised to maintain political equilibrium in the Senate. That was the only important improvement he would suggest.

A NEW BRUNSWICK OPINION.

Senator Wood, the next speaker, said he did not propose to suggest changes in the Senate so much as to point to the advantages of the Senate under the present system. None of the proposals for improvement made in the debate so far appealed to him. The history of the Senate justified its creation and continuation. As the debate progressed that would become clearer. There was no foundation for the common assertion that the Senate was not in harmony with the opinion and sentiment of the country. It had never been condemned for approving popular measures. He thought the great preponderance of Senators from one party such as existed in 1896 was not likely to occur again. He did not have the same dread of a large majority in the Senate as some other speakers. He did not think the proposal to give the leader of the Opposition appointment of some Senators would ever be adopted. He was opposed to any scheme involving the election of Senators. It would imbitter political feeling, divide the whole country into two great political camps, and it would foster the spoils system. The election plan would not guarantee that one party would have the majority in both houses. In fact, one party might, under an election system maintain a majority in the Senate for a longer time than under the present system. He could see many objections and no advantages to be derived from the naming of Senators by Provincial Parliaments. It would compel Provincial politics to be run on Federal lines. He did not admit that the Senate sat too little, and did too little work. If the charges were true, however, it did not prove there was a flaw in the constitution, but that errors had been made by the Government in appointing Senators. The people had the remedy in their own hands. The freedom the Government had in making selection of men for the Senate was a great advantage. Men could be called from any class or profession. The only limitation was provincial boundaries. The fathers of Confederation were wiser than their modern critics.

Senator McSweeney adjourned the debate.

## Bicyclist Is Knocked Out

### Mr. P. F. Miller in Collision with Mr. Ivy Yesterday.

Yesterday as a young man named Percy F. Miller, well known in the city, was riding along McDonnel St. on his bike, he, evidently out in deep thought did not notice another wheelman approaching him at a high rate of speed. A collision occurred in which Mr. Miller was knocked from his wheel and rendered unconscious for some minutes.

Mr. Miller told a Times' representative last night, that the accident took place as he was riding along the proper side of the street when the other man, Mr. Ivy, a clerk in Donovan's grocery, corner of McDonnel and Aylmer, was approaching him, seemed to have not been watching the road and taking the improper side of the road ran his wheel full tilt into Miller's bicycle. Mr. Ivy sustained a severe cut in one hand. The affair although ending somewhat seriously was purely an accident.

It seems that where the collision took place, the south side of McDonnel street, is the side best adapted to wheeling.

## May Reorganize Detective Force

Toronto, June 15.—It is probable that a complete reorganization of the provincial detective force will follow as the result of Inspector Murray's demise.

This reorganization will be undertaken at an early date and it is understood that the changes may be of a very radical character.

It is anticipated that some new blood will be added to the force, its size increased, and efforts made to inaugurate a better working system.

Some cases in the recent past, notably the Hamilton murder mystery, are alleged to have failed by reason of the inadequacy of the present system, and an effort will be made to better the existing conditions.

## Killed a Man Out of Loyalty to Czar

Moscow, June 15.—Michaelin, the workman who murdered Nicholas Bauman, the revolutionist, whose funeral on November 2, 1905, was the occasion of a great Liberal demonstration, was yesterday sentenced to imprisonment for a year and a half.

About 300,000 persons took part in Bauman's funeral, with red flags and banner flying. A choir of 900 trained singers chanted a requiem, while thousands in the procession sung the "Marseillaise." The immense size of the procession caused slow progress, and when darkness had fallen, the cemetery was still four miles distant. It was one of the greatest political demonstrations ever witnessed in Russia.

Bauman was driving through the streets of Moscow after the proclamation of the Imperial manifesto of October 30, waving a red flag when Michaelin, a former soldier, rushed out of the throng and brained him with an iron bar. Later in the day Michaelin surrendered himself to the police, boasting that he had committed the deed out of loyalty to the Emperor and in fidelity to his military oath.

## British Disaster on Str. Haverford

Liverpool, June 15.—Nine men were instantly killed and about forty were wounded as the result of a terrific explosion yesterday morning on board the British steamer Haverford, of the International Navigation Company. The vessel, which is commanded by Captain Season, arrived here from Philadelphia, landed her passengers and proceeded to Huskisson dock early yesterday in order to unload. The stevedores were in the act of loosening the hatches when the explosion occurred. It blew off the hatches, rent the decks and buried dead and wounded men in all directions. Several bodies were dismembered and the deck resembled the floor of a charnel house. The explosion, which, according to rumor, was caused by an infernal machine, was followed by the outbreak of fire. The cargo, consisting of linseed oil cake, in hold number two and hold number three, was soon blazing fiercely. Firemen and police hurried to the dock and the injured were quickly hurried to a neighboring hospital, while the work of searching for further possible casualities proceeded with vigor, in spite of the fierceness of the fire. After two hours' hard work, the firemen obtained the mastery of the flames.

## Improvements in Local Brewery

In addition to improvements recently made in the brewery of the Calcutt Bros. Mfg. Co., and ward, particulars of which were given in these columns a few days ago, a new bottle washing machine run by water power is being installed. It is of the latest style and does its work very quickly and thoroughly. The brewery has also inserted a machine for melting the pitch in kegs, which is run by a one-horse electric motor. The kegs revolve rapidly and the hot air is sent into them by means of a gas furnace, the air being heated to an extreme degree. The pitch is thus melted and ejected from the kegs. Great care is exercised to keep the kegs clean and the pitch is renewed frequently.

For POPULAR PRICED— CLOTHING
COME TO
THE MARKET STORE, 328 George St.

Men's Suits, ready-to-wear, $5.00 to $15.00

## CAN YOU RESIST DISEASE GERMS?

**Yes, and becomes "Germ-proof" by Driving Out Blood Humors and Restoring the System.**

Why are doctors and hospitals so busy in spring-time? Easily answered. People haven't made surplus vigor in the spring; it was all used up in fighting off colds through the winter.

With thin blood and low vitality, the germs of disease become active and cause fevers and debility.

Your one protection is to get the abundant vigor that Ferrozone so quickly supplies; it gives spring sickness that "tired feeling," restores nerve energy and instills vim and vigor into every ailing organ of the body.

No abler restorative is known than Ferrozone, its influence is not temporary but lasting, laying a sound foundation of health that lasts till old age.

Mr. Nazaire Begin, of Watton, P.Q., Que., who received enormous benefit from Ferrozone, writes: "I cannot speak too highly in praise of Ferrozone. If any one had told me that any remedy could build up my nervous system so well, I wouldn't have believed it.

"Before using Ferrozone I was run down in nerve and vital energy, and in very weak health.

"I didn't get enough sleep at night and felt poorly in the day time.

"Ferrozone has filled me up with energy and vim, increased my weight and made a new man of me."

Your health through the summer depends on clearing away all traces of spring sickness; the remedy is Ferrozone. Sold by all dealers, 50c. per box, or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

### TO PREVENT GRAFT

The Pennsylvania Railroad is considering the question of raising the wages of its employes in order to make them less accessible to bribes. The thought is that a man whose wages permit him to live with some comfort is not likely to be moved by the offer of a bribe.

This preventive measure would have no effect in the case of the constitutionally dishonest, whose virtue depends upon the lack of an opportunity to steal, but in many cases it would succeed. Men with the most honest intentions who become involved in financial difficulties with or without blame to themselves may be tempted beyond the power of resistance, while the certainty of an adequate and appreciative salary from their employers would not only make the need of money less stringent, but would cause greater loyalty to their employers' interests.

Much of the graft or bribing of which complaint is made is not felt by the participants to be dishonest because excused by long custom. Now that public attention is directed to the practice, so that in the future no one can indulge in it without a sense of guilt, it will still be impossible for some of the employes of the railroad to quit it unless the cutting off of this source of revenue is made up in some other way. Of course, one remedy would be to discharge all guilty of the offense, but the number appears to be so large that this course could not be followed without crippling the road by the loss of the experience of these men. A raise in salary is the natural and probably most efficacious action.

It will be hard, however, to convince employes that all forms of graft are illegitimate for them so long as the corporation itself is guilty of illegal practices. Without reference to the Pennsylvania Railroad in particular, it is a matter of common belief that railroads in the United States have profited by illegal rates, by the ownership of coal mines, which in Pennsylvania is forbidden by law to railroad companies, and in other dubious ways. So long as the directors profit by the possession of stock in construction companies and other corporations whose reason for existence is the opportunity of making excessive profits on railroad contracts, it will seem to the minor employe no great sin if he, too, takes advantage of his position. He may well ask how it is worse to favor one shipper in the matter of the assignment of cars than to favor another shipper by granting him rebates forbidden by law.

A good example set by the high officials is a necessary addition to any other measure designed to prevent graft by the lower officials.

## Farmers are Reassured

**The New Auto Bus Will Not Cause Horses Any Trouble.**

As the new Auto-bus will be placed on the Peterborough-Chemong Lake route on Monday or Tuesday, it might be well to say a few words in regard to this new local innovation.

It seems that there exists in the minds of some horse owners and drivers that this ponderous automatically propelled bus will frighten horses. It passes on the streets and roads. Now the bus owing to its formation and shape is not as much calculated to frighten horses as an ordinary motor car. The machine will not make anything like the noise and clanking of many of the steam threshers and other up-to-date machines used by many farmers. The machine will be accompanied from the Auto Car Co. o' Buffalo by an experienced chauffeur, or driver, who is an expert and thoroughly acquainted with every part of the machine. The chauffer will personally drive the bus for several weeks, and at the same time instruct Mr. Bruce Lee, the local liveryman, as to its working and driving.

When the bus is placed on the route it will be always accompanied by two men, who will, should a passing horse show any symptoms of fright, at once stop the machine and go to the assistance of the man whose horse is alarmed. Mr Bruce Lee, himself a man of wide experience with horses and owning many, fully understands these animals and will know just what to do under such circumstances, should they arise.

The bus seats 28 people and is 35 horse-power. It has three grades of speed: high, medium and low, and will be run at medium-low speed. The bus has heavy riding seats, placed across the car, and has a canopy top on which light baggage may be placed. There are curtains which, in case of bad weather or hot sunshine, can be drawn across the front and back ends.

The car will be used to convey passengers to and from the Chemong boats, the village, the park, and to carry farmers and others along the route. It is anticipated that no trouble will arise over horses being frightened.

## KEENE

As usual the Sons of Rest met in the park on Tuesday night. All the members were present, with the exception of the president. On enquiry it was ascertained that he went to visit his best girl. In the absence of the president, Fighting Archy was asked to take the chair. At precisely eight o'clock Archy called the members to order and opened the meeting with a short prayer, after which he spoke as follows: My dear brethren, it affords me unwonted pleasure to again occupy the president's chair. It is also a pleasure to me to see such a large number of the members present tonight. It is proof that you are interested in the society and I trust that we will have a profitable meeting. I think that I am justified in making the statement that I am in every way as well, if not better, qualified to hold the office of president as Minney Wale and I take the liberty tonight of soliciting your support at our next election, for it is my intention to be in the field again. With these few remarks I will now take my seat and leave the meeting open for business. Tom Beakley, the district organizer, arose and said that he had a charge to lay against Minney Wale, our president, for chewing tobacco in bed and spitting on the wall. Fighting Archy rose with fire in his eyes and said that any person vile enough to chew tobacco in bed was not worthy of the office of president, and he trusted that the members of this society would carefully consider the matter and have him expelled at once. I now will impose a fine of six hundred dollars on Minney Wale, to be paid in one day or three years in Central prison. Yankey Mac laid a charge against Ted Muckkey for driving a horse and buggy on the park. Archy fined Ted one hundred dollars, to be cash down. He paid his fine and took his departure for home with a lighter pocket-book. Howdon Dorie laid a charge against Ponty Mac for working on the road. Archy fined Ponty five dollars, to be paid next week or two months in jail. Bobtail Pie laid a charge against Cockatoo Elliot for whispering in Sunday school. Archy fined Cocky ten twelve dollars, to be paid in four days or six weeks in jail breaking stones. Shoemaker Clark laid a charge against Waxy McFarlane for singing party tunes while pegging boots. Archy fined Waxy twenty dollars, to be paid at once or go to prison for a week. He paid the fine. Hucksaw Carter fell asleep and upset a lamp and set the park on fire. After the fire was extinguished Archy closed the meeting with another short prayer.

"God Save The King."

### Big Mining Tracts Being Taken Up.

Quebec, June 15.—Large tracts of mining lands are now being almost entirely taken up at the Parliament House here in the Lake Chibougami district, several square miles having been secured today by Lord Templeton, of England.

### Ravages of Epidemics in India.

Washington, June 15.—The constant ravages of epidemics in India is shown in reports received by the public health and marine hospital service, the latest one, being for the week ended April 28 last, showing 17,486 cases and 16,633 deaths from plague that week in India; 2,116 cases and 1,812 deaths from plague in Bengal and 126 deaths from cholera, 167 from plague and 99 from smallpox in Calcutta.

Read "The Road to Wellville," in pkgs

MANY PEOPLE HAVE **CATARRH OF KIDNEYS** AND DON'T KNOW IT.

**Backache, a Warning Symptom of Kidney Trouble.**

**Pe-ru-na Is Invaluable in Such Cases.**

**Prominent Persons Who Have Been Cured.**

Mr. J. Blyler, 1305 Ohio street, Des Moines, Ia., writes:

"I wish to state my appreciation of your excellent remedy.

"I have always enjoyed excellent health, except frequent and painful attacks of bladder trouble, which doctors failed to relieve or cure.

*"Upon recommendation I used Peruna to my utter satisfaction, not having had an attack now for four or five years." J. Blyler.*

**Catarrh of Kidneys Caused Much Suffering.**

Mr. Leopold Brandl, 246 Bleecker street, Brooklyn, N. Y., writes:

"I was sick three months with catarrh of the kidneys and lungs. I was treated by my home physician and relieved to some extent, but after I had worked again for two weeks, my old suffering—backache and pains in the right lung—returned. The dreadful cough which bothered me day and night lasted six months and no one could help me.

"I tried three different patent medicines, without avail. I could scarcely eat anything and slept only a few hours each night.

*"A friend told me to take Peruna. I did so and the second day my appetite had improved. I took a teaspoonful of Peruna every hour, day and night, for three weeks. Now I have taken five bottles. I can eat enough for two people and am able to sleep well.*

"Whenever I meet a sick person, I advise him to take Peruna. I thank you a thousand times for your medicine, as it was the only remedy that saved me. We continue to keep it in our family."—Leopold Brandl.

**Dangerous Kidney Diseases Cured.**

WHEN the kidneys become affected by catarrh, either from colds, overwork, or an extension of catarrh from some other organ, they fail to perform their normal functions.

It is the work of the kidneys to excrete from the blood many of the poisons which accumulate in the body.

If the kidneys fail in their work, the poisons accumulate to such an extent as to cause convulsions, which often prove fatal.

Peruna, by relieving the kidneys of their congested and catarrhal conditions, leaves them free to act in a normal manner.

It also strengthens the action of the heart, equalising the circulation of the blood in all parts of the system.

A remedy that relieves catarrhal derangements of the kidneys should certainly be considered a household remedy. Peruna is such a remedy.

**High Commendation For Pe-ru-na.**

Mr. C. B. Fizer, Mt. Sterling, Ky., writes:

"I have suffered with kidney and bladder trouble for ten years past.

"Last March I commenced using your Peruna and continued for three months.

"I have not used it since, nor have I felt a pain.

*"I believe that I am well and I therefore give my highest commendation to the curative qualities of Peruna."*

Neglected catarrh of the kidneys is apt to develop into Bright's Disease or diabetes, when a cure is almost an impossibility.

We have on file many testimonials like the ones given here.

We can give our readers only a slight glimpse of the vast array of unsolicited endorsements we are receiving every month.

No other physician in the world has received such a volume of enthusiastic letters of thanks as Dr. Hartman for Peruna.

Address Dr. S. B. Hartman, President of the Hartman Sanitarium, Columbus, Ohio, for free medical advice.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### A Very Serious Problem.

Montreal, June 15.—A Halifax despatch says that scarcity of labor is beginning to be a serious problem with the big coal and steel companies of Great Britain, and, if the conditions in this regard do not improve very shortly, a loss of thousands of dollars in reduced outputs is bound to be the result.

At present the Dominion Iron and Steel Company are suffering from a shortage of labor at their iron ore quarries at Wabana, Newfoundland, and the output is not by any means sufficient to keep the three steamers, which the company chartered for the summer to carry product to Sydney, going regularly.

### TRIP TO A FIXED STAR.

**Would Be a Long Journey Even With Transportation Facilities.**

There is a perpetual fascination about the stars and the immense distances at which they lie from one another and from us. To demonstrate the vast distance of Centauri from this planet a popular scientist gives the following illustration in London Answers: "We shall suppose that some wealthy directors, for want of outlet for their energy and capital, construct a railway to Centauri. We shall neglect for the present the engineering difficulties, a mere detail, and suppose them overcome and the railway open for traffic. We shall go further and suppose that the directors have found the construction of such a railway to have been peculiarly easy and that the proprietors of interstellar space had not been exorbitant in their terms for right of way.

"Therefore, with a view to encourage traffic, the directors have made the fare exceedingly moderate—viz, first class at 1 penny per hundred miles. Desiring to take advantage of these facilities, a gentleman, by way of providing himself with small change for the journey, buys up the national debt of Britain and a few other countries and, presenting himself at the office, demands a first class single fare to Centauri.

"For this he tenders in payment the price of the ticket, £1,100,000,000.

"Having taken his seat, it occurs to him to ask:

"'At what rate do you travel?'

"'Sixty miles an hour, sir, including stoppages,' is the answer.

"'Then when shall we reach Centauri?'

"'In 48,693,000 years, sir.'"

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

Colonel Washington sat far back, hands on knees, quiet and meditating, and just below her Mr. Thomas Nelson shifted nervously in his seat, turning his eyes now there, now here.

Well to the front sat Richard Henry Lee of Chantilly, "the gentleman of the silver hand." The black bandage he wore over his hand fascinated her. She had heard it said he wore it to hide a wound he got swan shooting on the Potomac.

Her attention came back with a start as she heard the resolution in answer to Jamaica that "it is the most ardent wish of this colony, and we are persuaded of the whole continent of North America, to see a speedy return to those halcyon days when we lived a free and happy people." As she looked down at Henry, Anne saw that he was scribbling on a scrap of paper.

There was a hush as he arose and a buzz of expectancy as he mounted the rostrum. He held in his hand the paper upon which he had been scribbling.

Anne felt a touch of disappointment at the cold, measured quality of his tone. With that flickering half smile which meant dissent he moved an amendment to the Jamaica resolutions. He read without a gesture, in pronunciation as plain as homespun. His voice moved evenly, almost carelessly, over the periods.

But as he progressed the assembly awoke with a shock, and Anne saw a certain ripple almost of alarm surge over it. Henry had spoken the phrase, "our inestimable rights and liberties."

At that moment the speaker raised his voice, and the last words came challenge-like, the snap of a whip. "We do resolve, therefore, that this colony be put in a state of defense and that there be a committee to prepare a plan for embodying, arming and disciplining such a number of men as may be sufficient for that purpose."

Anne looked at Henry in the black clothes and tie wig which set off his face and drew a breath. The humility, the diffidence, the modesty of address were gone, and in their place was sternness. Even his voice had grown harsh, as though in menace, and on the convention, uncertain and wavering, those lovers of the "halcyon days," the menace fell. It was the pluff's from hesitation to resolve, from expostulation to powder. The fire had fallen!

Henry knew his men. All these years he had been learning them, drawing them out, questioning, story telling, watching effects, experimenting in their emotions.

His eye held every man within those walls. He turned it upon Richard Henry Lee, and he, his polished oratory forgot, hurled a blunt second at the chair.

Mr. Pendleton, Colonel Harrison, limping from the gout, and Colonel Richard Bland got upon their feet with arched frowns, barking that such action was "premature," and at the word Anne saw a pale scorn burn Henry's face. These, who had so lately sat in the Continental congress, prated of "dignified patience," "filial respect and discretion," "the relenting of the sovereign," "the nakedness of the colonies."

Anne had afterward no certain recollection of how Henry began in answer. All impression was swallowed up in that thrill which held every hearer. It has been said that he spoke as Homer wrote.

"Shall we shut our eyes—we wise men struggling for liberty—and listen to the song of the siren till she transforms us to beasts?" he cried. "Shall we, having eyes, see not, and, having ears, hear not the tidings of our temporal salvation? For my part I will know the worst, and I will provide for it. I cannot judge the future but by the past, and by the past how shall you solace yourselves? What is there in the conduct of the British ministries of the past ten years to justify hope?"

As he went on passion crept over his face like the wind that presages a storm; his lean neck was scarlet and corded with white lines, and his eyes glared hollowly.

"Do you regard the insidious smiles with which our petitions are received? Be not betrayed with a kiss!"

Sitting in a quiver of feeling, with fingers clasping the gallery ledge, Anne felt the shaken pulses of the audience. Under the intrepid metaphor she saw the messenger of the colonial assembly standing before the king's attorney general entreating that Virginia had souls to be saved as well as England, and the brutish answer: "Damn your souls! Make tobacco." She saw the colonies supplicating on their knees, spurned, contemned, spit upon. She saw the chains forging, navies building, armies gathering. She saw British ministers, like harpies, with cold eyes upon the green of the Americas.

Henry's voice had risen louder, more intense, and his colorless features and eyes of fire had become terrible to look upon. He sat upon the whirlwind. The very walls seemed to rock with vibrations.

"There is no longer any room for hope. If we wish to be free, if we mean to preserve inviolate those privileges for which we have been so long contending, if we mean not basely to abandon the struggle we have vowed never to abandon until its object be obtained, then we must fight. We must fight! An appeal to arms, to the God of Hosts, is all that is left us."

Anne dragged her eyes from Henry's. Amid the sea there was one face that had not moved a line. It was Colonel Washington's. He sat stonelike, as immovable as a bishop at his prayers, his hands still upon his knees. He was as a soldier should be—cool of head and saving passion for the hand. And as a soldier he was slow to disallegiance. But cold as he seemed when Henry bent the wills of that assembly and whipped the conservatives to the wall, there was a glitter in his eye that leaped to flame behind the quiet mask.

"They tell us that we are weak. When shall we be stronger? Will it be next week, or next year? When we are totally disarmed and when a British guard is in every house? Shall we lie still till our enemies have bound us hand and foot? We cry 'Peace, peace,' but there is no peace. Why stand we here idle? What do you wish? We are three millions of people, armed in the holy cause of liberty and invincible! We shall not fight our battle alone! The war is inevitable, and let it come! Let it come!"

Henry's voice, which had been like a battle shout, sank in his throat. His form bowed itself in the attitude of a galley slave. On his crossed wrists the

(To be continued)

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Shoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

ZULUS DEFEATED.

Durban, Natal, June 13—Col. MacKenzie's column yesterday attacked the rebel natives who had sought shelter in the bush. The latter climbed trees, whence they hailed assegais on the troops, but bullets dropped them out of the branches. Over forty were thus killed, and altogether one hundred and sixty natives were slain. Darkness ended the operations of the troops, but the rout of the rebels is regarded as practically complete.

**One Hundred Dollars in Two Years Brings One Hundred Thousand Dollars.**

The stock of the Two Stars Mining Company in old Mexico sold at $10.00 per share. Today it is selling at $10,000.00 per share. That is not the only mine in Mexico or the last opportunity. Let us give you information concerning another property in Mexico that has a future. Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. Write for plan of sale and description of property.

**SAN DOMINCO MINING CO.**

Dept. 61, Frisco Building, St. Louis, Mo

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 15.0x1500 feet. The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

# Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and knows the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appliances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds, the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $1 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000 Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**PENITENTIARY SUPPLIES**

SEALED TENDERS addressed to Inspectors of Penitentiaries, Ottawa, and endorsed "Tenders for supplies," will be received until Monday, 25th inst., inclusive, from parties desirous of contracting for supplies for the fiscal year 1906-1907, for the following institutions, namely:—

Kingston Penitentiary.
St. Vincent de Paul Penitentiary.
Dorchester Penitentiary.
Manitoba Penitentiary.
British Columbia Penitentiary.
Alberta Penitentiary.

Separate tenders will be required for each of the following classes of supplies:—

1. Milk, pure, fresh
2. Beef and mutton (fresh)
3. Forage
4. Coal (anthracite and bituminous)
5. Cordwood
6. Groceries, Pork, Bacon
7. Coal oil (in barrels)
8. Dry Goods
9. Drugs and Medicines
10. Leather and Findings
11. Hardware, Tinware, Paints, Oils, etc.
12. Fish, fresh

Details of information as to form of contract, together with forms of tender, will be furnished on application to the Wardens of the various institutions.

All supplies are subject to the approval of the Warden.

All tenders submitted must specify clearly the institution, or institutions, which it is proposed to supply, and must bear the endorsation of at least two responsible sureties.

Papers inserting this notice without authority from the King's Printer will not be paid therefor.

DOUGLAS STEWART,
GEO. W. DAWSON,
Inspectors of Penitentiaries.

Department of Justice,
Ottawa, May 25, 1906.

NOTICE is hereby given that the rights of the government on the water-powers hereunder mentioned will be put up at auction to be held in the sales room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long leases, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ke rapids on the Quinze river, county of Pontiac, about 12 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot No. 26, 3rd range of the township of Grandison, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manitouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the River aux Outardes, on the north shore of the Saint Lawrence, about 71-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Gabelle," on the Saint Maurice river, about 13 miles (in a straight line) from Three Rivers.

7. The Coteau Rapids on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermilion river, about 21 miles above La Tuque, county of Champlain, on the the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 41-2 miles from the confluence of these rivers and about 90 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Sault," river Rimouski, township of Duquesne, county of Rimouski, 16 miles from Rimouski.

11. The "Rapid Maiffi," river Bonaventure, about 6 miles from the Harachous of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 21-2 miles from the village of Saint Felicien and 15 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 62 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Peletier, county of Lake Saint John.

15. The three falls on river "Sault-au-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power, of these water-powers, the extent of the surrounding land which the above mentioned concessions comprehends, apply to the Department of Lands and Forests, Quebec.

ADELARD TURGEON,
Minister.

Department of Lands and Forests,
Quebec, 16th May, 1906.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart and Wilton, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

## OCEAN ROPES.

**A Marine Plant That Grows a Stem Three Hundred Feet Long.**

The largest marine plant and probably one of the highest plants known on this globe is a gigantic seaweed, the nereocystis, the stem of which has been found to grow as much as 300 feet long. It was first discovered not far from the Alaskan coast, but has since been found floating in various parts of the Pacific ocean along the American and Asiatic shores. This seaweed grows in a very curious manner. Large quantities of it are found at a little distance from shore and at depths not exceeding 300 feet. On loamy bottoms large thickets of this plant take root, and a stem of the thickness of ordinary cord grows upward. At its top there is a pear shaped balloon, which grows with the stem, and when it reaches the surface of the water it often measures six feet and more in length, with a diameter of four feet six inches. This balloon has, of course, an upward tendency and keeps the stem growing until it floats on the surface of the water. From the top of this balloon a large tuft of strong, thick, spadelike leaves grow out, which originally are not more than two feet long and which grow and split until from the balloon a roselike growth of from fifty to sixty-five feet in diameter covers the water. This gigantic weed grows in such quantities that near the shore large meadowlike islands are formed, which impede navigation. The natives of the Aleutian islands make manifold usage of this plant. From their strong dried stems they make ropes 250 feet and more long, while balloons of this weed furnish them with large vessels after they are dried, the smaller ones being used in their boats to bail out water. The long leaves, after being dried, are cut into narrow strips and used for wickerwork, the making of baskets and similar furniture.

## LAPP WOLF HUNTERS.

**Swift Runners on Snowshoes Make Short Work of the Brutes.**

The Swedish Lapps live entirely with, by and upon their reindeer. A Lapp who owns a thousand deer is a very rich man; but, as taxes are assessed upon the number of deer, he is inclined to understatimate his herd. The most dangerous enemy to the herd is the wolf, who, if so disposed, can kill thirty deer in a night. A band of wolves can make a rich Lapp poor. When the snow is deep and soft and it is announced that wolf tracks have been seen in the neighborhood of the deer the swiftest runners on snowshoes prepare for an exciting chase. The wolf may have a start of a mile or two, but the track it leaves in the deep, soft snow is so prominent that the hunters can follow it at their best speed.

The wolf, though he may run fast, has but slight chance of escaping the short men who on snowshoes rush through the wood, dart down steep hills and jump from ledges several yards in height. Each hunter does his best to outrun the others, for the wolf belongs to the Lapp who strikes the first blow. As soon as the leading hunter is close enough to the wolf he gives it a heavy blow across the loins with his strong spiked snowshoe staff. If there are other wolves to be pursued, he kills it outright; if not, he disables it and waits till all the hunters arrive before giving the death stroke.

**On Tipping the Hat.**

New Yorkers still cling to the ancient custom of tipping their hats when greeting a male friend or acquaintance. It is a common sight to see a staid, prosperous looking business man as he passes an acquaintance tipping his hat, although the other is alone and unaccompanied by a woman. It is the same after a party has been together somewhere, at dinner, probably, or at the theater. You will notice that as one separates himself from the others he will say good night or au revoir and then tip his hat. Also when one man is introduced to another it is dollars to a subway ticket that he will lift his chapeau. Wonder why it is. They don't do it in Pittsburg.

**Crusty.**

The new stenographer's yellow hair glittered in the flood of sunlight that poured through the window of the office.

But old Duke, the bookkeeper, had no eyes for the girl's beauty. He lighted a cigar and set to work.

"Mr. Duke," said the stenographer.

"Huh?" the old man grunted.

"Look here," she said imperiously, "I am sorry, but smoking always makes me sick."

"Then," said Duke, without looking up, "don't ever smoke."

**An Irish Compliment.**

An Irish gentleman said to an English officer, "Do you know Mr. X. of —?" The officer disclaimed having that pleasure. "Ah, he is a very nice fellow and a good friend of mine. But he has been dead these six years. An', shure, you're very like him!" The officer said he had been compared to a good many things in the course of his lifetime, but never before to a six-year-old corpse.—London Spectator.

**Latter Day Brecciness.**

"How often do your housemaids dust?"

"Do you mean how often do they fan the furniture," asked slangy Mrs. Nuwedd, "or how often do they skip out?"

If poverty is the mother of crimes want of sense is the father of them.—Bruyere.

**Precisely Located.**

"Where were the kings of England crowned?" was the question on an examination paper.

"On their heads," wrote a boy in the space left for the answer.

No gentleman ever finds it necessary to proclaim his character in the assertion that he is a gentleman.—Duluth News-Tribune.

SUBSCRIBE FOR THE TIMES.

**Miss Pauline Mowat**

talented Soloist, St. Andrews Presbyterian Church, London, Ont., writes of the New Scale Williams Piano

It gives me great pleasure to express to you my high appreciation of the excellent qualities of your New Scale Williams Piano. The evenness of scale throughout impresses me strongly, and its beautiful, mellow, sustaining tone is specially adapted to supporting the voice. I can unhesitatingly say that those who buy one of your pianos will get one of the very best instruments on the Canadian market, and in my opinion it has few equals.

Most sincerely yours,
PAULINE MOWAT.

Contralto Soloist St. Andrews Presbyterian Church, London, Ont.

Opera House Block

## *Steamer Drifted In Mid-Ocean*

Montreal, June 11.— The Thomson liner Jacona, twenty-eight days out from Scotland, arrived in port Saturday after having broken her crank shaft and replaced it with a new one on the high seas, one of the most difficult tasks that it is possible to accomplish on the open sea. The Jacona sailed from Scotland on May 16 and when within two hundred and fifty miles of Cape Race her crank shaft snapped, leaving her at the mercy of the wind and waves. Fortunately there was an extra shaft on board and this the chief engineer and his staff immediately prepared to put in place.

For eight and one-half days the chief engineer and his men labored; the seas in the meantime running high and the Jacona pitching to the will of the wind and the waves. The shaft that it was necessary for the crew to replace weighed no less than ten and one-half tons and the labor of accomplishing this on a vessel that was never still for an instant may well be imagined. However, at the expiration of the time mentioned, the Jacona was once more able to proceed on her way. While in the path of vessels bound for the St. Lawrence the Jacona for nine days never came within signalling distance of a steamship and the first news of the accident was from the Jacona herself when she passed Cape Ray on her way inward.

**Ken. Man Tells of Assassinations.**

Louisville, Ky., June 11.—The Courier Journal yesterday in a despatch from Cynthiana, Ky., prints the confession of Curtis Jett, which gives the alleged details of the assassinations of James B. Marcum and James Cockrill, and also throws new light on the murder of Dr. J. D. Cox, the three crimes having been committed during the reign of feudism in Breathitt county. The confession is authorized by Jett's attorneys. Jett says he, John Smith, and John Abner killed James Cockrill, that Robert Denton went after Abner and Smith to aid in the murder, and that Elbert Hargis, James Hargis, Ed. Callahan, Jesse Spicer, and Bill Britton are the men who formed the conspiracy.

**Jockey Club Will Charge Constable.**

Hamilton, June 11.—The sad feeling between the city police and the Jockey Club management resulted in trouble yesterday. P. C. Springer, who went to the track and was refused admission unless he purchased a badge, showed the gate keeper to one side and walked in. It is said the policeman had legal advice before going to the track. Sergeant Pinch would not order Springer off the track, but Chief Smith was sent for and ordered him out. The officer will be charged with trespass, and reported to the commissioners.

The Hamilton policemen are sore at the Jockey Club people for refusing them free admittance.

**Their Absence Explained.**

During an acrimonious debate in the house shortly before the civil war Mr. Potter of Wisconsin made some very sharp strictures on Mr. Pryor of Virginia. The result was a challenge from Pryor to fight a duel, which Potter promptly accepted, naming as terms bowie knives at five paces, terms which he well knew Pryor would not dare to accept, as he was a small man, while Potter was a large, powerful man and familiar with the use of the bowie knife. Pryor declined on the ground that the proposed terms were beneath the dignity of a gentleman to accept, and so the matter ended. But on the day following the challenge, while the result was still unknown, both Potter and Pryor were absent during roll call, and when Potter's name was called a Quaker member rose and in mild voice said, "Mr. Speaker, I am informed that the gentleman from Wisconsin had a Prior engagement." And when Pryor's name was called a moment later he rose again, saying, "Mr. Speaker, I hear that the gentleman from Virginia has gone to be as clay in the hands of the Potter."

**Double Thinking.**

Professor Jastrow, writing in the Popular Science Monthly of the causes of certain lapses of speech, recalls the singular power that Sir Walter Scott, among others, possessed of conducting two trains of thought at the same time. When highly developed this power enables the possessor subconsciously to find words expressing a thought already formed while at the same time shaping the next thought period in conscious preparation. An instance is given by Scott's amanuensis, who relates that while dictating the novelist would sometimes search through a book, finding and reading a passage, and thus keeping two trains of thought going simultaneously. The amanuensis discovered the fact that Scott was doing double work in his brain through the occasional occurrence in the dictation of a word which did not fit in the sentence, but four or five lines farther on the place where the word belonged would turn up.

—For bargains in fancy goods and stationery, come to Times Bookstore.

**Poor Rings.**

When posies inside wedding rings were first introduced does not seem to be known. Time has covered that, as he does so many things, with the mosses of oblivion, but we know that from the sixteenth century until the middle of the eighteenth it was customary to have them engraved on rings. These posies or mottoes are seldom to be found with more than two lines of verse and often with only one, but there are a few instances known where three lines are used. Some of these posies are very quaint and curious, and a few reach a high standard of poetic beauty. In 1842 a small collection of rhymes was published with the title of "Love's Garland; or, Posies For Rings, Handkerchiefs and Gloves and Such Pretty Tokens That Lovers Send Their Loves." It contains some posies that are not to be met with elsewhere and is a very interesting work, though but few people seem to have heard of it. The South Kensington museum has a good collection of posy rings, and among them we find the following: "United hearts, death only parts;" "Let us share in joy and care," "Love and live happily." There is a story to the effect that Dr. John Thomas, who was bishop of Lincoln in 1753, caused to be inscribed inside his fourth wife's wedding ring:

If I survive,
I'll make them five.
—London Graphic.

**Salmagundi.**

Halliwell in his "Dictionary of Archaisms and Provincialisms" describes salmongundy to be a mixture of apples, onions, veal or chicken and pickled herrings, minced fine and eaten with oil and vinegar; hence a nickname for a cook.

Halliwell-Phillipps' "Dictionary of Archaisms and Provincialisms" has: "Salmongundy—apples, onions, veal or chicken and pickled herrings, minced fine and eaten with oil and vinegar; hence a nickname for a cook." Cf. also Grose's "Classical Dictionary of the Vulgar Tongue." Bailey's "Dictionary" has "salmingondin."

Salmagundi, of course; made of pickled herring minced up raw with pepper, vinegar, etc. From "Sea Words and Sea Phrases Used Along the Suffolk Coast," by Edward Fitzgerald, communicated by him to the East Anglian News.—London Notes and Queries.

**The Champion Parrot.**

A woman in a London fathouse was accused of singing hymns to her parrots for the benefit of their souls. This recalls to the London Chronicle the most accomplished parrot in history. It belonged to Colonel Dennis O'Kelly and was famed for its whistling of the One Hundred and Fourth Psalm. When the colonel died in 1787 a large proportion of his obituary notice in the Gentleman's Magazine was devoted to this remarkable bird, which got another considerable notice of its own when it died fifteen years later in Half Moon street, Piccadilly. This parrot could also whistle "God Save the King" and "The Banks of the Dee" and would go back and correct itself if it got a note wrong. It could even answer questions, and its master was said to have refused 500 guineas a year to show it in public.

**Chimneys.**

Chimneys are modern—that is, chimneys with fireplaces and flues. None of the Roman ruins shows chimneys like ours. There are none in the restored buildings in Herculaneum and Pompeii. Roman architects complained that their decorations were smoked up. A kitchen in Rome was always sooty. Braziers were used in the living rooms. The chimney of antiquity consisted of a hole in the roof. The wealthy Romans used carefully dried wood, which would burn in the room without soot. The modern chimney was first used in Europe in the fourteenth century. The oldest certain account of a chimney places it in Venice in 1347.

**A Fish's Tail.**

A fish exerts its great propulsive power with its tail, not with its fins. The paddle wheel was made on the fin theory of propulsion, and the screw propeller had its origin in noting the action of the tail. It is now shown that the fins of the tail actually perform the evolutions described by the propeller blades and that the fish in its sinuous motion through the water depends on the torsional of the tail to give it power.

**Home Shy Wives.**

The home shy wife is a peculiar product of the time. She rises late and hurries from home the moment she is dressed. To have luncheon, tea or dinner at home appears to her to be intolerable, and she seldom reappears there except to return to bed. "What is home?" was asked at a west end dinner table recently. "The place where the servants are kept," was the immediate answer.—London Truth.

**Akin.**

"Do you think that marriage is a failure, Mr. Askin?" said Miss Elder to a young man whom she knew to be engaged.

"I haven't got that far yet," was the frank reply, "but I'm pretty well convinced that courtship is bankruptcy."—London Tit-Bits.

**How England Got the Gout.**

Strange effects have strange causes. What gave most English families of the upper class the gout was the treaty that brought in the heavy wines of Portugal, much too heavy for use in this climate.—Dr. Emil Reich.

One of the secrets of successful achievement lies in giving one's whole mind to the details as they present themselves, never slighting one of them, even the smallest.

**Castro Will Resume Presidency.**

Caracas, June 15.—General Gomez will retire on Independence Day, 5th July, and General Castro will resume the presidency at once. To add to the importance of this announcement, Gomez declares that his esteem and affection for Castro are unchanged and that all misunderstandings are cleared.

*GREAT LABOUR SAVING DEVICE*

**The Penman & Sprang**

**DUPLICATOR**

Will produce 100 copies in ten minutes, and is without doubt one of the greatest inventions of its kind ever conceived.

***THE DUPLIGRAPH***

The most reliable, cleanest, simplest, quickest and most up-to-date duplicating machine on the market

It will reproduce one hundred facsimile copies of a pen-written original in fifteen minutes; fifty to seventy-five copies of an original written on a typewriter or twenty-five copies of an original written with a copying pencil.

The original is written on ordinary paper, with an ordinary pen, type writer or copying pencil, and the copies can be taken on ordinary paper, cardboard, wood or china.

## Carnegie Medals Asked for Rescuers

Niagara Falls, N.Y., June 13.—At the meeting of the common council last night a resolution offered by Ald. Baron was carried, requesting the mayor to present to the trustees of the Carnegie hero fund the names of Harry Bates, desk sergeant of police headquarters, and Fireman Thomas Conroy for the cheroic rescue of Amos Schwertzer last week.

After the resolution was signed, Ald. McConey arose and stated that while he commended the action of Conroy and Bates, he believed they were not a worthless risk. "Instead of going out there and taking chances on their lives, I believe it would have been better to get a pike pole and shove the fellow over," said the alderman. An outburst of laughter followed.

### Candlelight.

Hail, candlelight, without disparagement to the sun or moon, the kindliest luminary of the three, if we may not style thee radiant deputy, mild viceroy of the moon! We love to read, talk, sit silent, eat, drink, sleep by candlelight. They are everybody's sun and moon. This is our peculiar and household planet. By the midnight taper the writer digests his meditations. By the same light we must approach to their perusal if we would catch the flame, the color. Night and silence call out the starry fancies. Milton's "Morning Hymn in Paradise," we would hold a good wager, was penned at mid night, and Taylor's rich description of a sunrise smells decidedly of the taper. Even now a loftier speculation than we have attempted courts our endeavors. We would indite something about the solar system. "Betty, bring the candles."

### A Useless Model.

An English manufacturer of pottery is the subject of a joke told in the Liverpool Post. While on a continental tour he purchased a Sevres vase for some hundreds of pounds and brought it home most carefully. Thinking that the foreman of his works might gather a hint from the design he called that gentleman in and showed him the treasure. "How do you like it?" he asked. The foreman took the vase in his hand, turned it over and returned it with the brief reply, "I don't think I can learn much from it." "Why not?" asked the manufacturer. "I don't like telling you, sir." "Come. Out with it." "Well, I designed that vase myself. It is a foreign imitation of our own work and is worth £5 at the outside."

### Will Row Till Judgment Day.

There is a shivery, shaky legend among the people who live along the Hudson river which is to the effect that that stream is the everlasting boating waters of a specter who is personified as Rambout Van Dam. Away back in colonial times Rambout and his friends were drinking until late at night. Finally this man Rambout started for home, some distance up the river, in his boat, swearing that he would row the distance if it took "a month of Sundays." Rambout never reached home, and the superstitious people say that he has been condemned to row till judgment day.

### His Daughter.

A gentleman who was once stopped by an old man begging replied, "Don't you know, my man, that fortune knocks once at every man's door?"

"Yes," said the old man, "he knocked at my door once, but I was out, and ever since then he has sent his daughter."

"His daughter?" replied the gentleman. "What do you mean?"

"Why, Miss Fortune."

### The Unusual Way.

"Do the Blanks manage to keep up appearances since they lost the greater part of their fortune?"

"No. They don't bother about appearances. They just use what little money they have to make themselves comfortable."

### A Change.

Old Gentleman (pointing to lanky youth at his side in the tram car)—How much for this boy—half fare, I suppose? Conductor—Well, no. He looks as if he were kept on half fare at home, and needs a change. Full fare, please. London Answers.

### His Mistake.

Rupert—Why did you ask her to marry you? Harold—Well, I thought she was sensible, but hanged if she didn't accept me!

## ANCIENT WATER VILLAGES.

**Relic of Old Customs Prevailing in the "Spreewald."**

One of the most interesting regions in the "old fatherland" is the so called "Spreewald," the forest of the Spree, situated not far from the German capital, in the province of Brandenburg. Each village is a little Venice, every house a little island, and these islets are connected by bridges sufficiently raised to allow boats to pass under them. Most of the houses, with their barns and stables, rest on piles, and there is generally a strip of artificial terra firma either in front or at the rear of every building. By means of these land strips and of the bridges the slender land communication is kept throughout the district, but most of the business and amusement are carried on through the canals, which not only form the main highways, but penetrate and cross and recross the whole region. It is on these lagoons that all traffic is conducted in boats during the period from spring when the last vestiges of frost and ice are disappearing until the end of autumn. You see the letter carrier shoot up and down the canals, performing his duties in his frail craft; the police glide leisurely along the banks, watching everything going on; peasants bring the products of their toil to the nearest towns; children go to and from school; young mothers, dressed in their Sunday clothes, are rowed to church, carrying in their arms a small, queer looking bundle from which two large eyes in a tiny face stare at the stranger in wonderment—baby is going to be baptized, an important moment with this strongly religious people.

## DREAM MYSTERY.

**The Events That May Be Crowded Into a Few Seconds.**

The duration of a dream is so seldom accurately measured that a story published in the St. Louis Medical Record is worth repeating.

The writer, a doctor, was seized with an uncontrollable drowsiness during a call and was struggling to keep awake when he was asked by his companion, "How long may you stay in B.?" His answer, which came promptly enough, was, "That depends on the Western Union," and, catching himself, he explained that he was expecting a telegram. In fact, however, his answer related to the facts of a dream which had been sandwiched between the two parts of the sentence.

After hearing the words "How long" the doctor had dozed off, dreamed that after long and tedious experiments he had invented a wonderful apparatus for holding telegraph poles in a vertical position, had negotiated with the postal company for its sale, but unsuccessfully, and had finally gone to the authorities of the other company. They, in the dream, told him they were considering a German invention for the same purpose, and the dreamer crossed the ocean to examine the rival device, returned, explained the differences to the intending purchaser and was writing a reply when he woke in time to hear the end of his companion's question.

The events of the dream had apparently consumed months, yet the actual time that elapsed was merely that required for uttering about four short words.

### Precedent For "Governess."

Albert VII., archduke of Austria, married Isabella Clara Eugenie, infanta of Spain, who brought to him as dowry the sovereignty of the Low Countries, etc. When Philip IV. of Spain ascended the throne in 1621 he took from his aunt the sovereignty of the Low Countries, but left her the title of governess. Her husband died soon after, whereon she took the veil, though still retaining the reins of government. She died at Brussels in 1633, aged sixty-six. Here there is precedent for the use of the word governess when a lady holds the post.—London Notes and Queries.

### Paid For the Opinion.

Shortly after Chief Justice Purley of the court of appeals of New Hampshire had retired from the bench and resumed the practice of his profession a man called on him to get his opinion in a certain matter. After stating his case clearly he said, "Well, judge, what do you think of my case?" The judge promptly replied, "I think you are a scoundrel." "How much do I owe you for that opinion?" inquired the client. "Ten dollars," demanded the judge. The fee was promptly paid.

### Rhodesia's Largest Nugget.

Weighing 21 62 ounces, a gold nugget which measures five and a half inches in length and three inches in width was recently found near Bulawayo. It is believed to be the largest yet found in Rhodesia, and is now in the British South Africa company's museum at 2 London Wall buildings, E. C.—London Mail.

### The Woman of It.

Mother (impatiently)—You have been very naughty today, Juanita. I shall have to tell your father when he comes home. Juanita (aged seven)—That's the woman of it! You never can keep anything to yourself!

### The Determining Factor.

Helen—Sometimes I like waltzing and sometimes I do not. Ethel—It depends on your mood? Helen—It depends on my partner.

Of all persecutions, that of calumny is the most intolerable.—Hazlitt.

## CHILDREN'S ACHES.

**Make Sure Whether or Not They Are Rheumatic Pains.**

Rheumatism is much more frequent in children than in grown people, especially that form called acute rheumatism. Many times the symptoms of rheumatism in children are attributed to growing pains when in reality rheumatism is developing. It has been estimated that at least 25 per cent of the children in our hospitals are there because of rheumatism. As is well known, acute rheumatism in children is liable to produce heart disease, from which the child rarely recovers. The patient may live several years, but is an invalid, and there is little hope for his entire recovery. Therefore, it is very important that rheumatism in children should be guarded against in every possible way.

There are three things that mothers can do to guard their children against rheumatism, especially during cold weather:

First.—See that they are dressed in warm flannels or at least fleece lined cotton undergarments; that their feet are kept dry by wearing overshoes when outdoors, which should be immediately removed when indoors.

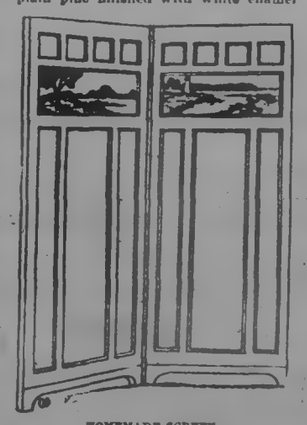
Second.—An overindulgence in sweets, cheap candies, syrups and sugar tends to the production of rheumatism; hence the use of such things, especially between meals, should be prohibited. A liberal amount of sweets with meals should be allowed, but cheap candies between meals are productive of urates in the blood, which are a predisposing cause of rheumatism.

Third.—The child should be encouraged to drink freely of pure water. The habit of taking a glass of water before each meal is a very good one. To keep this up during the cold weather requires some attention on the part of the mother. During the warm weather the child is naturally inclined to drink water enough without any prompting, but during the winter season, when rheumatism is more prevalent, drinking water is neglected.—Medical Talk For the Home.

## ARTISTIC SCREEN.

**One That Combines Cheapness and Good Taste.**

Screens are always useful in the home, and they may easily be made to lend an artistic air to any room. Good taste is shown in the screen illustrated herewith. It may be constructed of plain pine finished with white enamel



HOMEMADE SCREEN.

paint or stained in color, of chestnut either stained or varnished or of other kinds of hard wood, varnished and polished to show the grain of the wood. The pictures at the top may be either water colors, affixed by a narrow molding, or a tooled sketch.—Ladies' Home Journal.

### The Wardrobe.

One of the most important things to be remembered in the care of one's clothes is keeping the wardrobes and cupboard in which they are hung in perfect order and cleanliness, and, above all things, do not forget that they need frequent airing. On a sunny day the doors should be left open for several hours and the fresh air allowed to circulate thoroughly. A bottle of spirits of camphor, with the cork removed, may be hung on a book. This will keep out moths and give a fresh, clean odor to the garments, but not strong enough to make them offensive when worn. Cedar oil, if preferred, may be used in the same way. A dress bodice should never be put away without airing.

### A Clothes Tree.

The furniture of a sewing room should always include a clothes tree, which may be purchased at small expense. For hanging unfinished garments it is of the greatest use, and, of course, there should be a supply of coat hangers, which cost only a few cents each. This is decidedly the best method of disposing of garments that are as yet in unfinished stages. Quite often they must be left with sleeves pinned in or trimming pinned on, in such a way that it is most inconvenient to fold them. If the clothes tree is covered with sheets the garments will be quite as free from dust as if folded away in drawers.

### For Shabby Leather.

For improving shabby leather chairs take a pint of linseed oil, boil it and let it stand till nearly cold, then stir in half a pint of vinegar. Stir till mixed, then bottle for use. When required, shake the bottle well, pour a little on a soft cloth, rub well into the leather, turning the flannel as it gets dirty, then rub with a soft duster till the polish is restored. This polish softens the leather and prevents it from cracking.

### Sail in Separate Ships.

Ottawa, June 15.—Two Government cruisers will be employed this season in the patrol of the waters of the far North. One, under Major Moodie, will be assigned to Hudson Bay, the other, under Captain Bernier, will be sent further north to explore Baffin Bay, Lancaster Sound and Smith Channel, probably as far as Cape Sabine, which was visited by Mr. Lowe three years ago. Major Moodie will transfer the headquarters of the Mounted Police from Fullerton to Fort Churchill. A new post also will be established on Baker Lake, at the head of Chesterfield Inlet, on the west coast.

## Stop That Headache!

**Foolish to Suffer When a Simple Remedy will Prevent and Cure**

Ever stop to think what caused your headaches?

Probably not. Then look to the bowels and stomach, and you'll find plenty of cause. Chances are you'll find constipation, liver is sluggish, stomach overburdened with half-digested food.

No wonder you are dull, tired, restless day and night.

You need the cleansing influence of Dr. Hamilton's Pills which cure your condition in short order.

Being composed of natural vegetable remedies Dr. Hamilton's Pills possess great power, yet they are harmless. They aid all organs connected with the stomach, liver and bowels. In consequence food is properly digested, the blood is pure and nourishing, the body is kept strong and resists disease.

Headaches never come to those who use Dr. Hamilton's Pills, and this fact is vouched for by the Assistant Manager of the Poultry Success Magazine, of Springfield, O., Mr. J. H. Callander, who writes: "No better medicine than Dr. Hamilton's Pills. We use them regularly and know of marvelous cures that resulted everything else. They cleanse the whole system, act as a tonic on the blood, enliven digestion, help the stomach, and make you feel strong and well. For headaches, indigestion, and stomach disorders I am confident that the one prescription is Dr. Hamilton's Pills."

You can rely on Dr. Hamilton's Pills with implicit confidence, their effect is wonderful. Sold by all dealers. Price 25c. per box, five boxes for $1.00, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U. S. A.

## TOWN AND COUNTY NEWS

**DASHES HERE AND THERE BY TIMES' REPORTERS.**

### Phonographs.

Sold on easy payments at The J. M Greene Music Co., George street, New Opera House Building, Peterboro.

### To Learn Bookbinding.

We have an opening for a good, steady lad, to learn the trade of a bookbinder—one of the best of trades. Apply at Times Bookstore.

### Organ for Sale.

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1169.

### Japan vs. Christianity.

A Japanese student now qualifying himself for the Anglican Church ministry in Trinity College, Toronto will preach both services in St. John's church tomorrow.

### To Rent.

That beautiful residence, Holly House," 88 Gilmour street. Bath room, electric lights, good carriage house, stable and grounds. Rent $25.00 per month. Immediate possession. Apply to J. J. Turner & Sons, Tent & Awning Factory, George street, Peterborough.

### Mr. A. Collinge Buried Today.

The funeral of the late Mr. Arthur Collinge, formerly of Mudoc, who died Thursday night at the residence of his brother-in-law, Mr. Thos. Meredith of Lock street, will be held in Mudoc today. The deceased was 32 years of age and was highly respected by those who knew him.

### Child Killed By Poison.

A most deplorable accidental poisoning took place at Oak Lake on Monday when Eva, the little three-year-old daughter of Mr. S. Whitney, took some strychnine. Mrs. Whitney had been using the poison while engaged in papering, mixing the poison with the paste to kill mice, but the package was upset by a younger sister, and the child ate some. Twenty minutes afterwards she was dead. The funeral took place on Tuesday.

## LOCAL INCIDENTS

**By The Times Man on the Street**

—The regular weekly band concert took place in Victoria Park last night.

—St. Paul's Young Men's excursion to Scony Lake on Thursday, was a great success.

—"June 8th" is still on record on the street railway wires. What does it mean?

—You can go bass fishing today without taking a warm and personal interest in the fishery inspectors.

—Something big is going to take place on June 8th. If you don't believe it ask the street car authorities.

—The Provincial Convention of the Ancient Order of Hibernians will be held in Peterborough in August next.

—A party of local fishermen leave this morning for Campbellton to chase the elusive bass and that third queen.

—The annual meeting of the Y.M.C.A. was held yesterday evening for the receiving of reports, election of officers, etc.

—Ensign Norman, of Dundas, will conduct the meetings of the Salvation Army barracks on Sunday afternoon and evening.

—Despite the threatening rain many hundreds of citizens, largely delighted children were out by street car to Jackson Park last night.

—The dry goods and clothing merchants of Lindsay have agreed to close their places of business at five o'clock each afternoon during July and August.

—Sherwood Camps Woodmen of the World, will attend divine service at St. Luke's church on Sunday evening when the rector, Rev. E. A. Langfeldt, will deliver a special sermon to the visitors.

—A number from here took in the circus at Peterborough on Friday last amongst whom were A. Leach, J. and Fred Dowson, W. J. S. Gibbott, H. W. Johnston and A. Hunter. —Millbrook Reporter.

—Rev. E. A. Langfeldt of Peterborough was in town on Saturday last. He brought with him two of his children who will pay a visit to their grandparents, Mr. and Mrs. J. J. Hatley.—Orillia Packet.

—Mr. J. H. Scriver of Saskatoon, Sask., formerly of this city is spending a few days here. He is in the real estate business in the west and says that Saskatoon now has a population of nearly 7,000, and is growing rapidly.

### $9.00 New York and Return $9.00.

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 9.50 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

## SOCIAL AND PERSONAL

—Mr. W. Sheldrick, of Hamilton, is in the city.

—Mr. Albert Todd, of Winnipeg, is registered at the Snowden House.

—Mr. W. G. Armstrong, of New Westminster, is a guest at the National.

—W. L. Shelton, Lindsay, was in the city yesterday a guest at the Oriental.

—Miss Minnie Kenneally, of Peterborough, is the guest of Mrs. T. J. O'Neil.—Hastings Star.

—Mr. W. R. Dennick, of Toronto, contractor for the new carpet factory, was in the city yesterday looking after the work.

—Havelock Standard: Mr. T. E. Dineen spent Saturday in Peterborough —Miss B. Rive spent Monday with friends in Peterborough.

—Mr. Thos. H. Sears, manager of the British Type Founders' agency, Toronto, was in the city yesterday and gave The Times a call.

—Staff Captain McAmmond, of the Salvation Army, left for Port Hope yesterday to attend the concert given in that town yesterday evening by the Temple Band of Toronto.

—Mrs. L. F. Clarry of Hastings, and her father, Rev. Francis Johnston of Lindsay, left yesterday for Montreal where they will sail on a two months' trip to Great Britain and the continent.

—Messrs. J. H. Shaw, Ralph Kellog, Harry Perkins, Cincinnatti, O., passed through the city yesterday, being guests of the Snowden House. They are on their way to Buckhorn for a fishing trip and expect to have a good time.

—H. R. Dennick, L. A. Davidson, Toronto; W. J. Clapman, New York, F. Merrell, Toronto; J. C. Hay, Listowel; R. M. McIntosh, Woodstock; H. L. Pierce, D. F. Wanham, G. N. Henderson, Toronto; are guests at the Oriental.

—Port Hope Times: Mr. David Snell of Peterborough was in town on Wednesday attending the funeral of the late Edwin Rowland.—Mrs. R. Sly, Port Hope, has gone to Peterborough on account of the illness of her mother, Mrs. Gifford.

### Another Hallelujah Wedding.

There will be a hallelujah wedding at the Salvation Army barracks on Monday night next. The ceremony will be performed by Staff-Captain McAmmond. The happy couple are both members of the local Salvation Army corps. They are Bandsman Ernest Sargeant and Miss Amy Greene. Both have made many many friends since their arrival in Peterborough.

## THE SOVEREIGN BANK

Perhaps there is no better indication of the progress of the country and the prevalence of good times than is contained in the reports of our banking institutions.

Amongst those recently published none is more remarkable than that just issued by the Sovereign Bank. Although only established four years ago, its progress is almost astounding, and the figures published in another column are well worth the study of our business men. With a capital of $4,000,000, it has already accumulated a reserve of $1,230,000, and carries forward a balance to credit of profit and loss of nearly $16,000. We cannot do better than quote a few remarks from the General Manager's clear and lucid speech to the shareholders at the annual meeting held this week in Toronto. Mr. D. M. Stewart says:

"There were 32 chartered banks in Canada when we opened our doors on 1st May, 1902, and we stood 32nd on the list. On the 30th April, 1906, we had moved up into 15th place in point of assets, and to 6th place in point of paid-up capital. It is not, however, by such comparisons that I would convey to our shareholders the merits of their own institution, but rather by inviting their careful consideration of the unvarnished figures and hard facts laid before them today.

"I have always had large ideas regarding the position the Sovereign Bank of Canada should take in the financial world, but my ambition ran towards strength and safety rather than size. It is none the less pleasing to me, however, to be able to say that I believe we now have within our reach the happy combination of both solidity and magnitude, and when we hold our 5th annual meeting, I hope we shall be able to celebrate the occasion in a manner satisfactory to the shareholders, and becoming to a great institution."

We can only say that this speaks for itself, and we are not at all surprised that the very able and popular manager received the heartiest congratulations from the shareholders at the meeting.

Peterborough is pretty well cared for as far as banking facilities are concerned, with its six representatives of the largest banks, but we are progressing as a city even more rapidly than any other place in Ontario, as our customs figures abundantly prove, and we should not be at all surprised if before long the Sovereign also opens a branch here. None would be more welcome, as assuredly none are more worthy the confidence of the business public.

### J. J. Turner & Sons Get Large Order.

Yesterday, Messrs. J. J. Turner & Sons, received a telegraphic order from Red Deer, Alberta, for a $200 cottage tent, the same as took 1st prize at the Toronto Industrial Exhibition last year. This order included fittings, viz., tables, beds, chair, etc., complete. Peterborough goods seems to "Get there."

### More Italians in the City.

Yesterday the local Italian colony was augmented by quite a bunch of the sons of Sunny Italy, who, arriving by the noon G.T.R. train, each shouldering the usual jute bag, containing their worldly effects, sought shelter at 217 Charlotte street. They are a respectable and husky lot of men.

### Lieut. Hall Leaves for Cobourg.

Today Lieut. Gerald Hall, with Sergt. Guerin and a private, will go to Cobourg to arrange for the annual camp there of the 24th Field Battery. About 85 officers and men, under command of Major (Dr.) Young, will leave here on Monday for a series of drills and other camp exercises.

### China Missionary Speaks.

Mr. C. L. Blandford, a missionary, who has been twenty years in China, delivered a most interesting address at the Gospel Hall, George street, last night on the subject, "Are Missions in China a Failure?" Mr. Blandford is accompanied by his wife, and is returning to the scene of his labors in China after a brief visit to his home in England. His remarks were most thoroughly enjoyable and demonstrated that the speaker has a most comprehensive grasp upon missionary work in the celestial kingdom.

### Coal Dealers Have an Outing.

The coal men had a great trip per steamer Stony Lake to Burleigh Falls on Thursday. The party included coal dealers from Buffalo, Hamilton, Cleveland, Hastings, Campbellford, Millbrook, Norwood and many points throughout Western Ontario. Mr. Hay, of Listowel, president of the association, and Mr. H. M. MacIntosh, of Woodstock, secretary, were among those present. The local coal barons looked after the visiting dealers in black diamonds, and made things pleasant for them.

### Pat Only Had a Nickel.

Yesterday a good story was told by a gentleman in the Queen's Hotel. The narrator of the yarn went on to note that Pat had not been attending mass as regularly as his duties demanded. His reverence told Pat's wife he would call that afternoon or Pat and remonstrate with him of his short comings.

Pat on hearing of the proposed visit sat at the window looking for the priest. As soon as his reverence's portly form was seen looming up Pat made a hasty retreat through the back door. The rev. gentleman followed him down the street calling, "Pat! Pat! Pat!" Pat, at last, retreated into a saloon. The priest judging there was no escape by the rear, simply waited patiently until Pat came out and was caught. "Look here, Pat, said his reverence, didn't you hear me calling you?" "Yes, father, said Pat, but to tell you the honest truth your reverence, I only had a nickel with me, so I could not ask you in!"

### NO MAN IS STRONGER THAN HIS STOMACH.

Let the greatest athlete have dyspepsia and his muscles would soon fail. Physical strength is derived from food. If a man has insufficient food he loses strength. If he has no food he dies. Food is converted into nutrition through the stomach and bowels. It depends on the strength of the stomach to what extent food eaten is digested and assimilated. People can die of starvation who have abundant food to eat, when the stomach and its associate organs of digestion and nutrition do not perform their duty. Thus the stomach is really the vital organ of the body. If the stomach is "weak" the body will be weak also, because it is upon the stomach the body relies for its strength. And as the body, considered as a whole, is made up of its several members and organs, so the weakness of the body as a consequence of "weak" stomach will be distributed among the organs which compose the body. If the body is weak because it is ill-nourished that physical weakness will be found in all the organs—heart, liver, kidneys, etc. The liver will be torpid and inactive, giving rise to biliousness, loss of appetite, weak nerves, feeble or irregular action of heart, palpitation, dizziness, headache, backache and kindred disturbances and weaknesses.

Mr. Louis Pare, of Quebec, writes: "For years after my health began to fail, my head grew dizzy, eyes pained me, and my stomach was sore all the time, while everything I would eat would seem to lie heavy like lead on my stomach. The doctors claimed that it was sympathetic trouble due to dyspepsia, and prescribed for me, and although I took their powders regularly yet I felt no better. My wife advised me to try Dr. Pierce's Golden Medical Discovery—and stop taking the doctor's medicine. She bought me a bottle and we soon found that I began to improve, so I kept up the treatment. I took on flesh, my stomach became normal, the digestive organs worked perfectly and I soon began to look like a different person. I can never cease to be grateful for what your medicine has done for me and I certainly give it highest praise."

Don't be wheedled by a pushing, grabbing dealer into taking inferior substitutes for Dr. Pierce's medicines, recommended to be "just as good."

To gain knowledge of your own body—in sickness and health—send for the People's Common Sense Medical Adviser. A book of 1008 pages. Send 21 one-cent stamps for paper-covered, or 50 stamps for cloth-bound copy. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

## POLICE NEWS

**Daily Happenings in Court Room and Station.**

Yesterday morning the Labor Loathing Easy Hours Club turned out in good numbers as their usual place of business and pleasure, the police court.

Charles Innes, an Englishman, who had a personal interview three days ago with the local dispenser of police court justice, again made his bow to the rostrum. Cause drunk. Effect, Charles was penitent. Result $2 or ten days.

Acting Magistrate S. R. Armstrong remarked when Charles expressed regret for his indiscretion; "You got over being sorry the last time very quickly."

John McCarney charged with non-support of his family, pleaded not guilty, but said he had been drinking. He was remanded for a week.

Yesterday the Italian Lovergino, who as noted in yesterday's Times was arrested on a charge of stabbing a fellow scion of Italy, by name Sylvestrie, on Thursday night, was given trial at the police court. He was remanded for one week.

## *Farmers' Picnic a Great Success*

**Guelph Gave Good Welcome to Peterboro and Durham Visitors.**

Yesterday a Times representative interviewing one of those who took in the excursion to Guelph under the auspices of the Farmers' Institutes of East and West Peterborough, and East Durham, was assured that the outing this year was the most successful ever held, and to those in charge of the arrangements the great est credit is due. There were over seven hundred on board the special train and all who went had a right royal time.

The special train left Peterborough, at seven o'clock, over three hundred entraining here. The start from Campbellford was made at 5.30 a.m., Practically every village and township was represented, a large number being taken on at each station. A large number from the city took in the trip.

Guelph was reached shortly after one o'clock, and the Ontario Agricultural College was at once visited. Lunch was served at the farm. At the conclusion of the dinner, President G. C. Creelman of the O.A.C., gave a short address, welcoming the visitors. The excursionists then visited the departments of the farm and college, including the Macdonald institute. The poultry department and the horticultural department.

Messrs. Duchenon and Squirrels, the experimentalists, and Prof. Day kindly placed themselves and such valued advice and information at their service.

Among the officers of the institutes, who were largely instrumental in making the trip a success, and who went along, were Mr. Birdsall, president of the East Peterborough Institute, and Mr. O'Reilly, the secretary. Mr. T. A. Kelly, president of the East Durham Institute, and Messrs. T. M. Hunter and Wm. Collins, president and secretary respectively of the West Peterborough Institute.

# ANNUAL REPORT

# THE SOVEREIGN BANK

## OF CANADA

The fourth annual meeting of shareholders of The Sovereign Bank of Canada, held at the head office, Toronto, 12th inst., was largely attended, at which the following reports were presented:—

### GENERAL STATEMENT (Condensed)

**30th April, 1906**

| LIABILITIES. | | ASSETS. | |
|---|---|---|---|
| Notes of the Bank in Circulation | $ 1,416,950 00 | Cash on Hand and at Bankers | $ 2,615,267 56 |
| Deposits | 11,985,236 31 | Bonds, Debentures, etc. | 911,053 50 |
| Balances due to other Banks | 411,853 29 | Call and Demand Loans secured by Bonds, Stocks, etc. | 3,904,731-13 |
| Capital Stock Paid Up | 1,545,416 66 | Commercial Loans and Discounts | 11,691,781 96 |
| Reserve Fund and Undivided Profits | 1,277,160 15 | Bank Premises and other Assets | 447,555 -2 |
| | $16,649,099 75 | | $16,649,099 75 |

### DIRECTORS' REPORT.

Profit and loss account for the year ended 30th April, 1906:—

| | |
|---|---|
| Balance at credit profit and loss account, 29th April, 1905 | $ 16,094 32 |
| Net profits for the year ended 30th April, 1906, after deducting charges of management, Provincial and Municipal taxes, advertising expenses, accrued interest on deposits, and after making full provision for all bad and doubtful debts | 187,467 75 |
| Premium on new stock issued at $125 per share | $ 81,250 00 |
| Premium on new stock issued at $190 per share | 686,550 00 |
| | 767,800 00 |
| | $969,358 07 |
| This has been appropriated as follows:— | |
| Four quarterly dividends at 6 per cent. per annum | $192,923 20 |
| Transferred to reserve fund | 600,000 00 |
| Written off bank premises | 10,000 00 |
| Reserved for rebate of discount on bills | 5,000 00 |
| Donations to hospitals, etc., including South African memorial fund | 1,500 00 |
| | 949,423 20 |
| Balance carried forward | $ 15,231 77 |

### RESERVE FUND.

| | |
|---|---|
| Balance at credit of account, 29th April, 1905 | $ 600,000 00 |
| Transferred from profit and loss account | 62,200 00 |
| Premium on new stock, as shown above | 767,800 00 |
| Total, 30th April, 1906 | $1,230,000 00 |

All the branches of the bank have been inspected during the year.

The most important event during the year was the sale of a large block of stock to the Dresdner Bank at $190 per share net to the bank. The directors recorded their gratification at the unanimity expressed by the shareholders. Out of 1,040 shareholders there were but two dissentients, and their total holding aggregated only 15 shares.

The increase of $3,512,000 in the deposits affords the most satisfactory evidence of the ever-increasing confidence of the public in the Sovereign Bank of Canada.

The number of shareholders in the bank on 30th April, 1906, was 1,119, as compared with 887 in 1905. This wide distribution affords the investing and borrowing public a bulwark of strength and security of incalculable value.

The Directors record their appreciation of the zeal of the staff, through whose efforts the bank has grown to such important dimensions.

The President spoke as follows:—

A year ago I had the pleasure of announcing an increase in the dividend. We paid some 101,000 in dividends during the past year, and after doing this had a surplus from the ordinary net earnings of $84,500, as compared with a surplus of $66,900 the year before ever dividends aggregating only $45,000. On this basis we could easily have paid 7 per cent. and still have had as much to appropriate for reserve fund, etc., as we had at the end of April, 1905.

Before asking the General Manager to discuss the statement submitted I desire to state that in Mr. Stewart we have a gentleman of proven ability, and under his management the shareholders may look forward to even greater results.

The First Vice-President said —

One thing which has pleased me very much is that the enlargement of the bank is attracting more important and influential business than if we continued to be a comparatively small institution.

### GENERAL MANAGER'S ADDRESS.

The General Manager said:—

The profit and loss statement shows the results of the year's business to be quite satisfactory; the bank made more money than in any previous year. He commented on the appropriation of $1,500 to hospitals, etc., and stated that such contributions were both necessary and desirable. He felt sure the shareholders would always approve of donations of this kind if confined to moderate amounts.

He referred generally to the improvement in the bank's position.

| | |
|---|---|
| Capital paid up increased | $2,285,119 |
| Reserve fund increased | 950,774 |
| Circulation increased | 217,960 |
| Deposits increased | 3,512,401 |
| Commercial loans and discounts increased | 5,859,117 |
| Total assets increased | 6,899,103 |

The bank's staff and customers have doubled in two years:

| | 1904. | 1905. | 1906. |
|---|---|---|---|
| Number of officers on the staff | 151 | 247 | 353 |
| Number of depositors | 17,710 | 26,725 | 37,532 |
| Number of discount customers | 3,531 | 6,135 | 7,361 |
| Total number of customers | 21,241 | 32,910 | 44,586 |

Since the previous annual meeting the bank had moved into its handsome ten-story building in Montreal, in which every office was rented. This building is now netting a clear 6 per cent. on the total investment. The balance of the items under this heading represented only $1,000 per branch for furniture, safes, vault doors, etc., all of which were of good value, as $10,000 have been written off these assets to date.

The General Manager stated that during the past year the bank had received applications for 2,992 discount accounts, of which 1,714 were declined. He also referred to the fact that when the bank opened its doors on 1st May, 1903, the Sovereign Bank was 32nd on the list of chartered banks, while on the 30th April, 1906, it had moved up into 15th place in point of assets, and to 6th place in point of paid-up capital. He had always had large ideas regarding the position the Sovereign Bank should take in the financial world, but that his ambition ran towards strength and safety rather than to size. It was none the less pleasing, however, to be able to say that he believed the happy combination of both solidity and magnitude was now within reach.

Votes of thanks were passed to the Directors, General Manager and Staff, and complimentary speeches in connection therewith were made by Hon. James Young, A. Claude Macdonell, M.P., Major Arthur G. Peuchen, Mr. W. J. Barr, and others.

The scrutineers were Messrs. C. E. A. Goldman and A. C. Macdonell.

The following were elected Directors for the ensuing year: Randolph Macdonald, A. A. Allan, D. M. Stewart, Hon. D. McMillan, Hon. Peter McLaren, Arch. Campbell, M.P., John Pugsley, W. K. McNaught, M.P.P., and A. E. Dyment, M.P.

Mr. Randolph Macdonald was subsequently elected President, Mr. A. A. Allan First Vice-President, and Mr. D. M. Stewart Second Vice-President and General Manager.

## *Local Man Strikes it Rich*

The friends of Mr. Andy Devine in Peterborough, will learn with interest that a very rich find has been reported from lot 1, concession 3, township of Coleman. The discovery was made by Andy Devine a few days ago, but the matter was kept quiet until the inspector saw and passed the claim. It is very rich in silver and cobalt and reports credit the inspector with stating it to be the richest and best claim he has seen. He states that it will develop into one of the richest mines in the district. The mine has been acquired by the Beaver Silver Mining Company of Montreal, with the original discoverer in possession of a three eighths interest.

## Walked to Her Death In the Otonabee

### Miss Alice Corbman, After a Long Illness Commits Suicide By Drowning.

Yesterday morning [illegible] river claimed another victim, bearing in its [illegible] Miss Alice Corbman, [illegible] of Mr Stephen Corbman, of 92 Aylmer street. [illegible] morning to be walking up and down George street, acting in a hesitating way that aroused suspicion in the minds of those who saw her. When seen acting in this way [illegible] who was 22 years of age, was on George street a little south of Matthew's packing house, where the street car switch is located. She would walk first to the west side and stand a few moments, stare into the water of the bay and would then act in a similar manner at the east or river side of the road.

A lady who had been watching her, suddenly missed sight of the girl and not seeing her leaving the spot either towards north or south, communicated her fears to several people in the neighborhood. An immediate search party was organized and the water at each side of the street thoroughly investigated and probed with pike poles and sickels. About half an hour after the girl was missed, Mr. Cecil Soucie of Sherbrook street west, who was in a punt helping in the search, located the body and assisted by others got it out of the water and to shore. Unfortunately the girl had been in the long under water to allow any hope of resuscitation, although vigorous efforts were made to recall the spark of life.

Mr. D Bellegham was at once notified and drove in haste to the fatal spot. He then took the remains to his Hunter street undertaking establishment.

Miss Corbman was well dressed, nothing in her attire indicating any excitement whilst preparing to set out on her mission of self-destruction. She had on a dark green skirt, white blouse, and high heel shoes in addition to well made and neat underwear.

Chief of Police Razell notified Coroner Dr. Gray, but when he acquainted himself with the circumstances surrounding the unfortunate affair, decided it was a case of suicide and that no inquest was necessary.

Our readers will doubtless remember the Miss Corbman some weeks ago had a narrow escape from drowning in a well on the premises. She was found in an unconscious state in a bath tub full of water. It was then supposed that she had fainted whilst taking a bath and fell unconscious into the water of the bath.

It seems that the deceased has been ill for some months and the supposition is that this had preyed on her mind thus impelling her to take her rash course of yesterday.

The funeral will be held from her father's residence, at 92 Aylmer st on Tuesday to the Little Lake cemetery for interment.

### Mountains are Shifting.

Geneva, June 16.—M de Varigny, a Swiss scientist, declares that the mountains, especially the Swiss and Austrian Alps, are continually changing, so that an atlas of these districts two years old is no longer correct. The writer states that many villages in the Bernese Oberland and the canton of Valais have been raised or lowered from six to [illegible] in the last few years, and that the [illegible] mountain ranges for hundreds of miles has considerably altered.

### Marriage of Lady Hamilton.

London, June 16.—Lady Mary Hamilton, only daughter of the late twelfth Duke of Hamilton and Brandon, and the richest woman in Great Britain, was married yesterday at St. George's church, Hanover square, to the Marquis of Graham, eldest son of the Duke of Montrose. King Edward was among those present at the ceremony. The church was filled with members of the peerage.

## TURMOIL BREWING IN UNITED STATES

### President Butler of Columbia Warns Students of That University—The Spirit of Unrest Present.

New York, June 16.—Dr. Nicholas Murray Butler, president of Columbia University, in commencement address yesterday, said:

"Unless all signs fail we are entering upon a period of social and economic, perhaps even of political reconstruction. A spirit of unrest is abroad. It appears to be conviction that eighteenth century formulas and axioms upon which our social and political fabric is so largely built do not work as they were expected to work. So far as it has political foundation, it appears to be the perception of the easily demonstrated inequalities of power and influence and of equally easily demonstrated inequality of benefits from governmental policies. I ask you to keep your balance and poise in presence of excitement and turmoil."

## ANARCHISTS IN ENGLAND

### Home Secretary States That Police — are Able to Control Them.

London, June 16.—In the House of Commons an attempt to induce the Government to declare its intention with regard to anarchism resulted in Home Secretary Gladstone cleverly dodging the question.

Sir W. Evans, member from the Tower Hamlets, asked whether anarchists arriving as immigrants were entitled to admission on the plea that they were not police refugees. Mr. Gladstone replied that the Alien Act did not make provision for the exclusion of anarchists as such. The question of whether a would-be immigrant was or was not a political refugee only arose when the immigrant had no means. Each case must be decided on the fact. Answering further, Mr. Gladstone said the police were thoroughly acquainted with the anarchist propaganda in London and would be prepared to take action again, as in the past, should occasion show any need. The latter reply was an answer to a question due to the publication of anarchists papers within a week, openly advocating murder, extolling the murderers and holding them up as an example for imitation.

## W. Peterborough Farmers' Institute

### Successful Meeting Held in the City Council Chamber.

A well attended annual meeting was held Saturday afternoon in the council chamber, by members of the West Peterborough Farmers' Institute, with Mr. T. M. Hunter, president in the chair.

The secretary's report was very encouraging. He noted that crops and general conditions among the farmers of this district had been satisfactory, and that everything points towards a bountiful harvest this fall. He complained, however, that too many farmers come to the meetings, take advantage of the hints and advice given by various speakers, but do not pay up the small fee for membership viz., 25 cents, which will entitle them to all the reports and bulletins issued by the Department of Agriculture. "Would men in any other calling or profession act in that manner?" he asked.

At their first meeting held in Lakefield there were 50 present, and 150 at the evening session. He asked the members and directors to each and every one try to increase the membership by inducing others to come in and make their's one of the most flourishing institutes in the province. The executive desires the hearty co-operation of every agriculturist.

He heartily thanked the press, who sometimes at great inconvenience, sent out their reporters to their various meetings, and wrote up such extended reports for publication, and also the mayor and aldermen who so kindly allowed them the use of their chamber for holding the meetings in Peterborough.

The following directors were elected:—

Harvey—Messrs. Archie Wilson, jr., R. Shaw, Alex Nicholls.

Otonabee—Messrs. R. Hambridge, S. Duvall, S. Murchen, R. Chambers, W. B. Stewart, and Alex. A. Stewart.

Monaghan—T. M. Hunter, J. Drown, H. Foster, T. Brown.

Smith—Fred McKee, T. Milburn, J. McConkey, A. McGregor, and J. Stewart.

Ennismore—J. Telford, J. K. Galvin, D. Crough, S. O'Reilly.

Lakefield—R. Q. Bench, A. C. Garbutt, T. Cullen, Wm Mills, F. E. Kidd.

At a meeting of the Board of Directors afterwards, the following officers were elected:—

President—J. N. Telford, Bridgenorth.

Vice-President—Mr. F. McKee, Selwyn.

Secretary Treasurer—Wm Collins.

Auditors—J. Smith and J. Barnard.

The auditors' report showed a balance in the Ontario Bank of $30.39.

## False Charges Are Denied

### Fishery Overseer Johnston Writes His Department.

It will be remembered by our readers that an evening contemporary, a few days ago, contained some very serious charges made by Mr. Geo. Nurse of Rice Lake against Fishery Overseer David Johnston.

The following letter of complete retraction vindicating this libelled official has been published by the paper containing the charges, and reads as follows:

Dear Sir,—In the issue of your paper of June 11 appears an article headed "Sensational Charges Against Inspector," and enumerates several serious charges against Mr. David Johnston, fishery overseer on the Otonabee River, and which I now feel it my duty to contradict. The following charges were made to his paper in haste and wrongly.

The first charge stated that Mr. Johnston had, about a year ago last winter, wanted to get a petition signed by the South Monaghan people to permit Mr. Wedlock to net muskeats, and for which he was to get a rake-off of $100.

I now contradict this charge knowing that Mr. Johnston never, at any time, had anything to do with any such petition and that I know nothing, whatever of the $100 rake off mentioned and which is untrue.

As to Mr. Wm. A. Nurse's petition, the said petition was around and signed and handed into Mr. Bradburn before Mr. Johnston was appointed overseer and Mr. Wm. A. Nurse was assisted by Mr. Bruce Johnston. The petition was to stop fishing with nets in Rice Lake and tributary waters.

I now acknowledge that Mr. Johnston was no more severe with the Nurse Bros. than he could be with anyone else under the same circumstances. As to the catfish net which I wrongly took from the water near Jubilee Point and which was afterwards captured by Mr. David Johnston, and taken to Peterborough, and in whose possession the net still is, I now acknowledge that Mr. Johnston has been doing his utmost to fulfil his duties in this and every other matter in connection with this case and the preservation of the game fish.

GEO. NURSE.

Gore's Landing, June 14.

The Times, on Saturday evening, had a visit from Mr. Johnston in reference to this matter. Mr. Johnston handed us a copy of a letter which he mailed that day to the Fishery Department, Toronto, which read as follows:

Peterborough, June 16, 1906.

Mr. S. T. Hastedo, Department of Commissioner of Fisheries.

Dear Sir,—I enclose herewith two copies of a Peterborough newspaper which I consider it my duty, both as an officer of the department and in self protection to submit to your notice.

You will see by the paper of June 11th that serious charges were made therein against me, but which are denied in that of June 16th.

By reading these articles you will see they are unfounded charges originated because I did my simple duty, and that the party making them confessed to have lied throughout. I might say that I am seriously considering entering an action against the paper disseminating these false statements. I am, etc.

### Distinguished Physians Coming.

London, June 16.—Some of the first English physicians are arranging to attend the British Medical Association's Congress in Toronto this autumn. They include the King's physician, Sir William Broadbent, and Sir Thomas Barlow, physician to the King's household and to Lord Strathcona.

### Extradition of Hobbs.

Montreal, June 16.—Mr. Arnold Wainwright, representing the Dominion Government, accompanied by Colonel A. P. Sherwood, Commissioner of Dominion Police, left for New York last evening for the purpose of attending the proceedings in New York, for the extradition of David Hobbs, accused of forgeries and customs frauds.

## STORM AGAINST EDUCATION BILL

### Unionist Leader Tells Populace to Expect Another Election in Six Months—Exile for Bannerman.

London, June 18.—They keynote of home politics in the ever-increasing unpopularity of the Government, and the clarion call of Joe Chamberlain. At a meeting of the Union workers he affirmed that the education bill would never pass, and that they might expect a general election in six months. "Therefore," said Joe, "keep your powder dry."

The Roman Catholics are dead set against the education bill. Wales, stated by the Government to be practically unanimous in favor of the measure, is holding mass meetings to protest against it. The church union of Great Britain also is organizing mass meetings to protest against it.

PLAN PREMIERS EXILE.

Irish members of Parliament are against the bill, and the labor party rapidly is breaking out in open revolt against the Government party, as reflected in Wier Hardy's expression, which is that the great hope of the people lies in the break-up of the Liberal party, whilst the greatest fear is that labor may be absorbed by Liberalism.

Humorously enough, the labor party urges Bannerman to take a peerage and retire into the sanctitude of the Upper House. At the same time they propose at an early date to bringing forward of a measure for the abolition of the House of Lords, which, with the help of the Liberals, they have hopes of carrying.

Thirty-two special trains arrived here Saturday filled with Lancashire folk who came up to protest against the education bill. They numbered in all 10,000 people, who paraded the streets headed by the Bishops of Manchester and London. All day the parks were filled with gatherings, and speakers inveighed against the Government's bill.

WILL FIRE THE POPULACE.

This demonstration surely will fire the populace of London firstly, and then spread throughout the country in a wave of violent protest such as no Government ever has known before.

Meanwhile, the old political fiddler, Bannerman, who owes his position to the fact of his colorless character, which made him a possible leader in a party whose factions were at constant loggerheads, has taken fright at the storm raising so rapidly around his head, and strives to persuade the electors that the education bill is a legacy of the late Government. To make his position still worse, it is an open secret that members of the Government are divided against themselves not only on the education bill, but on many other questions.

DOWNFALL OF MINISTRY.

Sir Edward Grey took office on the condition that he was not to be interfered with, and he stands aloof, whilst Asquith, the cleverest man of his party, kept from a leadership which, naturally belonged to him, does not at all approve of the premier's milk and water policy of giving way to the demands of woman suffragists and other cranks in the hope of gaining general popularity. Eventually the education bill will be submitted to the House of Lords. There it will surely be rejected and returned to the lower house with crushing amendments which the government cannot possibly accept. But in the meantime, from what clearly is visible now, the majority of electors will be up in arms, and if the government should be forced to appeal to the country, one of the most remarkable contests of parliamentary and constitutional history might have to be recorded—that of a government having come into office with a majority never known before and being swept from power in the quickest time of any ministry known.

## Ensnaring Victims

### Steps Should be Taken at Once to Prevent Further Trouble.

Here in Peterboro, as in other cities and towns, dyspepsia or stomach troubles are ensnaring victims in a most insidious way.

Nearly every mother's son of us and daughter, too, expects the stomach to accustom itself to all manner of ill-treatment, but the time comes when we cannot abuse it with impunity. How much better it would be to take steps at once to strengthen the stomach and prevent further trouble.

Use Mi-o-na now and soothe the irritated walls of the stomach, and strengthen the gastric follicles so that they will pour out their daily supply of digestive materials with regularity. Then the headaches, sleeplessness, specks before the eyes, poor appetite, tired feelings and nervousness will disappear, and you can eat what you want at any time you like.

Mi-o-na is a combination of remedies, some of which are but little known in this country, and is a positive guaranteed cure for all diseases of the stomach excepting cancer.

Just one little tablet out of a 50 cent box before meals, for a few days, and you will soon regain perfect health and strength, and have no fear of indigestion or stomach troubles.

If you cannot obtain Mi-o-na of your druggist, it will be sent by mail, post-paid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N. Y.

### Drowned in a Drain.

Ste Madelind, Que., June 16.—Jean Baptiste, the nineteen months old child of Mr. Charles Messier, a farmer, of St Simon range, in this parish, was drowned yesterday in a roadside drain which had been filled by the recent heavy rains. The mother was kneading in a shed near the house, when, going to speak to some relatives who were driving by, she noticed the baby's hat on the surface of the water, and search revealed the little one's body. Attempts were made to restore life, but without avail.

### Proceeds of Toronto Licenses.

Toronto, June 18.—The city and the province have received a cheque for $40,000 each, from Mr. W. J. Purvis, chief license inspector, being the first distribution of money for this year.

## Miss M. C. Barlee Is Now a Matron

### Popular Society Belle Becomes the Bride of Mr. Hazen Ritchie.

Much interest was taken, particularly among society circles over the interesting but quietly celebrated marriage, of Miss Mabel Clement Barlee, in St John's church, Saturday morning.

The bride is a daughter of the late George Barlee, esq., and a niece of the late Rev. Vincent Clementi, B. A. The happy man is Mr Hazen Ritchie, son of the late Sir William Ritchie, Chief Justice of the Supreme Court, of Ottawa.

The ceremony was performed by the Rev Canon Davidson. The bride entered the church leaning on the arm of her brother-in-law, Mr. W. D. Parker, of Montreal, who gave her away. Mr. R. J. Devey, organist of St. John's church, played Mendelssohn's wedding march. There were no ushers and no invited guests, although a large number of the bride's friends were in attendance.

Miss Barlee, who was unattended, was charmingly dressed in her travelling costume, an Eton suit of linen trimmed with white braid, with pretty lingerie blouse, with hat to match.

Mr. Harold A. Morrow, C.E., of Toronto supported the groom. The church had been prettily decorated for the occasion by members of the Chancel Guild.

After the ceremony Mr. and Mrs. Ritchie drove to the G.T.R. station, where they took the train. They will spend two weeks on a fishing expedition as guests of the Caladon Mountain Fishing Club in Western Ontario. On their return they will take up residence in Peterborough.

Mrs. Hodgins, wife of Lieut.-Col. Hodgins, D.O.C., of Ottawa, sister of the bridegroom, and her daughters, Miss Betty Hodgins, were present at the wedding.

Miss Barlee has been a valued member of the Chancel Guild, the King's Daughters and the Sunday school of St. John's church, and is one of the most generally popular of Peterborough's young ladies. Mr. Ritchie is also very highly thought of by his many friends in the city, so that this young couple begin married life under most favorable and encouraging auspices.

## Mistake in 24th F. B. Uniforms

The remainder of the uniforms for the members of the 24th Field Battery arrived Saturday and were given out at 7.30 o'clock that evening in the drill hall in Ashburnham. By some mistake of the department a mistake was made in the trousers, i.e., in the "longs." It is probably known to our readers that for the battery there are two makes of trousers, "longs" and riding breeches. About 50 pairs of the "longs" to make a pun were "short;" this mistake will however be rectified in time for the camp.

## Deaf Mutes Go To Belleville

On Saturday afternoon a number of local citizens who are afflicted by deprivation of the powers of speech and hearing left for Belleville to take part in the opening of the tenth biennial convention of the Ontario Deaf Mutes Association.

Among those who went from Peterborough were Miss G. Pilling, Mrs. W. Emery, Mrs. W. O'Rourke, Messrs. Dan. Sheehan, A. Carr, W. O'Rourke, John Hayes, John Shelton, John Crow and E. Lawson.

## POLICE NEWS

### Daily Happenings in Court Room and Station.

Yesterday a familiar ideal character, "Dusty" Dunbar, spent the day in the Hotel des Cops. It seems that the poor old man is incapable of taking care of himself. His mental status, etc., will probably be investigated by the County Crown Attorney and other officials.

There was nothing doing at yesterday's police court. One man, however came in, in response to a summons for not having paid his dog tax, and after getting the tag paid 53 cents costs.

## Russia in Panic Massacres Continue

## QUEBEC WILL REVOLT IF ACT IS PASSED

### Gervais Will Oppose it Strongly and Western Members Will Join With Him.

Ottawa, June 17.—The sentiment among the Liberal members from Quebec over the premier's action in the Cinquars case is increasing, and should the government persist in pushing the Sunday bill it may culminate in revolt.

It is openly stated that Mr. Gervais of Montreal will oppose the bill on the floor of the house, and that he will find supporters not only from Quebec but also from the west. The insurgents, however, can hardly hope for the continued leadership of Mr Aylesworth, who, by virtue of his office, is now upon the order paper as sponsor for the bill.

TELEGRAPHERS PROTEST.

A deputation of telegraphers along the Intercolonial Railway system, headed by Mr. Campbell, grand secretary of the Telegraphers' Union, discussed with the minister of railways the notice the latter has issued, that will prevent I.C.R. telegraphers hereafter from accepting express business for transmission either by the Canadian Express or Dominion Express companies. Since the telegraphers had their dispute with the Canadian Express Company over their rates of commission on express business the telegraphers between St. John and Halifax have been sending most of their business by the Dominion, and in the case of goods destined east of St. John's, this means that they are diverted to the C.P.R. short line. The telegraphers in their interview with Hon. Mr. Emmerson strongly opposed the order that he contemplated issuing to cut off the right they have heretofore enjoyed of accepting express business and drawing a commission thereon.

## LACROSSE.

In Saturday's game at Rosedale, the Nationals went down to defeat before the Torontos by a score of 6—4. The Torontos had the better of the play all through.

## Mr. B. Bellasis Off For Africa

The many friends in this city of Major Bellasis, for some years a resident of Lakefield, will be interested to learn that an expedition will leave London, Eng., shortly, under the leadership of Mr. Brian Bellasis, his son, and a brother-in-law of Mr. R. N. Stuart, Young's Point. The party will obtain bioscopic records illustrating the wild life and industrial activities along the entire route of the proposed Cape to Cairo railway in Africa.

## THE OLD PLEA

### He "Didn't Know It Was Loaded."

The coffee drinker seldom realizes that coffee contains the drug Caffein, a serious poison to the heart and nerves causing many other forms of disease noticeably dyspepsia.

"I was a lover of coffee and used it for many years and did not realize the bad effects I was suffering from its use.

"At first I was troubled with indigestion but did not attribute the trouble to the use of coffee, but thought it rose from other causes. With these attacks I had sick headache, nausea and vomiting. Finally my stomach was in such a condition I could scarcely retain any food.

"I consulted a physician, was told all my troubles came from indigestion, but was not informed what caused the indigestion, so I kept on with the coffee and kept on with the troubles, too, and my case continued to grow worse from year to year until it developed into chronic diarrhea, nausea and severe attacks of vomiting so I could keep nothing on my stomach and became a mere shadow reduced from 159 to 128 pounds.

"A specialist informed me I had a very severe case of catarrh of the stomach which had got so bad he could do nothing for me and I became convinced my days were numbered.

"Then I chanced to see an article setting forth the good qualities of Postum and explaining how coffee injures people so I concluded to give Postum a trial. I soon saw the good effects—my headaches were less frequent, nausea and vomiting only came on at long intervals and I was soon a changed man, feeling much better.

"Then I thought I could stand coffee again, but as soon as I tried it my old troubles returned, and I again turned to Postum. Would you believe it, I did this three times before I had sense enough to quit coffee for good and keep on with the Postum, the result is I am now a well man with no more headaches, sick stomach or vomiting and have already gained back to 147 pounds." Name given by Postum Co., Battle Creek, Mich.

Look in pkgs for the famous little book, "The Road to Wellville."

### Horrible Atrocities Against the Jews Are Reported and Excesses Are Feared in Other Places.

Odessa, June 17.—Instructions have been issued to the effect that all the infantry regiments and army reserve men in the southern and south-western provinces are to be temporarily placed on a "home war footing," in view of the possibility of the peasants rising against the nobles. The Cossacks are to be mobilized into flying brigades.

It is stated that similar instructions have been issued to the provincial commanders-in-chief in Central and Northern Russia.

SITUATION WORSE.

St. Petersburg, June 17.—The gravity of the general situation grows hourly. The bourses of St. Petersburg and Moscow are in a panicky condition and the Social Democrats and Social Revolutionists, considering parliament to be a negligible quantity, are pushing their campaign for an armed uprising with increased vigor. Demonstrations are hourly occurring in the streets of Moscow in favor of a general strike, which the proletariat leaders are trying to precipitate a conflict. The agitation among the workmen has reached the boiling point, and patrols are again in heavy force.

In the country the rural guards are throwing in their lot with the peasants, refusing to protect the landlords. The progress of the revolutionary propaganda in the army is seriously alarming the government, and to add to the popular excitement comes the massacre of Jews at Bialystok. While the reports conflict as to the immediate responsibility for the outbreaks the authorities here cannot escape responsibility for the provocative Black Hundred placards which they caused to be printed all over Russia, appealing to the worst passions of the mob against the Jews as the enemies of the country. The government is undoubtedly frightened at what has occurred.

MASSACRE CONTINUES.

Martial law has been declared at Bialystok and troops are being rushed to the scene, just according to the latest reports the hunting down of unfortunate Jews continued unabated yesterday afternoon and night, accompanied by indescribable horrors. The commission despatched to Bialystok by parliament can be relied upon to make a partisan response to the country of any dereliction of the authorities.

The leaders in the lower house of parliament are convinced that it is the present intention of the government to prevail on the emperor to order a recess of parliament, and they have taken the important resolution not to obey the imperial order. This amounts to open defiance, and is a purely revolutionary step. The plans of the leaders were secretly formulated, but it is known that if the government turns the lower house out of the Tauride Palace the leaders contemplate an attempt to continue the sittings independently. In other words they will try to seize the reins of power.

A DEADLY PARALLEL.

The eternal parallel of the French revolution, which keeps recurring, is thus again in evidence. The members would probably be required to swear as did those of the French assembly at the tennis court, to meet wherever circumstances require it, until a constitution is established on a solid foundation. If this stage is reached a dictatorship or the surrender of the government is inevitable. The emperor must swear to abide by the constitution as Louis XVI did, or proclaim a dictatorship. The latter step is sure to be the precursor of a bloody revolution, which perhaps the former will only delay.

The Reich believes that the case of M. Volianoff, whose expulsion from parliament for a press offence is demanded by the government, is the first step in the government's attack of parliament, which the ministry is trying to persuade the world is a revolutionary body, warns the government that an attempt to dissolve parliament will plunge the country into horrors of which the government has little dreamed, and declares the government must be blind to imagine that such a step can succeed, adding:

"Like a poor chess player, the government fails to see that this move can only lead to a checkmate."

WAS PLANNED.

M. Vinaver, a Constitutional Democratic member of the lower house, has received the following telegram from Bialystok:

"The rioting proceeded throughout the day with unabated fury, and is still continuing, with no signs of cessation. It is impossible to send particulars of the horrors."

In spite of the story about the bomb-throwing, it was known for weeks past that a massacre of the Jews was likely, but no steps were taken to prevent it.

## BASEBALL.

The result of Saturday's Eastern League games were as follows:

Rochester 6, Buffalo 4.
Toronto 6, Montreal 9.
Providence 4, Baltimore 4.

For POPULAR PRICED— CLOTHING

## Your 'Fagged' Feeling is Spring Sickness

**This Unhealthy Weather Will Intensify Your Exhaustion Unless You Have Good Medicine.**

Time won't help; matters grow worse instead of better if your system isn't rid of its poisonous burden.

Your blood is not only thin, but is contaminated with a whole winter's accumulation of wastes.

A stimulating blood tonic is required.

What's it going to be?

No bitters or alcoholic dope, but concentrated cure in the form of "Ferrozone" which is known as the best of all spring rejuvenators.

It creates keen appetite.
Produces prodigious digestion.
Converts food into nourishment.
Gives richness and vitality to the blood.

Makes strong nerves and hardy muscles.

Ferrozone possesses power that can't be doubted. It will do for you what it did for Walter Wood, of Beaufort Car Co., N. B., who writes: "I can say that Ferrozone has given me a new lease of life. A year ago I suffered much from nervous weakness. I was really scarcely able to drag myself around. My appetite was gone, I had no color or ambition and felt generally used up. The first box of Ferrozone started me back to health. I took a number of boxes, but it was worth while as my health was completely restored."

Get back to health with Ferrozone. Your druggist sells it, 50c. per box or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBORO, JUNE 15, 1906

### UNDERMINING THE CZAR

In devoting their energies to winning over the Russian army the revolutionists of that troubled Empire have begun to undermine the throne of the Czar. If they succeed in luring the soldiers of the Imperial Government from their traditional allegiance to the Emperor he will have no defense worthy of the name against red revolt.

The much-talked-of devotion of the Russian people to their "Little Father" has proved a broken reed for the Czar to lean upon in the hour of peril. He found safety only in his troops when Russia was torn with riots and revolutionary uprisings. If the army had failed his throne would have fallen.

The Nihilists, Anarchists and other revolutionists have strong hopes of winning over the army. Why not? The soldiers come from the homes of the masses. They cannot be kept out of touch with their kinsfolk. They must be influenced by the feeling of their class. Certainly the lot of the private soldier in the Russian army is not so fortunate that he has much reason to stand by his rulers against the common people.

There is only one enduring hope for the Czar and his Government. It lies in the chance that reforms and wise liberality on the part of the Imperial authorities may win the real loyalty of the Russian people. If the throne of the Romanoffs stands many years it must rest on the unforced and heartfelt support of an enlightened Russian nation.

### AN ARROGANT DEMAND

The fact that John Mitchell is taking a hand in the present coal strike with a view to settlement probably means continued industrial war. One of the points of difference between the operators and the miners that is characteristic of labor controversies is the demand of the United Mine Workers of America that less than a dozen men who were employed to care for the mines after the miners refused to do so should be discharged. The unreasonableness of this demand is fully apparent to every one who believes in justice and right. The mine owners were obliged to take care of their property when the miners walked out. If this care had not been exercised there would be no mines for the miners to go back to. The caretakers necessarily were non-union men, for that was the only kind the owners could get. Now, after the miners have decided to go back to work in the mines that have been kept waiting for them, they demand that the caretakers be discharged from all employment about the mines. The operators, as a matter of principle, have refused this unreasonable demand. In the meantime thousands of men who are willing and anxious to work are held back and their families are deprived of their earnings. Can Mr. Mitchell ratify and justify this "principle" of unionism?

### HENRY BELL'S COMET.

**The First Steamer That Plied For Hire In Great Britain.**

Among the curiosities of advertising may surely be placed the first advertisement of the first steamer that plied for hire in Great Britain—namely, Henry Bell's Comet. Thus ran the advertisement in the Glasgow Courier of 1812:

"Steam passage boat, the Comet, between Glasgow, Greenock and Helensburg. For passengers only. The subscriber having at much expense fitted up a handsome vessel to ply upon the river Clyde between Glasgow and Greenock—to sail by the power of wind, air and steam—he intends that the vessel shall leave the Broomielaw on Tuesdays, Thursdays and Saturdays about midday or at such time thereafter as may answer from the state of the tide and to leave Greenock on Mondays, Wednesdays and Fridays in the morning to suit the tide. The elegance, comfort, safety and speed of this vessel require only to be proved to meet the approbation of the public, and the proprietor is determined to do everything in his power to merit public encouragement. The terms are for the present 4 shillings for the best cabin and 3 shillings for the second, but beyond these rates nothing is to be allowed to servants or any other person employed about the vessel."

What would poor neglected Henry Bell have said could he have seen his humble little Comet, of whose elegance, comfort and speed he was so proud, alongside a modern ocean racer or one of the latest palatial river steamers of the Clyde or Thames, all so well advertised?

### THE JUNE "ROD AND GUN"

With midsummer heat, people's thoughts are turning to vacations, and they are seeking to escape from the man-made cities to the delightful haunts of Nature, and the simple, free, and untrammeled life of the God-made country. Again Rod and Gun and Motor Sports in Canada, published by W. J. Taylor, at Woodstock, Ont., is prepared to give them just the information they seek. The June number is devoted to Boating and Summer Resorts and the longing to be away from toil and turmoil will come over most people as they turn over the pages of this fascinating Magazine. The choice of outings in Canada is infinite in variety and attractiveness, and some very fine samples are presented for consideration in this number. From the east to the west, places within easy access of civilization, and those remote from the throbbing life of cities, seaside, backwoods, and mountain resorts, all receive notice: while sportsmen of every kind find some fare dealing with their own particular field. The immense strides motor boating has made in Canada are fully dealt with in this number, and the Toronto Canoe Club, the largest organization of the kind in the world, is the subject of a specially illustrated article. Hunting and fishing remain, as ever, the special strength of the Magazine, which in entering upon its eighth year shows all the symptoms of a healthy vigorous life, and justifies to the full the statements made in the birthday retrospect, and gives promise of continuing, with even more effectiveness, its good work for the future. The numerous attractions presented by Canada to the sportsmen and tourists of the world are becoming more widely known each month through the pages of Canada's premier Sportsmen's Magazine.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### The Truce of God.

One of the most curious of the many queer mediæval customs was that known as "the truce of God." From what we have been able to learn of it the custom appears to have originated as an outgrowth of a desire to protect the common people to some extent at least against the lawless tyranny of the feudal lords of the middle ages. It was first decreed at a church synod which convened at Roussillon in the year 1027. By this decree it was provided that no man should attack his enemy between Saturday evening at nones and Monday morning at the hour of prime. About the year 1032 a similar compact was entered into between the church and the barons of England. The church forbade barons to make any attack upon each other between sunset on Wednesday night and sunrise on the following Monday or upon any feast or fast day. The same truce made provision that no man should be disturbed while laboring at his trade or while going to or from a place of worship.

The Celebrated English Cocoa.

**EPPS'S**

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**COCOA**

The Most Nutritious and Economical.

**Thin Blood**

Experience count anything with you? Then what do you think of 60 years' experience with Ayer's Sarsaparilla? Sixty years of curing thin blood, weak nerves, general debility! We wish you would ask your own doctor about this. Ask him to tell you honestly what he thinks it will do for your case. Then do precisely as he says.

We have no secrets! We publish the formulas of all our medicines! J. C. Ayer Co., Lowell, Mass.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart and Wilton, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the check will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

felon's manacles seemed actually to be visible. His very tone thrilled helplessness and heartbroken agony.

"And if we chose," he said heavily, "there is no retreat save slavery. Our chains are ready. We may hear their clanking on the plains of Boston! Is life so dear or peace so sweet as to be so purchased?"

He lifted his chained hands toward heaven. "Forbid it," he prayed, "Almighty God!"

With the words he straightened. His tendons strained against the fetters, and they fell from his wrists as he sent a look at the quaking loyalists of the house that chilled their blood.

"I know not what course others may take"—oh, the hissing scorn of that now triumphant voice!—"but as for me—as for me—give me liberty or give me death!"

Anne heard what followed as in a dream. She heard the studied oratory of Richard Henry Lee, aided by the elegant gestures he practiced before the mirror. She heard Thomas Nelson, the richest man in Virginia, no longer shifting in his seat, now crying out that if British troops should be landed

*"As for me, give me liberty or give me death!"*

in the county of which he was lieutenant he would obey no forbidding, but call his militia and repel them at the water's edge.

She saw standing on the committee appointed to carry out Henry's resolution to arm the colony—greatest marvel of all—the very men who had cried out against it. Mr. Pendleton, Colonel Harrison, Colonel Bland.

At that moment a vast army began forming. From those walls in which later Benedict Arnold was to quarter his British marauders the message flew that day. One by one the battalions gathered, strong, but invisible. They were not called by drum or trumpet. They had no camp nor field nor garrison. But at plow, in shop or in chamber the recruits silently answered the summons and stood ready.

It had been the hour and the man. The hour had started the initial impulse of the Revolution, and the man was Patrick Henry.

CHAPTER XII.

"SHUT the door!" the earl commanded.

Foy did so and returned to his seat across from the governor in the arras walled council chamber at the palace. He sent a shaky look at Armand, who sat at ease in egg-blue satin and lace, attired for the evening's rout. And the look was malevolent.

Lord Dunmore's face this night forced slow hate, and he sat hunched in his chair. "Has Connolly come from the ship yet, Foy?" he asked.

The other shook his head.

"Hell's teeth!" raved the earl, leaping from his seat and striding up and down. "I'll show them! Tomorrow they shall whistle for their powder! There are the Indians still, and then the slaves. If I have to raise the plantations, I'll bring these snivelling rebels to their knees! Freedom, forsooth! 'Tis the king's hand rules, and my hand for the king's in the Virginias!"

He paused in front of Armand and beat the table with his fist.

"And the slipperiest of them all you shall snare us, my fine marquis. 'Tis Patrick Henry! Haunch of a basted swine! A nice picture his tongue licks up for the clods! He is in Williamsburg tonight, and he shall not leave it till he sails for London and a gallows tree!" He strode off again in a rage, his face working like a Satan's.

At last he left off. "Give him his orders, Foy," he said quickly.

Foy leaned forward, chin in palm, and spoke.

"You will write a message now to Henry which I shall dictate. It will state that you are in receipt of news from France affecting the colonies and desire his immediate presence at a place which I shall name. You shall go further to await Henry and detain him there till my own arrival with an armed fle. Do I make myself clear?"

The young foreigner waved his embroidered arm lightly. "I beg to remind his excellency of our bargain."

The governor faced around with something like a snarl and sat down heavily.

"I was to write certain letters to De Vergennes, King Louis' minister, and to Beaumarchais—letters in the hand of the Marquis de la Tremerie, signed with his signature and seal. These have been written. They have said of the situation in this colony only what you would have them say, have they not? And you have sent them. Is it not so?"

The earl narrowed his eyes.

"I have done your excellency's bidding. You are not satisfied. Very good, monsieur. We turn the page then."

"Ho!" said Foy. "'Tis not as difficult for a nobleman to get money, eh, Master Clerk? What fine colonial bird have you plucked now? I' faith, a nice swagger of a sudden! Marry! Art going to wed with a plantation then?"

Lord Dunmore snorted and threw himself forward in his chair.

"Nay!" he shouted. "The bargain ends not here, my lily livered poacher! Letters, haith, when there is open rebellion? Small need I have for pen work now! 'Tis neck twisting I am for, and you shall aid me with a bait for that stubborn rump Henry!"

Foy drew forward pen and paper. "Will you write?" he asked.

"No," said Armand composedly.

(To be continued)

## *May Reorganize Detective Force*

Toronto, June 15.—It is probable that a complete reorganization of the provincial detective force will follow as the result of Inspector Murray's demise.

This reorganization will be undertaken at an early date nd it is understood that the changes may be of a very radical character.

It is anticipated that some new blood will be added to the force, its size increased, and efforts made to inaugurate a better working system.

Some cases in the recent past, notably the Hamilton murder mystery, are alleged to have failed by reason of the inadequacy of the present system, and an effort will be made to better the existing conditions.

**One Hundred Dollars in Two Years Brings One Hundred Thousand Dollars.**

The stock of the Two Stars Mining Company in old Mexico sold at $10.00 per share. Today it is selling at $10,000.00 per share. That is not the only mine in Mexico or the last opportunity. Let us give you information concerning another property in Mexico that has a future. Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. ## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

## SYNOPSIS OF CANADIAN NORTHWEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quarts.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet.

The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

# Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous figures of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

**THE COLONIAL DIAMOND MINING COMPANY**

controlled largely by British capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

# 100 PER CENT. ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**

AND

**$5.00 PER MONTH**

FOR FOUR MONTHS WILL BUY

**500 Shares**

OF STOCK WHICH MAY SOON BE WORTH

**$500.00**

This opportunity to buy stock will not last always. Price will promptly advance May 1st, and shortly thereafter be withdrawn from the market.

## On the Ground Ahead of the Boom

## ABOUT FEMALE AILMENTS

**Not Hard to Cure If Properly and Promptly Treated.**

Ask any intelligent physician what causes nine-tenths of all female diseases, even including anaemia, nervousness and consumption.

Back comes the answer, quick and sharp "Constipated Bowels."

There is scarcely a single female ailment that had not in the earlier stages symptoms of constipation.

How much better it is to avoid it without the poisonous medicines caused by constipation. How much clearer the complexion, how much fresher one feels when the system is pure and clean.

Think it over yourself.

Isn't it apparent that a good regulator and liver stimulant such as Dr. Hamilton's Pills is sure to do good?

Gay spirits, good looks and rugged health have returned to many a sick woman through Dr. Hamilton's Pills.

Better get a few boxes to-day. Purely vegetable, free from dangerous ingredients, healthful and antiseptic Dr. Hamilton's Pills will assist you in a thousand ways.

An delay is always dangerous. What plain duty is to follow the example of Mrs P. Rowe, who sends the following letter from Gravelle, Port Au Port, Newfoundland "Four years ago I got kidney and bladder trouble. I thought it was female trouble and treated it accordingly. Even my doctor in St John said it was so.

"In reading about Dr. Hamilton's Pills I noticed symptoms like mine and I bought six boxes. These pills went right to work on my sick condition and helped me from the first. My supposed female trouble, which was bladder disease, was cured. My weight increased eight pounds and never before was I as well as today. Dr Hamilton's Pills did it all."

All dealers sell Dr. Hamilton's Pills, 25c. per box or five boxes for $1.00, by mail from N. C. Polson & Co., Hartford, Conn., U.S. A., or Kingston, Ont.

## PETERBOROUGH BUSINESS COLLEGE

opens on

TUESDAY JAN. 2, 1906

Intending students would make application as soon as possible.
Call at the College or address

WM PRINGLE,
Opposite Post Office. Principal.

## LOCAL INCIDENTS

By The Times Man on the Street

—Strawberries keep high in price.

—Pay up 25 cents and join the West Peterborough Farmers' Institute. It is a good investment.

—The summer train service between Peterborough and Lakefield will go into effect today. The morning train will leave Peterborough at 8.30 o'clock, the noon at 11.55 and the evening at 5.40 o'clock.

—Mr T. W. Robinson has opened his store on Jumper Island, Stony Lake, for the season. The daily mail service will start on Monday and the post office will be known as Jumper Island, instead of Stony Lake.

## SOCIAL AND PERSONAL

—Mrs Geo. Rverson, McDonnel St., is visiting her parents in Galt.

—Mr A D Sopher, New York, was a guest at the Oriental on Saturday.

—Mr C. W. Martin, Buffalo, was a guest at the Snowden House on Saturday.

—Mr Samuel Belver, Montreal, was registered at the Oriental Hotel on Saturday.

—Miss Mabel Ray of Toronto, is visiting for a few days with her friend, Miss Gertie Brooks, of the Palace Hotel.

—Jas Duncan, an old Peterborough boy, now wine clerk at the Hotel Del Monte, Preston Springs, is in the city visiting his mother in the east ward.

**C. G. E. Angling Club Busy.**

Saturday afternoon the members of the Canadian General Electric Angling Club, took their first outing for the season. They left for a fishing trip to Rice Lake in Mr R. M. Roy's yacht, the Rob Roy. Aboard the stout little str Rob Roy, with "Bob" at the wheel a pleasant trip was ensured.

**$9.00 New York and Return $9.00.**

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 7.50 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

**Woodmen at St. Luke's Church.**

Despite the wet weather last night there was a good turn out of the members of Sherwood Forest, Camp No 50, Woodmen of the World, to St. Luke's church, where Rev. F. A. Langfeldt delivered a special sermon to the visitors. The music was of an attractive character.

**Bell Telephone Co. Kept Busy.**

The Bell Telephone Co. have a gang of men working from Locust Hill to Peterborough putting up a new telephone line between this city and Toronto. Already the line between Toronto and Locust Hill is in use, and it is expected that Peterborough will be connected this summer.

**Large Auto Party in the City.**

At noon Saturday an auto-party from Toronto, friends of Mr. Reid of McGregor & Reid, arrived in a automobile of high power and speed. A steam yacht was chartered and in the afternoon the party went out fishing. Those in the auto were Mr. and Mrs. Hugh Reid, Mr. A. H. Reid, Mr. and Mrs. J. M. Downer of Toronto, Mr H Bryse, Port Perry.

**Auto-Bus Delayed By Strike.**

Owing to a strike now on in Buffalo the new auto-bus that was to have arrived in the city Saturday, will not now be shipped until Wednesday and will arrive here on Friday night or Saturday morning of this week. Mr. E. B. Olmstead, secretary of the Auto-car Co. of Buffalo, together with an experienced chauffer will accompany the machine. The new bus will, on arrival, at once be placed on the Peterborough-Chemong route.

**Late Rev. W. M. Roger Eulogized.**

Yesterday during the morning service in St. Paul's church, Rev. Dr. Torrance, the pastor, in feeling terms made special and eulogistic reference to the life work and lamented death of the late Rev. Walter M. Roger, who was a son of Rev. J. M. Roger for forty-two years minister of St. Paul's church, Peterborough. There was a large attendance, and the rev. speaker's words visibly moved many of those present.

## Mr. and Mrs. G. May In An Accident

**Horse Frightened By Auto and Occupants of Buggy Flung Out.**

A buggy accident that might have been attended by most serious results occurred near the Roman Catholic Cemetery, Saturday at noon.

It seems that as Mr. and Mrs. Geo. May, who live in North Monaghan, were driving home, and reached the corner of Alfred and Chamberlain streets, Mr. May's horse took fright at an automobile, throwing the occupants of the vehicle out.

Mrs May was not seriously hurt, but sustained a severe shaking up. Mr. May however, was not so fortunate. When he was thrown out he alighted between the buggy and a tree, severely injuring his chest. He was conveyed to the residence of his son, Mr. Bert May, corner of Brown and Chamberlain streets. Medical assistance was summoned, and Mr. May's injuries attended to.

He is very severely hurt, about the back part of the chest. It pains him to breathe but nothing serious is anticipated.

Mr May's buggy was very badly wrecked.

This is the second accident that has taken place in this locality within the past week.

## CHRISTIANITY IN JAPAN.

**Mr. Iwai, a Japanese Student of Trinity College Preached at St. John's Yesterday.**

At St. John's church yesterday, Mr. Iwai, a Japanese student in Trinity College, Toronto, who is studying for the Church of England ministry, preached at both the morning and evening services. His addresses were in connection with the missionary efforts of the Anglican church in Canada and abroad, and Mr. Iwai, after his ordination will return to Japan and engage in the work of disseminating the truths of christianity among his own people.

In the morning, Mr. Iwai gave his own experience at home in the Great Britain of the East, where he had his family professed Buddhism, of which religion, however, they knew no more than could be acquired by observation and tradition. Buddhism, he pointed out, is overshadowed by Confucianism, the tenets of which form the moral character of the Japanese, in cultivating loyalty, obedience, faithfulness, purity of home life, and true friendship one for another. All these virtues, however, added the speaker, is dominated by Shintoism, which is based on respect for ancestors, for country, and for the Imperial House, and unites all Japanese, whatever other faith they may hold, in the celebration of ardent patriotism. Nine hundred out of every 1000 Japanese, while professing Buddhism are morally trained by the ethics of Confucianism and Shintoism. Mr. Iwai was educated in a high school, and thence sent to the university at Tokio, where he met with a christian friend, who was instrumental in bringing about his acceptance of the doctrines of christianity, and his recognition that moral teachings for home life are not all sufficient for the human race.

In the evening Mr. Iwai enlarged upon the crying need in Japan for missions and christian clergy to teach the soul-satisfying doctrines of christianity, introduced into the country but 55 years ago. Buddhism, Confucianism and Shentoism, the three blended into one, have formed the Japanese present high moral character; their priests have paved the way for the higher and spiritual teachings of Christ's church, and it now remains for missions and teachers, generously supported by such congregations as those of St. John's and sister churches, to continue the glorious work of converting the whole of Japan to the faith which not only elevates the moral character of a nation, but reveals the existence of a living God, and the inheritance of eternal life.

## *Fish Caught in City Limits*

**Peterborough Unique in Having Good Fishing in its Borders.**

A Times' representative on Saturday afternoon saw two splendid maskinonge, each running from eight to ten pounds in weight, that were caught about 10 a.m. that day in the channel between the C.P.R. spur line running to the American Cereal Company's mills, and the west bank of the Otonabee, near the C.P.R. bridge, by Mr. Herold Snowden. Mr. Snowden had for some time known of maskinonge being in the neighborhood and getting his canoe out, paddled to the spot and began trolling. He quickly landed these fine fish and lost another, which of course, (consult all fishermen as to such cases) was much heavier than those taken.

This is going some to haul out from 15 to 20 pounds of game fish in the heart of a city of 13000 inhabitants. What other city of the size can show a similar record? We offer a genuine leather medal to the mayor of any city of same population that can show, that two maskinonge weighing 20 pounds, were caught in the centre of his town.

**The Attempted Train Wrecking.**

Almonte, June 15.—Provincial Detective Rogers is here investigating the attempted wrecking of a C.P.R. passenger train by means of rails piled up on the track a week ago.

**Fishing Good at Buckhorn.**

Mr. Tom Eastwood, the genial host-face of the hotel of that ilk at Buckhorn, was in the city on Saturday, a guest at the Snowden House. Mr. Eastwood told The Times that the hotel is already full up and will be so for some days. Guests from Buffalo, Rochester, Cincinnati and other American points are rapidly pouring in. Tom noted that everything points towards the fishing at Buckhorn and that district being better this year than ever before.

### Does Your Stomach Bother You?

**Dr. Shoop's Restorative Cures All Distressing Stomach Troubles Through the Inside Nerves.**

As you value your health and happiness don't neglect to care for the slightest stomach pain—don't let it go. At the first sign of distress use Dr. Shoop's Restorative and end all these troubles. These aches are signals—they are symptoms of coming disease—it is wise to ignore them? You who never eat a hearty meal without a sense of fullness [illegible] followed by a period of lassitude or [illegible] drowsiness—beware. Neglect these needful [illegible] and you surely invite distressing indigestion—you'll become a sufferer [illegible] miserable dyspeptic. Do you [illegible] experience any of these symptoms? [illegible] stomach—distress after eating, returning of food [illegible] to mouth, wearing at [illegible] pit of stomach, rumbling [illegible] of gas, belching of wind, [illegible] loss of appetite, heartburn, [illegible] headache, dizziness? If you [illegible] sufferer in any of these ways, your duty is clear—there is but one [illegible] course open to you—strengthen the inside [illegible] nerves—these special stomach nerves—shake off forever this evidence of disease. Put the digestive nerves in condition to act as nature intended they should. Don't drug, don't force—just give the inside nerves natural force, gentle tonic, nature's help. Dr. Shoop's Restorative should be taken to do this—it is the only prescription which builds up or even attempts to restore the inside stomach nerves. Sold and guaranteed by

J. D. TULLY.

Do You Feel Like This?

### Whose Say-so is Best?

With nearly all medicines put up for sale through druggists, one has to take the maker's say-so alone as to their curative value. Of course, such testimony is not that of a disinterested party and accordingly is not to be given the same credit as if written from disinterested motives. Dr. Pierce's medicines, however, form a single and therefore striking exception to this rule. Their claims to the confidence of invalids does not rest solely upon their makers' say-so of praise. Their ingredients are matters of public knowledge, being printed on each separate bottle wrapper. Thus invalid sufferers are taken into Dr. Pierce's full confidence. Scores of leading medical men have written enough to fill volumes in praise of the curative value of the several ingredients entering into these well-known medicines.

Amongst these writers we find such medical lights as Prof Finley Ellingwood, M. D., of Bennet Medical College, Chicago; Prof. Hale, of the same city; Prof. John M. Scudder, M. D., late of Cincinnati, Ohio; Prof. John King, M. D., late of Cincinnati, Ohio; Dr. Grover Cox, of New York; Dr. Bartholow, of Jefferson Medical College, of Pa., and scores of others equally eminent.

Dr. Pierce's Favorite Prescription cures the worst cases of female weakness, prolapsus, anteversion and retroversion, all secret irregularities, cures painful periods, dries up disagreeable and weakening drains, sometimes known as pelvic catarrh and a multitude of other diseases peculiar to women. Bear in mind it is not a patent nor even a secret medicine, but the "Favorite Prescription" of a regularly educated physician, of large experience in the cure of such peculiar ailments, who frankly and unreservedly takes his patients into his full confidence by telling them just what his "Prescription" is composed of. Of no other medicine put up for woman's special maladies and sold through druggists, can it be said that the maker is not afraid to deal thus frankly, openly and honorably, by letting every patient using the same know exactly what she is taking.

Sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is guarded as sacredly secret and womanly confidences are protected by professional privacy. Address Dr. R. V. Pierce, Buffalo, N. Y.

How to preserve health and beauty is told in Dr. Pierce's Common Sense Medical Adviser. It is *free*. For a paper-covered copy send Dr. R. V. Pierce, Buffalo, N. Y., 21 one-cent stamps to cover mailing *only*; in cloth binding 50 stamps. Dr. Pierce's Pellets cure constipation.

**They Danced a Buckhorn Jig.**

The party of Cincinnati, O., gentlemen, captained by Mr. Perkins, who is noted in Saturday's issue of The Times, are stopping at the Buckhorn Hotel on Saturday afternoon, tendered to Mr. Tom Eastwood at the Snowden House, that that day, before noon they had caught the full legal limit of bass and maskinonge. Another gentleman telephoning from Buckhorn said the American visitors were at that moment dancing a Buckhorn jig on the rocks in front of the hotel. The Cincinnati visitors are loud in their praises of the fishing in that part of Kawartha Lakes.

Department of Railways and Canals, Canada

RIDEAU CANAL

**Notice to Dealers in Cement**

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Cement," will be received at this office until 16 o'clock on Saturday, the 30th June, 1906, for the supply of 1,750 barrels of Portland Cement, to be delivered in sacks.

Specifications can be procured at the office of the Superintending Engineer of the Rideau Canal, Canadian Building, Ottawa, on and after this date.

The Department does not bind itself to accept the lowest or any tender.

By order,

## Russian Bakers and Butchers on Strike

### Increasing Evidences of Intention of Radicals to Force the Inevitable Conflict With the Autocracy and Precipitate a Revolution

St. Petersburg, June 19.—The Constructionist assembly. The meeting constitutional Democrats [illegible] refused to listen to his statement that ready to close in their ar[illegible] with the Government could not be said revolutionaries of the [illegible] to fight to the death with the three months the question of [illegible] ing the party's tactics and [illegible] ing any further attempt to reopen an open rupture with the Govern[illegible] ment was entirely lacking. Professors Mitchell and Nowgoroff, leaders of the Constitutional Democrats in the Lower House, led the Radical wing, urging the necessity of keeping pace with the revolutionist movement, and insisting that unless they moved forward a little immediately they would be overwhelmed and left stranded. Prof. Minkoff, M. Vinaver and others counselled caution, saying it was not yet time to bend to the storm, but the Radicals were in the majority. The Novoe Vremya yesterday says that the Constitutional Democrats have actually resolved to break with the Government within a few days. Mr. M. Struve, editor of the Osvoboshdenie, informed the Associated Press that no decision had been taken. He admitted, however, that the leaders plan were secret. Many of the Liberals fear a rupture and regard the contemplated step as a grave error, claiming that the Constitutional Democrats cannot hope to keep step with the advanced Radicals, who at a meeting held in the suburbs of St. Petersburg last night not only condemned the lower house of Parliament with the recently dissolved Constitutional Democrats as traitors, but even denounced the group of toil.

M. Alladin was hissed when he tried to explain the absurdity of the contention that the house must demand what the Emperor common a

BAKERS AND BUTCHERS STRIKE.

The strike continued exten[illegible] strikers threatening to wreck the shops where attempts were made to bake bread. Little hardship, however, has thus far resulted. The first-class shops were visited and supplied bread-stuffs with black bread in advance. The strike of the strikers is to be followed in a few days by a butchers' strike.

The news from the interior shows that the wave of strikes is spreading, but it is too early to tell whether this movement, which seems more spontaneous than organized, will precipitate a crisis. New strikes are reported at Yekaterinoslav, at Saratoff and at the collieries of Bakmuth.

The usual number of robberies are reported, emphasizing the growing lawlessness and anarchy of the country.

### NO DESPATCHES ALLOWED.

St. Petersburg, June 19.—The Government is preventing any reports being sent from Bialystok which is regarded as ample proof of the horror of the situation.

### 200 JEWS WERE KILLED.

Odessa, June 19.—The Novosti, of this city, published a despatch from its correspondent at Bialystok, saying: "I personally counted two hundred and ninety Jewish corpses, a great number of whom were horribly mutilated. Only six Christians were killed and eight wounded."

### UNION OF 250,000 MEN

#### Presbyterian Brotherhood to be Formed:

Detroit, June 19.—A union of 250,000 men in the Presbyterian church in aggressive Christian work will be perfected in Detroit this week, when the committees appointed by the general assembly of the Presbyterian church to establish a Presbyterian Brotherhood meets in the Jefferson avenue Presbyterian church. The membership in the Detroit presbytery will not be less than 5,000.

All men's organizations in the Presbyterian church, now in existence or hereafter to be formed, are to be united in this brotherhood. All congregations in which no men's organization now exists are urged to form men's classes or clubs. Standing committees on the brotherhood are to be formed in all presbyteries and synods, for the purpose of fostering organized work for men in the churches.

The first convention of the organization will be held November 14 and 15, 1906. The place will be settled at the meeting today.

#### Must be Cared For, For a Year.

San Francisco, June 19.—Major General Greely has sent a communication to Mayor Schmitz today in which he outlines a plan for the housing of the city's homeless. It is estimated that in the next few months thousands will leave, but it is certain that some 50,000 homeless will have to be taken care of for the next year or two by the municipal authorities. General Greely says that the present mode of living in tents in parks and vacant lots will prove impracticable and unsanitary, and recommends barracks be rented for a nominal sum. Each house will accommodate from four to eight families, three rooms to be allotted to a family. Common cook houses, baths, etc., will be provided.

The disgusting discharges from the nose and throat, and the foul catarrhal breath, are quickly dispensed with by using Dr. Shoop's Catarrh Cure. Such soothing antiseptic agents as Eucalyptus, Thymol, Wild Indigo, etc., have been incorporated into a snow white cream making a catarrhal balm unexcelled. Sold by J. D. Tully.

### PADRONES ILL-TREATED

#### Hundreds Sidetracked to Florida Swamps and Treated as Slaves.

New York, June 17.—That Italian immigrants and other laborers sent to the south and west by New York padrones are the victims of cruel treatment and oppression is one of the statements made by License Commissioner John N. Bogart in the annual report of the work of his office which he submitted to Mayor McClellan.

In recent cases brought to the attention of the commissioner of licenses it was shown that hundreds of Italian immigrants who believed they were going to Philadelphia or Pittsburg were really landed in the swamps of Florida and the wilds of North Carolina, where they were kept on railroad construction work under the surveillance of armed guards until they became too sick to be of value, when they were turned loose to make their way back to New York as best they could.

#### Kisses Wife; Divorce Suit.

St. Louis, Mo., June 19. — Because Judge Orville Davis Jones, of Edina, Mo., kissed his wife, Mrs. Mary Elizabeth Jones, in a dark room of their home, believing her to be Katie Bryant, the colored servant girl, Mrs. Jones now is suing him for divorce. Mrs. Jones today told the story of how she set the trap which resulted, she said, in Judge Jones kissing her under the belief he was kissing Katie Bryant. As she recited the story, Judge Jones sat facing her in the courtroom. He manifested much agitation.

#### Shot Himself By Accident.

Saskatoon, June 19.—Frank Goodfellow, a farmer living at New Hillsdale, left his house to milk some cows and before going shoved a revolver into his pocket with which to shoot gophers. Shortly afterwards he was found with a bullet through his body. The weapon had exploded while he was handling it. He was 27 years of age, unmarried and came from Barrie, Ont.

#### Lower Rates for Winnipeg.

Winnipeg, June 19.—The electric street railway have announced a schedule of rates for power and lighting upon the completion of their electrical power plant on Winnipeg River. It is satisfactory to the citizens, guaranteeing a reduction of 50 to 70 per cent. Power is cut from 30 to 12 1-2 cents per hour for elevators and motors to 6 and 4 cents respectively. Lighting will cost 10 cents instead of 30. Further reductions are promised.

## FORTUNE IN A WRECK

### How a Melbourne Merchant Made a Million

### BOUGHT WRECK FOR £350

#### His Profits From Salvage of Wreck Are Estimated at £200,000.

London, May 15.—To buy a wreck for £350 and subsequently to acquire from it a fortune of nearly £200,000, is a stroke of good luck such as falls to the lot of few men.

This, however, a Melbourne draper, now the Hon. J. G. Aikman, member of the Legislative Council of Victoria, can claim to have done, and the profits from his purchase are not completed yet, for the wreck is still proving a handsome source of revenue.

The romantic story of this great fortune has only come to light, writes the Melbourne correspondent of The Express, and is told by Mr. Aikman himself.

On a June night two years ago the magnificent P. and O. steamer Australia, which cost £550,000 to build, went ashore at the entrance to Port Philip Bay, a short distance from Melbourne. The vessel herself was subsequently put up to auction, and knocked down to Mr. Aikman for the ridiculous sum of £290. Afterwards the auctioneer offered the cargo left by the underwriters on the wreck, and this Mr. Aikman secured for another £60. "The low price at which the whole thing had been knocked down was a complete surprise," declares Mr. Aikman. "I had enough money with me to pay a deposit of £2000."

"We determined to make a careful examination of the hull at low water, when, to our surprise, we found a valuable cargo of Muntz metal lying high and dry and quite accessible. There were ten tons of it, which were taken out in less than a day, the metal eventually realizing £50. Nine hundred tons of bar iron, bar steel, tool steel, and shear steel were recovered from the wreck, and were sold at an average rate of £10 a ton. I also got 700 tons of galvanized iron and forty tons of steel during the first operation.

"After six months' operations we left what remained on the boat, with the object of abandoning her, when, in conversation with an engineer, that gentleman mentioned that counting the condenser and the metal, brass, and copper piping, there must have been hundreds of tons of metal on board."

The statements made by the engineer were fully borne out by investigation, and work was immediately resumed.

"During the second operations on the Australia 219 tons of brass, copper and gun metal were obtained, and 1,350 tons of scrap cast-iron were obtained from the engine and other castings on board. Five tandem and four Tangye engines and a large quantity of pig-iron were also got from the wreck.

"The four propeller blades, which consisted of either phosphor or manganese metal, and which weighed fourteen tons altogether, were taken from the steamer, and realized £100 as old metal."

Half the hull of the Australia still remains above water, and quantities of brass, copper, and gun metal have still to be recovered.

It is estimated that Mr. Aikman's profits from the wreck approach £200,000.

## Boys Show Off And Upset

Yesterday evening two boys, as boys will, were "showing off" in a skiff just below the lift over at the locks. As they paddled up and down to where the tuilers are moored, displaying their masterful ship of the craft they were seated in the now seemingly got sick over their foolhardy display, and, although they did not quite throw up it turned over; so did the boys into the wet water of the Otonabee. They "frogged" it to shore and wrung out their clothes before making their little sneak for home. Mr. Collins, lockmaster at that place, seeing the way the boys were acting, got all ready to go to their aid in case of accident, but they swam to shore unaided all, like McGinty, very very wet.

## Local Troops Off For Cobourg

### 3rd Dragoons and 24th Field Battery Leave for Camp.

Yesterday morning Peterborough or at least that part of it lying about the G.T.R. station looked like a budding "Aldershot."

The occasion was the departure of the 24th Field Battery and the Third Dragoons for the military camp at Cobourg. The boys entrained at the G.T.R. station and a large crowd of friends of the soldiers came down to see them off.

The boys looked well in their new uniforms, the men of the Battery looking every inch soldiers and carrying themselves with the manner of veterans. The Dragoons also made a fine appearance in their dashing cavalry uniforms.

Two special trains were required for conveyance purposes. The Dragoons were the first to get away. Their train consisted of four horse cars, 1 baggage car and two coaches, one each for officers and men. The total strength was about seventy, and the corps was in charge of Major Hall. The other officers were Captain Johnston, and Lieuts. Cleghorn and Anderson. The veterinary officer was Captain Poole, and the medical officer, Lieut. Douglas.

The Dragoons pulled out about 9.30 o'clock. At Millbrook a stop was made, and the squadron from that place was entrained. The Millbrook squadron is of the same strength a the local corps, seventy horses were taken along.

After the departure of the Dragoons the Battery were entrained and pulled out about ten o'clock. The corps was in command of Major Young, and the other officers were Lieuts. Leary and Hall. The veterinary officer is Dr. Blanchard. There were ninety men and sixty-two horses in the Battery. The train consisted of four horse cars, one baggage car, and two coaches for the men and officers.

At Millbrook a stop was made and a number of men recruited at Bethany taken on there.

The brass band of the 10th regiment, from Campbellford, under Bandmaster Dickson, passed through Peterborough also on their way to the camp. They had to wait here for a couple of hours. They were accompanied by several of the men from the Campbellford and Hastings companies of the 40th Regiment. All the other regiments in the district went into camp at Cobourg yesterday.

Pink Lips, Like Velvet. Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most highly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

#### Horse Brings $25,000.

Mr. Jas. Allen of the Allen House, yesterday received a letter from Mr. A. Robillard, registrar of the County of Russel in reply to a communication Mr. Allen had sent him asking the whereabouts of a horse named "Frank S." "Frank S." it might be noted is a full brother to "Corkland Prince," the fine dark stallion Mr. Allen is often seen driving about the city.

Mr. Robillard said in reply, Frank S., the colt that I owned when you were in Russel was sold about a month ago for the sum of $25,000. He has been taken to California since this last sale, etc.

#### Ex. Ald. Batten Secures Baggage.

On Saturday a relative of Mr. Jos. Batten, was leaving for Rochester, en route to California, with her little boy. The little fellow ran into a grocery store on the corner of Aylmer and Charlotte streets, to get some candy. In the meantime, the train pulled into the station. The mother, in her anxiety to get her train, got hold of the little lad and rushed over to the depot. Here in their excitement over the tickets, &c., a bundle containing umbrellas, rockey and harness sticks were left in the waiting room of the depot. A telegram was at once sent to ex-Ald. Batten, who yesterday went over to the G.T.R. station and secured the goods. The ex-alderman secured the goods just as the troops were pulling out for Cobourg.

#### Cobalt Batteries.

Asheville, N. C., June 19.—Thomas A. Edison, who has been here on a prospecting tour, says he has made some wonderful discoveries of cobalt. "I will reduce the weight of storage batteries in automobiles 50 per cent. and the cost of traffic in cities 55 per cent.," he said today. "I am fully confident that what I have found here will enable me to start on the work of new vehicles propelled by cobalt batteries."

"Most of the cobalt now known to the scientists of the world is found in France and Australia and American industries are hampered because of the distance it is from the manufactories."

Yesterday evening a party under the captaincy of Mr. Harry LeBrun left for Mr. LeBrun's island, "Belle Chase," Stony Lake, on fishing bent. When Mr. H. Winch gets back look out for fish stories!

## Express Companies Raised a New Point

### Declared That the Dominion Parliament Has Not the Power to Regulate Them, That Any Such Power Belongs to the Provinces.

Ottawa, June 19.—A special committee of Parliament met yesterday to consider the provisions of Mr. Alcorn's bill to bring the business of express companies under the control and regulation of the Railway Commission.

Sir Frederick Borden was in the chair, and among those present were Hon. H. R. Emmerson, F. D. Monk, W. F. Maclean. Counsel was also present to represent the interests affected.

T. B. Chrysler, K.C., who appeared on behalf of the express companies, contended that the Dominion Parliament had no authority under the British North America Act to regulate the rates and the affairs of express companies. Because a Parliament had the right to incorporate companies it did not necessarily follow that it had the right to regulate them, too. The British North America Act left left the control of property and civil rights to the Provinces, and, in his judgment, a transaction between an express company and its customer was a civil contract. Therefore, the regulation of express rates and business belonged to the Provinces. Doubtless which the Dominion Parliament was incorporating a company it could impose whatever conditions it desired, but when Parliament as one party to a contract had given a charter to an express company, it had no right to subsequently impose new conditions.

The constitutional limitation that Mr. Chrysler argued was a point the committee had not previously considered. Plainly, it did not commend itself to the membership of the committee.

Mr. Chrysler held that an express company was not an undertaking under the meaning of the B.N.A. Act.

Mr. Monk held that Parliament's full authority to regulate trade and commerce gave it the right to regulate express companies.

Sir Frederick Borden did not think that after Parliament had accepted the principle of Mr. Alcorn's bill this special committee had authority to deal with the question of jurisdiction.

Mr. Chrysler later quoted opinions of Mr. Fitzpatrick and Mr. R. L. Borden questioning Parliament's authority to regulate express rates.

After hearing them the committee decided to wait for the opinion of the Minister of Justice on this point, and took up the details of the bill.

## Lovers of Music Should Attend

### Grand Concert by Students of Local Conservatory.

Tomorrow evening one of the greatest musical treats that lovers of high-class musical art appreciate, will be given at the Grand Opera House by the pupils of the Peterborough Conservatory of Music. Those who love high-grade musical productions and symphony should certainly reserve Wednesday evening for this concert.

Tonight all the pupils of the Conservatory of Music are requested to meet at the Conservatory to get their colors preparatory to the grand entertainment on Wednesday evening. Prof. Gliddon has now worked up, through his acknowledged merits, what will perhaps be one of the best musical treats that Peterborough has seen in many a day.

### WAS IT MURDER?

Kingston, June 19.—The authorities are working upon a case of murder, supposed to have been committed four years ago near Sharbott Lake. A woman named Mrs. Nedde gave the startling information at Bathurst, near Perth, that two boys, named Babcock and Martin, who were supposed to have been drowned in Sharbot Lake in April, 1902, were murdered by Sandy Bidore, who was three weeks ago sentenced at Kingston to fourteen years in penitentiary for shooting at police, and another Indian named Frank Beaver, who lives in Rice Lake.

Bidore used to live with Mrs. Nedde, and she says he told her of the deed, and where the bodies were buried. The authorities, it seems, went to the place indicated, and found human bones in the ground. The two boys had left Sharbot Lake for the point in a skiff to get logs for W. Y. Gannon. They had between $70 and $80 on their persons, and the two Indians evidently knew this, deavor is being sought for, and an investigation into the woman's story will be held.

—Take in the Peterborough Conservatory of Music closing exercises.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

### BASEBALL.

No Eastern or National baseball games were played yesterday.

• • • •

Games played yesterday resulted as follows in the American League:

Philadelphia 2, Cleveland 1.
Boston 0, Chicago 2.
New York 0, Detroit 3.
Washington 3, St. Louis 3.

• • • •

### FOOTBALL

The Peterborough Rugby Club is about to take another good man in "Doc" Shaw, their star center half who is shortly leaving for the west. Mr. Shaw has accepted a position with a large manufacturing concern in Winnipeg, who leaves in about a fortnight. Mr. Shaw came here about two years ago and has since been in the employ of the American Cereal Company.

#### Union Lose in Odd Clash.

Sterling, Ill., June 19.—Since the beginning of the work of construction of the Frances Shimer Academy north of this city at Mount Carroll there have been many disputes between the union and nonunion men on the job. There were fifty men on the job who carried cards and thirty who did not. The thirty men live in Mount Carroll, while the fifty were imported. The thirty men held a meeting today and resolved that the fifty had to quit or they would go on strike. The contractor discharged the fifty union men and is now filling the vacancies with nonunion men.

#### Members Want Passes.

Ottawa, June 19.—A movement is said to be on foot among members of Parliament to make electric railways holding a federal charter carry them free of charge. The railway act of 1903 states in its interpretation clause that a railway means any railway when a company has power to construct. Several railway and legal experts of the Commons are of the opinion that electric railways come under this definition, and that those with federal charters must comply with the clause which states that "The company shall furnish free transportation upon any of its trains for members of the Senate or the House of Commons of Canada with their baggage." The matter, it is said, will be brought to a head at an early date by a question to Hon. A. B. Aylesworth, Minister of Justice.

### FELL ON HER LOVER

New York, June 19.—James Condern, 25 years of age, of Summit, N. J., died yesterday in All Souls' Hospital, at Morristown, from a broken neck, after three weeks of treatment in which every resource of modern surgery was exhausted.

Condern called on a young woman in Summit about three weeks ago. The young women, who weighs upward of 250 pounds, was dressing, and he sat down on the stairs in the hallway to wait.

The young woman tripped near the top, and fell squarely on Condern, who was picked up unconscious and taken to his home, where physicians found his neck had been broken.

It was decided last Friday to take him to the hospital for an operation. Saturday it was discovered that his spinal cord had been injured, and the surgeons were unable to save his life. The young woman is prostrated from grief.

#### Great Musical Treat.

Closing exercises of the Peterborough Conservatory of Music, on Wednesday, June 20th, in the Grand Opera House. Tickets to this most interesting display of talent will be sold at 25 cents each. No extra charge for reserve seats.

## Indian River Has An Awakening

#### Young Man Brought to Nicholl's Hospital After Desperate Act.

The news of what Indian River regarded as a matter of moment, became known in the city yesterday, regarding a young man who, jumping from a C.P.R. train, became mired in a swamp at that station.

It seems that the young man in question is from Halifax, a representative of a Toronto firm. On Saturday he jumped off the C.P.R. train going east at Indian River, and created considerable interest by his strange actions. He went into the shop kept by Mr. Evans at Indian River and asked Mr. Evans to keep his money for him, at the same time hinting at self destruction. Mr. Evans did not take the money, in view of his strange actions, two special constables were sworn in to search for him. Assisted by several others they scoured the woods and fields about Indian River on Saturday afternoon, but could not locate the stranger. On Sunday the search was renewed and shortly after noon he was discovered in a swamp, about two miles south of the village, half buried in the soft earth. His clothes were soaking wet and were hanging in tatters. He was taken to Indian River and then driven to the local police station. A doctor after examining the man ordered him to be taken to Nicholl's hospital. In his pockets was found $23 in cash, a railway ticket for Halifax, and other articles. The young man is apparently suffering from nervous shock. His people in Halifax have been communicated with.

#### Winnipeg's Great Boon.

Winnipeg, June 19.—Winnipeg is booming this year as it never boomed before, and is rapidly becoming a great metropolis. Building permits for the year to date amount to $5,500,000.

## Decoration Day Is Wednesday

Tomorrow afternoon, June 20th, the members of Otonabee lodge, No. 13, and Peterborough lodge, No. 111, Independent Order of Oddfellows, will observe the annual ceremony of decorating the graves of their deceased brethren in Little Lake cemetery.

The brethren will assemble in Central park at 2.30 o'clock sharp, and headed by the 57th Regt. band, will march in a body to the city of the dead. All visiting brethren or members of I.O.O.F. lodges outside the city are cordially invited to take part in the impressive rite of depositing flowers upon the grassy mounds of those who have been laid to rest and are now sleeping their last long sleep beside the quiet waters of Little Lake and under the shade of the fine old grows which stand sentinel-like over the graves.

It is expected that a great many citizens will take part in the ceremony and decorate the graves of deceased relatives and friends.

During the afternoon addresses will be delivered by several of the clergymen, who have been invited to say a few words appropriate to the occasion.

## North Germans Distrust Austria

Berlin, June 19.—One of the results of the forthcoming of the kaiser to Vienna is that General Count von Moltke, the chief of the German General Staff, will make the personal acquaintance of General Baron von Beck, the Austrian colleague. General von Moltke will make the acquaintance of one of the most charming men in Europe, but that will be about all. For it is to be doubted if he will succeed, where his predecessors failed, in persuading the Austrian military authorities to recast their scheme of mobilization so as to bring their army from a peace to a war footing with something like the promptitude of the German forces. The German mobilization takes four days, while that of Austria takes from eight to twelve—no one knows the exact figure. Nothing the German staff has been able to do could induce the authorities at Vienna to expedite matters. The excuse given if the difficulties of language which divide the Austrian army into so many watertight compartments, and the want of the proper railway facilities.

But what the German military authorities aver in the matter is the want of will. The North Germans do not trust the Austrians, and never did. One of Prince Bismarck's most trusted lieutenants once said that the Chancellor's main idea in the Austrian alliance was to prevent Austria being against Germany. He expected little active aid from her. This was proved by the fact that during the early days of the Triple alliance Germany had a secret treaty with Russia, the existence of which was only revealed by Prince Bismarck after he left office.

THERE'S A REASON

GRAPE-NUTS, the delicious breakfast food, needs no cooking. It is ready for instant use and is a crisp, toothsome dish of decidedly attractive flavor. It possesses high value as a strength-making food, a welcome to athlete, brain worker and invalid.

In place of any form of meat, try

Grape-Nuts

with good rich cream and some fruit for breakfast. The change has worked wonders in the way of health for many; it may suit you. TRY IT.

## Damp Spring Weather Ruinous to Health

### Causes Weakness, Headaches and Feeling of Unrest; the Cure is Simple.

That peculiar weakness so common in the spring, is demoralizing to body and mind alike.

Stupid, absent-minded and dull,—You feel the need of a stimulating tonic.

To impart quickness and great vitality to the entire system nothing acts like Ferrozone.

In a short time it makes you feel fit and fine, creates a feeling of youth and strength that's surprising.

Ferrozone revives and braces the sickly because it nourishes and builds up the organs that are weak. As a spring tonic, appetizer and blood-strengthener it is unequalled.

A well known resident of Utopia, Ont., Mr H. H. Postle, writes: "From long experience I am convinced that everyone requires medicine in the spring. As a rule the blood is thin and impure and the whole system is congested with poisons that should be carried off. I use Ferrozone because it clears up the system, gives you an appetite and makes you sleep well. One winter I had serious palpitation of the heart, nervous headaches, and an extreme tired feeling. Sleep was not restful and by spring I was in bad shape. I took six boxes of Ferrozone and was made the picture of health."

Ferrozone makes permanent cures. Absolutely safe because it is purely vegetable and contains no alcohol. Concentrated cure in tablet form,—that's Ferrozone, 50c. per box or six boxes for $2.50 at all dealers or by mail from N. C. Poison & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between *Toronto* and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro' are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $3 per year, strictly in advance.

### STUDY AND HEALTH IN SCHOOL

The question of school hygiene, and especially of overwork on the part of the pupils, has received considerable attention of late in the press of the United States. To the useful discussion of this subject Dr. G. Woodruff Johnston makes a valuable contribution in the current North American Review.

He deals with the effect of school life and present methods of study on the health of the pupils, and while the American data on the subject are few and superficial, as far as they go they support conclusions reached in Europe by systematic inquirers. Whenever and wherever such an investigation has been attempted, a surprising amount of ill health among school children has been reported. Moreover, "though varying in degree, from slight functional disturbances to actual illness, the same morbid conditions were found" in every place and every time.

There are many "school diseases," the most typical of them, perhaps, being headache. This disease may be due to anaemia, eye strain, bad ventilation, nerve exhaustion, fatigue and other causes. From 40 to 50 per cent of all school children suffer from it, and it is habitual, girls, however, being affected more than boys. The number of scholars suffering from habitual headache increases step by step and grade by grade with advancement through school, and, significantly enough, [illegible] grow more frequent and severe as the term progresses, disappear in the holidays and reappear with the next term.

Among other school diseases are sleeplessness, palpitation, irritability, mental weariness, twitching and instability in posture and balance. The diseases affecting the nervous system, according to Dr. Johnston, are of greatest interest to Americans, for "we know that our heredity, ideas, climate, environment, and habits of life predispose to such affections."

Now, much can be done to prevent disease among school children by attending to light and ventilation, the shape and height of desks and the like, and food is also an important factor. It appears, however, that "fatigue is the determining cause of many diseases and aggravates most or all of them." Fatigue, then, is the evil to attack. Overwork must be avoided in all grades, and recreation and exercise encouraged. The article concludes with these words:

"The remedy [illegible] lies not in the almost professional athleticism which is now the vogue, for in this it is evident we are merely substituting one form of fatigue for another no less injurious, but rather in a completer apprehension of the school child as a young animal at work and play, and a rational adaptation of work and play to his capacities and needs.

This is exactly what leading educators have been saying of late, and the problem is worthy of the most careful consideration.

### THE PROBLEM OF ANARCHISM

Andrew D. White's suggestion that the police departments of American and European cities be empowered by international agreement to work together in dealing with anarchism is one that the great powers must sooner or later consider.

As long as the anarchists of the deed" were confining their operations to assaults against despotism liberal governments gave them asylum. But the Haymarket massacre taught the people of the United States the danger of too free hospitality for fanatics whose hands were raised against all government, and the assassination of President McKinley convinced them that the problem of anarchism concerned them as much as anybody else.

For years Scotland Yard is understood to have had a tacit agreement with the anarchists in London that they would not be molested if they did not attack members of the royal family or the government. If any such part existed it was broken when the attempt was made to destroy the young British princess who had just become the bride of the King of Spain. Continental newspapers are criticising the British government for affording a refuge for Continental anarchists to plot assassination, and the criticism is by no means unobserved.

If measures should be taken in Great Britain and Switzerland for the expulsion of "anarchists of the deed" most of them would go to the United States, where there are already too many. The Paterson colony is openly rejoicing over the Madrid crime, in which nearly a score of lives were destroyed. The release of Berkman from the Pittsburg workhouse has been followed by unusual anarchistic activity in Chicago, and from Portland come reports of a plot against the president of the United States.

The English-speaking people are reluctant to interfere with political liberty, but it becomes a serious question how far they are bound to exercise such "restraint" in dealing with those whose avowed object is to destroy all civilized society by force, and who regard good governments as worse than bad governments by the very fact of their being good. If the revolutionary anarchists of Europe and America choose to make themselves an international menace they may be sure that society will find means of protecting itself.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### MUST COME BACK.

The government has received a despatch from Seattle, stating that the United States Government had ordered the return of the Foster brothers to Vancouver.

### TRANSPORT STRIKES MINE

Tokio, June 17.—The Japanese transport Tayotomi struck a mine on Thursday evening when 24 miles off Joshin Korea, and sank immediately. Fifty of the crew are missing.

The Celebrated English Cocoa.

# EPPS'S

An admirable food, with all its natural qualities intact. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

**Water Power Privileges**

NOTICE is hereby given that the rights of the government on the water-powers hereunder mentioned will be put up at auction to be held in the offices room of the Department of Lands and Forests, in the city of Quebec, on the twenty-first day of June next, at 10.30 o'clock in the forenoon.

The concession to be made by long lease, for 99 years, on conditions which will be communicated to the public on the day of the sale.

1. The Ka-Ka-Ke rapids on the Quinze river, county of Pontiac, about 12 miles from North Temiscamingue.

2. The "Big Pipe Stone," the "Little Pipe Stone" and the "Island Rapids," Quinze river, county of Pontiac, about 8 miles from North Temiscamingue.

3. The falls at the outlet of Trembling lake, lot No. 28, 3rd range of the township of Grandison, county of Terrebonne.

4. The falls and rapids collectively known as the "First Falls," at the mouth of the river Manicouagan, north shore of the Saint Lawrence, county of Saguenay.

5. The principal falls of the river aux Outardes, on the north shore of the Saint Lawrence, about 7 1-2 miles from Pointe aux Outardes, county of Saguenay.

6. The rapid called "La Galette," on the Saint Maurice river, about 12 miles (in a straight line) from Three Rivers.

7. The Coteau Rapids on the Saint Lawrence, at Coteau-du-Lac, county of Soulanges.

8. The "Iroquois Falls," on the Vermillon river, about 21 miles above La Tuque, county of Champlain, on the line of the Transcontinental Railway.

9. A fall on the Manouan river, a tributary of the Saint Maurice, county of Champlain, 4 1-2 miles from the confluence of these rivers and about 90 miles above La Tuque, on the line of the Transcontinental Railway.

10. The fall named the "Grand Sault," river Rimouski, township of Duquesne, county of Rimouski, 16 miles from Rimouski.

11. The "Rapid Main," river Bonaventure, about 6 miles from the Harachois of Bonaventure, in the county of the same name.

12. Ellis Bridge rapid, on the Chamouchouan river, county of Lake Saint John, 21 1-2 miles from the village of Saint Felicien and 18 miles from Roberval, also another rapid on the same river, situate about 1-2 a mile below the first.

13. The "Chaudiere Falls," on the Chamouchouan river, county of Lake Saint John, 62 miles from Roberval.

14. The "Chute des Peres," river Mistassibi, in front of the monastery of the reverend Trappist Fathers, township of Pelletier, county of Lake Saint John.

15. The three falls on river Saulteau-Cochon," about one mile, in a straight line, from the Saint Lawrence, township of Laval, county of Saguenay.

For further and more particular information, concerning the horse-power of these water-powers, the extent of the surrounding land which the above mentioned concessions comprehends, apply to the Department of Lands and Forests, Quebec.

ADELARD TURGEON,
Minister.

Department of Lands and Forests,
Quebec, 18th May, 1906.

# Hearts Courageous

By... HALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

His lordship's face, from livid, turned a volcanic purple.

"Your excellency," went on the young man, "will recall my social position. Spy? Betray? Surely not, messieurs!" He moved his hand as though dismissing an indiscreet pleasantry.

The earl bit off an oath with head thrust forward. His jaw dropped like a lion lapping blood.

Armand had risen. "I shall see you tonight amid the ladies, monsieur?" he asked of Foy. "A very good night to your excellency."

"I shall be eager to carry out any plans your excellency may be pleased to favor," said Foy as the door closed.

The Apollo room that evening was a blaze of splendor. It was the last dance of the old regime. All knew the nearness of the cloud. All heard the rumble of the storm. But courtesy in Virginia was as the grain in wood. There it was not until the last that Tories had perforce to leave the colony; when all who were not Tories turned Democrats and went into the Revolutionary armies; when gentlemen took the field and their ladies toiled at home with lint or homespun.

Now, though the bolt was speeding, until it fell Tory and Whig met and danced in tavern and in hall. Smile and bow changed not a whit. Sparkle was over all.

But it was only a shell of gayety. The core was a volcano.

In the outer hall of the Raleigh, behind the shifting throng of gallants at the door of the Apollo room, Jarrat looked across a minuet and in glimpses caught between the stately moving figures he saw Anne.

Never had she seemed so beautiful, her head golden misted in the light, her long, fringing lashes shading the dusky blue of her eyes. She stood, full veined, exultant, under the white candles, her dress dove colored, flowered in large trees, with cherry tinted stays trimmed in blue and silver. On her hair, drawn high, sat a wenlike capuchin.

Jarrat's face sprang scarlet—a hopeless, helpless rage of bitter longing. With him it was moth and flame, and the wing singeing had become a joy of torture.

The Marquis de la Trouerie passed into the assembly. Gallants crowded to greet him. Brooke fawned upon his hand. He became a sun with a train of lesser satellites. He moved leisurely through the throng, answering the shafts of the wits, bowing to plump Mrs. Byrd among the dowagers, approaching the end of the room, where Anne, beside Colonel Tillotson's soldierly black, held her constant court, gilded by the effulgence which the open worship of the favorite of fashion had thrown upon her.

Very lovely she looked to Breckinridge Cary, just arrived on a visit from Lancaster. He watched her from where he chatted with Byrd, whom he had last seen in Covent Garden shortly before he left England for home. He had known her from a child at Gladden Hall. The old world, he thought, could never have bred her; she was true of the new, of its fire and full blood, its daring, its pride and prodigality, born of its dewy valleys and its untouched, cavernous forests, a thing that must have withered in the heavy air of London.

"Yonder comes our glass of fashion, Mr. Cary," boasted Brooke, joining them. "Ah, you can always tell your real nobleman! What a waistcoat!" he simpered, ogling it rapturously. "Demme if Master Coolbaugh shall not cut me one like it."

Cary looked with a flash of recognition that broadened into a stare of amazement. He saw a figure incased splendidly in satin, with rare point dropping from the sleeves, jewels gleaming from the ruffles, a sword hilt on which blood rubies burned, a breast sparkling with a bediamoned order.

"The marquis is late," Brooke added.

"The marquis?" Cary's eyes opened wide.

"That," said Byrd, "is the Marquis de la Trouerie."

Cary bent closer. There could be no mistake. No mistake! And all Williamsburg deceived! The circle of beaux parted, rolled back at the newcomer's approach, and Anne's face lifted itself, startled and joyful, a one look which told it all to Cary, flashlike. Oh, the pity of it!

Jarrat in his red coat saw, too, from the hall—saw her smiling, but not to his words, glowing, but not for him, and evil crept into his face till every feature seemed a sin.

"Sweet Sir Lobster!" said a lackadaisical voice behind him. "Peaceful as ever I see, and with uniform all unsullied. I' faith, I warrant no redskin might outstrip you on the far Scioto."

"Not now, Master Freneau," said Jarrat, breathing heavily. "Not now! Tonight I am occupied."

"Alas! Poor Scarlet! Is it not a rarer show? Mayhap 'twill inspire me to an ode. Shall I sing a Trouerie caparisoned for the lists of love?—See! To be gazed at so—is it not worth a prince's ransom? Oh, adorable!"

He paused, his mocking black eyes on the other's smoldering face. "Behold the discomfited!" he went on. "Think you Mistress Tillotson has aught for the spruce coxcombs with diamond shoe buckles and a macaroon elbow for snuff taking? Nay, nay! Nor for a king's spy with a rusted sword!"

Jarrat for once had no retort. The outer door opened, and Foy and three soldiers in his majesty's uniform entered. Foy carried a folded paper.

The four entered the inner door and stepped on to the crowded floor together. Frenau and Jarrat both pressed after them, the former in eager curiosity and the latter to slip into the background.

Anne stood with the marquis, her fingers on his arm, awaiting a minuet. The fiddles were weaving the first meshes of the tune. She felt his arm suddenly tighten, his clasp take closer hold.

"What is it?" she asked. There was a bustle at the lower end of the room.

He looked down at her. Something in his voice smote her. "Remember what you said to me at Greenway Court—what you said when we stood under the pines by Gladden Hall. If I should come to be mean and low and dishonorable before the world"—

"Look!" she cried. "They come this way. What can they want?"

"Listen low before the world, but still loving—still loving you"

An indefinable tremor came to her. The dancers were beginning to stop. Colonel Tillotson and turned his head.

Foy, followed by the soldiers, had paused in front of them and was pointing to Armand. "Take him!" said he.

The fiddles broke off with a screech. The whole floor was stricken suddenly hushed, suddenly motionless. Anne could hear in Foy's throat his hoarse, savage breathing as the soldiers stepped forward. The assembly gasped, thunderstruck.

Then instantly there was an uproar. "Stop!" they insisted. A dozen dress swords, among them Frenau's, came out clicking. The ladies shrank, the gentlemen came up furious, muttering curses against the royal governor.

"What is the meaning of this outrage, sir?" Colonel Tillotson stood tall and threatening. "By what right lay you hands upon the person of the marquis?"

"The marquis!" said Foy. "I want no marquis. This is no more marquis than I am. I have here a warrant signed by the royal governor of Virginia for the seizure of the person of [illegible] Armand, calling himself the

## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

## SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 150x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

## Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more [illegible] basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them is ever increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and in London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

### THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appurtenances. From careful tests made during these six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property being on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and in all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

# 100% ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and

## On the Ground Ahead of the Boom

also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

## Pale Faced Girls

**Thousands Using Successful Cure For Paleness and Anaemia.**

The pallid girl always lacks appetite. What little she eats is badly digested.

At night she is restless, she dozes, but doesn't sleep soundly.

Vital force must be increased, new blood must be supplied and a general rebuilding take place before she will feel like she ought.

Dr. Hamilton had invaluable experience in these cases and found nothing so prompt in building up the young women as his vegetable pills of Mandrake and Butternut.

Dr. Hamilton's Pills begin by cleansing the system and purifying the blood; they also improve digestion and render food ready for absorption. Additional nourishment is quickly supplied and the patient is fast strengthened and invigorated.

Full of spirit, ruddy and strong is the girl that assists her system by Dr. Hamilton's Pills.

The following recent letter from Miss Etta McEwen, of Haliburton, speaks for itself:

"In using Dr. Hamilton's Pills I find my system is wonderfully built up. It is certainly the most effective remedy I ever used. I have now a good appetite, sleep more soundly, and awaken in the morning feeling quite refreshed.

"Formerly I felt tired and depressed. I looked as if a severe illness was hanging over my head.

"Nothing could give quicker results than Dr. Hamilton's Pills and I strongly advise every young woman to use them."

All dealers sell Dr. Hamilton's Pills 25c. per box or five boxes for $1, by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## TOWN AND COUNTY NEWS

**DASHES HERE AND THERE BY TIMES' REPORTERS.**

### County Council Meets Today.

The June session of the Peterborough county council will open in the county council chamber at two o'clock this afternoon. Considerable business will be transacted at this meeting of the county fathers.

If you Stomach is Weak, If your Food distresses you, If you are Weak and Nervous, Use Dr. Shoop's Restorative one month and see what it does for you. Sold by J. D. Tully.

### Picnic of Baptist Mission Band.

About 200 boys and girls had a splendid time at the annual picnic of the Mission Band of Murray St. Baptist church which was held at Jackson Park on Saturday afternoon.

### To Visit Star of East Mine.

Messrs. R. J. Munro, W. E. Loch, Peterborough, Wm. Leahy, Lakefield, and John Fowler, Otonabee will leave today on a visit to the Star of the East mine in Barrie township Frontenac county. A meeting of the directors will be held at the mine tomorrow when important matters will be discussed.

### Fishermen Who Were Lucky.

A party of fishermen composed of Messrs. R. S. Parks and E. J. Doughty, of Peterborough, and Charles Edwards of Lang, went to Rice Lake and on Saturday, when near Foley's Point, captured eight fine muskinonge, weighing in all 76 pounds, and six fine bass. The largest muge weighed 19 pounds and the second largest tipped the beam at 16 pounds.

### Horses for Cobourg Camp.

Mr. R. H. Leacy yesterday shipped 30 horses for use at the Cobourg military camp of the 24th Field Battery. Mr. Ernest B. Lawrence will this morning drive a team and Victoria, round via Bewdley, to the camp at Cobourg for use of the officers of the local battery.

## LOCAL INCIDENTS

**By The Times Man on the Street**

—Board of Education met last night.

—The closing exercises of the Peterborough Conservatory of Music will be held in the Grand Opera House tomorrow evening.

—The str. Monarch on Wednesday brings an excursion from Centerton, via Harwood, Rice Lake and over the lift lock, then back to the city.

—Mr. J. J. McBain will give the members of the George street choir an evening's outing down the river on Thursday on his yacht "Mollie."

—The Band of Love under the leadership of Sergeant-Major Vincent, will give an entertainment in the Salvation Army barracks on Thursday night.

—The unpaid ceremony of decorating the graves of deceased brethren will be observed by the Oddfellows of the city at Little Lake cemetery tomorrow afternoon.

—It is understood that several local business men will make an effort to have the local fall fair in evidence, notwithstanding the action of the directorate to the contrary.

—Flower Sunday will be observed in George street church on Sunday morning next. The children of George and Grace churches will assemble in the church in a body.

—Messrs. Sherwood & King, stone contractors on the stone work of Messrs. Kinnear's new wholesale warehouse, on George street, yesterday received the cut stone for the basement work.

—Rev. W. J. Jolliffe, pastor of Charlotte street church, will deliver his farewell address in the church on Sunday evening next. He and his family will leave the following week for their new home in Clinton.

—Last nigh Capt. Jerry Young of the fine steamer Stony Lake, remarked that the storm that raged over Kawartha Lakes yesterday afternoon was the wildest and most severe for the time of year in his extended experience.

Lax-ets—A Candy Bowel Laxative. If you have Constipation, If you have a coated tongue, If you are dizzy, bilious, sallow. If you have Headaches, Sour Stomach, etc., risk 5 cents on Lax-ets. See for yourself. J. D. Tully.

### Many Tagless Dogs in Town.

There are at present 110 tagless dogs scratching up lawns and committing other nuisances as freely as those canines which have had from $1 to $2 each paid on them the police are now out hot foot after these outlaws and expect to gather quite a number of them, not to mention their owners, in soon.

### A Junior T. A. S.

A Total Abstinence Society for the boys of St. Peter's congregation has been formed. The membership of the new society will include boys who have made their first communion up to sixteen years of age. After sixteen years of age they will be taken into the regular T.A.S. One hundred have already joined.

**$9.00 New York and Return $9.00.**

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days. Good on regular express trains leaving at 9.50 and 7.15 a.m., 7.15 and 8.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 10 King street east, Toronto.

### Work on Fire Hall Now Begun.

Messrs. Sherwood & King, the local contractors, who have the sub-contract for stone and cut stone work in the brick work, of the new fire hall, yesterday began operations on this new city building. It might be noted that these contractors have been greatly handicapped owing to their inability to secure sufficient stone of right quality for the work. Messrs. Sherwood & King will hurry this stone work along as fast as circumstances will allow.

## *No Coadjutor Now Required*

No coadjutor bishop to assist the Lordship of Toronto, as suggested in a former issue of The Times, will be, as yet appointed. This is a result of his Lordship Bishop Sweatman's personal request, made during the session of the Anglican synod held in Toronto. His Lordship Bishop Sweatman said,

"I am grateful to be able to say that I no longer feel obliged to ask for the appointment of a coadjutor."

This statement received amidst tumultuous applause, followed the announcement that the amendment to canon one of the constitution had been defeated, as the vote of the clergymen lacked four votes of the required two-thirds number of those present.

## *Mr. C. B. McAllister in New Business*

**Cheap Coal of Northwest to Be Used in Promoting New Manufactories.**

Mr. C. B. McAllister, who as noted in a former issue of The Times, has recently been on a business trip to the Northwest, has returned to the city. Mr. McAllister, who spent Saturday and Sunday in the city at his home in the east ward left yesterday evening for the Northwest. Mr. McAllister is interested in placing power plants in several of the towns and cities of the Northwest, particularly in Manitoba, has just placed a power plant in Brandon. Mr. McAllister says that the immense coal fields in the West will be utilized in producing power for electric energy in that part of the country. He noted that the cheapness of the coal and its splendid gas producing qualities will be used to fullest advantage in that country.

## SOCIAL AND PERSONAL

—Mr. J. S. Creed, Halifax, N.S., is a guest at the Oriental.

—Mr. Wm. Eyres was in Cannington on business yesterday.

—Mr. W. Williamson of Lindsay was in the city yesterday.

—Mr. E. F. Clarry, Hastings, was a guest at the Oriental yesterday.

—Mr. A. J. Matthews, Brantford, was in the city yesterday, registered at the Oriental.

—Mr. R. Norman Jolliffe, of Toronto, is spending a few days in the city visiting his parents.

—Mrs. (Dr.) Fisk, of Montreal, is the guest of Mr. and Mrs. H. O. Fisk, 671 Water street.

—Rev. E. Vicars Stevenson, of Plainfield, New Jersey, is home spending his summer vacation.

—Mr. Hetzenhausen, of the Geo. Matthews Co., has gone to Sault Ste. Marie on a business trip.

—Mrs. (Dr.) Jeffs, of Toronto, formerly of Peterborough, is the guest of Mrs. H. P. Kennedy, for a few days.

—Mr. C. H. Moore left Sat night for Manitoba and the Northwest on a business trip, his ultimate destination being Alberta.

—Mr. D. H. Moore is at Victoria Road on a visit to his son, Mr. E. V. Moore, manager of the Condensed Peat Fuel Company.

—Mr. George H. Williamson, General Secretary of the Y.M.C.A., left yesterday for Cobourg, where he will spend two weeks at the military camp in connection with the Y.M.C.A. work.

—Mr. Chas. W. May, who has recently completed an extensive contract at the Dacey House, Burleigh Falls, leaves today for Lakefield, where he will redecorate the Craig House.

—Rev. A. H. Brace, moderator of the Peterborough Baptist Association, Mrs. Brace and Mrs. Mowry left last night to attend the meeting of the association, being the delegates from Park street church.

—Mr. Clarence Smith of the Canadian Bank of Commerce, at Strathroy, is in the city for a few days visiting his parents, Mr. and Mrs. Wm. Smith. Mr. Smith has been transferred to Winnipeg by the bank.

—Mr. S. Gardiner, a well known piano tuner of Toronto, with his brand new bride, spent Sunday and yesterday at the Queen's Hotel. They left for Toronto by 6.10 C.P.R. train last night. Mr. R. Gibbs drove them round the city during the two days the happy couple spent here.

—W. H. Fox, H. J. Hamilton, Toronto; H. W. Peatson, Thos. J. Glaster, J. D. Webb, Mrs. R. Wm. Toronto; V. W. Clarkson, Hamilton; F. N. Brady, Toronto; John Jenkins, Montreal; W. P. Breckenridge, Toronto; G. L. Black, Ottawa, are guests at the Oriental Hotel.

## *Board of Education Hold a Meeting*

**Mr. Eastwood's Account From S. S. Building Wrecking Refused.**

The Board of Education last night held an adjourned meeting in regular rendezvous of these trustees of the future generation's understandings.

There were present, Messrs. Ferguson in the chair, Fair, Hill, Crane, Ackerman, Dr. Burnham, Dumble and Pringle.

The minutes of last meeting were dispensed with.

Mr. Crane, chairman of the Property Committee moved that the account of Mr. Eastwood (for moneys alleges to have been made in tearing down the Murray street Separate school building) be not paid. It further moved that the Board offer the landlord of the Menzies school the sum of $500 for a lease of the building to July 1st, 1908, giving him the privilege of building on the vacant land any time after 1st April, 1907, it being understood that sufficient ground room be left to accommodate the pupils. Your committee have taken steps to secure a plan for the renovation of the West Ward school, but would ask for one week further time to secure necessary information.

(Sgd.) JOHN CRANE

This motion was seconded by Mr. Dumble, and carried.

The Board then went into committee of the Whole, or, as things are run by the Board, [illegible] as far as the press is concerned, before returning home.

## NOT A PATENT MEDICINE

**Hyomei a Scientific Treatment for Catarrh by Breathing Medicated Air.**

Ever since Hyomei has been known, its formula has been given to physicians, druggists, and, in fact, to all intelligent people who could appreciate the true merit of the combination of healing gums, oils and balsams, of which it is composed.

Many leading physicians endorse Hyomei and prescribe it for catarrhal troubles. In fact, quite a few of them use it themselves to break up a cold and prevent pneumonia. They regard it as a natural, yet scientific way of curing catarrh.

Breathed through the pocket inhaler that comes with every outfit, Hyomei destroys all catarrhal germs in the air passages of the throat and nose, soothes and heals the irritated mucous membrane and effectually drives from the system all traces of catarrhal poison.

No one should confound Hyomei with the patent medicines that are advertised as catarrhal cures. It is as superior to them all as the diamond is more valuable than cheap glass.

The complete Hyomei outfit, consisting of a neat pocket inhaler, a medicine dropper, and a bottle of Hyomei costs but $1, and extra bottles can be obtained for 50 cents, making it the most economical method of curing catarrh, as well as the most reliable.

If you cannot obtain Hyomei of your dealer, it will be forwarded by mail, postage paid, on receipt of price. Write today for consultation blank that will entitle you to services of our medical department without charge. The R. T. Booth Company, Hyomei Building, Ithaca, N.Y.

## FACTS IN NATURE.

**Not Only Do We Get Inspiration From Nature, But Health as Well.**

For people who are run-down and nervous, who suffer from indigestion or dyspepsia, headache, biliousness, or torpid liver, coated tongue with bitter taste in the morning and poor appetite, it becomes necessary to turn to some tonic or strengthener which will assist Nature and help them to get on their feet and put the body into its proper condition. It is becoming more and more apparent that Nature's most valuable health-giving agents are to be found in forest plants and roots.

Nearly forty years ago, Dr. R. V. Pierce now consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., discovered that by scientifically extracting and combining certain medicinal principles from native roots, taken from our American forests, he could produce a medicine which was marvellously efficient in curing cases of blood disease and liver and stomach trouble as well as many other chronic, or lingering ailments. This concentrated extract of Nature's vitality he named "Golden Medical Discovery." It purifies the blood by putting the stomach and liver into healthy condition, thereby helping the digestion and assimilation of food which feeds the blood. Thereby it cures weak stomach, indigestion, torpid liver, or biliousness, and kindred derangements.

If you have coated tongue, with bitter or bad taste in the morning, frequent headaches, feel weak, easily tired, sleepless or pain in side, back gives out easily and aches, belching of gas, constipation, or irregular bowels, feel flashes of heat alternating with chilly sensations or kindred symptoms, they point to derangement of your stomach, liver and kidneys, which the "Golden Medical Discovery" will correct more speedily and permanently than any other known agent. Contains no alcohol or habit-forming drugs. All its ingredients printed in plain English on wrapper.

The sole motive for substitution is to permit the dealer to make a little more profit. He gains; you lose. Accept no substitute for "Golden Medical Discovery."

Constipation causes and aggravates many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. One a laxative; two or three are cathartic.

**Wanted.**

Chambermaid wanted. Apply at the Allen House.

**Wanted.**

Three or four good boilermakers and two caulkers. Apply to L. H. Holcomb, City Hotel.

**Wanted.**

A Dining-room Girl at the Crown Hotel. Apply to Mr. R. H. Jackson.

On Thursday last, a white and tan fox terrier (female) puppy, answers to the name of Foxy. Suitable reward for return. Anyone harboring the dog will be prosecuted. Apply to 201 Charlotte street.

**Getting Ready for Boys' Camp.**

The date of the Y.M.C.A. boys' camp is July 14th to 25th. Applications can be had at the office of the Y.M.C.A. The greatest program of the year is promised for his camp. Every Y.M.C.A. boy under 17 should plan to go.

**A San Francisco Man Here.**

The Times had a call yesterday from Mr. Augustus Maylee of San Francisco. Mr. Maylee is here on a business trip. He was present during the earthquake in the above mentioned city, and gave us a thrilling account of what he witnessed during that horror. Mr. Maylee is the guest of Dr. Beadle, who is an old acquaintance of Mr. Maylee, their friendship dating back for 20 years. Mr. Maylee will visit his mother who resides in Warkworth, and also his sister, Mrs. W. J. Reed, Bonecy, [illegible] before returning home.

## No Ministers In Conspiracy

### Cabinet Denies That It Was at Trepoff's Star Chamber Conference---Strike Movement Spreads.

St. Petersburg, June 20—In ... the engineers of the ... Railroad have decided not to ... locomotives today. The ... Government ... the most ... the day expressed ... Minister ... trains ... disturbances ... to ... the ... of the country ... Warsaw and Moscow. The ... mayor of ... and ... yesterday, and ... industry and a ... The ... existence of ... Archangel ... The ... has been ... that the ... doubled.

The ... from Odessa continues ... on the ... sent to ... star chamber ... Trepoff, ... is understood ... Rosa, says the situation is ... that Parliament must be ... of, and is only hesitating ... to the method. Three ways ... posed.

First—To order a recess of Parliament for three months.

Second—To dissolve Parliament and order new elections based on universal suffrage, in the hope that the temper of the Parliament thus elected will be different from that of the present body.

Third—To declare the Council of the Empire or Upper House the representative body until a new Parliament is elected.

There are two features of the situation which make the court camarilla pause—the early necessity for more money and the distrust over the growing disaffection of the troops.

EGGED ON MASSACRE.

M. Vinaver, a member of the Lower House, yesterday at Simon received the following ... from M. Jacobson, a member of the commission sent to Bialystok by the Lower House of Parliament to investigate the Jewish massacres there:

"Order was restored yesterday. Seventy-eight Jews and six Christians have been buried. The majority of the dead were killed with daggers or rifle bullets. The total of the dead has not yet been established. A Cossack yesterday killed a passing Jew.

The city council has unanimously declared that the massacres were not the result of race hatred, but were due to provocation, and the Council of police participated in the outrages.

The reports that Jews and revolutionists attacked ... Imbatista are false.

CONFISCATE PAPER.

The massacre of Jews at Bialystok has shocked the courts and added to the general excitement, and the revelations which the commission of the Lower House of Parliament is to investigate there are expected to make matters only add fuel to the flames. The ... refused to allow the press correspondents to send anything relative to the ... to the authorities. The Gazeta, a newspaper edited by M. Filonoff, a member of the Lower House of Parliament, containing an account of the ... and charging the authorities of Bialystok with deliberately preparing the riot, was confiscated when it appeared yesterday morning.

Despatches from the interior bring the usual chronicle of murder and robbery. Fresh strikes are reported at Kaluga, Kremenchug, Zhitomir, Volsk, and Ustsysolsk. In the ... case of the attempt to precipitate a general strike is by no means assured. The Novoe Vremya, however, ... Sidener, among them being the nine-year-old twin sons of Alf Adams, Harvey and Wilfrid. These boys could not swim but were floating around on a raft. An older boy who happened to be on the bank took to pelting stones and mud at the youngsters, and to get beyond the range of the missiles they went out into deep water with their raft. In dodging a stone Wilfrid fell off the raft backwards and although he could not swim, his brother Harvey jumped off in order to save him, if possible. Both boys were struggling in the water, neither able to swim and both beyond their depth. Heber Rogers, with out hesitating a moment jumped into the water and swam to their assistance. Throwing an arm around each of the rapidly drowning boys, he brought them to shore. Two other boys, Percy Neil, a son of Mr. Harry Neil, and Theodore Quinn, son of Mr. Wm Quinn, threw off their clothes, and went out to help Heber bring the boys to shore.

The boy, who, using the Art of a would-be bully did not attempt to save those whom his cowardly action had placed in jeopardy of their lives.

Heber Roger's brave action should be brought to the attention of the Humane Society, so that a well won medal may be sent him.

## Death of Mrs. Edward Dusty

### Mother of Local Hotelman Passes Away in Uxbridge.

Mrs. Edward Dusty of Uxbridge, mother of Mr. Chas. Dusty of the Queen's Hotel, passed away in that town on Monday, June 18th. She leaves to mourn her loss, her husband, three sons, Charles, of this city; Samuel, of Greenback, Ont.; and Jacob, a commercial traveller, of Ohio; and one daughter, Mrs. M. Rountree, of Uxbridge. The funeral will be held in Uxbridge at ... today. Mr. Chas Dusty left for Uxbridge last night by the G.T.R. 6.38 train. The deceased was 87 years of ... and had never been ill until six months ago, when paralysis set in.

## The Lift Lock Again Closed

### Engineer Grant Discovers More Defects in Canal Bank.

The lift lock will be closed for the next few days, while some repairs are being effected to the bank above the lock. Engineer Grant has discovered that the embankment for some distance above the lock is not in a satisfactory condition, and it was decided to run the water out and make a thorough examination in order to be perfectly certain. This has been done and Mr. Grant has a staff of men at work digging into the bank to ascertain the trouble. It is expected that the lock will be closed for a few days, while this work is being prosecuted, but no long delay is anticipated.

Mr. McCrudden assured The Times that the trouble is not in the lift lock itself, the latter working to perfection.

In the meantime there will be no traffic through the canal below the Norwood road, where the water is shut off. The superintendent hopes that in a few days the canal will be open for traffic as usual.

## Heber Roger's Brave Deed

### Prompt Action of Local Boy Saves Two Pals From Drowning.

It seems that, Monday afternoon, some boys, from nine to thirteen years of age, went swimming in the river near Mr. C. B. McAllister's re-

## POLICE NEWS

### Daily Happenings in Court Room and Station.

Yesterday the Lotus Lovers, in spite of rainy weather did not congregate in the police court, as only one case, a simple ordinary "drunk" was on trial.

James Wilson, whose face is familiar to all habitual frequenters of this abode of intellectual bliss, was up on the charge of vagrancy. Jimmy denied the soft impeachment, but Chief Roszel said that Wilson has no home, and no money. Wilson has served three or four terms in gaol, and has been out about three weeks. He was drunk most of the time and was a nuisance on the street.

The prisoner said, "I'll not be here any more, give me three hours and I'll leave the city."

The chief asked him how long he would stay away and he answered "forever."

"If you ever appear here again, you will go to Central Prison," was the concluding and emphatic peroration of His Worship.

James in fitting terms expressed his gratitude for that three hours start.

At the county police court yesterday morning Robert Baldwin, a farmer living near the scene of the alleged crimes, was tried on the charge of stealing a box containing $150, and some other valuables from George Decheine, caretaker of a lumber camp of the Dickson Co., in Cavendish township.

The plaintiff stated that he had counted the money in the box on June 5th, and on the following morning it was missing. His evidence was that Baldwin was the only one in the vicinity.

Baldwin denied the charge and stated that he had never seen the box in question.

In summing up the case His Worship Magistrate Edmison said that Decheine's evidence was contradictory, and as the charge had not been proved, he acquitted Baldwin.

R. F. McWilliams appeared for the defendant and R. E. Wood for the plaintiff.

### Colonial Inspection Needed.

London, June 20.—The report of Dr Thomas, the medical officer of the Borough of Stepney, to the Local Government Board, shows that his department, during the past five years, has destroyed over a ton of rotten, tinned foods daily at the Stepney wharves. These, he adds, were not American goods, as practically no canned goods came from American concerns imported through the Stepney wharves, but were colonial meat, fish and fruit. The medical officer says he found raspberries treated with sulphur in order to preserve them.

### Additional Circuit Completed.

The Bell Telephone Company of Canada has just completed an additional circuit between Peterborough and Lakefield. This is sure to facilitate the service between these two points.

—Mr. J. M. Brooks, president of the local branch of the Ontario License Holders' Protective Association, and vice-president of the Ontario Association, left this morning for Toronto to attend the annual convention of the association to be held in that city.

## SCOTTISH KNIGHT VISITS CANADA

### Sir W. Thornburn Member of British Commons Makes First Visit to Land of the Maple Leaf.

Montreal, June 20—Sir Walter Thorburn, of Kerfield, Peebles, Scotland, and member of the House of Commons for twenty years, representing Peebles and Selkirk districts, is in the city on a short visit.

Yesterday Sir Walter, who is a typical Scotchman of the old school, was viewing the city and calling upon his various friends, among them being Mr. C. R. Hosmer.

For twenty years he had been endeavoring to make a visit to this side of the Atlantic and this was his first opportunity, and now he regretted that he had not made the trip years ago. While his visit had been necessarily hurried the Scotch Knight had managed to see a good deal of the country. He had visited Washington where he had been kindly received by both the President and Vice-President Fairbanks. He had also had a very interesting chat with Speaker Cannon, with whom he had discussed the procedure in Washington, as compared with that of the House of Commons. He found that they had much in common, though here and there the differences were striking.

While in Canada, Sir Walter will visit Ottawa, where he hopes to have the pleasure of seeing Lord Grey, whom he has known for many years.

Speaking of old acquaintances, he referred to the fact that Mr. John Hope, of this city, was a native of the town of Peebles, and he had taken the opportunity while in the city of calling upon him. They had not seen each other since they were boys, back about 1850.

In British politics, Sir Walter Thorburn is a Unionist. Prior to 1886 he was a member of the Liberal party, but in that year refused to follow Mr. Gladstone's home rule policy. He then opposed the sitting member as a Unionist, and defeated him, and continued to be a member of the House until the last general election, when he was defeated. He is distinctly opposed to home rule, believing that the granting of the same would be a serious menace to Great Britain.

"If Ireland," said he, "were a thousand miles away from London, then, perhaps, it might be an excellent thing, but under the circumstances it would be dangerous in the extreme."

He is largely interested in manufacturing in Scotland, and has a handsome estate of upward of seven thousand acres.

## The Warden's Fine Address

### Warden Johnston Delivers His Address to County Council.

The annual June session of the county council was held yesterday afternoon with Warden Johnston in the chair.

All the members were present, viz: Warden Johnston, Councillors Andrews, Buck, Shaw, Monogue, Carey, Garbutt, Stinson, Maloney and Webster.

The warden read his address as follows:

To the members of the County Council of Peterborough.

Gentlemen,—I beg to address you at the regular session of the council upon matters of interest affecting our county.

It is a great pleasure for me to be able to point to the continued material progress the county is making. The season has been propitious and there is every reason to believe the industry of agriculturists will be awarded by an abundant harvest.

The whole Dominion also is making rapid progress. Manufacturing is increasing and numbers are emigrating to and are proud to become citizens of Canada.

The great work of the year which this council will achieve is the much talked of House of Industry.

The land selected near the village of Lakefield as a site has been duly conveyed to the county, and a contract for the construction of the building entered into, providing for the completion of the work by the first of November next.

It will be probably considered advisable by the council at an early date to frame rules governing the terms for admission of inmates and the management of the institution.

Provisions was made in our by-law creating for the issue of debentures to pay for the expense of the construction.

Contracts have been executed for the erection of proposed iron bridge over the Indian River at Ennis's to Keene, the cost of the constructure being $3,000 and of the bridge proper $4,750.

Owing to the raising of the water by the Hastings dam the expense of the construction of the bridge at Keene is considerably increased, and consequently an application has been made to the Dominion Government for a grant toward this work. The application has been very strongly endorsed by our county members and it is to be hoped their efforts will prove successful.

The joint committee of the county and city appointed to administer the funds available for charitable purposes under the will of the late Mrs. Foley met for organization and appointed Mr. Buck chairman and Mr. James A. Hall, secretary-treasurer thereof.

The application to the court for payment over of the funds was argued before Mr. Justice Falconbridge last month, but judgment has not yet been given by him upon the questions raised.

The transfer to the Dominion Government of the swings of the bridges at Bensfort, Hiles, Locks Channing and Gannon's has been completed. To complete the title a by-law approving of this were passed by the Townships of Dummer, North Monaghan, Smith, Ennismore, and Harvey and these municipalities joined with the county in execution of the required releases.

My attention has been called to the report of the Provincial Municipal Auditor presented at the recent session of the Legislature, and extracts of which appeared in local papers. If statement contained reflection upon our late treasurer and upon the county council, which were in my judgment, entirely incorrect and unjustified for. If the Provincial Auditor had any complaint to make during our late treasurer's occupancy of the office he should have done so then and brought the matter to the attention of the council, but this he did not do. While as a natural result of our late treasurer's illness the work of the county became somewhat in arrears, the necessary posting of books, etc., were afterwards promptly done and comment thereon afterwards by the auditor was quite unnecessary.

By statute amending the school law, passed at the last session of the Legislature, the counties are required to raise annually by general rate, except from towns and villages, a sum at least as large as the special Government grant to the rural schools, the amount so raised to the county being payable to the trustees of the rural schools.

It will, therefore, be necessary for the council, in preparing the estimates to provide for the additional levying of at least $1,070 for the purpose.

Apart from this, the business requiring the attention of the council at the present session will, I expect, be of the usual routine character.

Councillors Buck, Carey, Garbutt and Maloney were nominated as a committee on the warden's address.

County School Inspectors J. Coyle Brown and R. Lees read their semi-annual reports.

## The Marvellous Cobalt Country

### Another Mine of Limitless Possibilities Being Worked.

Yesterday Mr. Daniel Simpson, an engineer of international reputation, who is stopping at the Oriental Hotel, gave The Times a call.

This gentleman has had practical experience as a mining engineer and expert in every mining state and territory in the United States, as well as in Alaska, Canada and Mexico, and is very highly recommended and endorsed by the cashiers of several National banks and leading citizens of the United States.

Mr. Simpson is now manager of The Columbus Cobalt Silver Co., with headquarters at Cobalt, Ont.

Mr. Simpson has enthusiastic trust in Cobalt's future, and especially in the Columbus mine. This mine has an authorized capital of $500,000, the shares of which are now quoted at $1 each.

The Columbus Cobalt Silver mine is located on their own property, on the north-west quarter of the south half of lot two in the third concession of Coleman Township, District of Nipissing. The mine was inspected and passed upon by Prof. Mickle, of the School of Practical Science, Toronto, as noted in the Toronto Globe of June 6th. The Toronto News' special staff correspondent, who was at Cobalt on June 9th, says: "At the Columbus mine preparations are being made for active development. A contract is being let for the sinking of the main working shafts to a depth of 100 feet. This will be a double compartment shaft 5 ft. 10 in. x 10 ft. 6 in. and the contractor has agreed to keep his men working day and night until the work is completed." It might be noted that the contractor began work with a double shift of men on Monday last.

The stock in this mine, which is adjacent to the celebrated "Nova Scotia," which is now producing millions of dollars of silver, is, for a limited time only, quoted at $1 per share. Mr. Simpson declares his belief that within a year to eighteen months, these shares will be eagerly bought at $50 each. One strong feature about this stock is the low capitalization of the mine, hence making it a better dividend payer when the mine is in working order.

Mr. Simpson, who, as noted, is a practical mining engineer, assured The Times that the natural formation and location of the Columbus makes it a practical certainty that the Columbus will prove the richest mine in Cobalt as soon as the shaft is sunk as above noted. The property has all the timber required for mining purposes as well as fuel.

A glance at the list of directors, as per ad. in another column, is most reassuring, they being Canadians of national reputation.

For full particulars call today on Mr. D. Simpson, at the Oriental Hotel, or address him at P. O. Box 129, Cobalt, Ont.

TO BOIL

## Brings Senate Into Disrepute

### Appointing Members in Order to Provide Seats for Ministers.

Ottawa, June 20.—Senator McMullen continued the debate on senate reform in the Upper House yesterday. He cited in support of a second chamber in Canada the fact that the principal countries of the world had dual legislative houses. The ... of all the provinces would have to be obtained to the abolition of the Senate. He doubted if it could be done.

Abolition of the Senate could hardly be demanded on the ground of expense. He had made a calculation and had found that last year the expense of running the Senate with the increased indemnity, was $30,614. That was about five cents a head for each Canadian.

He favored the electing by the Provincial Legislatures of a portion of the Senate, as proposed by Sir Richard Cartwright. That would relieve the Federal Government of some responsibility in the appointments. Now there were dozens of applicants for each Senate vacancy. Most of them were bound to be disappointed, and some of them driven into Opposition.

He favored a twelve years tenure, but was opposed to the election of Senators. One Chamber was all that could be elected with safety. There was no reason why Senators, like judges would not be retired on full pay after reaching a certain age.

Senator McMullen endorsed Sir Richard's condemnation of the ... term gerrymander. The question of Senate reform began right after the Senate had passed that bill. It had gone through the Senate in still an hour. The fact that it was ... times rushed through the Senate gave the country the idea that the upper chamber only existed to give election to sets of the lower house.

Senator McMullen thought Senators should be appointed from districts as well as from Provinces, and should regard the people of those districts as their constituents, and expect communications from them as members of the Commons did. The Senate would thereby be brought in closer touch with the people. Members of the lower house should not be appointed to the Senate in order to give seats to Ministers. That practice tended to bring the Senate into disrepute.

SENATE ON THE TARIFF.

Ottawa, June 20.—The Senate last evening took up the Act to amend the Customs Tariff Act, as proposed in the Budget, by continuing bed rock alluvial gold mining machinery on the free list, and providing rails could be sent to the United States for re-rolling and returned to Canada on payment of the duty on the labor only, with the provision that the Government could discontinue this, and charge full duty as soon as a mill was established in Canada to do the work. The bill was given its third reading.

## ATHLETIC WORLD

### BY OUR SPORTING EDITOR

THE TURF.

Last night it was rumored among local sporting circles, that Mr. Harry Nesbitt, who last week made a match with Mr. Jno. Duncan, to race Harry Direct against Duncan's green trotter (not yet named) for $200 a side, does not think that Harry Direct is swift enough for the Duncan horse, and it was said last night that he has withdrawn his deposit. This, however, The Times was not able to corroborate. Time will tell.

• • • •

BASEBALL.

All the games in the Eastern yesterday, with the exception of Rochester and Baltimore, were declared off on account of rain. The game between those two teams resulted as follows, Rochester 3, Baltimore 7.

• • • •

American League games yesterday resulted as follows:

Philadelphia 2, Cleveland 0.
New York 1, Detroit 2.
Washington 7, St. Louis 2.

• • • •

Following were the scores in the National League:

Chicago 5, Boston 0
St. Louis 3, Philadelphia 1.

## Japs Excluded From U. S. Navy

### They Have Been Learning Too Much About American Service.

New York, June 20.—All Japanese are to be excluded from the American navy on July 1 unless they produce citizenship papers, or a signed declaration that they intend to take out the same. In the future no Japanese will be allowed in the navy unless he renounces the Mikado in favor of the Stars and Stripes. Orders to drop the names of all alien Japanese from the papers of every warship in this country have been issued by the Secretary of the Navy, Mr. Bonaparte. He further directs that the places of Japanese who have been employed as stewards and servants are to be filled by American negroes.

Officers at the navy yard in Brooklyn say that it has been discovered that the Japanese Government has been able through its subjects on board American ships to learn altogether too much about the Yankee service, not only as to the personnel, but also as to plans for future defence. Hence Secretary Bonaparte's order. The story is told by officers of the American battleships now at anchor in the North River that less than a month ago a midshipman discovered a Japanese steward making plans of the business section of the turrets of one of the latest types of warships. His personal effects were searched by order of the commander of the ship. It was discovered that he had been working for weeks on plans of the ship, and that he was a remarkably fine draughtsman. The matter was reported to Washington, and was doubtless one of the things which caused the order issued against the Japanese.

### Panic Imminent on Grounded Steamer

New York, June 20.—A panic was narrowly averted when the excursion steamer Wm. W. Storke, with five hundred people, mostly women and children, bound from the Battery to Midland Beach, S. I., a pleasure resort, grounded half a mile from her destination. The captain and ex-mayor John H. Hinchliffe, of Paterson, N. J., owner of the resort, managed to restore quiet, but not until nearly every woman had a life-preserver strapped on herself and children.

## That Tug of War Cup in Dispute

### Mr. Munden Wants the Cup for the Quakers.

Mr. Chas. Munden, who was formerly the chief officer of the Quaker tug-of-war team, asks us in the letter appended below, why a certain local hotelkeeper does not hand over a cup which the writer claims was won by the Quakers. In this matter, before expressing any opinion on the subject, we would like to hear the present keeper of the cup give his side of the question.

Mr. Munden's letter is as follows:

(To the Editor of The Times.)

Dear Sir,—Can you tell me why the cup now in possession of the proprietor of a local hotel, is no hand it over to those to whom it belongs. This cup was given by the Turf Club and was to be the possession of the winning team, to be held by them until another team challenged for and won it. The Quakers won this cup three times consecutively; then the Force team won it once, but did not reply to a challenge issued by the Quakers. Now, under these circumstances, the cup should belong either to the Quakers or the Force team, and, as the Quakers won out three times and the Force team once, it seems to me that the cup should go to the Quakers. In either case the hotelman in question, in my mind, has no right to retain the cup.

C. MUNDEN.

## Half Million Acres of C.P.R. Land Sold

### English Company is Capitalized at Two and a Half Million Dollars.

Montreal, June 20.—Mr. Orell Ward arrived in Montreal from Edmonton, and was soon in conference with Sir Thomas Shaughnessy at his office in the Canadian Pacific Building.

Mr. Ward has purchased a half million acres of land from the Canadian Pacific in the Edmonton district, and it will be colonized at an early date.

It is not known just now what was the actual purchase price, but the company, which was organized in London, is capitalized at $2,500,000.

Mr. Ward is a Londoner who came out a few months ago to seek an opportunity for investment of capital in Canadian land, and that owned by Canadian Pacific was finally chosen. He went home and soon had the necessary capitalists together; the company was formed and the acceptance of the railway company's offer quickly accepted. The conference with Sir Thomas was in connection with minor details.

In conversation with a reporter, Mr. Ward said that he was now hurrying home to England to consummate the original program, which he had mapped out in connection with the proposed colony. He could not say, of course, just when the people would commence to arrive, but it would be at the earliest date possible. One of the directors of the company is with Mr. Ward, and he spoke in the highest possible terms of the outlook of Canada's North-West.

### Japanese Transport Blows Up.

Tokio, June 20.—The Japanese transport Toyotomi struck a mine Thursday evening when 24 miles off Jochin, Corea, and sank immediately. Fifty of her crew are missing.

### Scarcity of Labor in Kansas.

Topeka, Kan., June 20.—There is an extreme shortage of labor throughout Kansas. Farmers are unable to obtain men to harvest their wheat. The railways, being short of labor, are not offering cheap farm-laborers' excursions.

COBALT
THE
WORLD'S RICHEST SILVER MINING CAMP
THE COLUMBUS COBALT SILVER COMPANY, Limited
Authorized Capital Stock, $450,000. Shares $1 each.
BOARD OF DIRECTORS.
HON. RICHARD HARCOURT, President, Director of the Ontario Bank, and formerly Treasurer of the Province of Ontario.
JOHN FLEET, Esq., Vice-President, Head of the firm of Fleet, Lowndes & Co., Director of Ontario Bank.
JAMES B. TUDHOPE, Esq., M.P.P., Head of the firm of Tudhope Carriage Co. Limited, Orillia, Ontario.
DANIEL SIMPSON, Esq., M.E., Managing Director, Cobalt, Ontario.
JOSEPH COLCMBE, Esq. Explorer, Haileybury, Ontario.
SOLICITORS: Clark McIlwrow, Campbell and Jarvis.
This Company owns the famous Columbus Mines, being a quarter section in Coleman Township, near "Giroux Lake," nearby the rich Lawson, Hargraves, Jacobs, Drummond, and other great mines, also joining near the famous Gillies timber limit, which is so rich in silver that the Ontario Government decided to develop it for the benefit of the public. It has four veins so far discovered, one of them has been known as the 'Great Columbus Vein' for months, which is nearly seven feet wide almost all one; containing Cobalt Smaltite, and Galena, running well in silver. It is predicted by the best and oldest mining Engineers that this mine will soon become a very great producer. There is now a large force of miners sinking the big main double working shaft, working night and day.
It is a foregone conclusion that the price of this stock will greatly advance as the sinking progresses, therefore, the undersigned personally offers for sale at par only a limited number of shares.
Send for full particulars to
DANIEL SIMPSON,
ORIENTAL HOTEL, PETERBOROUGH, ONT.

## Pin Your Faith on Ferrozone

**A Tine Honored Cure for Spring Ailments that Every Physician Recommends.**

But every year has seen the popularity of Ferrozone increase, and today it is used by the people of many nations for weakness, debility and the characteristic ailments of spring.

Let Ferrozone help you!

It enriches the blood supply and thereby vitalizes the quickens the whole body.

Humors and impurities are driven off. Disease germs of every kind are destroyed.

Nutritious material is supplied for restoring the waste, and day by day the process of rebuilding goes on till health that outlasts old age is established.

Mr. W. A. Renwick, of 245 Hunter street, Hamilton, Ont., writes: "A year ago I became run down and lost my health. My strength was greatly reduced and on account of the weakness of my heart I was afraid to take up work.

"On going up stairs or walking fast my heart would beat like an engine, I would gasp for breath and get exhausted quickly. At night I would wake up in an excited condition, and find my heart going like mad.

"In this terrible state nothing helped me but Ferrozone. Such good it did me I can hardly explain. It built up my strength, put new life in my heart and made me feel like a new man."

Even in advanced cases of weakness Ferrozone is unfailing. Your druggist sells it at 50c. per box or six boxes for $2.50, at all dealers, or by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $4 per year, strictly in advance.

### VISIONS

Dr. William Osler's cold-blooded proposal to chloroform old men has made him so famous, or notorious, that some newspapers are reprinting as news the opinions he expressed in a book that he published a year ago concerning deathbed visions.

"Deathbed visions," he says, "of which there are scores of supposed authentic records and in which thousands of people are believers, are plain nonsense." By which he means to say probably not that people do not see things which have no objective existence but that what they see is not miraculous and is in no sense an inspiration or revelation. It would be a wise man who could know even that much about them.

Considerable light is shed on this subject by the most elementary acquaintance with the special senses of the human body. The optic nerve, the auditory nerve and the olfactory nerve are widely different in one respect from the other nerves. If violence is done to the nerves of the hand, foot, leg or back the only sensation is pain. If force of any kind is applied to the optic nerve one sees something. If to the auditory nerve he hears something and if to the olfactory nerve he smells something. What it is that he sees, hears and smells depends perhaps on his imagination and his memory of objective realities.

These nerves may be excited either by physical means or by disease. If a person pushes his finger against one side of his eyeball with his eyes closed he will see a large spot of light, and if the optic nerve is shocked by a severe blow he will see a shower of stars. If the auditory nerve becomes inflamed he will hear the hissing of steam day and night. People whose olfactory nerve was impinged on in some way have had their floors torn up to hunt for a supposed dead rat. The same phenomena occur when the corresponding portions of the brain are excited.

These simple facts are sufficient to show that every man has within his own body the machinery and the material for seeing things that have no objective existence. All that is needed to produce such an experience is the proper mechanical or pathological excitation of the proper nerves. The excitation is generally pathological and the fact that sick people see and hear things that have no objective existence is too common to be disputed.

Because such things have a physical cause Dr. Osler jumps to the conclusion that they are "plain nonsense" but a great many people as wise as he is will not agree with him. Dreams have the same explanation as visions, but both dreams and visions have been known to correspond with objective realties at a remote distance of time or space. It may be conceded that in almost every case they have no meaning and no value without admitting that in these exceptional cases they are not a profound and awful mystery.

The Christian religion may almost be said to be founded on dreams and visions, and some people would say at once that this was enough to discredit it, but if we admit that such a thing as a revelation from heaven is possible at all there is no good reason why it may not be communicated in this way. Certainly we see in the case of the apostle Paul that a man may constantly see visions without being in the least degree visionary.

Dr. Osler seems to be hitting at the doctrine of the immortality of the human soul by overturning its trustworthiness of visions, but he is fighting a man of straw. Christian theologians have rested the doctrine of immortality on described visions. The late D. L. Moody, when he was dying, opened his eyes after a period of unconsciousness and said, "I have seen my children," meaning his deceased grandchildren, but no one ever inferred that he had really done so.

Dreams, visions, clairvoyance and telepathy form an occult class concerning which it is less wise to dogmatize than to say you don't know.

## Kansas Wants Men For Harvest Fields

Chicago, June 19.—A despatch to the Record-Herald from Topeka, Kansas, says: Kansas is sending the strongest appeal of her history for men to work in the harvest fields. At least 25,000 more men than are in sight now will be needed, and desperate measures will be adopted to draft men into the service behind the self binders.

The State free employment agent holds that a number of railroads are largely to blame for the shortage of harvest hands. He says the railroads need every man they can get to complete their own work and for that reason have refused to grant the one per cent. 1 mile passenger rate that usually is made for the harvest hands. They fear, it is said, that the call from the wheat fields, with the attractive wages, will draw away their laborers, who get only $1.25 for working on the tracks.

All sorts of inducements are held out to laborers to go to the wheat fields. Along the Santa Fe Road yesterday farmers drove into town in surreys and carriages and picked up the struggling laborers who alighted. At Halstead one farmer made a deal with five men who left the train and conveyed them to his home, five miles distant, in a big automobile. His promise of a fine fried chicken Sunday dinner was an additional incentive.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment, Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### $9.00 New York and Return $9.00.

Friday, June 15th, via Lehigh Valley Railroad. From Suspension Bridge, Niagara Falls. Tickets good 15 days, good on regular express trains leaving at 7.50 a.m., 7.15 a.m., 3.43 p.m. For tickets call on or write Robt. S. Lewis, Passenger Agent, 18 King street east, Toronto.

### Policy in Accord with Government

London June 19.—At the conference this afternoon regarding colonization of educated women, Mrs. FitzGibbon said the policy of the National Council of Women in Canada was in accord with the policy of the Dominion Government. They were willing to cooperate if needed in an imperial scheme to equalise the sexes.

Mrs. Joyce cited many instances of women emigrants happily married in Canada.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart and Wilton, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

# Hearts Courageous

By... MALLIE ERMINIE RIVES

Copyright, 1902, by THE BOWEN-MERRILL COMPANY

one Louis Armand, Marquis de la Trouerie, swindler, impostor and conspirer against the peace of his majesty's colony. A fine sport he has made of you, ladies and gentlemen! Will you come hence peaceably," to Armand, "or shall I have you dragged?"

The hearers wavered. Mrs. Byrd had fixed her eyes on Anne's face, and in them was a tiny, feline glitter. Anne's hands were clasped about Armand's arm, and a spot of indignant red burned either cheek.

"Oh, infamous!" she said clearly. "'Tis a lie."

"Sir," asked Colonel Tillotson of Armand, his tone baiting, "will you answer this?"

The young Frenchman's eyes were on Anne with a look ineffably tender, struggling with a sudden anguished shadow. White lines had fallen around his lips.

"Colonel Tillotson—gentlemen," said Foy, "there is not a particle of doubt, though the rascal has been clever enough to deceive even his excellency. Lack of proof has prevented his earlier exposure. This man crossed on the same ship as the nobleman he represents himself to be. The passengers of the vessel knew him in his true character."

"'Twas the Two Sisters," Anne declared. Her eyes sought out Cary. "Why—why—you were on that ship! You left her in Hampton Roads. You must know. Tell him he lies!" Her tone was certain and defiant.

Cary's lips twitched. He looked at Armand, where he stood straight and quiet, his eyes on Anne's, and he seemed again to see that lithe form hurling itself against the brutal mate of the ship for the hurt of an outcast woman's heart. He struggled against a wish to cry out that the matter was not his business and fly. He dared not look at Anne, knowing what he must see there when he spoke.

"Mr. Cary was on the ship?" asked Foy distinctly.

Anne drew a long breath, and a pallor suddenly struck her face. But she bent forward and laid her hand on Cary's arm.

"Answer!" she bade him. "Who is he?"

Cary raised his hand. "He is a gentleman, and he is a brave man. Beyond I ask dot."

"Is he the Marquis de la Trouerie?" Anne's voice was clear and firm.

"He was my friend!" cried Cary.

"Is he the Marquis de la Trouerie?"

Cary's look turned to her. He saw the grayness in her cheek and the brave light in her eyes burned his heart cold. He looked from side to side at the sneering laugh of Foy, at the calm, stern evenness of Colonel Tillotson, at Anne's face, now grown deadly white.

"Is he the Marquis de la Trouerie?"

"Answer, my friend," said Armand.

Cary's voice was husky as he spoke. "He is the marquis' secretary," said he.

The men standing nearest drew away from Armand at this. Anne had given a flinching start as if smitten by the dying terror of a bullet. It seemed to her that present, future, dreams, reality, heaven, earth, eternity, were all slipping away from her. Armand touched her hand gently, his face torn with conflict.

"You told me—if the man you loved"— The words failed.

She raised her great eyes to his. "Are you the Marquis de la Trouerie?"

A whitening pain had conquered his face.

"I am Louis Armand," he said as one whose heart is broken.

Anne closed her eyes and stood trembling, and in that moment he dropped his arms to his sides and turned to the waiting soldiers.

"Take him away!" said Foy.

Seeing, Anne struggled piteously to speak. She stood an instant with both hands stretched out after him; then she slipped back into Colonel Tillotson's arms.

The dance was breaking up as the door opened for Armand and his guards.

Then across the quiet struck discord. A far babble drew suddenly nearer. There was a din and a scurry of crying. Windows were opened.

"Haste!" fretted Foy. "To his excellency with the prisoner! Conolly has been seen. The alarm is out, and the town will rise!"

Gallants and dames issuing into the street in their ball finery, the ladies' rouged cheeks faded in the early light, saw a horseman who rode by bawling:

"The powder! The powder!" he shouted. "Dunmore's men have robbed the magazine!" And with the shout the great bell of the palace began tolling the summons calling all soldiers of the king to assemble.

"The governor has come to his senses at last," Mrs. Byrd said with satisfaction as she came out to her chair. "We shall presently see these precious rebels scampering to their holes. You must go, I suppose, Francis?"

"Aye, mother," he answered, his eyes bright with Anne's pain, and gave her his cheek to kiss.

But he did not go to the palace. The resignation of his commission went to the earl instead, and he himself hastened to the narrow house in Duke of Gloucester street which bore the name Alberti and the sign of the violin. It was long before he saw his mother again.

* * * * * * *

The volcano had burst. There is to be small doubt from this time where any Virginian stands. By noon the bank of the James river at Burwell's ferry, where lies the man-o'-war Magdalen, whither Dunmore's crafty agent Conolly has marched his marines with the powder raped from the Williamsburg magazine, is black with threatening men.

Steadily numbers swell the crowd that chokes Duke of Gloucester street—city councilors, some in furtive delight at this loyal ruse, others stamping angrily, with powdered wigs askew and hands seeking the hilts of their dress swords; sober men mounting and dismounting horses; ladies, brilliant as ever, in red heeled shoes and clocked stockings, eager, excited, voluble. Here is all the aristocracy, the blue bloods of the valley planters; here are the duller garbed burgesses of the inner counties.

The mob surges up and down past a square, prim house of glazed brick brought as ballast in the tobacco ships. It is fronted by a little garden, through which leads a path between exact flower beds of white lupins, love in a mist and Canterbury bells, and here in his chair sits old Baron Fairfax, leaning on his cane, listing to the tumult, knowing it means anger against the royal authority, but not heeding his stubborn loyalty enough to pass beyond the gate. He is all a quiver with rage at the seizure of the marquis.

(To be continued)

On Saturday evening on Wilcox or George streets, between Metcalf and Charlotte street, a gold crescent brooch, set with pearls. Finder will be well rewarded by leaving at the Times Bookstore.

**PATENTS PROMPTLY SECURED**

**One Hundred Dollars in Two Years Brings One Hundred Thousand Dollars.**

The stock of the Two Stars Mining Company in old Mexico sold at $10.00 per share. Today it is selling at $10,000.00 per share. That is not the only mine in Mexico or the last opportunity. Let us give you information concerning another property in Mexico that has a future. Every dollar you invest is held by one of the greatest banks on the Continent, in your name, until you are paid dividends equal to your investment. Loss impossible. Write for plan of sale and description of property.

SAN DOMINGO MINING CO.

Dept. 61, Frisco Building, St. Louis, Mo

## SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba or the Northwest Provinces excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased), of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENT should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so

## SYNOPSIS OF CANADIAN NORTHWEST MINING REGULATIONS.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

QUARTZ.—A free miner's certificate is granted upon payment in advance of $5.00 per annum for an individual, and from $50 to $100 per annum for a company according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet.

The fee for recording a claim is $5

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1 an acre.

The patent provides for the payment of royalty of 2½ per cent. on the sales.

PLACER mining claims generally are 100 feet square; entry fee $5 renewable yearly.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles. Rental, $10 per annum for each mile of river leased. Royalty at the rate of 2½ per cent collected on the output after it exceeds $10,000.

W. W. CORY,
Deputy of the Minister of the Interior.

# Diamonds and Diamond Mining

It would be difficult to name a commercial commodity representing a more tangible basis of intrinsic value than a diamond. Diamonds are enhancing in value yearly—the demand for them never increasing—and the diamond market shows a remarkably healthy condition.

Very little is known in this country by the general public about diamond mining, and the vast returns from it. All are more or less familiar with the mining of gold, silver, copper, zinc, lead, &c., &c., and know the immense fortunes that are realized yearly from them, and the enormous source of wealth which they represent to the country annually. Yet as a matter of fact the most profitable mining enterprises of the world are those devoted to the mining of diamonds, and "In London, the great financial centre of the world, this is well understood, and diamond mining securities are an important factor in financial operations there.

The two most profitable commercial institutions in the world today are the De Beers and Premier diamond mining companies of South Africa, which pay fabulous returns on even the present price of the stock, which has enhanced in value many times during the last few years.

THE COLONIAL DIAMOND MINING COMPANY

controlled largely by Boston capital, own in British Guiana, South America, a property containing 42 mines which, during the six months we have been operating it, has paid over 50 per cent. profit, and that after expending large sums for machinery and mining appliances. From careful tests made during those six months we have demonstrated that we have a larger diamond field than either the De Beers or Premier Diamond Mining Companies, and that each laborer we employ produces larger results than the African laborers. We also know positively that our property will produce three times as much per cubic yard of dirt as the South African mines. We also have the priceless advantage of a healthy climate and an unlimited supply of water—two essential factors in success.

This company is conducting a legitimate business enterprise upon business principles and we court the fullest investigation of our enterprise. The property lying on British territory and conducted under the strict laws governing all mining operations carried on in British domains, detailed information relative to it may be obtained from the commissioner of lands and mines, who receives from a government inspector on the grounds, the actual condition and production of the property. Thus our production is a matter of official record and may be obtained at all times from this authentic source.

To provide the necessary capital to increase our production 10 fold, we are offering a block of $100,000 of our stock at par, $10 per share. When it is considered that we paid $220,000 in cash for our property, which we own outright, it must be admitted that $100,000 is not an excessive amount of stock to issue, and is all that we will offer for sale.

The undersigned will be pleased to have parties interested in legitimate investments call at our office, where we can supply much valuable information relative to diamond mining. If not convenient to call, write for prospectus.

# 100% ADVANCE JUNE 1

## Present Price of Stock FIVE Cents per Share

If you want to get in on the ground floor before the price advances to 10 Cents per share, NOW IS YOUR CHANCE

When The Gold Leaf Mining, Milling & Drainage Company was organized the officers of the company foresaw the certainty, of a big mining boom in Clear Creek County, Colorado, U.S.A., and they congratulated themselves on securing a property which showed 1,500 feet of development work, and could be classed with the MINES of the region.

The steady increase in the mineral production of the county, new strikes, the development of old mines at depth (proving the continuity of the ore bodies and the increased richness of the ores), the availability of mining supplies, the abundance of water the great amount of timber for mining and fuel, the adaptability of the topography for deep tunnel mining, and the large number of milling and smelting plants, means that the district possesses all the elements of successful and economical mining.

It was a foregone conclusion that investors would awake to a realization of the conditions, and inaugurate a new boom in 1906. It is but natural that they should desire to place their money in a locality that shows more PROVEN MINES than prospects, and where the chances for speedy returns are greater than the chances of loss. Because of economic conditions money will go farther in development work and bring RESULTS quicker. Many new companies have recently been organized, foremost among them being The Gold Leaf Mining, Milling & Drainage Co. Stock in all Clear Creek County companies is finding a ready market among both Eastern and Western investors, and in consequence The Gold Leaf Mining, Milling & Drainage Co forestalled the boom by securing one of the best mining propositions in the locality, consisting of 16 mining claims, situated on Standard Mountain, in the Ohio and Jackson Mining District, two and one-half miles south of Idaho Springs. The Gold Leaf properties are credited with a past production of $75,000, and the tunnel is being steadily driven toward the rich ore bodies from whence former shipments were made. The old workings are now drowned with water which the tunnel will drain and also give unlimited stoping ground for the ores. Surrounding mines have produced over $11,500,000. Now is the time to purchase stock. When we re-open our ore the opportunity will be lost to investors.

Don't overlook this exceptional opportunity! Think of the acreage; Think of the development work done; Think of the past ore production; Think of the future possibilities; Think of investing—THEN ACT AT ONCE!

Sufficient stock subscriptions have already been received to carry our Frontier Tunnel a distance of 600 feet, or to the Standard Vein, from which point ore shipments will be resumed. Future stock subscriptions will be applied on the purchase of a power plant or on contracts to facilitate the work of driving the tunnel.

Our General Manager estimates that the completion of the tunnel will place at our disposal OVER FOUR MILES OF ORE, aggregating 96,000,000 tons.

**$5.00 DOWN**

AND

**$5.00 PER MONTH**

FOR FOUR MONTHS WILL BUY

**500 Shares**

OF STOCK WHICH MAY SOON BE WORTH

**$500.00**

## Are You Often Bilious?

**Read This and Learn How To Prevent Attacks.**

Biliousness is merely a term applied to a condition that exists when the body is over-loaded with bile.

The complexion turns yellow, eyes look dull, pimples, itching and eczema break out, headaches are ever present. Biliousness has two great causes, constipation and defective liver action.

When Dr. Hamilton's Pills are taken they not only correct the bowels, but act directly on the liver, regulating its bile secretion.

Unlike ordinary medicines, which purge and give temporary relief, Dr. Hamilton's Pills remove the condition which causes biliousness, thus permanent cures are effected.

Dr. Hamilton's Pills do cure biliousness and liver ills under all circumstances.

We prove this by the statement of Mr Benwick Luddington, of New Harbor, N.B., who writes: Three months ago I had no expectation of ever getting free from periodical bilious attacks. They were preceded by dizziness and dreadful headaches. If I stooped over my head would swim and a nauseous feeling crept into my stomach.

"Dr. Hamilton's Pills fixed up my liver, drove all the bile out of my blood and made me a well man in a few months. Today I enjoy a good appetite, excellent digestion, and the best of good health. Dr. Hamilton's Pills did it all."

Get Dr. Hamilton's Pills today. Sold by all dealers; 25c per box or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## TOWN AND COUNTY NEWS

**DASHES HERE AND THERE BY TIMES' REPORTERS.**

### Strawberry Festival in Smith.

A strawberry festival and ice cream social will be held at Middleton's school house, 2nd line, Smith, on Friday June 29th, under the auspices of S.S. No. 7.

### The Merry-Go-Round a Success.

The crowd continues nightly to flock towards Jackson Park. The merry-go-round has certainly "caught on," and will doubtless prove a good drawing card. Mr. Larmouth nightly hears a noise like silver five-cent pieces, a noise like silver five-cent way Company's cuffers.

### Great Musical Treat.

Closing exercises of the Peterborough Conservatory of Music, on Wednesday, June 20th, in the Grand Opera House. Tickets to this most interesting display of talent will be sold at 25 cents each. No extra charge for reserve seats.

### To Consider Isolation Hospital.

A meeting of the city physicians will be held in the city council chamber tomorrow afternoon at five o'clock to consider the plans of the new isolation hospital. A full attendance is requested. The Board of Health will meet on Monday morning next.

### Port Hope "Times" in Action.

Mr. E. G. Rooke, proprietor of the Port Hope Times has been served with a notice before action by Kerr & Kerr, solicitors for G. R. & P. Rice, asking him to contradict the statements made in his recent articles on the milk question, or else bear the consequences of a suit for libel.

### Local Orangemen at Lakefield.

A very interesting session of Diamond Loyal Orange Lodge, No. 80, with Worshipful Master Barrett in the chair on Monday night, initiated one candidate. At the close of the Orange, the Blue Degree was conferred upon two brethren. At 7.30 yesterday evening busses were waiting at the lodge room and took a number of the brethren to Lakefield to attend the district meeting.

### Men Wanted.

Any number of Woodsmen wanted for Algoma Commercial Company, Sault Ste Marie, Ont. Highest wages paid. Apply to

GEO. J. CHALMERS
543 Water Street
or P. O. Box 831, city.

## THE NEW TERM

at the

## PETERBOROUGH BUSINESS COLLEGE

opens on

TUESDAY JAN. 2, 1906

Intending students should make application as soon as possible. Call at the College or address

WM PRINGLE,
Opposite Post Office. Principal.

## LOCAL INCIDENTS

**By The Times Man on the Street**

—The Dramatic Club of All Saints church did not meet last night.

—The next session of the Division Court will be held on June 29th.

—Mr George L. Hatch of Ottawa, auditor for the Matthews Company is in the city.

—John Garman, a farmer of Sandy Creek, Ont., was struck by a train on Monday and killed.

—St. Thomas is the next place of meeting of the Grand Lodge, Canadian Order of Foresters.

—The autocars for the Peterborough-Chemong route trip has not yet come, but is expected today.

—Yesterday morning Mr. Robert Hayland caught a twelve-pound pike in a sewage in the river, just above the dam at Inverlea Park.

—About 100 excursionists took in the C.M.E.A. excursion to Stony Lake via the G.T.R. and steamer Stony Lake yesterday morning.

—Work on the addition to the Maple Leaf hotel, George street, is progressing favorably. The frame work is about completed.

—Mr. A. J. Murphy, late of Adelaide street, Toronto, is opening up a store at 206 Charlotte street, as an insurance agent, and for handling real estate.

—The local Typographical Union have announced Civic Holiday, August 6th, as the date of their annual picnic. This year it will be run to Indian Point per steamers Water Lily and Rainbow.

—Cole Bros. circus yesterday drew immense audiences at Haileybury. This is the first circus that ever showed in the Temiskaming district, and every farmer within 40 miles turned out and took it in.

—At last the much talked of Ashburnham outfall sewer has been completed. Contractor James Bogue has finished the last manhole and all that now remains is for the city engineer to accept the work and pay over the money.

### Phonographs.

Sold on easy payments at The J. M. Greene Music Co., George street, New Opera House Building, Peterboro.

### Oil City, Pa. Visitors Here.

A party consisting of Mrs. J. K. Dale and Miss Edna Ross, of Franklin, Pa., and Messrs. C. M. Conard and J. R. Steeple, of Oil City, Pa., two of the directors of the Star of the East Gold Mining Company, passed through the city yesterday on their way to the company's mines in Hatrie township, Frontenac County.

### Dog Lost.

On Thursday last, a white and tan fox terrier (female) puppy, answers to the name of Trixy. Suitable reward for return. Anyone harboring the dog will be prosecuted. Apply to 204 Charlotte street.

### Orangemen's Church Parade.

The members of Diamond Loyal Orange Lodge No. 80, have decided, for Sunday, July 8th, to attend Park street Baptist church, where a sermon will be preached by Rev. Bro. A. H. Brace. This is in addition to the church parade to St. Andrew's in charge of Rev. J. G. Potter on the evening of the same day.

### Mr. Jas. Kendry in Lethbridge.

The Lethbridge, Alta., Herald says: "Jas. Kendry, ex-M.P., for West Peterborough, is in the city, and will be here for several days. He is one of the leading woollen manufacturers of Ontario, and was for many years mayor of Peterborough. He is accompanied by Mr. Siegel of New York."

### Organ for Sale.

Fine new organ will be sold at a bargain. Very little used. Will be sold at a low figure for quick cash. Apply at this office or to P.O. drawer 1168.

### Lindsay Golf Players Here.

Messrs. J. D. Flavelle, G. W. Hoffman, E. J. Kylie, Geo. A. Little, J. G. Edwards, W. R. Widdess, C. D. Burt, R. Ross, A. Montizambert, and W. Sheldin, members of the Lindsay Golf Club, who arrived in the city at noon yesterday, armed with a formidable consignment of golf clubs, registered at the Oriental.

## Robert Bailey Breaks An Arm

An accident particularly distressing in the case of a farmer at this season of the year occurred in the township of Emily, on Monday afternoon.

It seems that as Mr. Robert Bailey, a popular farmer, residing in the third concession of Emily, was assisting at a barn raising at the farm of Mr. John Knowles in the seventh concession, he had the misfortune to fall from a beam, and sustained a compound fracture of his arm.

Mr. Bailey, who was working on the plate of the frame, about sixteen feet above the ground, missed his footing, and fell the sixteen feet, breaking his arm at the wrist, fracturing both bones. Drs. Cameron and Keith, of Omemee, were summoned and dressed the injury. Mr. Bailey was taken to his home and will be laid up for several weeks.

## Grape-Nuts

A FOOD FOR BRAINS

A charming breakfast dish

Read "The Road to Wellville," in pkgs

## SOCIAL AND PERSONAL

—Mr. D. O'Connell was in Toronto yesterday.

—Mr. John Smith of Guelph is in the city.

—Mr. R. H. Cobb, of Kenora, is a guest at the National.

—Mr. A. A. Laurie of Buffalo, is in the city on business.

—Mrs. K. Eardley-Wilmot will not receive again until September.

—Mr. T. George Holmes, of Port Hope, was in the city yesterday.

—Messrs. W. S. Jacques and J. R. Cunningham, of Trenton, are guests at the National.

—Mr. Wm. Hall, of Cumbray, is in the city on a visit to his son, Mr. R. R. Hall, M.P.

—Miss S. Loucks is visiting her sister, Mrs. Meredith, of Peterborough.—Marmora Herald.

—Mr. D. J. Cimeon of Peterborough paid our town a business visit today.—Lindsay Post.

—Mr. Coates, of Toronto, inspector of the Canada Life Insurance Company, was in the city yesterday.

—Mr. J. Hilliard Cornwall, M.P.P., who has been spending a few days in the city, left for Cobourg yesterday.

—Rev. A. H. and Mrs. Brace left on the morning train yesterday for the association gathering in Brighton, in session from Tuesday till Friday.

—Mr. H. O. Esk, has gone to Niagara Falls, Ont., where he will attend the sixteenth annual meeting of the Canadian Electric Association which opened its sessions yesterday.

—The congregation of McNab street Presbyterian church, Hamilton, of which Rev. H. B. A. Ketchen, formerly of St. Paul's church, Peterborough, is pastor, has decided not to erect a new edifice but will make extensive improvements to the present building.

### Hesitating She Was Misjudged.

It was rumored yesterday that a young woman Monday afternoon, just at the scene of Sunday's sad catastrophy was acting in a significantly suspicious manner, calculated to make those observing her fear another case of "felo de se," was about to be perpetrated. The Times discovered last night that the young lady was yesterday roaming her change and trying to decide whether to buy chocolate caramels, ice cream or a cigar case for her Sunday beau.

## An Aftermath of Swamp Episode

As noted in yesterday's issue of The Times a commercial traveller, jumped from a C.P.R. train at Indian River, and caused considerable excitement in the neighborhood.

On Monday a detective belonging to the Railway Co. visited the scene of the mystery but was frustrated in his attempts as the man who had acted so strangely had been taken to Peterborough.

The swamp where Constables Whibbs and Brockingridge found the commercial traveller is located about two miles south of Indian River. Had the man not been discovered at the time, as noted in The Times, he would have undoubtedly perished from exposure.

## Correspondent Wants the Fair

### Thinks the Local Merchants Would Contribute Largely.

(To the Editor of The Times.)

Sir,—As your paper is always open to those desiring to ventilate matters affecting the public's welfare, I would like to ask why there will be no exhibition this fall.

In asking this question I do not mean for one moment to cast any reflection either on the honesty or judgment of those who last year controlled the Peterborough fall fair. These gentlemen certainly put on good attractions and had a good fair. If the public did not patronize the fair as well as they should have done, it was no fault of such men as Messrs. Hughes, Charles, Winch, Elliott or others who worked hard, at their own time and expense to make the affair a success. These gentlemen had the goods, but the public had had inferior articles passed off on them before and were perhaps sceptical.

It is well known that a very common sentiment expressed everywhere after last fall's fair was over, was, "Well they have kept faith this year and next fall the directors will get their reward by large attendance."

Now it seems that those in charge of the fair this year are exercising perhaps too arbitrary a judgment. I hope they will either give a financial statement showing a fair this fall is impossible, or go ahead. If they take the latter course, I think enough could be collected amongst our merchants to ensure a financial success.

Yours truly,
PETERBOROUGH'S INTERESTS.

## Quick Trip to Chemong and Back

As noted in a former issue of The Times, Mr. Price and party of gentlemen friends from Rochester, have been spending their holidays at Buckhorn. Yesterday morning Mr. Price received a telegram which noted that business warrant him at home as soon as he could get there. He got a special boat to convey him from Buckhorn to Chemong.

Before he left Buckhorn he telephoned Mr. Herb. Snowden to have a team at the Chemong wharf ready to convey him to Peterborough in time to catch the 11.45 train for Port Hope. Mr. Snowden got Mr. Macpherson's auto and in an hour they had made the return trip to Chemong bringing Mr. Price and his party here just in time to catch the train.

## Woman's Trials.

The bitter trail in a woman's life is to be childless. Who can tell how hard the struggle may have been ere she learnt to resign herself to her lonely lot? The absence of this link to bind marital life together, the absence of this one pledge to mutual affection is a common disappointment. Many unfortunate couples become estranged thereby. Even if they do not drift apart, one may read the whole extent of their disappointment in the eyes of such a childless couple when they rest on the children of others. To them the largest family does not seem too numerous.

In many cases of barrenness or childlessness the obstacle to child-bearing is easily removed by the cure of weakness on the part of the woman. Dr. Pierce's Favorite Prescription has been the means of restoring health and fruitfulness to many a barren woman, to the great joy of the household. In other, but rare cases, the obstruction to the bearing of children has been found to be of a surgical character, but easily removable by painless operative treatment at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., over which Dr. Pierce of the "Favorite Prescription" fame presides. In all cases where children are desired and are absent, an effort should be made to find out the real cause, since it is generally so easily removed by proper treatment.

In all the various weaknesses, displacements, prolapsus, inflammation and debilitating, catarrhal drains and in all cases of nervousness and debility, Dr. Pierce's Favorite Prescription is the most efficient remedy that can possibly be used. It has to its credit hundreds of thousands of cures—more in fact than any other remedy put up for sale through druggists, especially for woman's use. The ingredients of which the "Favorite Prescription" is composed have received the most positive endorsement from the leading medical writers on *Materia Medica* of all the several schools of practice. All the ingredients are printed in plain English on the wrapper enclosing the bottle, so that any woman making use of this famous medicine may know exactly what she is taking. Dr. Pierce takes his patients into his full confidence, which he can afford to do as the formula after which the "Favorite Prescription" is made will bear the most careful examination.

Dr. Pierce's Pleasant Pellets are the best and safest laxative for women.

### Wanted.

Chambermaid wanted. Apply at the Allen House.

### Wanted.

Three or four good oilermakers and two caulkers. Apply to L. H. Holcomb, City Hotel.

## Here's Just the Right Bowel Laxative

**Gentle, Sure—Pleasant to Take—A Tried and True, Genuine, Nature's Remedy.**

If you do not have free, easy and regular movements of the bowels you lack the prime and first essential of good health. There's more harm done than mere discomfortableness, sluggishness and biliousness—retention of food wastes in the bowels, poisons, irritates and pollutes. You make—the circulatory system the blood—the scavenger instead of a fountain of—purest life and unlimited vitality. The pills of constipation are—not trifling but nearly always—are fraught with vital—significance. Seek your—relief in Nature's—Accept the gentle natural—and Laxets! Be sure not to—force and irritate organs of the stomach—Avoid all the danger of powerful—and unknown medicines. Your vitality and your health are always secured if you take Laxets. The formula is on every box—show it to your family physician. Laxets are put up in a flat metal case in handy tablet form—one tablet taken before meals or on retiring always brings relief. Pleasing to take—the most potent yet gentle of all remedies—a genuine help of Nature's—a bowel laxative which cures constipation. Recommended and for sale by

5ts Laxets Only 5ts

## POLICE NEWS

Daily Happenings in Court Room and Station.

Yesterday's session of the police court was the extended [illegible] Willie Clay of vagrancy fame. It they used to [illegible] for the elephant or cross under [illegible] of the [illegible] does [illegible] chickens into the [illegible] the cat's department of the [illegible] and Emily's women, [illegible] members of the Rose [illegible] Club, as evidenced by [illegible]

The last case called was that of a man from [illegible] charged with [illegible] $2 for [illegible] in the [illegible] vicinity of Lily [illegible] looked as [illegible] though he could spend [illegible] days in [illegible] for lack of the [illegible] Some one [illegible] a friend in need [illegible] to his relief and made good.

An Indian named Ezome [illegible] a young man named Gunn with firing off a gun within the city limits. Mr. Kerr appeared for the young man and pleaded not guilty.

It seems that the Indians owned a cat and the young man a canary bird and some chickens. Last Monday morning the cat owned by Ezome came into Mr. Gunn's house and promptly assassinated the sweet singer taking it from the cage without permission of its owner. Both defendant and his father saw the feline making off with their warbler in its jaws.

The same evening, Mr. Gunn saw the cat entering his chicken coop. He picked up a gun, and took a shot at the cat, and his aim was true. The shot alarmed the Indian contingent, and as a result one Lo's has not yet recovered from the fright. Fearing [illegible] conviction [illegible] the [illegible] bring the case [illegible] Evidently [illegible] gotten [illegible] the [illegible] do that I guess [illegible] gun and shoot cats myself.

Mr. Kerr argued that the by-law regulating the use of firearms was not meant to cover such cases. In fact, fire-arms, he added, are used daily in the shooting galleries. However he consented in his client having a nominal fine of $1. This was paid.

The next case was when one of the babies in court was used as exhibit A. It seems that a lady living on Sherbrooke street owns a dog. An Englishman with an accent as broad as the stretch of water separating him from Albion, charged that the dog was vicious and bit his baby in a little toddler of perhaps a year old.

The lady in defence of her dog said the occurrence took place in her own dawn. That the child would run over and tried to take a bone from the dog's mouth when the animal bit it on the arm.

His Worship remarked that no dog would stand for having a bone taken from it, but gave the Englishman an opportunity to produce witnesses this morning in court, as to the dog's general character.

A well known local eccentric, by name, "Gusty" Dundas, North Monaghan, was tried before County Police Magistrate Edmison yesterday morning on the charge of vagrancy. At his own request "Gusty" was committed to the county jail for six months.

### New C. P. R. Director.

Montreal, June 21.—Hon. D. J. Forget is now a director of the Canadian Pacific Railway. The appointment was made yesterday at a meeting of the directors.

## Ontario Bank's Great Success

### Encouraging Reports at 49th Annual Meeting.

The citizens of Peterborough have perhaps a more personal [illegible] interest in the Ontario Bank than in most cities, owing to its General Manager, Mr. C. McGill, being a Peterborough man, who, by his successful management of the local branch, has proved to [illegible] he is a popular high [illegible]

The 49th annual meeting of shareholders of this popular institution, was held on Tuesday, June 19th, in the head office, Toronto, with President D. R. Wilkie, Osburn in the chair.

The report of the directors disclosed the most financial year had been one successful. The net profits after deducting charges of management, interest accrued upon deposits and making ample provision for bad or doubtful debts, amounted to $158,915.81. The same used to pay two semi-annual dividends at the total rate of 8 per cent. per annum, the total amount of dividends paid being $97,500. $20,000 was added to rest account, and $5,000 reserved for officers' pension fund. The paid-up account now amounts to $700,000. During the year new branches were opened at King City, Port Hope, Millbrook, Warsaw, and at the southern part of this city.

Mr. Charles McGill, one of Canada's [illegible] financiers, is to be congratulated upon the successful result of his administration.

The local branch is too well known to require eulogy, under the management of Mr. John Crane it is characterized by a widely spread volume of business, and universal courtesy by the staff at all times and under all circumstances.

This bank in Peterborough has for some years past steadily increased the number of its depositors and customers, and is largely instrumental in fostering and promoting the business of many of our merchants and manufacturers.

Pink Lips, Like Velvet, Rough, Chapped or Cracked Lips, can be made as soft as velvet by applying at bedtime, a light coating of Dr. Shoop's Green Salve. The effect on the lips or skin of this most excellent ointment is always immediate and certain. Dr. Shoop's Green Salve takes out completely the soreness of cuts, burns, bruises and all skin abrasions. It is surely a wonderful and most highly satisfactory healing ointment. In glass jars at 25c. Sold by J. D. Tully.

To be corporal, provisionally, Pte. Bayer, vice Corp. Hall, promoted.

No. 6 Men regularly enlisted in the 57th Regiment, desiring to go to the Cobourg camp, will parade at the armories at eight p.m. on Friday, June 23rd, 1906. Men from Companies Nos. 1, 2, 5, and 6, will report to Capt. Bennett, who will have command of No. 1 Co. Men from Companies Nos. 3, 4, 7, and 8, will report to Capt. McWilliams, who will have command of No. 2 Co.

No. 7—All belts must be left in the armories at once in order that the supply recently purchased may be properly numbered to replace those lost or missing.

By order,
D. WALKER,
Capt.-Adjt.

## Cheese Board Open Yesterday

### 4,676 Boxes Boarded With 11 5-16 Cents Given.

Yesterday the local cheese board had a good showing, 4676 boxes being boarded, as compared with 3241 boxes at the last sale two weeks ago. Prices ruled from 11 3-16c. to 11 5-16c, the bulk selling at these figures. Kerr offered 10 3-8c. to start, and prices gradually swelled until Mr. Gillespie offered 11 5-16c, and above this other buyers did not go. Mr. Gillespie therefore secured the first selection, taking the following factories: Westwood, Villiers, Keene, Central Smith and Buckhorn.

At 11 5-16c, Mr. Wrighton secured the second call and took the following: Beaufort, Warsaw, Indian River and East Emily.

Mr. Squires secured third choice at 11 3-4c, and took the following, Oakdale, Ormonde and Norwood.

The next selection went to Mr. Kerr at 11 1-4c, as follows: Lang, Shearer, Warminster, Pine Grove and Selwyn.

Mr. Cook bid 11 1-4c, and bought the following: Myrtle, Trewern, Melrose Abbey and Shamrock.

At 11 3-16c, Mr. Kerr took the following selection: Mt. Pleasant, Cavanville, Fleetwood, North Dummer, Young's Point, Peterborough, Cedardale, Maple Leaf, Crown, Hope, South Burleigh and Lakefield.

Brickley sold at 11 1-4c, to Mr. Cook, having refused Mr. Kerr's offer of 11 3-16.

## July 12th to be Celebrated in Lindsay

### Great Doings in Sturgeonville on Orangemens' Day.

The good little burg of Lindsay is going to out-do itself on "The Glorious 12th."

Orangemen from all over the district will attend the proceedings held under the auspices of the County of Victoria Loyal Orange Lodge. Special rates will be made per rail, by Canadian Pacific and Grand Trunk and steamboats, for the Orangemen of the Counties of Simcoe, Haliburton, Northumberland, Peterborough and Victoria, and True Blues, Prentice Boys and Orange Young Britons lodges will be represented from the various towns and villages in these counties.

Lindsay's celebration of the 216 anniversary of the Battle of the Boyne promises to be a notable one. Addresses will be delivered by the different resident clergymen and by prominent speakers of the Orange Order. Already the lodges in the surrounding towns and villages have signified their intention of coming to Lindsay, and the crowd promises to be a record-breaker. The drummers and fifers of the lodges have been practicing for weeks, and are now in fine trim.

Last year the Lindsay lodge attended the walk in Omemee and were elated with having one of the best lodges present. This year the Omemee lodge will come up strong, as also will those of Peterborough.

### Sharbot Lake Murder.

Kingston, June 20.—It seems that Chief of Police White, of Perth, came here and interviewed Badore, in the penitentiary, in regard to the story that two boys, Babcock and Martin, of Sharbot Lake, were not drowned four years ago, but murdered. Badore stated that the boys were murdered, and that he might be induced to give the police a tip as to who committed the deed. He denied that he was one of the murderers. He told of the spot where the bodies had been buried, and where bones have since been found.

## Jews Ask Britain To Make Protest

### Leading Hebrews Interview Sir Edward Grey on Bialystok Massacres and Seek Intervention.

London, June 21.—Leading Jews met to discuss the situation at Bialystok, and the probability of bringing pressure to bear on the Russian Government. Later Lord Rothschild discussed the matter with Foreign Secretary Grey.

Lord Rothschild afterwards said that nothing had been decided upon. Sir Samuel Montague said, however, he had hopes to get the government to intervene. The London newspapers this morning, especially the Government organs, consider it distinctly a case for the powers to intervene, recalling President Roosevelt's memorable protest with regard to the Kishineff massacre, and in any event consider that unless the Russian Government takes proper steps in the matter it would not be right for Great Britain to make naval fraternization.

## Decoration Day Is Once More Observed

### Local Oddfellows Turn Out and Pay Tribute to the Dead.

Yesterday afternoon, preceded by the 57th Regiment Band, the local Oddfellows turned out about 100 strong and marched to the Little Lake cemetery, the occasion being "Decoration Day." Many hundreds of our citizens, the fair sex being in the majority, gathered at this last repossing ground of so many thousands of Peterborough's departed, but still remembered dead, and deposited flowers on the grassy mounds, which mark the last resting place of their beloved ones.

The members of Otonabee lodge, No. 13, and Peterborough lodge, No. 111, I.O.O.F., assembled at Central Park at 2.30 o'clock, each member carrying a beautiful bouquet of flowers. The procession under marshalship of Bro Col. Miller, left the park shortly before three o'clock. As the brethren of the mystic three links marched down George street, on their way to the cemetery, the sidewalks were lined with citizens, who have always taken a sympathetic interest in decoration day. Arriving at the cemetery gate the brethren countermarched, and after ascending the hill, the Oddfellows divided into different groups and each grave of a deceased brother was visited and flowers strewn upon his last resting place.

The turnout yesterday was not as large as has been seen in former years, this is explained by the fact that many Oddfellows working in factories want to attend a church picnic and at the 12th of July ceremonies, and could not well get away two days, as the factories are now crowded for time.

The spectators were unanimous in noting the splendid physique and fine appearance of the brethren as they walked yesterday.

Behind the procession in a cab drove Rev. Dr. Crothers, pastor of George street church, and Rev. J. G. Potter, pastor of St. Andrew's.

At the cemetery, the rev. gentlemen made short but appropriate addresses mainly eulogistic of the ceremonies in hand, and the spirit directing the occasion.

Following were the graves decorated, together with the number of the lodge to which the deceased belonged Peterborough lodge number is 111, and Otonabee, No. 13,

## Mr. T. Cavanagh In Bear Scrap

### Local Hotelman Frightened Pet Bear and Was Hurt.

Yesterday morning as Mr. T. Cavanagh, the veteran hotelman of this city, was playing with a pet bear chained on the platform at the rear of this hotel on Simcoe street, his foot, in some way became entangled in the chain holding the animal. The bear, which ordinarily is as quiet and tame as a house dog, became startled and at once its savage nature was aroused. In an instant the long cat-like claws protruded, and the bear made a grab for Mr. Cavanagh.

The claws on its right paw caught Mr. Cavanagh's trousers in front, and tore a large hole in the cloth, but by Mr. Cavanagh quickly stepping back did not inflict any injury on his leg; the left paw talons, however, caught and tore his right hand just above the junction of the fingers.

Mr. Cavanagh rather joked about the matter and told The Times the bear is always quiet and is fed only on bread and milk, not caring for meat. This bear is a half grown black bear, standing about 22 inches high, and in splendid condition.

### Volcano Has New Mouth.

Tokio, June 20.—A fresh crater has been formed on Mount Aso, on Kinshiu, the southernmost of three principal islands of Japan. It is emitting smoke and a rumbling sound, but no damage has been reported. Uneasiness, however, prevails in the vicinity of the volcano.

## Peterborough Conservatory of Music

### Hold Their Closing Exercises Last Night.

A crowded house last night testified to the esteem in which the Peterborough Conservatory of Music is held by the music-loving public of this city, at their closing exercises, which were held in the Grand Opera house. Mr. Glidden, the director of this establishment, has good reason to feel proud of the evident high esteem the Conservatory is held in, as evidenced by the patronage of last night. It might be noted that many friends of the Conservatory, who were unable to be present, had purchased tickets.

One notable feature of last night's audience was not so much the number as the quality of those present. Those in the opera house last night represented the culture and musical intelligence of the city, most of our leading citizens enjoying an evening of exceptional interest.

The Conservatory colors, red, white and black, were conspicuously worn by the audience.

The generous length of the program made up for the fact that there were no encores allowed.

When the curtain rose it disclosed the Conservatory orchestra in the foreground of the stage, while in the background on raised tiers of seats were many of the pupils.

Miss Kate Leary filled the role of "Mrs. Wiggs" in a very acceptable manner, evoking continuous laughter from the audience.

The program was a long and varied one, and all taking part did justice both to the Conservatory of Music and themselves. The program, owing to the lateness of the hour, was curtailed, and lack of space does not allow us to give it in full.

After the third number of part II Miss Pollock was presented with a beautiful bouquet of pink roses.

## ATHLETIC WORLD

BY OUR SPORTING EDITOR

### BASEBALL.

Following were the scores of the games played in the Eastern League yesterday:

Toronto 5, Jersey City 6.
Montreal 3, Baltimore 4.
Buffalo 1, Newark 0.
Rochester 4, Providence 1.

### GOLF.

Peterborough won out against Lindsay in the golf competition, by a score of 12—10.

—Miss Margaret Brooks has returned from Rochester, to spend her vacation with her parents, Mr. and Mrs. J. M. Brooks, George street.

JOSEPH COLUMBUS, Esq., Explorer, Haileybury, Ontario.

SOLICITORS—Clark, McPherson, Campbell and Jarvis.

This Company owns the famous Columbus Mines, being a quarter section in Coleman Township, near "Giroux Lake," nearby the rich Lawson, Hargraves, Jacobs, Drummond, and other great mines, also joining near the famous Gillies timber limit, which is so rich in silver that the Ontario Government decided to develop it for the benefit of the public. It has four veins so far discovered, one of them has been known as the "Great Columbus Vein" for months, which is nearly seven feet wide almost all ore; containing Cobalt Smaltite, and Galena, running well in silver. It is predicted by the best and oldest mining Engineers that this mine will soon become a very great producer. There is now a large force of miners sinking the big main double working shaft, working night and day.

It is a foregone conclusion that the price of this stock will greatly advance as the sinking progresses, therefore, the undersigned personally offers for sale at par only a limited number of shares.

Send for full particulars to

DANIEL SIMPSON,
ORIENTAL HOTEL, PETERBOROUGH, ONT.

This seems a

# Clean Food

Era

We are inclined to believe that some magazine writers in their anxiety to attract attention to themselves have overstated the case against the meat packers.

We do not sell meat but believe in fair play, and also in a complete knowledge, by the people, of exactly what they are eating.

We have always printed on each and every pkg. of

# GRAPE-NUTS

Food

exactly what it is made of and the scores of visitors who pass through our works every day find the Pure Food Factories as clean and sweet as a maiden's fresh white apron. The food is thoroughly cooked in these factories from the choicest white wheat and barley, the sweet offering of the fields.

**No food on earth gives the same sustaining power from meal to meal as Grape-Nuts**

BECAUSE--

The starchy parts of the wheat and barley are changed by moisture and heat to a form of sugar required by the human system and almost immediately absorbed without stress to the digestive machinery. And again, the certain elements in these grains are incorporated to insure rebuilding of the soft gray matter in the brain and nerve centres to fit one for the wearing work of the day. A dish of Grape-Nuts and Cream at each meal supplies the GO and you can feel it in a way that leaves no question. It is not stimulation but simply scientific feeding.

**"There's a Reason."**

## Terror of Spring is Sickness

**What Are You Doing to Protect Your Weak Body Against Spring Fevers?**

A delay gives the germs and weakness a better chance to take hold.

Don't wait, think of your small resisting powers, and begin building up today!

For weakness, overwork and debility the doctors prescribe Ferrozone; let it help you now.

Vitality and power are instilled into the blood, this means new strength for all weak organs.

The fire of youth will dance in your veins, and new found energy will increase your desire to work.

Ferrozone supplies the nourishment and tissue-building material your system lacks. Isn't this a reason why.

From Cornermere, Ont., Mrs. Jno. Oram writes as follows: "For a number of years I was sickly in the springtime. I felt tired, nervous and had headaches. My blood was weak and damp days brought on rheumatism. My nervous system was unstrung, and I felt utterly worn out. Ferrozone revived me in a short time. In two days my appetite increased and I could feel a building up process going on. This great tonic made a new person of me, and I don't think a more strengthening medicine for the spring can be found."

Wouldn't it be just fine to get back your old time spirits and vigor? Easily done with "Ferrozone;" commence today. Sold by all dealers, 50c per box or six boxes for $2.50. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

## Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterboro are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

### A $300 APPENDIX

The appendix has been condemned by the learned doctors as a thing of no use. But they will now have to revise their opinion. A vermiform appendix that catches and holds a diamond worth $300 is not without its utility.

But to begin the story at its beginning. A young shoplifter person entered the store of an Omaha jeweler the other day and asked to look at some diamonds. She bore about her an air of affluence and many good clothes, so that the clerk did not scruple to set forth a whole tray full of the sparklers, and forebore to watch her too narrowly. The shoplifter young person slipped one of the precious stones into her mouth, and made her way out of the shop. Almost immediately after her departure the stone was missed, a detective was sent after her, and caught up with her. She still had the stone in her mouth. The rude detective addressed her so harshly that she swallowed the diamond. After having done so she became panic-stricken—and confessed.

She was haled to the police courts, and there her inner consciousness was searched by means of an X-ray machine. The $300 diamond was located in the vermiform appendix. And it was then that the police judge delivered himself with the wisdom of Solomon. Or, rather, with the wisdom of Portia.

"That diamond is yours," said the police judge to the jeweler, "and you have a right to dig for it. It is your diamond—take it. But—

"BUT if you resort to an operation against the prisoner's will, and she dies from the effects of that operation, you can be held for murder."

Exactly the same dilemma that Portia presented to Shylock. "By the terms of your bond," said Portia, "the pound of flesh is yours. But—

"Be careful and don't shed any blood while you're cutting it loose, or it's twenty-three for you, by the laws of Venice."

The young woman Raffles at first protested against an operation. "I'll die before I let them cut into me in that manner," said she. A few days passed, and she changed her mind. A still, small voice within, that was not exactly conscience, and yet which had a powerful effect upon conscience, spoke unto her.

"I have not done right," said she. "I feel it now. Something at the very center of my being tells me that I have erred. The pain which I am in is more than I can stand." Thus does humanity desire to make itself a safety-deposit vault; but there is always an inscrutable power mightier than itself that curbs its vaulting ambition—a destiny that shapes our ends, roughhew them how we will."

So the mere act of swallowing this diamond has decided this young woman with the morals of an ostrich to repent and live a better life in the future. She can no longer bear to carry about her heart, or, nearby, the awful consciousness of her crime. The operation will cost $150, and the shoplifter individual, soon to become an unappendized but righteous member of society, has been promised immunity from the law. There are several morals to the story, fully half a dozen of them; figure out the one that suits you best.

## *They Are Glad To Help Canada*

Ottawa, June 19.—In view of the somewhat general impression, especially among the manufacturers and exporters of Canada, that the Canadian Commercial Agency Service should be greatly extended, and further, in view of the fact that Canada has not a single commercial agent in the United States, the superintendent of Commercial Agencies recently addressed a circular letter to all British consuls-general and consuls in that country seeking, if possible, to bring about some measure of harmony between these officials and the Canadian business community and thereby, if possible, unofficially enroll their services more directly in the interests of Canadian trade.

The impression has existed for many years among Canadians that the British consuls do not interest themselves in Canadian trade, and, therefore, could be of little or no use to them. On the other hand, the statement was made that Canadians, as a rule, seldom availed themselves of the advantage offered by British consuls in the United States by calling upon them or by writing to them, and that Canadians had no ground to hold such an opinion when they seldom ever sought their assistance.

The response to Mr. O'Hara's circular letter has been a splendid testimony to the efficiency of the British Consular service in the States, many of whom replied at considerable length, offering excellent suggestions, and, in general terms, stating that the facilities of their respective offices were at the service of Canadian business men.

## *Half the Meat Came From United States*

London, June 19.—Chicago meat again formed the subject of several questions in the House of Commons yesterday. Mr. Hicks-Beach, Conservative son of the former Chancellor of the Exchequer, asked War Secretary Haldane what quantity of Chicago canned meat was supplied to the troops in South Africa during the late war and what proportion of enteric deaths ought more properly to have been ascribed as due to ptomaine poisoning. The secretary replied that rather more than half the canned meat had come from the United States. The War Office knew nothing of any cases of enteric fever which should be classed as ptomaine poisoning.

Mr. Lea, Liberal, wanted to know if the War Office would not issue an order requiring every can of meat supplied to the army to be plainly stamped with the date of manufacture.

The Secretary said that such had long been the requirement of the ordinary War Office contracts.

To another question the War Secretary said he was aware of only one case in the last 12 months in which troops had refused to eat rations of canned meat, a sample of which was now under the examination of an analyst.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

### Brigand Attacked by Rabble.

New York, June 20.—An Italian was attacked and mutilated a Jewish woman in endeavoring to steal her earrings from her, was attacked and nearly killed by a mob of Hebrews the, with the police who arrested him, narrowly escaped.

SUMMER CRUISES IN COOL LATITUDES

The well and favorably known S.S. Campana 1,760 tons, lighted with electricity and having all comforts, leaves Montreal on Mondays at 2 p.m., the 13th June, 2nd, 16th and 30th July, 13th and 27th August; 10th and 24th September for Pictou N.S., calling at Quebec, Gaspe, Mal Bay, Perce, Cape Cove, Grand River, Summerside and Charlottetown, P.E.I.

**BERMUDA**

Summer excursions $35 by new twin screw S.S. Bermudian, 5500 tons; sailings fortnightly from New York from 6th June to 21st November. Temperature cooled by sea breezes seldom rises above 80 degrees.

The finest trips of the season for health and comfort.

ARTHUR AHERN, Secretary, Quebec.

**Hair Help!**

So many persons have weak hair, lifeless hair, hair that falls out, splits at the ends, keeps rough and uneven. Such hair needs help. The roots need feeding with a good hair-food—Ayer's Hair Vigor. The hair becomes stronger, grows faster, stops falling out, keeps soft and smooth. Just feed your hair and you will be satisfied with it.
